# Installation of New Podiums in Classrooms

---

**Project Manager:** Charity Trillet, Director of Technology Support, Information Technology Division

### Brief Description of the Project

Provide the campus three new podium installations.

### Project Status

Three new classrooms have new podiums installed. The classrooms selected were Brock 405 and 406 and the Arena.

### Goals

- Provide permanent, reliable computer, video, and document projection in the classroom so that faculty and students do not need to deliver, setup, or configure devices to make a presentation.
- Maintain a standard set of equipment and controls so that presenters do not have to learn a different system for each room.
- Reduce the need for portable equipment delivery and pickup by Media Resources

### Methodology

The classroom support staff consisting of James Spruill and Shannon Prather installed the new equipment. They were responsible for getting the bids on the equipment and installing the equipment when it arrived.

### Evaluation

The classrooms were setup with the new podium equipment in Spring 2006. All work was documented in a database for setting up the equipment. Support was provided for the equipment by the Classroom support staff.
