Manufacturing Engineer

Mitco is seeking a Manufacturing Engineer for its manufacturing plant in Chattanooga, Tennessee. Mitco is a manufacturer of high quality solid industrial tires for the material handling industry. Mitco has been serving the material handling industry since 1953 and has established an excellent reputation in this arena. (www.mitco.com) Mitco has a unique, family feel culture and pride ourselves on quality, craftsmanship and our team environment.

General Summary:

Position will report to the VP of Operations and be responsible for supporting quality and manufacturing processes. Will have responsible role in tire mold design and direct communication with mold vendors and O.E.M. engineers. Experience is desired but not necessary. Mitco will provide training.

Responsibilities:

- * Design molds, analyze machinery to accept molds and approve quotes.
- * Provide engineering assistance to O.E.M.'s.
- * Plant layout and material flow design and development.
- * Maintain mold inventory and specifications.
- * Assist with equipment development and research.
- * Involvement in Environmental, ISO and ergonomic compliance.
- * Ability to effectively meet and communicate with employees, the public and vendors.
- * Good written communication skills with effective organizational skills.
- * Ability to work collectively with others within the organization.
- * Perform post project audits to insure that the process design and cost objectives are met.

Requirements:

- * Bachelors degree in Engineering.
- * Experienced with Autocad and Excel.
- * Good hands on engineering skills.
- * Ability to work independently and be effective in a fast paced environment.
