

Connect your device

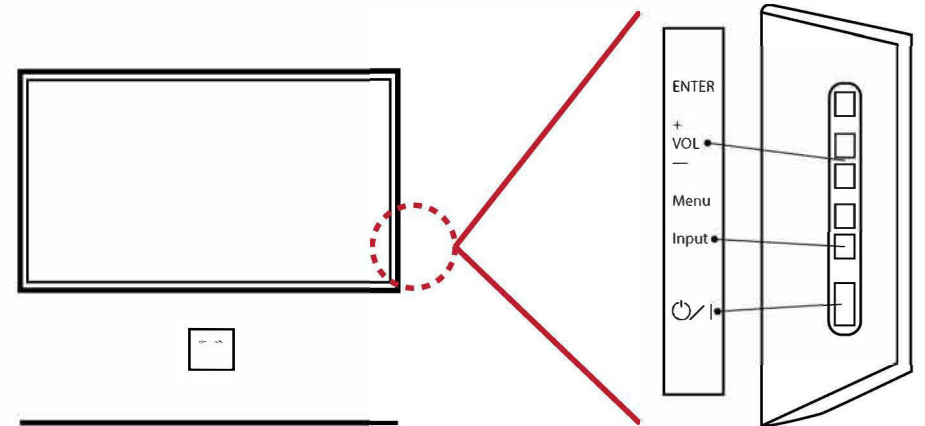

You may connect a variety of devices to the study room display using a HDMI cable and any necessary adapter. Plug the HDMI cable into the wall plate beneath the display.

The Check Out desk on the first floor has HDMI cables and various adapters available.

Check display settings

If your device is not displaying properly, make sure the power is on, then push the “input” button on the control panel to cycle through inputs and ensure “HDMI 1” is selected. Use the “vol +” and “vol -” buttons to adjust volume.
