

**Instructional Technology Resources Resolution  
Passed by the Full Faculty after Two Readings**

We, the faculty at the University of Tennessee at Chattanooga, recognize the problem of using grant resources, gifts and endowments, and/or the Student Technology Fee to fund instructional technologies now essential to UTC's mission and infrastructure. We therefore support permanent funding for the University's instructional technology needs. Because classroom technologies and instructional resources are currently funded by grants, endowments, or the Student Technology Fee, few funds remain to address issues of deferred maintenance or to initiate new resources/projects on our campus. We therefore recommend that UTC develop a five-year plan to move items to the E&G budget. Such a request, we understand, requires that we evaluate and potentially revise the way we currently operate programs.
