UTC is Named #22 in the Smart Choice Top Online Colleges for Engineering Management

The Master of Science in Engineering Management degree was offered online starting in 2001. Currently, the University has more than 100 graduate students in the program; 60 percent of UTC graduate students in the program are fully online. In 2012, the University graduated 31 students from the program, according to Dr. Neslihan Alp, Department Head of Engineering Management and Technology, UC Foundation Professor and Assistant Dean for Graduate Studies and Research. "It's a great honor for us to learn that our Engineering Management online master's program is ranked as number 22 in the U.S. among all these strong universities," Dr. Alp says.

SuperScholar's Smart Choice ranking is designed to provide a listing of the top ranked universities in Engineering Management online degree programs because engineers with a strong understanding of business, management, and leadership are in high demand. The Smart Choice ranking of the top colleges for online Engineering Management degrees only considered regionally accredited colleges and universities listed in the National Center for Education Statistics. Qualifying schools were then evaluated and ranked based on publicly available information regarding academic reputation, special accreditation, student satisfaction, and cost. The result ranks UTC as #22 in the top online schools for Engineering Management.

Architecture, Construction, and Engineering (ACE) Mentor Program High School Students and Mentors Visit our College During the Engineers Week in February 2013

Current students, faculty, and staff of the College of Engineering and Computer Science hosted ACE high school students and mentors for an introduction to engineering programs, as well as a tour of the engineering building and facilities.
