The UTC Curriculum Committee worked very hard again this year. Members are to be commended for their diligence in reading and discussing proposals. One carry-over proposal from the previous year and ninety-five new proposals were considered. Ninety-five were eventually approved and sent to the Senate where all forwarded were approved ultimately.

The work-load of this committee is very unevenly distributed across the academic year, with much of the work in the shortened academic month of December and January. Some means needs to be found to spread out the receipt and disposal of proposals. The intense effort required presently burns out good committee members.
