WHY WOULD YOU USE THIS FEATURE:
The Blackboard Mashup feature allows you to find content outside of Blackboard and bring it into your course. Mashups are a simple way to add multimedia to your course without having to create it yourself. This tutorial will go over how to add a Mashup to a Content Area.

HOW TO ADD A MASHUP:
1. Access your course within Blackboard.
2. Access a Content Area.
3. Click Build Content. Under Mashups select the type you wish to add. For this example we will add a YouTube video.

4. Enter keywords next to Search to search for content. You may also choose how the search function uses the keywords to do the search from the drop-down menu.
5. You can also search for videos presented in a specific language. Click Go to search for a video.
6. Locate the Mashup video you wish to add. Click Preview to preview the video.

7. Click Select to add the content to your course.

8. You have the option to change the name and add a description of the video.

9. Set the view options for the Mashup. These options control how the link to the video is displayed in the Content Area.
   a. Thumbnail: Displays a small image that enlarges when clicked.
   b. Text Link: Displays text that expands to player when clicked.
   c. Embed Video: Displays the video within the Content Area.
10. You can also have the option of attaching a file to the Mashup by clicking **Browse my Computer** to locate the file.

11. Set the Availability options. Make sure you click **Yes** next to Permit Users to View this Content. Otherwise, students will not be able to view the video.

12. Click **Submit**.
