

The University of Tennessee at Chattanooga Student Technology Fee Funding Request

CECS Proposal No. 3

Beginning 2005-2006

Title: Replacement of Obsolete Computers in EMCS Room 307

Unit Submitting Proposal: College of Engineering and Compute Science (CECS)

Summary of the Proposed Project.

The computers in the Circuits Laboratory are over eight years old. They were discarded by the Library two years ago. This laboratory is used to teach ENGR 271, ENEE 271, ENEE 273, and CPSC 305. Almost every student in CECS will use these computers. The proposed project is to replace these obsolete computers.

Goals and Objectives

The overall goal is to provide current computing platforms for all students using EMCS Room 307.

The objective is to replace obsolete computers that can no longer be used or supported.

Method for Achieving Goals

Purchase and install the new computers in time for the Fall, 2005 Semester.

Evaluation Method

Students and faculty members using the new computers in EMCS Room 307 will be asked to evaluate the improvements in performance and reliability.

Previous grant(s): N/A

Proposed location: Describe the proposed location of the equipment, software, etc.

The new computers will be installed in the EMCS Room 307

Requested Budget:

Estimated One-time (hardware and software) costs \$17,640

Estimated recurring costs per year \$ 0

Proposed Location

CECS Technical Support Staff reporting to Karl Fletcher

Approval by Dean or Vice Chancellor: _____

Individual responsible to complete proposal if funded: Karl Fletcher

Priority established by Dean or Vice Chancellor: _____
