EEO/TITLE IX/SECTION 504 STATEMENT

The University of Tennessee at Chattanooga does not discriminate on the basis of sex or on the basis of handicap in the education programs and activities which it operates, pursuant to the requirements of Title IX of the Education Amendments of 1972, Pub. L. 92-318, and Section 504 of the Rehabilitation Act of 1973, Pub. L. 93-112.

This policy extends to employment, admission, retention, and treatment by the University. Inquiries concerning Title IX or the Rehabilitation Act or charges of violation of the above policy should be addressed to the director of affirmative action, 101 Founders Hall.

The University also does not discriminate on the basis of race, color, religion, or national origin.

This catalog is published by The University of Tennessee at Chattanooga, a campus of The University of Tennessee.
Glossary of Academic Terms

Adviser—a faculty member who advises the student about his or her academic program.

Audit—to take a course without credit.

Behavioral and Social Science Courses—certain courses in anthropology, economics, education, geography, history, human services, political science, psychology, and sociology.

Classification—level of progress toward the bachelor’s degree. An undergraduate student is classified as a freshman, sophomore, junior, or senior depending on the number of semester hours completed and quality points earned.

College—an organizational unit of the University, embracing several departments, divisions, or schools. UTC has one college, the College of Arts and Sciences.

Concentration—a particular emphasis within a major area.

Corequisite—a course which must be taken at the same time as another course.

Course—a specific subject of study.

Credit—the numerical value awarded upon completion of specified studies, usually based on class meeting length and frequency. At UTC credit is stated in semester hours.

Curriculum—the whole body of courses offered by the University or by one of its colleges, schools, divisions, or departments.

Department—an organizational unit representing a discipline or related disciplines, such as the Department of Foreign Languages.

Discipline—an area of study representing a branch of knowledge, such as mathematics.

Division—an organizational unit which may include one program, or several, as in Continuing Education or Special Services.

Elective—a course not specifically required.

Fine Arts Courses—certain courses in art, theatre, and music.

General Education Courses—courses designed to help the students discover the relatedness of knowledge and acquire a core of information, attitudes, and capabilities basic to their formal college education and their continuing education throughout life.

Graduate Student—a student who has received a bachelor’s degree and has met all criteria for admission to the Graduate Division.

Humanities Courses—certain courses in classics, English, history, modern languages, and philosophy and religion.

Interdisciplinary Courses—courses which deal with two or more academic subjects.

Major—the subject or subject areas on which a student chooses to place principal academic emphasis.

Non-Western Course—a course which deals with some aspect of a civilization outside of Western civilization, such as Asian, Latin American, etc.

Orientation—activities and programs designed to help the new student become acquainted with the University.

Permanent Record—the card on which the director of records lists all of a student’s courses, semester hours credit, grades, quality points, status, and certain personal information.

Post-baccalaureate Student—a student who has received a bachelor’s degree and is taking additional undergraduate courses.

Prerequisite—a requirement which must be met before a particular course can be taken.

Registration Load—the total semester hours for which a student is registered in any semester or term.

Schedule of Classes—a listing of all courses offered by the University during one semester or summer session, showing fees, instructors, and time and place of meeting.

School—an organizational unit composed of related disciplines. At UTC there are five schools: the School of Business Administration, the School of Education, the School of Engineering, the School of Human Services, and the School of Nursing.

Semester—half an academic year or 15-16 weeks. Some schools operate on a quarter system, which divides the academic year into thirds. UTC uses the semester system.

Semester Hour—the unit of credit used by schools on the semester plan.

THE UNIVERSITY

7 History
7 University Goals Statement
8 The Community
History

Near the end of the 19th century, Chattanooga was rapidly becoming the industrial center it is today. Its citizens were actively engaged in coal production, iron manufacturing, the lumber trade, and rail construction. These industrial pioneers knew the value of education and had a deep respect for learning. When the Methodist Episcopal Church began to explore the possibilities of developing a central university in the South, Chattanoogans came forward to work with the church in this effort.

Since its founding as Chattanooga University in 1886, The University of Tennessee at Chattanooga has developed an institutional excellence which rests on an unusual blend of the private and public traditions of American education.

For 83 years the University was a private school. Three years after its founding, the University was consolidated with another church-related school—East Tennessee Wesleyan University at Athens—under the name of Grant University. In 1907 the name University of Chattanooga was adopted.

In 1969 the University of Chattanooga and a junior college, Chattanooga City College, merged with The University of Tennessee, one of the oldest land-grant universities in the nation, to form the UTC campus. Pledged to the service of the entire state, The University of Tennessee has emerged as a statewide system consisting of four primary campuses. The new campus was given the mandate to devote the major portion of its resources to the development of excellence in undergraduate education and in selected areas of graduate study.

Retaining the disciplines of traditional liberal education, the University has expanded its degree programs in professional studies and engineering and greatly increased its initiatives in continuing education and public service.

The University’s wide diversity of degree programs has attracted a current enrollment of more than 7,600 students who represent 62 Tennessee counties, 39 states, and 39 foreign countries.

Accreditations

The University has been an accredited member of the Southern Association of Colleges and Schools since 1910. It is also accredited by the National Council for Accreditation of Teacher Education, the National Association of Schools of Music, the National Council on Social Work Education, the American Chemical Society, the Engineering Accreditation Commission/Accreditation Board for Engineering and Technology, the American Assembly of Collegiate Schools of Business, and the National League for Nursing. It is approved by the American Association of University Women. The University is a charter member of the Southern University Conference and is a member of the American Association of Colleges for Teacher Education, American Alumni Council, American Council on Education, Association of American Universities, Association for Continuing Higher Education, Association of Urban Universities, American Association of State Colleges and Universities, Council of Graduate Schools in the United States, National University Extension Association, and the Tennessee College Association.

University Goals

The University of Tennessee at Chattanooga is one of the principal campuses of The University of Tennessee system. Its institutional goals statement is presented with the expectation that The University of Tennessee at Chattanooga will be an outstanding educational institution whose primary purpose is to serve the people of the state and region through commitment of its faculty, staff, programs, and resources to excellence in undergraduate education and in selected areas of graduate study. The emphasis must be on teaching and learning; however, appropriate research and public service are viewed as supporting this primary objective. With this perspective, the goals of the University are:

- To provide an outstanding faculty and staff supported with opportunities for renewal and development.
- To encourage students to develop a continuous interest in learning by equipping them with the methods of inquiry and the capabilities necessary for independent study.
- To expand the university’s capability for academic advising and guidance to help students formulate and achieve their educational and career goals, and to enable new students to make a smooth transition into their new educational environment.
- To provide academic support services for students who are strongly motivated but may not be totally prepared to meet all of the university’s academic standards.
- To provide a varied and balanced program of activities designed to enhance each student’s personal development, as well as contribute to the cultural, intellectual, social, and economic life of the region.
- To provide graduate programs of those levels and types necessary to meet the ongoing assessed needs of the university service area.
- To promote excellence in teaching; to provide a positive climate for research, creative activities, and public service; and to promote a climate conducive to constructive change.
- To encourage students to develop a continuous interest in learning by equipping them with the methods of inquiry and the capabilities necessary for independent study.
- To provide academic support services for students who are strongly motivated but may not be totally prepared to meet all of the university’s academic standards.
- To promote excellence in teaching; to provide a positive climate for research, creative activities, and public service; and to promote a climate conducive to constructive change.
- To encourage students to develop a continuous interest in learning by equipping them with the methods of inquiry and the capabilities necessary for independent study.
- To provide academic support services for students who are strongly motivated but may not be totally prepared to meet all of the university’s academic standards.
— To foster effective communication, mutual respect, and understanding among all members of the university community.
— To promote the development of collaborative and mutually beneficial relationships with institutions, organizations, and agencies, both public and private.
— To provide the supporting staff, resources, and the physical facilities consonant with the above goals.

The preceding embodies UTC's commitment to two fundamental principles: to respond to the educational needs of the people it serves and to achieve standards of excellence in all of its endeavors. All planning for the future will be guided by these fundamental principles.

The Community

The University is located only a few blocks from the urban area of Chattanooga, a city that is both highly industrial and rich in natural beauty. Claiming more than 600 industries, Chattanooga lies at the foot of Lookout and Signal Mountains where the Tennessee River forms Moccasin Bend. These sites possess historical significance as well as beauty in a city steeped in the heritage of the Civil War.

The cultural environment of Chattanooga is enhanced by contributions from the University and the many civic organizations that support the arts through dramatic productions, concerts, and art exhibits. Ten city parks, seven public golf courses, and a 35,400 acre lake provide a variety of recreational activities.

With a population of about 169,565 in a metropolitan statistical area of over 426,000, Chattanooga is easily accessible from all parts of the nation by air and bus.
Undergraduate Admissions

The Admissions Office administers all matters pertaining to undergraduate admission. All requests for information and application forms should be addressed to the Office of Undergraduate Admissions, The University of Tennessee at Chattanooga, Chattanooga, Tennessee 37403. The Admissions Office telephone number is (615) 755-4157. Completed admissions applications and credentials should be sent to the same office. A $15 nonrefundable application fee is required of all candidates for admission who have not previously attended a University of Tennessee campus or the University of Chattanooga.

New students may be admitted at the beginning of either semester or any summer session. Every effort should be made to submit the completed application and supporting credentials no later than four weeks prior to the beginning of the semester in which admission is desired.

Orientation and Advising

Orientation programs for new freshmen and transfer students are directed by the Advisement and Orientation Office and combine the services and skills of the Admissions Office, the Registration Office, the Student Affairs Office, and the Counseling and Career Planning Center. These programs provide an introduction to the campus and University life. The Student Orientation Board, composed of upperclass student leaders, also has a major role in planning and coordinating new student orientation.

Each orientation program includes a tour of the campus, an explanation of its facilities and academic offerings, small group discussions with faculty and students, advising and registration, plus entertainment and the opportunity to get acquainted with fellow students. In addition, subject placement exams will be given to establish the level of proficiency. Students may be placed in the regular or developmental curriculum as a result of the exams.

The Advisement and Orientation Office coordinates the activities of the Faculty Advisory Council, which is a panel composed of faculty members selected for their expertise in dealing with student-related matters. These advisers assist students in reaching their academic and career goals and provide personal attention for all freshmen and all pre-majors. Results of aptitude and achievement tests as well as copies of the students’ records are made available to the advisers for use in advisement.

Engineering, music, nursing, American studies, communication, environmental studies, and humanities majors, and students who have completed 29 hours, go to their major departments for advising.

To schedule an appointment with an adviser, the student should go to the Advisement and Orientation Office, located at 124 Hooper Hall, or call (615) 755-4573.

General Admission Requirements

To apply for admission, the following credentials must be submitted to the Admissions Office:

Freshmen:
1. Undergraduate admissions application
2. Current high school transcript
3. ACT or SAT scores
4. $15 application fee

Transfer:
1. Undergraduate admissions application
2. Transcripts from each previously attended college/university
3. $15 application fee

All pertinent academic credentials must be filed with the Undergraduate Admissions Office before the applicant may be officially admitted. The high school transcript may be sent any time after the completion of the junior year of high school; after graduation a supplementary transcript must be submitted including final senior year grades and date of graduation.

Specific Admission Requirements

Freshmen
UTC admits students who receive a high school diploma from state approved or regionally accredited high schools. Approved high schools are those on the approved list issued by the state Department of Education. Accredited high schools are those recognized by the regional accrediting association.

There are two categories of admissions at UTC. They are as follows:

Regular Admissions
Students who present a high school grade point average of at least 2.75 or a 20 on the ACT composite (900 on the combined SAT) and have completed the high school unit requirements will be granted regular admission. (Refer to high school unit requirements and minimum requirements for admission stated below.) Students who have not completed the required high school units will be admitted on condition.

Conditional Admissions:
Students who present a high school grade point average of at least 2.0 and a 12 on the ACT composite (700 on the combined SAT) may be admitted on condition (refer to high school unit requirements stated below).
Students admitted on condition must earn at least a 1.0 GPA during their first semester or suspension will result. The dean of admissions and records or the admissions committee may recommend any or all of the following conditions:

1. reduce course credit load
2. specific course requirements
3. specific academic adviser
4. specific program of developmental studies

High School Unit Requirements
In addition to the high school grade point average and ACT/SAT requirements, specific high school units in English, math, laboratory science, social science, and foreign language are required. Students may be admitted with a high school unit deficiency but will be required to remove the deficiency within the first 42 hours of enrollment. These requirements are as follows:

For Fall 1986:
- 4 units of English
- 2 units of mathematics (Algebra I and II or Algebra I and Geometry)
- 1 unit of laboratory science
- 1 unit of American History
- 1 unit of social studies or 1 unit of a foreign language or 1 unit of a foreign language

For Fall 1987 and 1988:
- 4 units of English
- 2 units of mathematics (Algebra I and II or Algebra I and Geometry)
- 1 unit of laboratory science
- 1 unit of American History
- 2 units of social studies and/or foreign language (any combination totaling 2 units of this area meets requirements)

For Fall 1989:
- 4 units of English
- 3 units of mathematics (Algebra I and II and Geometry)
- 2 units of laboratory science
- 1 unit of American History
- 1 unit of European or World History or World Geography
- 2 units of the same foreign language

A person 21 years or older must meet the requirement of high school graduation or the equivalent, but need not meet the requirements stated above. Those students who present a high school GPA below 2.0 may be placed on condition.

Students who graduate from unapproved high schools and apply as freshmen must have the minimum high school GPA and the minimum test score on the ACT or SAT to be considered for regular or conditional admission. Students who do not meet both these requirements may be admitted on condition.

Minimum Requirements for Admission
Admission at UTC is generally denied to applicants who do not meet the minimum 2.0 high school GPA or the 12 ACT (700 SAT) or the minimum high school units. Exception to these minimal standards can be granted to applicants with special circumstances only by the dean of admissions and records with the concurrence of the admissions committee.

Undergraduate students who demonstrate that they may be an academic risk may be required to enroll in certain courses or participate in programs including summer programs, designed to enhance their academic skills. Credit accrued may not be applicable to a degree.

In addition to the minimum high school unit requirements for admission, the student should plan a high school course of study so that it will meet all high school prerequisites for his or her area of interest. Proper high school preparation will insure that the student will not have to take college preparatory courses after enrolling.

Certain UTC majors recommend additional preparation. Majors recommending 2 units of math, 1 unit of geometry and 1 unit of advanced math or trigonometry are applied math, biology, chemistry, computer science, math and science education, engineering, engineering management, environmental studies, geology, mathematics, medical technology, and physics. In addition a bachelor of science degree in engineering recommends 3 units of science including physics.

All bachelor of arts and bachelor of music degrees recommend 2 high school units in one foreign language.

Nursing majors are urged to complete 2 units of algebra, 1 unit of geometry and 2 units of a laboratory science preferably biology or chemistry in high school.

American History Requirement
Effective July 1, 1978, and afterwards, all students receiving a bachelor's degree must have completed one unit of American history on the high school level or six semester hours of college-level American history as required by the General Assembly of the state of Tennessee (Tennessee Code Annotated 549-3253).

Admission by Examination
Those mature students who achieve a high school equivalency diploma through the General Education Development test may be admitted to the University on the basis of the test provided that they have scored at least a 45 on the GED test. Such students are required, however, to meet high school unit requirements listed on page 11. Students under 21 years of age presenting a GED test score must also submit acceptable scores from either the ACT or SAT examination.

Adult Special Status
An applicant 21 years of age or older who wishes to take undergraduate courses, but who does not plan to work toward a degree or certificate from The University of Tennessee at Chattanooga, may be admitted as an adult special student. The applicant must give satisfactory evidence of preparedness to take the courses open to him or her. An adult special student must meet the same course requirements as regular students since the special student's work is graded at the completion of the course. An adult special student may subsequently apply for regular student status at the University. In such a case the student's grades will be reviewed and up to 60 semester hours of credit may be counted toward fulfillment of degree requirements. Students who have previously been suspended or dismissed from the University of Chattanooga
or The University of Tennessee may not enroll as adult special students. Students with college credit from another institution may not enroll as adult special students.

Audit Students

Any student registered for credit courses may enter classes as an auditor, subject to the approval of the student's adviser and of the instructor whose class is audited. An audit registration may not be changed to a credit registration later than the last date of registration for the semester.

Adults who wish to attend undergraduate classes without earning credit or receiving grades may register as auditors only if the space is available in the class desired and if the instructor approves the registration. Any adult student entering under audit classification who subsequently wishes to take courses for credit must meet all requirements for admission to the University. Those under 21 may have this privilege only if they have fulfilled the admission requirements of the University.

Auditors are under no obligation of regular attendance, preparation, recitation, or examination. They receive no grades and no credit. The degree of their participation in class discussion, laboratory, or field work shall be determined by the instructor of the class.

The tuition and fee charge is the same for audit registration as for credit registration. Academic records are maintained only for audited courses in which the student attends at least 75% of class sessions.

College Opportunity Program

The College Opportunity Program is designed to give outstanding high school seniors an opportunity to preview college through taking selected college courses. Courses are offered during the summer or during the regular academic year. Courses will be offered at convenient times on the UTC campus. Special sections of regular college courses may be offered or high school students will be permitted to enroll along with college students in regular courses. The admission to the College Opportunity Program requires the following:

1. Enrollment in high school or intention to return to high school in order to complete requirements for a diploma,
2. Completion of the 11th grade of high school,
3. A grade point average of at least a 3.0 (8), and
4. Recommendation of high school principal or guidance counselor.

Students will be permitted to earn up to 24 semester hours in the program and may take a maximum of 12 hours in the summer and no more than two courses during the fall and spring semester. The credits will be applicable to a degree at UTC or may be transferred.

Early Admission

The University has a program of early admission for exceptionally gifted students. In order to be eligible for the early admission program, a student at the end of the junior year in high school should have a 3.5 high school average and score in the 95th percentile or above of University norms on the ACT or the SAT examination. A student may apply for early admission with the consent of his or her parents and the approval of the student's principal or guidance counselor. Assuming the student meets the previously listed requirements, he or she will be admitted only if in the opinion of the dean of admissions and records the student will clearly profit from this kind of placement. In most cases a personal interview with the student is required.

Such students may be considered for admission as full-time students, summer session students, or on a dual enrollment basis while completing secondary school.

International Students

In making application for admission to undergraduate study, each international student will be required to provide the following:

1. A completed application for undergraduate admission, accompanied by the $15 application fee.
2. Authenticated copies of the applicant's academic records. These records should describe the courses of instruction in terms of years spent in school and types of subject matter covered with grades earned in each subject. These documents must be interpreted in English.
3. A minimum score of 500 on the Test of English as a Foreign Language for applicants whose native language is not English. Information about this test may be obtained from the Educational Testing Service, Box 899, Princeton, New Jersey 08540.
4. A medical record, filled out and submitted no earlier than six months prior to proposed entrance. All foreign students must submit evidence of a negative tuberculin test prior to being given permission to enroll.
5. Evidence—dated no later than six months prior to registration—that the applicant has adequate financial resources to meet the expenses of attending the University, and that such resources will be available to the applicant in the United States prior to the date of his or her registration at the University.
6. The student must date and sign an estimate of expense form showing that they are aware of the costs in attending the University.
7. Transfer students must supply a letter of good standing from their Foreign Student Adviser or dean of students and must meet the requirements for admission to the University as a transfer and an international student. These requirements are stated in the section on Specific Requirements: Transfer Students.

All application materials must be submitted and processed by August 1 for the fall semester, December 1 for the spring semester. All admission materials should be sent to the Office of Undergraduate Admissions.

Post-baccalaureate Admission

See under Graduate Studies, page 33.
Readmission

Former students in good standing who have been away from the University for one semester or more (excluding the summer) must apply for readmission. If they have attended any other college or university during their absence, they must also meet the requirements for admission to the University as transfer students as stated in the section on Specific Requirements: Transfer Students, with the exception that no application fee is required for readmission. Students who have been suspended or dismissed from the University are referred to the section on Continuation Standards for the conditions under which they may be readmitted.

Special Audit and Special Fee Students

Tennessee residents who are at least sixty years of age may audit classes on a space available basis at the University without paying a fee. Similar arrangements are available for Tennessee residents who are 100 percent disabled.

Tennessee residents who are 65 years of age or older and persons totally disabled who meet admission requirements may enroll for credit for a fee of $7.50 per semester hour to a maximum of $75 per semester.

Persons wishing to participate in any of the above programs should call the Continuing Education Office at (615) 755-4346.

Transfer Students

Applicants for admission as degree seeking students who have been registered in another college or university are classified as transfer students. They must submit to the Undergraduate Admissions Office complete official transcripts of their college work.

For admission as transfer students, students must have pursued courses appropriate to the curriculum at The University of Tennessee at Chattanooga, must be eligible to return to their last institution, and must meet The University of Tennessee at Chattanooga’s continuation standards (see page 22 for standards). Students whose records do not meet the standards required by the University for admission will be denied admission unless, in the opinion of the dean of Admissions and Records, acceptance on scholastic probation is justified.

The University will usually accept, by transfer, work satisfactorily completed at regionally accredited colleges and universities. Transfer students from senior institutions must complete at least their last 30 academic semester hours of work at The University of Tennessee at Chattanooga. Transfer students from two-year institutions must complete their last 60 semester credit hours at a senior institution. A student who earns credit at a two-year college during his last 60 hours at UTC, may choose not to apply the credit toward graduation. Transfer courses are usually accepted at full credit value as either specific course equivalents or electives.

Students wishing to transfer to The University of Tennessee at Chattanooga from regionally unaccredited colleges and universities must meet UTC’s admissions requirements. Information concerning the acceptance of credit from such institutions will be furnished at the time of application.

Transfer credits accepted by The University of Tennessee at Chattanooga will be entered on the permanent record only after the student has registered for classes at The University of Tennessee at Chattanooga. Applicants who fail to declare previous college attendance and to submit transcripts of such records will be subject to dismissal from the University.

Transient Students

Students who are enrolled in another college or university and do not wish to transfer to UTC and seek a degree may enroll as a transient student. Enrollment under this condition is usually for one semester and students are usually enrolled in courses that will transfer to another institution and apply toward degree requirements. A letter indicating that the student is in “good standing” must be sent to the Office of Undergraduate Admissions from either the registrar or academic dean of their present institution. If a transient student wishes to continue enrollment past the initial semester, an additional letter of good standing may be required.

Special Credit

Advanced Placement

In addition to advanced standing by transfer work, students admitted to the University may obtain advanced placement by any of several examinations.

The University participates in the advanced placement program of the College Entrance Examination Board. Applicants who have taken the advanced placement examinations may submit the results to the University for consideration.

In general the University will grant credit and advanced placement in the subject of the examinations to those entering students who earn scores of three, four, or five. Some departments may exercise their option to require a minimum score of four. Such students may then begin their college study at the level for which their advanced preparation has qualified them. Examinations with grades of three or two will be referred to the appropriate department, which will determine whether credit or advanced placement can be granted.

Credit earned through advanced placement will be entered on the student’s permanent record at the University but will not be computed in the grade point average.

College Level Examination Program

UTC recognizes and accepts credit derived from several of the subject area examinations of the College Level Examination Program of CEEB. The CLEP subject examinations measure achievement in a number of specific undergraduate courses. A report of test scores should be sent directly to the Undergraduate Admissions Office of the University for consideration. Individual academic departments set standards for the acceptance of CLEP credits. Therefore, the required percentile grade for credit at UTC varies. Some departments accept no credit via CLEP.

Credit earned will be entered on the student’s permanent record but will not be computed in the grade point average.
Cooperative Education Program

The Cooperative Education Program provides students with the opportunity to gain practical work experience in their major. Students will be placed in a work experience setting which closely relates to their academic major. The students will be placed on an alternating schedule which requires that they work full time one semester and attend school full time the next semester, or on a parallel schedule which requires the students to work a minimum of 15 hours/maximum of 20 hours per week and attend school full time during the same semester.

Students placed in co-op should register with a major department for course 001 at the beginning of each semester they are employed. Only students who have advanced approval of the Office of Cooperative Education and their major department will be enrolled in this course.

Correspondence and Extension Credit

Up to one-fourth of the hours (excluding physical education) required for an undergraduate degree may be earned by correspondence or by correspondence and extension combined. The same limitations apply to hours in the major. All such courses must meet degree requirements at The University of Tennessee at Chattanooga. Correspondence and extension courses may not be taken within the last 30 hours of degree credit unless advanced approval has been granted by the Petitions Committee.

Catalogs of correspondence study offered through The University of Tennessee are available for distribution in the Office of Continuing Education.

Credit for Experience

Individuals who have not earned a baccalaureate degree may be eligible to receive credit for work experience, inservice training, and certified professional programs through the UTC Individualized Education Program. Information concerning the IEP is available in the Continuing Education Office, (615) 755-4346. A fee of $30 will be charged for each semester hour of credit awarded.

Credit by Special Examination (Undergraduate)

Any student who has been admitted to the University is eligible to receive credit by special examination for competence gained through study or experience primarily independent of University class activities. Credit by special examination may be given for courses offered in the catalog with the exception of:

1. courses described as directed research, tutorial, or directed independent study;
2. any course from which the student has been exempted by placement examination or which the student has presented for admission purposes;
3. any course in any education teaching block; or
4. courses in which the student has received a final grade.

A fee of $30 will be charged for each semester hour of credit.

Students seeking credit by special examination shall, on forms provided by the director of records, request approval from the permanent committee on special examinations established by the department under which the course is described in the catalog. The departmental committee will grant or deny the request pursuant to the standards stated on the request form. The departmental committee shall deny the request if it determines that the student would realize substantial benefits only from participating in the activities of the course in question.

The method for designing, administering, and evaluating the special examination will be determined by the departmental committee on special examinations. The examination shall in all circumstances be comparable in scope and difficulty to a comprehensive final examination in that course. No student will be allowed to repeat a special examination in a given course within one year.

The student will receive credit, to be recorded as S (Satisfactory) on the transcript upon demonstrating the development of the abilities and attitudes of students who have taken the course and upon passing the examination with a minimum equivalent grade of C. Examination results judged inadequate will be recorded as NC (No Credit) on the student's transcript. Neither S nor NC grades will be used in computing the grade point average.

Limitations on Nontraditional Credit: CLEP, IEP, Military Service, Special Examinations (Proficiency or Challenge Examinations), Competency Based Programs, ACT-PEP (Nursing majors only).

The maximum undergraduate credit that may be earned by these means is 60 semester hours. The limit for special or nontraditional credit is 30 hours for any one of these categories. Normally, nontraditional credit will not apply toward the last 30 hours of residency; however, students who have completed 30 hours of traditional course work at UTC and have not yet attempted the last 30 hours may petition to apply a maximum of 15 hours of these types of credit toward the last 30 hours. Application for IEP credit must be initiated no later than the semester preceding graduation.

Except for credit by special examination (undergraduate) most credit earned by these nontraditional means is elective. Exceptions to this principle may be made only with the written approval of the respective departments, indicating specifically the amount and type of credit to be applied to a major degree program.

Military Service Credit

The University may grant credit for military science to students with six or more months of honorable active service in the armed services of the United States or in a service academy. A total of 30 semester hours of elective credit, including basic military service, may be accepted from the Community College of the Air Force. University policy permits and encourages granting credit for appropriate educational experience in the armed services in accordance with their evaluation in the American Council on Education's 1984 Guide to the Evaluation of Education Experiences in the Armed Services or by the Commission on the Accreditation of Service Experiences evaluation service. Veterans requesting military service credit should submit a copy of the DD Form 214 to the Records Office for evaluation.
Student Financial Aid

In the belief that educational opportunities of qualified students should not be controlled by their financial resources, The University of Tennessee at Chattanooga offers a comprehensive program of student financial assistance. UTC uses a variety of resources to assist students who otherwise might find the costs of a college education prohibitive. Through federal, state, and university financial assistance programs a student may receive one or more different types of assistance to cover educational costs.

There are four basic types of financial aid for UTC students: scholarships, grants, loans, and part-time employment. These are awarded individually or in combination, depending on the student's financial need.

Financial need is the difference between the student's cost of attendance at the University and the family's ability to pay that cost. To assist in determining the student's need for financial aid, the University uses the needs analysis system of the American College Testing Service (ACT). Through the use of the ACT Family Financial Statement the Financial Aid Office determines the amount the student and the student's family can be expected to contribute toward meeting educational expenses. A student's financial need is met with financial aid.

Scholarships

The University of Tennessee at Chattanooga scholarship program for new and currently enrolled students is made possible through funds provided by the University, outside foundations, estates, private businesses, civic groups, individuals, and alumni.

Most scholarships are awarded to students who demonstrate strong academic achievement and proven need for financial assistance. There is, however, an academic merit scholarship program based only on academic achievement. Unless otherwise stated, to compete for merit scholarships only, a student must submit a UTC Application for Student Financial Aid. A financial statement is not necessary. Academic achievement is judged for entering freshmen by the applicant's secondary school academic record and scores on the American College Testing (ACT) or Scholastic Aptitude Testing (SAT) admissions tests. In many cases high school activities are also considered. Academic achievement for currently enrolled and transfer students is judged by the applicant's cumulative grade point average.

All scholarships, including merit scholarships, are highly competitive. Despite the generosity of University friends and alumni, there are not enough funds to provide aid to all qualified students. Early application is advised. Annual scholarship stipends range from $200 to $3,000.

Each year 25 outstanding entering freshmen are selected to participate in the William E. Brock Scholars Program. These scholars receive four-year stipends of $1,750 or $3,800. Selection is based on scholarship, leadership, and service. Application is made directly to the Brock Scholars program. For further information see the William E. Brock Scholars section of the catalog.

In addition to the Brock Scholars, fifteen prestigious merit scholarships are awarded each year to incoming freshmen: five Andy Holt scholarships (sponsored by the UT National Alumni Association) for $1,200 each and renewable for four years; five chancellor's and five leadership scholarships (sponsored by the UC Foundation) of $1,500 each and renewable for four years.

UT alumni valedictorian scholarships are available to the valedictorians of Tennessee high schools. UT alumni community college scholarships are available to the top two students of each of the Tennessee community colleges. These one-year $850 awards are available at all campuses of The University of Tennessee.

The University also offers a transfer scholarship program for students transferring from junior and community colleges. This scholarship recognizes the student's outstanding achievement for academic work in the two-year program. Each year four entering juniors are selected for these $850 two-year awards.

Approximately 600 scholarships are available for UTC students. Most scholarships are awarded for one year; however, although students compete for scholarships each year, priority is given to renewal applicants who meet the priority date. The UTC Application for Student Financial Aid is a general application and applicants will be considered for all scholarships coordinated by the University Financial Aid Office.

Music and athletic performance scholarship applicants should contact the director of their program of interest.

Students interested in Army ROTC should contact the UTC Military Science Department for information on two-, three-, and four-year scholarships. These scholarships pay the cost of all tuition, textbooks, and laboratory fees. Additionally, the scholarship student receives $100 per month (up to 40 months) subsistence pay during the academic year for the duration of the scholarship.

Grants

Pell Grants (formerly BEOG)

All undergraduate students applying for institutional assistance based on a financial need are to apply for this federal grant program. Other forms of financial assistance will not be extended to a student until eligibility for the Pell Grant has been determined. To apply, the student submits the Fam7y Financial Statement to the American College Testing Service. Approximately six weeks after the Family Financial Statement is mailed, the student should receive the Basic Grant Student Aid Report.
Supplemental Educational Opportunity Grants
This is a program of direct grants available to entering freshmen, transfer, and enrolled undergraduate students with financial need. A Supplemental Educational Opportunity Grant may not be less than $200 or more than $2,000. The above regulations and provisions of the Supplemental Educational Opportunity Grant are subject to change by federal legislative action.

Student Loans

National Direct Student Loans
Long term loans, at five percent interest, are available primarily through the National Direct Student Loan Program. Proven need for financial assistance determines eligiblity.

Loan repayment and interest payments on National Direct Student Loans are deferred until after graduation or as long as the individual remains in half-time attendance at an accredited institution of higher education in the United States. Repayment may also be deferred for up to three years for special circumstances as outlined in the Higher Education Act of 1986. The maximum repayment period is normally 10 years with the current minimum annual repayment $360 or 10 percent of the accumulated loans, whichever is greater.

If upon graduation the borrower becomes a full-time teacher in a public or nonprofit school that is designated by the U.S. Commissioner of Education as having a high enrollment of low income families or becomes a teacher of the handicapped, 15 percent of the total principal plus interest is cancelled for the first and second year of teaching, 20 percent for the third and fourth years, and 30 percent for the fifth year. If after graduation the student becomes a staff member in a Title I preschool program that is operated for a period comparable to a full school year, 15 percent of principal plus interest will be cancelled for each year of service.

An undergraduate may be extended a maximum annual loan of $1,500 to an accumulated loan total of $6,000 for an undergraduate and $12,000 for a graduate student. The above regulations and provisions of the National Direct Student Loan Program are subject to change by federal legislative action.

The UTC Underwood and Ansbach Loan Funds
Student loans from University sources are available to currently enrolled students with a 2.0 or above cumulative grade point average. A loan of up to $1,200 a year can be offered. One surety or cosigner is required for each promissory note. Repayment of principal, together with any unpaid accrued interest thereon, shall be made over a period commencing the first of the fourth month following graduation, withdrawal, or transfer from the University, or following the date on which the borrower ceases to carry at least one-half the normal full-time academic workload as defined by the University. Repayment of principal, together with interest thereon, is made in monthly or quarterly installments (as agreed to between the principal and the University) at the rate of not less than $30 per month plus accumulated interest or 1/36 of the amount of this note, plus accumulated interest, whichever is greater. The interest is six percent per annum. The borrower may, without penalty, pay all or part of the loan at any time before the maturity date.

Nursing Student Loans
The Nursing Student Loan is available to students who are enrolled or admitted as students in a course of study leading to a baccalaureate or graduate degree in nursing and who show need of assistance in order to pursue their course of study. The program provides a long-term loan at a six percent interest rate with repayment beginning nine months following termination of half-time study at an accredited school of nursing. Repayment may also be deferred for a period up to three years while the borrower is serving in the armed forces or Peace Corps or up to five years for a full-time course of study leading to advanced professional training.

The above regulations and provisions of the nursing loan program are subject to change by legislative action.

Student Employment
The University participates in the College Work-Study Program administered by the United States Office of Education. To be eligible for the College Work-Study Program, a student must be accepted for admission or be in good standing if currently enrolled. A student's eligibility further depends upon the need for employment to defray college expenses. On-campus part-time work opportunities are available in the various departments, offices, and agencies of the University. Off-campus work may also be available. The UTC Application for Student Financial Aid and the ACT Family Financial Statement are required.

Employment opportunities provided under the institutional student employment program are offered to students who indicate a desire to work and who do not meet the financial need requirements for the College Work-Study Program. The Financial Aid Office handles on-campus student employment. Part-time employment, handled by the UTC Placement and Student Employment Center, is also available in private businesses, corporations, and industries in the Chattanooga area. To be eligible for this part-time employment, the student must meet the requirements established by the employing agency.

The Chattanooga Symphony offers an orchestral apprentice program for a limited number of qualified performers. Eligible students receive wages equal to the prevailing union contract. Interested students should contact the head of the music department.
Other Assistance

Georgia Tuition Equalization Grant
Grants are made by the Georgia Finance Authority for $387 a semester to Georgia residents who are juniors or seniors at UTC.

Students must live within 50 miles of UTC and more than 50 miles from a four-year Georgia educational institution. Full-time enrollment at UTC is required. Applications are available in the UTC Financial Aid Office.

Guaranteed Student Loans
These loans may be available to help meet educational expenses through the federal government or a state guaranteeing agency. Students should contact their local bank, credit union, or savings and loan to determine their participation in the program. If the student is unable to find a lender, he or she should check with the Financial Aid Office. To receive the loan, a student must be admitted to or in regular attendance and in good standing at the University. Interest on such loans is paid by the federal government while the student is in school. During the repayment period, which begins no less than six months after graduation or withdrawal from the University, the student pays up to eight percent simple interest. The maximum amount of a loan to an undergraduate in a 12-month period is $2,500.

Total loans outstanding may not exceed $15,000 for the undergraduate or $25,000 for the graduate student.

Complete information is available at most banks and credit unions. If you are unable to secure a guaranteed student loan from your hometown bank or credit union, contact the UTC Financial Aid Office for further instructions.

PLUS Loans
A non-need-based source of loan funds available to the parents of dependent undergraduates as well as independent undergraduates and graduate/professional students.

The parents can borrow up to $3,000 for each undergraduate dependent child, not to exceed the cost of attendance minus financial aid. Independent undergraduates may borrow up to $2,500 per year. This $2,500 maximum includes any loans taken under GSL as well as PLUS.

Graduate/professional students are entitled to borrow up to $3,000 per year. They may also borrow up to $5,000 per year under the GSL provisions. Therefore, graduate/professional students may borrow up to a total of $8,000 per year under GSL and PLUS combined, not to exceed need, which is defined as the cost of attendance minus estimated financial assistance.

The cumulative maximum loan amount that can be borrowed by a parent for each dependent undergraduate student is $15,000. Independent undergraduates may borrow a cumulative maximum of $12,500 including GSL borrowing. The cumulative maximum loan for graduate/professional students is $15,000 from PLUS. In addition, these students may borrow up to $25,000 (aggregate includes undergraduate and graduate loans borrowed) from GSL, resulting in a cumulative maximum loan from both programs of $40,000.

The interest rate on PLUS loans is 12 percent. There is no federal interest subsidy on PLUS loans. If the borrower is a parent or a less than full-time student, repayment of interest and principal must begin within 60 days of disbursement of the loan. If the borrower is a full-time student, or qualifies for some other deferment (i.e., parents in military), he or she goes into deferment for the principal only. Payment of interest must begin within 60 days of the loan disbursement. The lender may grant forbearance of accrued interest and capitalize it when repayment resumes.

Detailed information and application forms are available directly from lenders or from the Financial Aid Office. It is also possible to obtain information and application forms from state guarantee agencies.

Tennessee Student Assistance Corporation Grant Program
Grants are made by the Tennessee Student Assistance Corporation to residents of the state of Tennessee who show a financial need as supported by a financial statement. Applications for these awards, which cover approximately one-half of tuition costs, are available in the UTC Financial Aid Office, a high school counselor's office, or from TSAC, Nashville, Tennessee. Students should apply before August 1.

Application Procedures
Because a student's family resources can decrease and increase significantly from year to year, the University requires each student to apply annually for renewal of financial aid.

1. Although applications will be processed throughout the year, students should complete and submit the Student Financial Aid application on or before the following priority deadline dates to receive maximum consideration for all available funds:

   Academic year—March 1: entering freshmen and transfer students
   April 1: currently enrolled students

   Spring only—November 1: all students
   Summer only—March 15: all students

2. Students should complete and submit a Family Financial Statement to the American College Testing Service approximately six weeks prior to the priority deadlines. If applying only for academic merit scholarships a financial statement is not required.

3. All undergraduate students applying for assistance based on financial need should apply for the Pell Grant.

4. Students should have begun the process for admission to the University prior to or at the same time as applying for financial aid.

5. Tennessee residents should apply for the Tennessee Student Assistance Award if requesting aid based on financial need.
6. Federal regulations require that UTC have a financial aid transcript on file from each school (beyond high school) a student has previously attended. It is the responsibility of each student to see that the completed transcripts are sent to the UTC Financial Aid Office. Blank financial aid transcript forms are available from the Financial Aid Office.

7. The Financial Aid Office notice of award is the UTC financial aid award letter. Students who accept their awards by July 31 (fall) and November 30 (spring) should have funds available at fee payment.

8. Students need to have completed the financial aid process, including acceptance of their award(s) by August 1 (for fall), December 1 (for spring), and March 1 (for summer) to have funds available at the beginning of the term.

The Financial Aid Office regularly provides assistance with the financial aid application process and financial budgeting. Also, a student may request a review of the determination of the student's need and award.

For applications and further information on financial aid write the Financial Aid Office, 215 Race Hall, The University of Tennessee at Chattanooga, 615 McCallie Avenue, Chattanooga, Tennessee 37403.

---

**Student Fees and Expenses**

Tuition is free to residents of Tennessee. Out-of-state students must pay the tuition charge. A student's residence is determined primarily by the residence of the student's parents. Exceptional cases, including guardianships, are given special consideration and are determined on the basis of the particular circumstances in each case. Any student who is classified as an out-of-state student may, at any time, request that a residence classification be reconsidered. When additional information concerning a student's residence classification is available, the student should provide the Office of Undergraduate Admissions with this information in order that a reappraisal of residence status may be made.

Thirty dollars of the fee is allotted to the bond obligation of the University Center.

*Student fees are established by the University of Tennessee Board of Trustees and are subject to change without notice.*
### Activity Fee

All students registered will be assessed an activity fee of $3 per hour (maximum $28).

### Auditor’s Fees

Fees for courses being audited are the same as those for courses taken for credit. Auditors do not take examinations, receive credit or grades, and may not participate in the class activities as determined by the instructor.

### Disabled Persons Fees

Tennessee residents who are totally disabled and meet admission requirements may enroll for credit for a fee of $7.50 per semester hour to a maximum of $75 per semester.

Tennessee residents who are 100 percent disabled may audit classes on a space available basis at the University without paying a fee.

For more information call the Continuing Education Division at (615) 755-4346.

### Disabled Persons Fees

Tennessee residents who are totally disabled and meet admission requirements may enroll for credit for a fee of $7.50 per semester hour to a maximum of $75 per semester.

### Music Fee

In addition to the credit hour rate, a fee is assessed for instructional courses. The fee is due at the regular fee payment dates. The fees are:

- Per one-half hour instruction: $30
- Per one hour instruction: $60

### Senior Citizens Fees

Tennessee residents who will become 65 years of age or older during the academic semester in which such persons begin classes and who meet admission requirements may enroll for credit for a fee of $7.50 per semester hour to a maximum of $75 per semester.

Tennessee residents who become 60 years of age or over during the academic semester in which such persons begin classes may audit classes on a space available basis at the University without paying a fee.

For more information call the Continuing Education Division at (615) 755-4346.

### Summer Terms

Fees for the summer sessions are the same as for regular semesters.

### Other Expenses

#### Application Fee

A nonrefundable fee payable at the time initial application is made.

#### Bad Check Fee

Any checks received by the University which fail to clear the bank on which drawn will incur a service charge of $10 if paid within the first seven days. After the seventh day the service charge will increase to $15. In addition to the service charge, a check written to cover tuition, dorm, and fees which fails to clear the bank, will incur the appropriate late and reinstatement fees in effect at the time the student redeems the check. Check writing privileges will be revoked for those students writing three or more bad checks to the University.

#### Graduation Fee

- Bachelor’s Degree: $20
- Master’s Degree: $30

Fee is payable at the beginning of the semester in which the candidate is to graduate. Academic robes will be available for purchase from the bookstore.

#### Housing

Room rents vary from $490 to $730 per semester according to the accommodations available. A $25 reservation/damage deposit is required from students applying for housing. In addition a $75 advance payment is required for fall semester. Fees not paid on regular fee payment will incur a $10 late fee within the first seven days. After seven days the late fee will increase to $15. If the University must bill for dorm fees a $5 deferred fee will be due in addition to the late fee.

#### Meals

Meals in the University cafeteria are served a la carte. Meal tickets may be purchased at the University cafeteria.

#### Orientation

A $35 fee for the two-day sessions includes one dinner, one lunch, and a breakfast, as well as an overnight dormitory stay. The fee also covers cost of booklets and orientation materials.

Parking
- Reserved parking decal: $48 per semester
- General parking decal: $30 per year
- Perimeter parking decal: $5 per year

Special Examination Fees
- Payable for each proficiency or validation examination.
  - Undergraduate: $30 per credit hour
  - Graduate: $44 per credit hour

Fee Payment

General
A student will not be allowed to register with a debt due the University.

On Saturdays when the Registration Office or Business Office may be open for a part of the day, the late registration service fees scheduled to be in effect on the following Monday will apply to fee transactions handled on Saturday.

No student is officially authorized to attend classes until he or she has properly registered and paid fees.

Upon receipt of full, partial, or incomplete schedule, students are registered and responsible for payment of fees. The Registration Office must be notified in writing prior to the first official day of classes that he/she wishes to cancel registration. Those students that withdraw after classes will be responsible for a percentage of fees plus late fees according to the withdrawal charge under "Refund of Fees and Adjustments." Students which have not paid fees or made satisfactory arrangements with the Bursar by the sixteenth calendar day will be withdrawn. This applies to all students regardless of source of funds, including those whose fees are billed, deferred, waived, or paid with personal funds. Students must have their fee receipt validated on the official fee payment dates to void the assessment of late fees.

Before paying fees, check your fee card to be sure your name, social security number, and all charges are assessed and correct. Additional courses and/or assessments which must be billed will be assessed a $5 deferred fee.

The University reserves the right to refuse to release any student his or her transcript or degree for failure to return University property or for failure to pay any accounts due at the University.

The University accepts cash, checks, MasterCard, and Visa for payment of fees. Counter checks are not accepted. If unable to pay fees on the regular fee payment days, prepayment is accepted in the Bursar’s Office or by mail. Late fees will be assessed according to postmark date.

Fall and Spring Semester

Students must pay their fees on the regular dates designated for this purpose. For more detailed information regarding fee payment dates, refund information, etc., refer to the schedule of classes (STARS) for the particular term in question. Effective the first regular business day (excluding Saturday, Sunday and any holidays) following the last regular fee payment day, a $15 late payment and late registration fee will be charged for the first eight calendar days. A $25 late payment/registration fee will be charged for the next eight calendar days. After the sixteenth calendar day, students will be withdrawn for nonpayment of fees. In addition to the late fee a $20 reinstatement fee will be in effect as of the seventeenth day if allowed to continue.

Summer Terms

For summer terms a graduated late service fee of $2 per regular business day will be charged during the five regular business days following the last regular fee payment day ($2 the first day, $4 the second day, $6 the third day, $8 the fourth day, and $10 the fifth day). Students who have not completed registration and paid their appropriate charges within five ensuing regular business days after the last regular fee payment day, will be withdrawn from the University. A schedule of late fees will apply in accordance to the Fall and Spring semester “if allowed to continue.”

Refund of Fees and Additional Charges

General
No refund is due on courses which are dropped unless the charge for the remaining courses plus the percentage charge for the courses dropped is less than the maximum semester charge for tuition and maintenance fees. All refund periods are based on the official first day of classes for the University, as published in the catalog and schedule of classes.

All charges and refunds will be made to the nearest even dollar. All charges are subject to subsequent audit and verification and errors will be corrected by appropriate additional charges or refunds.

Approximately six weeks after the beginning of the semester (except summer) a statement of account will be sent to students who owe additional fees or fines. Students not responding to such statements will be withdrawn from the University. The withdrawal does not relieve the financial responsibility. If withdrawn a $20 fee must be paid to be reinstated.

Refunds on dropped courses, in accordance with the refund policy, will not be made until after the tenth week of the semester.

Academic Regulations

Catalog Effective Dates

The catalog in effect at the time of entry will be used to determine degree requirements if the degree is conferred within 10 years. Students, however, may also elect the current catalog at the time of reentry, the catalog in effect when a new major is selected, or a catalog reflecting a revised curriculum. Transfer students may use the catalog in effect at the time of their first entry into college provided that the transfer to this institution is made within five years of that date.

A student seeking recommendation of The University of Tennessee at Chattanooga for initial teacher certification or endorsement must satisfy the current UTC approved program requirements on file with the Tennessee Department of Education at the time of application for certification.

Registration Limits

Students are classified as full time if they are registered for 12 hours or more. Students registered for fewer than 12 hours, either by their own choice or by University regulations, are classified part time. Students wishing to complete degree programs in four academic years will need to schedule 16 hours each semester. Schedules of over 20 hours are not permitted unless the students have obtained advance approval of the Petitions Committee.

The maximum load for any term of summer is 7 hours; any combination of terms is 10 hours, and the maximum registration is 16 hours for the entire summer session. Any exceptions must receive advance approval by the Petitions Committee.

Course Numbers and Levels

Courses offered by the University are listed in each college or school section with the course numbers, title, credit, course descriptions, and prerequisites. The numbers identify the level of the courses. In special circumstances a student may register for a course above the stated level when in accordance with departmental policy and on recommendation of the adviser. Freshmen, however, are not permitted to register for 300- and 400-level courses. For any undergraduate degree, students must complete a minimum of 30 hours of courses at the 300 level or above.

<table>
<thead>

</tbody>
</table>
Institutional Credit

Institutional credit will be assigned to all developmental courses in reading (EDCI 105), mathematics (MATH 105, 106), study skills (HSRV 100), and writing (ENGL 105, 106). This credit will be in addition to all degree requirements. It will not apply to the hours required for graduation, either major requirements, general education requirements, or elective hours. Neither will it be counted in the grade point average for graduation or honor. While the student is enrolled in developmental courses, however, institutional credit will be counted in the grade point average in determining the student’s eligibility to continue in residence at UTC as outlined below in the retention and continuation standards.

Retention and Continuation Standards

In order to be able to continue in residence at UTC, students must earn a minimum grade point average in accordance with the following scale of attempted hours:

<table>
<thead>
<tr>
<th>Hours Attempted</th>
<th>Grade Point Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>1—23</td>
<td>1.0</td>
</tr>
<tr>
<td>24—39</td>
<td>1.5</td>
</tr>
<tr>
<td>40—55</td>
<td>1.8</td>
</tr>
<tr>
<td>56 and above</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Students who achieve the required cumulative grade point average for the hours attempted are considered to be in good standing. Those who fail to achieve the required average will be subject to the following action:

1. Students will be placed on academic probation after the first failure to earn the required grade point average.
2. Academic suspension for one semester will follow if probation is not removed by raising the grade point average to required standards or if a 2.0 average for the semester of probation is not achieved. The complete summer session is considered a period of suspension. Suspended students who enroll in other colleges or in correspondence courses during their semester of suspension must earn at least a 2.0 average on all hours attempted during this period in order to be eligible for automatic readmission to UTC. Students not meeting the 2.0 requirement must apply for readmission through the Admissions/Readmissions Committee.
3. Students will be placed on probation when they return after the period of suspension. They must either achieve a 2.0 average in the semester following their return or raise their cumulative average to acceptable standards. If they fail to achieve either standard, they will be dismissed for an indefinite period and may not apply for consideration for readmission for one calendar year unless an appeal is filed with the Petitions Committee and acted upon favorably.
4. Any student permitted to enroll despite the fact that his or her cumulative average is below continuation standards will be on probation.

Students who are either suspended or dismissed have the right to appeal for reentry if they believe that extenuating circumstances were responsible for their poor academic achievement. Students who wish to appeal for reentry to the term that immediately follows their suspension or dismissal, including any term of the summer, must complete a petition form available in the Office of Records. In addition, dismissed students who wish to appeal for reentry before the end of a calendar year must also complete a petition form available in the Office of Records. Appeals for the term in which reentry is sought must be made by the third day of classes for the fall and spring semester and the second day of classes of any summer term.

Although readmission is not automatic, dismissed students who wish to appeal for reentry after the lapse of at least one calendar year must complete their appeal through the Office of Admissions on special forms available in that office. These appeals must be submitted before the first day of classes of the term in which reentry is sought.

Academic action is recorded on the permanent record card.

Academic Warning

Academic warning is a cautionary notice to the student that his or her semester grade point average is below 1.0 and that continued academic performance at this low level may lead to probation, suspension, or dismissal. Students may be placed on probation or may be suspended or dismissed without having received such a warning notice since these academic actions are closely linked to the overall grade point average. Unlike these
latter actions, academic warnings do not appear on the student's permanent academic record.

**Academic Alert**

Academic alert may be noted on the grade report for any student whose cumulative average is below 2.0 even though the student meets minimum requirements for continuation.

Undergraduate students who demonstrate that they may be at academic risk may be required to enroll in certain courses and participate in programs, including summer programs, designed to enhance their academic skills. Credit accrued may not necessarily be applicable to a degree.

**Grading Policies**

**Grades**

- **A** represents superior performance in the course.
- **B** represents commendable performance in the essentials of the course.
- **C** represents acceptable performance in the essentials of the course.
- **D** represents marginal performance below the acceptable standards of university work.
- **S** is given for courses completed on a satisfactory/no credit basis. The hours are not computed in the grade point average. Not more than eight hours in Health and Physical Education 039, Varsity Sports, may be applied toward the 128 hours required for a degree.

**NC** represents failure to complete the requirements in satisfactory/no credit courses. The attempted hours are not computed in the grade point average.

**/** may be given to a student whose work has been of passing quality and who has valid reason for not completing some requirement of the course. Removal of an Incomplete must be submitted by the instructor to the Office of Records no later than three weeks before the last day of classes in the next regular semester, or the Incomplete will become an F. The Incomplete grade will not be computed in the grade point average during the interim.

**IP** is used as an interim grade for departmental honors courses numbered 495r and indicates work in progress. It must be removed by the end of the next regular semester or the In Progress becomes an F. The IP will not be computed in the grade point average during the interim.

**F** indicates unqualified failure and the necessity for repeating the course to obtain credit.

**W** indicates official withdrawal from one or more classes after the first two weeks of classes, and up to the last six class weeks before the final examinations. Comparable deadlines apply to each of the summer terms.

**Quality Points**

Quality points are computed for undergraduates for each credit hour as follows:

- A—4
- B—3
- C—2
- D—1
- F—0
- S—not included
- NC—not included
- W—not included

**Grade Point Average**

Continuation in the University, rank in class, and eligibility for honorary organizations or fraternities and sororities and for scholarships are based on the grade point average. This average is computed by dividing the total number of quality points earned by the total number of semester hours attempted, including hours of F. Hours are excluded in which grades of S, NC, /, and Whave been earned.

Grade point averages are not rounded, and no numerical value less than the stated grade point average will suffice. See section below for policy on replacement of grades.

**Repeated Courses**

1. A student may replace grades of C or lower as many as five times; courses in which grades of S, NC, and W were earned will not count in the allotted number of replacement grades.

2. The policy was effective with the fall of 1985. Unlimited replacement of grades earned at any college or university will be permitted before the fall of 1985. Beginning with the fall of 1985, a student will be limited to five additional replacement grades in courses taken at UTC or any other college or university.

3. All grades, except the five replaced grades, will be used in the grade point average computation.

4. In any repeated course, excluding "r" courses, a student forfeits the first earned hours, if any.

5. Courses in which grades of A or B were earned cannot be repeated except for "r" courses. If an A or B is repeated, the repetition will be changed from credit to audit.

6. For a transfer student a "course" is interpreted as any course listed separately in an individual term on the transcript regardless of the number of such courses needed to equate to a UTC course.

7. When a student is repeating more than one course in a term and is nearing the permissible limit of five replacement grades, the following order will determine replacements: 4 hour F's, 3 hour F's, 2 hour F's, 4 hour D's, 3 hour D's, 2 hour D's, 1 hour F's, 1 hour D's, 4 hour C's, 3 hour C's, 2 hour C's, 1 hour C's. In the case of a tie, a grade in a course within the
Undergraduate Degrees

The University offers undergraduate programs which lead to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science, Bachelor of Science in Engineering, Bachelor of Science in Nursing, and Bachelor of Social Work. Majors offered with these degrees are as follows (specific requirements, including study in related areas, are outlined in the appropriate colleges and divisions):

American Studies (B.A.)
Concentrations: American History, American Literature, Philosophy and Religion, Political Science, Sociology-Anthropology

Applied Mathematics (B.S.)
Concentrations: Actuarial Science, Corporate Science, Computer Science, Systems Science

Art (B.A., B.F.A.)
B.F.A. Concentrations: Art Education, Graphic Design, Painting, Sculpture

Biology (B.A.)

Business Administration (B.S.)
Concentrations: Accounting, Finance, General Management, Industrial Management, Marketing, Office Management, Personnel Management

Chemistry (B.A. and B.S.)

Communication (B.A.)
Concentrations: Advertising, Broadcasting and Electronic Media, Broadcast Journalism, Journalism, Public Relations

Computer Science (B.S.)
Concentrations: Information Systems, Scientific Applications, Systems Architecture, Topical

Criminal Justice (B.S.)
Concentrations: Corrections, Crime Control, Juvenile Justice, Law and the Courts, Law Enforcement

Early Childhood Education (B.S.)

Economics (B.A. and B.S.)

Elementary Education (B.S.)

Engineering (B.S.E.)
Concentrations: Electrical Engineering, Industrial Engineering, Mechanical Engineering, Chemical Engineering, Civil Engineering

Engineering Management (B.S.)

English and American Language and Literature (B.A.)
Includes concentration in writing

Environmental Studies (B.S.)
Concentrations: Biology, Chemistry, Engineering Science, Geography, Geology, Mathematics, Physics, Sociology-Anthropology

Foreign Languages: French, Greek and Latin, Latin, and Spanish (B.A.)

Geology (B.S.)

History (B.A.)

Home Economics (B.S.)
Concentrations: General (Child and Family Development, Foods and Nutrition, Management and Consumer Science); Business (Fashion Merchandising, Food Systems Administration, Interior Design, Consumer Affairs)
Minors are currently available in the following areas:

- Medical Technology (B.S.)
- Theatre and Speech (B.A.)
- Nursing (B.S.N.)
- Music (B.M.)
- Music (B.A.)
- Mathematics (B.A.)
- Human Services (B.S.)
- Humanities (B.A.)
- Art: Studio Art or Anthropology
- Secondary Education (B.S.)
- Psychology (B.A. and B.S.)
- Political Science (B.S.)
- Concentrations: Preprofessional, Public Administration
- Sociology and Anthropology (B.A. and B.S.)
- Special Education (B.S.)
- Theatre and Speech (B.A.)

Additional minors may be developed.

**Usage Notes**

The letter *r* following a course number means that, because of a difference in content from semester to semester, a class may be taken more than once for credit. Example: Art 205r.

A capital letter (A, B, C, D, F, or G) prefixed to a course number means that the course can also be used to satisfy the general education requirement of the category indicated. Example: Mathematics F136.

Category E does not apply to the revised general education requirements (effective for new students entering fall 1982) and has been intentionally left out.

## Degree Requirements

### I. General Education Requirements

The general education requirements described below were approved by the faculty to become effective for new students who enter in the fall of 1982 and thereafter. Courses are continually being reviewed to meet the criteria for general education certification; the lists below, therefore, will be expanded throughout the year. Anyone who changes to the current catalog must meet all requirements.

The general education program is minimal. In setting forth such requirements the faculty is not implying that the requirement is all that the student needs in each category; nor is the faculty implying that any particular course offers a thorough knowledge of the discipline. Provided with an introduction and a point of departure, each student and his or her advisers determine the student’s needs and direction for furtherance of his or her education. Courses meeting general education requirements are identified in the class schedule for each semester although all courses currently approved are listed below with each category. Generally, with the exception of laboratory courses in Category D which normally carry four credit hours, only courses earning a minimum of three semester hours of credit may fulfill a general education requirement. It is University policy that a student not schedule courses above his or her class level without permission of the department offering the course.

With the exception of majors in general areas such as humanities, students must select courses outside the major discipline in all general education categories. Students should complete the requirements for Category A (Written Communication) within the first 42 hours of academic credit attempted and Category F (Mathematics) at their earliest opportunity.

For transfer students, courses must be equated to approved general education courses in order to satisfy requirements. In Category D, 3.33 semester hours constitute a course for transfer students provided that the equivalency is an approved UTC general education course.

Students enrolled prior to fall 1982 should consult earlier catalogs or schedules of classes for courses certified for general education.

### Category A

Written Communication in the English Language (6 hours)

Courses in Category A are intended to help students improve their power to understand, to read, and to write the English language; to help them clarify and articulate thought; and to help them treat language as an instrument and model for understanding and appreciation. The primary emphasis is on written composition. The following courses satisfy this requirement.
Category A (Written Communication) course requirements must be completed within the first 42 hours of academic credit attempted. Exemption from English 121 and completion of A122 satisfies Category A.

Category B

Humanities and Fine Arts (9 hours—3 hours from Humanities, 3 hours from Fine Arts, and 3 hours from either)

Courses in Category B offer students opportunities to develop an appreciation for achievements in art, music, theatre, and literature; to acquire a sense of historical perspective; and to gain some knowledge of perennial and changing issues in philosophy and religion. Majors in education may not use history in this category to satisfy state requirements for humanities. The following courses satisfy Category B requirements.

Humanities: Classics 310, 396; English 131, 133, 203, 207, 211; History 101, 102, 203, 204, 310; Philosophy 106, 201, 221, 425; Political Science 212, 313; Religion 103, 221, 222, 236; University Honors 101, 102; University Studies 210.

Fine Arts: Art 111, 211, 301; Music 111; Theatre and Speech 111, 115, 280; University Honors 103.

Category C

Behavioral and Social Sciences (6 hours)

Courses in Category C offer students opportunities to explore the nature and complex functioning of human beings as individuals and in societies and cultures, including as integral to that exploration of the principles, scope, and methods of the behavioral and social sciences. The following courses satisfy this requirement.

Anthropology 152, 211; Economics 101, 102; Geography 104; Home Economics 340; Human Services 101; Political Science 101, 202, 302; Psychology 101, 241; Social Work 210; Sociology 125, 151, 215, 220; University Honors 105, 106.

Category D

Physical and Natural Sciences (4 hours)

Courses in Category D offer students an understanding of the principles and scope of the physical and natural sciences. A fundamental part of these courses is the study of historical and contemporary ways in which these fields aid in understanding the natural and physical universe and also aid in the accomplishment of technological goals. Courses in this category must be laboratory courses. The following courses satisfy this requirement.

Anthropology 209; Astronomy 102; Biology 121; Chemistry 121, 125; Environmental Studies 150; General Science 111; Geology 111; Physics 103, 230; University Honors 107.

Category F

Mathematics (3 hours)

Courses approved for this category are intended to help students acquire some appreciation for mathematics as a creative activity of the human mind and some understanding of its usefulness in comprehending the physical universe. These objectives are supported by appropriate emphasis on computational skills and on the ability to work with mathematical symbols. The following courses satisfy this requirement.

Mathematics 115, 120, 136, 145, 150, 155, 210; Philosophy 212.

Category G

Perspectives (3 hours)

Courses in this category offer a special opportunity for students to achieve an understanding that reaches beyond their time and place by developing a sense of the importance and relevance of the past or of other societies and peoples through studies in: 1) non-Western cultures and civilizations; 2) major achievements or tragedies of Western civilization; 3) development, meaning, and impact of major scientific discoveries and theories; and 4) development, meaning, and impact of important economic, political, social, or technological ideas and policies. The following courses satisfy this requirement.

Anthropology 208, 333; Biology 300; Classics 110; Engineering 211; English 233, 257, 397; History 114, 208, 211; Home Economics 390; Human Services 300; Modern Languages 201; Music 214, 397; Political Science 102, 244, 314; Religion 211, 232; Social Work 250; University Honors 108.

II. American History

By act of the General Assembly of the state of Tennessee, students who have not had one year of American history in high school must complete six semester hours of American history if they receive an undergraduate degree after July 1, 1978. Three hours of this requirement may be satisfied by Tennessee history.

To meet teacher certification requirements, majors in elementary and early childhood education must complete six semester hours of American history in college regardless of their high school background.

III. Physical Education

Health and Physical Education 021, is required in the first year, plus one additional physical education activity course with the exception of varsity sports. Transfer students who have already successfully completed two one-semester hour courses in physical education activity, excluding varsity sports, will be considered as having met the requirements.

The University may grant the individual student a deferment or waiver after reviewing the necessary
records submitted by the student. Waiver of this requirement may be granted in accordance with the following policies:

1. Students who are 25 years of age on or before the first day of classes of the semester under consideration.
2. Recommendation of a licensed physician. (Any student having medical restrictions yet desiring to take physical education may have a program designed exclusively for him or her by enrolling in Health and Physical Education 025. Guidance, participation, and evaluation are structured on an individual basis.)
3. Veterans with at least one year of military service.

Students receiving a deferment or waiver of this requirement will be responsible for meeting the credit hour requirement for graduation.

IV. Foreign Language

For B.A. and B.M. degrees: completion of second college year of a sequence in one foreign language (e.g. French or German or Spanish 211 and 212 or French or German or Spanish 213 and 214 or Latin 201 and 202). Every student is advised to begin or to continue a foreign language study during the student's first year at the University or his or her first year as a candidate for the degree.

A student whose native language is not English and who is pursuing a B.A. or B.M. degree will fulfill the foreign language requirement by meeting the English requirements for foreign students: English 161, 121 and 122.

V. Major

Requirements, including study in related areas, as specified by department.

VI. Additional Requirements*

A. Electives to complete a minimum of 128 semester hours of credit.

Candidates for the Bachelor of Science in Engineering degree must complete 137 semester hours and co-op Engineering graduates will need 147 semester hours.

A minimum of 30 semester hours must be completed in residence on this campus, and the final 30 semester hours must be completed in residence courses at The University of Tennessee at Chattanooga. Students who have attended a junior or community college must complete the last 60 semester hours at a four-year college or university with the last 30 hours in residence at The University of Tennessee at Chattanooga. See page 13 for further information.

B. A minimum of 30 hours of the 128 hours needed for graduation must be earned at the 300 level or higher.

C. A minimum grade point average of 2.0 must be achieved—

1. On all cumulative work undertaken and
2. On all hours attempted at The University of Tennessee at Chattanooga and
3. On all hours attempted in the major discipline.

For further clarification of which courses are included in the major discipline, see the description of the major.

D. Completion of testing requirements

In order for the University to assess and improve its academic programs, periodic measurements of student intellectual growth must be obtained. As a requirement for graduation every student may be required to participate in one or two evaluative procedures, which may include examinations in general education and/or the major field of study. The evaluative information obtained through testing is one of the means used to improve the quality of the educational experience for future generations of students.**

*See pages 21-24 for additional information on academic regulations.

* Approved by The UT Board of Trustees.

Degree Regulations

Academic Residency Requirements

The final 30 semester hours must be completed in residence on this campus, and a 2.0 average must be earned on these hours. Special arrangements to allow work taken at other University of Tennessee campuses to be counted as part of this requirement must be approved by the Petitions Committee.

Students who attend a junior or community college at any time in their academic career must complete the last 60 semester hours at a senior college with the last 30 of those 60 completed at The University of Tennessee at Chattanooga.

Before entering professional school, students in combined programs must complete at The University of Tennessee at Chattanooga the last 30 of the 98 semester hours of undergraduate study.

Application for a Degree

The student is responsible for applying for a degree with the Office of Records not later than the beginning of his or her final year. A student who neglects to file application must wait until the next degree-conferring period to be awarded a degree. The graduation fee is $20 for undergraduates and $30 for graduate students and must be paid before the diploma will be released.

Limitations for B.A. Degree

Not more than 42 hours in any one department may be applied toward a Bachelor of Arts degree.

Not more than six hours in certain subjects (all office administration courses; all home economics courses except 105; Engineering 102) may be applied toward a Bachelor of Arts degree.
Preprofessional Programs

Second Bachelor's Degree

A student who has received one bachelor's degree may receive a second bachelor's degree provided that all specific requirements for both degrees are met, that the curriculum for the second degree includes at least 30 hours (with a 2.0 average) not offered for the first degree, and that an additional year is spent in academic residence.

Combined Programs

The University of Tennessee at Chattanooga offers both three- and four-year programs leading to the bachelor's degree for students preparing for study in certain professional areas. In the four-year program the degree is granted upon completion of 128 semester hours, which include both the general education requirements and a major. Under the combined programs a student may receive the bachelor's degree from The University of Tennessee at Chattanooga after completing three years or a minimum of 98 semester hours of undergraduate study plus the first year of professional school. The combined programs available include the bachelor's degree for students preparing for the study of forestry, medicine, dentistry, or medical technology. A Dual Degree Program for combined undergraduate and graduate study in political science or public administration is offered in conjunction with The University of Tennessee, Knoxville.

Before entering professional school, the student in a combined program must have completed all but 30 of the total semester hours required for the bachelor's degree. The requirements in general education and in a major must be completed as a part of this program. While transfer work may be accepted, at least the last 30 semester hours of the three-year undergraduate program must be earned at The University of Tennessee at Chattanooga.

The student is responsible for having a transcript of the first year's work at a professional school sent to the University and for filing application for the degree. The graduation fee is $20.

Forestry (B.A.)

The student completes three years or a minimum of 98 semester hours of undergraduate study at UTC. The undergraduate program should include one year each of biology, including botany; chemistry; economics, including macroeconomics; mathematics, including analytical geometry and calculus; physics; and a major in a behavioral or natural science.

At the beginning of the student's senior year, he or she transfers to the School of Forestry of Duke University and takes the first year of the professional program in forestry. At the completion of that year, the student may receive the Bachelor of Arts degree from UTC. At the end of the second professional school year at Duke, the student may receive the Master of Forestry degree from Duke University.
Preparation for Health Professions

Students wishing to enter dentistry, medicine, or one of the other health fields such as cytotechnology, dental hygiene, medical technology, pharmacy, physical therapy, or veterinary medicine may complete their preprofessional training at The University of Tennessee at Chattanooga before going on to a professional school.

For the Bachelor of Science in Nursing program, which is offered by The University of Tennessee at Chattanooga, see page 172. This is not a combined program.

The various curricula available at The University of Tennessee at Chattanooga have been prepared with the cooperation of The University of Tennessee, Memphis, and include the specific requirements for admission to the respective colleges of the medical units there. The veterinary medicine program is offered at The University of Tennessee, Knoxville.

In general, these same programs will also meet the minimum admission requirements to other professional colleges offering degrees in these health sciences. Students wishing to prepare for professional institutions other than The University of Tennessee, Memphis, should consult the catalogs of these schools to determine the specific preparation required for admission. In all cases, final decision for admission rests with the college involved.

Dentistry

Although applicants may be admitted to the College of Dentistry of The University of Tennessee, Memphis, with a minimum of 90 semester hours in academic subjects, preference is given to those who have already completed a baccalaureate degree. Admissions requirements include 6 hours of English composition, 8 hours of general biology, 8 hours of general chemistry, 8 hours of organic chemistry, and 8 hours of general physics. Upper level biology courses (selected from cell biology, comparative anatomy, embryology, genetics, histology, microbiology, and physiology) are recommended. Public speaking is highly recommended as an elective. A minimum grade point average of 2.5 in all required subjects attempted and in cumulative coursework is normally required for admission. For general electives, courses in calculus, foreign language, literature, biochemistry, social sciences, and behavioral sciences are suggested.

A student in a combined program who is working toward a bachelor's degree from The University of Tennessee at Chattanooga must complete at least 98 hours, including all general education requirements, as well as requirements for a specific major offered by UTC before entering the College of Dentistry. After the successful completion of the first year at the College of Dentistry the student will be awarded the bachelor's degree from UTC.

Medical Technology (B.S.)

A student working toward the B.S. degree with a major in medical technology from The University of Tennessee at Chattanooga must complete 98 semester hours with the program outlined on page 49, together with 30 hours from an approved school of medical technology. The last 30 of the 98 hours must be completed in resident courses at UTC.

Medicine

Although the majority of students now earn the bachelor's degree before admission to a college of medicine, some may be accepted with only three years of undergraduate work. Minimum requirements for admission to the College of Medicine of The University of Tennessee, Memphis, include 16 hours of chemistry (8 hours of general and analytical and 8 hours of organic), 8 hours of physics (mechanics, heat, light, sound, electricity, and magnetism), 8 hours of biology including zoology, and 6 hours of English composition.

Strongly recommended additional courses include advanced chemistry (analytical, physical, or biochemistry or chemical instrumentation), advanced biology (comparative anatomy, embryology, animal physiology, cellular biology, or genetics), calculus, behavioral and social sciences as well as computer science, languages, literature, philosophy, history, and etymology. A total of 90 semester hours is required for admission if a student is not working toward a bachelor's degree from The University of Tennessee at Chattanooga. A degree candidate must complete 98 hours, including all general education requirements as well as requirements for a specific major offered by UTC. The last 30 of the 98 hours must be completed in resident courses at UTC.

Preveterinary Medicine

Although no combined degree program is available in the veterinary medicine field, students at The University of Tennessee at Chattanooga may complete on this campus most of the courses required for admission to the College of Veterinary Medicine at The University of Tennessee, Knoxville. Because of the competition for admission to this field as well as to other health fields, students are advised to complete an undergraduate degree program in a major that will offer alternative career opportunities. The following preveterinary medicine courses are required.

<table>

Allied Health Fields

Students planning to enter one of the other health fields can satisfy the minimum admission requirements for the respective units of The University of Tennessee, Memphis, by completing one of the following programs. These programs by themselves do not lead to a degree from The University of Tennessee at Chattanooga. Students wishing to do so, however, may count any of these courses completed at The University of Tennessee at Chattanooga as part of the total hours required for a baccalaureate degree if they decide to continue toward a major offered by UTC.

Cytotechnology

Three years of preparation (90 semester hours) are required for admission to this program at The University of Tennessee, Memphis. The program of study must include the following courses or their equivalents:

<table>
<thead>
<tr>

Courses in mathematics 135, 145; social sciences; organic chemistry; and advanced biology such as genetics, embryology, or cell biology strongly recommended. A year of American history in either high school or college is required for the degree program at UT, Memphis.
Honors and Honor Societies

General University Honors

An undergraduate student will be graduated cum laude when the student's cumulative grade point average as well as UTC average at the end of the final semester is 3.25. With an average of 3.5 both cumulative and at UTC, the student will be graduated magna cum laude. The student with the highest average will be graduated summa cum laude if his or her average is at least 3.75. These honors will be inscribed on the diplomas.

Effective with the graduation class of December 1987, eligibility for general university honors will be changed as follows on both the cumulative grade point average and on the UTC average: cum laude—3.5, magna cum laude—3.75, summa cum laude—3.9 minimum but restricted to the student with the highest average in the graduating class. More than one summa graduate will be recognized in the event of a tie. These standards will apply to all those who are graduated in December 1987 and later regardless of the catalog under which the student entered.

William E. Brock Scholars Program

Brock Scholars are those students who have been awarded membership in one of the University's most prestigious honors programs. This program attempts to create an atmosphere, both academic and social, in which its members may develop their capacities for intellectual, moral, and social leadership. The program's goal is a community of scholars, at various levels, benefiting from each other's work and providing the University and the community with ideas and new ways to excellence.

In order to achieve this goal, the program provides scholars with a general education curriculum tailored to their, talents and needs (see page 108); an integrated program of cocurricular activities; an advisement system that enables each scholar to derive the greatest benefits from the University's resources; membership in a highly visible and respected group; and a four-year financial scholarship award. In addition, Brock Scholars are recognized as such at graduation and at other official University functions.

Each year the program admits to membership some 20 freshman students. Applicants are expected to have demonstrated outstanding achievement and promise in high school. Continuance is reviewed each year and is contingent upon the scholar's academic performance, upon the recommendation of the director, and upon the approval of the University's Scholarship Board.

The Brock Scholars Program is open to adult students with freshman status who otherwise qualify. UTC faculty and staff are encouraged to recommend candidates. Interested adult students should inquire at the Honors Office.

For further information or application form, write Dr. Robert C. Fulton III, Director, William E. Brock Scholars Program, The University of Tennessee at Chattanooga, 615 McCallie Avenue, Chattanooga, Tennessee 37403.

Departmental Honors

The Departmental Honors Program allows exceptional students to receive special recognition for their academic achievements. Departmental honors is bestowed upon students who have maintained high academic standards in their course work, have completed an acceptable honors thesis, and have achieved an honors pass on an oral examination. Graduation with departmental honors is recorded on the permanent academic record and on the diploma.

The departmental honors thesis allows each honors candidate to deepen knowledge and increase skills in a special discipline. Original literary analysis, scientific experimentation, artistic expression, or other demonstration of superior proficiency or creativity are normally acceptable forms of expression for the thesis. The thesis will include an approximately two-page abstract in language intended for the intelligent and educated non-specialist. The thesis will be defended by means of an oral examination administered by the major department. The oral defense will be on the thesis and related underlying issues of the discipline.

The chair of the departmental honors committee will appoint for each candidate for honors a member of the departmental honors committee to act as liaison. This member will be kept informed of progress by student and department, will see a copy of the rough draft of the honors thesis, and will sit as a nonvoting member on the oral examination concerning the thesis.

Interested students shall consult with their advisers or departmental heads prior to the beginning of the senior year. The honors program is a two-semester program and should require substantially more work than would be required for the four hours granted were they in regular courses or other independent study courses. Formal application to departmental honors candidacy must be made by the first school day in March for students working in summer and fall or fall and spring terms and by the first school day in November for students working in spring and summer or spring and fall.

Forms for admission to departmental honors candidacy can be obtained from the director of the honors program, 202 Guerry Hall. After the director of records has certified the candidate's academic standing and grade point averages, the application is submitted to the head of the department by which honors is to be granted.

A student is not formally accepted in departmental honors until he or she receives notice in writing that the faculty council has approved the student's application.

Each candidate must have a copy of current guidelines and is responsible for following the guidelines. Copies are available from the director of the honors program.
Honors can be obtained from the department or from the secretary or chair of the departmental honors committee. A progress report to the adviser and the chair of the departmental honors committee is due the Monday one week before the last week of classes in the first term of the two terms' work. The progress report must be approved by the adviser before it is sent to the departmental honors committee.

Departmental honors is normally work done by an individual. Joint interdisciplinary projects may be applied for when the work clearly involves students in different disciplines and when certain monitoring procedures are observed. Each such case will be decided on its merits by the departmental honors committee.

Admission to, and continuance in, the program requires an overall grade point average of 3.2 and a grade point average of 3.5 in the major field. Each departmental honors candidate must complete four full semesters (or a minimum of 48 semester hours of course work) at UTC prior to graduation. Honors work will receive four semester hours of credit in the appropriate courses, normally courses numbered 495r, the distribution of hours in the two terms to be one of the following options only: 1-3, 2-2, 3-1. A grade may be given for the first term or postponed by giving an IP (In Progress), which grade is to be replaced by another grade by the end of the following regular semester. The credit hours so earned will count for graduation whether or not honors is conferred. Credit earned in departmental honors courses will not be calculated as part of the 42-hour maximum in the major.

Any student who has a grade point average of 3.75 in his or her major and 3.5 overall through the next-to-last semester may become a candidate for highest honors. Standards for the thesis and departmental examination for highest honors appropriately reflect the nature of the superlative designation.

**Golden Key** is a national honor society for all juniors and seniors, either full or part time, who have been at UTC for one year and who have maintained at least a 3.3 grade point average.

**Mortar Board**, a national honor society for senior women and men, elects to membership those who at the end of their junior year have a minimum grade point average of 3.0 and who have demonstrated outstanding ability in leadership, scholarship, and service to the University.

**Phi Eta Sigma**, national honor society for men and women, elects to membership those freshmen who have a 3.5 average on at least 12 graded hours in the first semester or a cumulative average of 3.5 at the end of the freshman year.

Honor societies in specific areas include:

- **Alpha Mu Alpha** (marketing)
- **Beta Beta Beta** (biology)
- **Beta Gamma Sigma** (business administration)
- **Beta Sigma Tau** (engineering)
- **Delta Omicron** (music)
- **Delta Tau Omega** (geology)
- **Gamma Sigma Epsilon** (chemistry)
- **Kappa Delta Pi** (education)
- **Kappa Omicron Phi** (home economics)
- **Lambda Alpha Epsilon** (criminal justice)
- **Lambda Iota Tau** (literature)
- **Omicron Delta Epsilon** (economics)
- **Phi Alpha Theta** (history)
- **Pi Delta Phi** (French)
- **Pi Gamma Mu** (social sciences)
- **Pi Mu Epsilon** (mathematics)
- **Psi Chi** (psychology)
- **Scabbard and Blade** (military science)
- **Sigma Delta Pi** (Spanish)
- **Sigma Iota Epsilon** (business management)
- **Sigma Pi Sigma** (physics)
- **Sigma Theta Tau** (nursing)
- **Sigma Xi** (sciences)

---

**Academic Recognition and Honor Societies**

The University recognizes scholarly achievement in a number of ways. The dean’s list includes each semester the names of all students who achieve an average for the semester of at least 3.2 with a registration of 6 graded hours or more.

Academic achievement, either in general or in specific fields, is recognized by a number of organizations:

- **Alpha**, the scholastic honor society of The University of Tennessee at Chattanooga, elects to membership seniors who have maintained a very high scholastic average. Election is by vote of the faculty members of Alpha.

- **Alpha Lambda Delta**, national honor society for women and men, elects to membership those freshmen who have a 3.5 average on at least 12 graded hours in the first semester or a cumulative average of 3.5 at the end of the freshman year.

- **Blue Key** is a national recognition society for men and women.
Graduate Studies

The Graduate Division is the administrative unit which coordinates and supervises activities relating to the graduate degrees offered by The University of Tennessee at Chattanooga.

Graduate offerings at UTC are designed to provide opportunities for both part-time and full-time graduate students. Classes for full-time graduate students in business administration, criminal justice, computer science, education, and music are scheduled in the evenings; classes in psychology are usually offered during the day.

During the summer semester, education students can plan on full-time study in day classes. Graduate courses in business administration and criminal justice are offered primarily during evening hours in the summer.

For more information concerning a specific degree program, please refer to the appropriate department and the UTC Graduate Bulletin.

For application material, write

Director of Graduate Studies
114 Race Hall, UTC
615 McCallie Avenue
Chattanooga, Tennessee 37403

Admission Procedures

Anyone holding the baccalaureate or higher degree who wishes to take courses must make formal application for admission through the Graduate Office. Those who do not qualify for graduate admission or who elect to pursue a second bachelor's degree may be admitted as post-baccalaureate students.

To insure adequate consideration, the completed application and supporting credentials should be received by the Graduate Office no later than one month prior to the beginning of the semester for which admission is desired. An applicant for admission must furnish the following materials to the Graduate Office:

1. A completed, signed application on the form provided by UTC.
2. Payment of the $15, nonrefundable, application fee.
Graduate Admission Requirements

An applicant for admission to the Graduate Division must hold a baccalaureate degree from a regionally accredited college or university and (1) have a minimum grade point average of 2.5 (based on a 4.0 scale) on all undergraduate work taken prior to receiving the baccalaureate degree or (2) a 3.0 in the senior year or (3) qualify for graduate admission by earning a B+ average on 9-12 hours of 300 or 400 level courses since graduation. Scores must be submitted on the appropriate admissions test if the applicant is seeking admission to a degree program.

An applicant for admission to a degree program should refer to the appropriate school or department for specific admission requirements since some degree programs require a higher academic average, additional admission requirements, or utilize a formula for determining admission.

In addition to the above requirements, an applicant whose native language is not English must have earned a minimum score of 500 on the Test of English as a Foreign Language.

UTC Seniors

A senior who is within 30 semester hours of completing requirements for the bachelor's degree at The University of Tennessee at Chattanooga may apply for admission to graduate courses if the applicant has an overall grade point average of 3.0 (B) and is recommended by the head of his or her major department. Subject to the approval of the director of graduate studies, a student may earn up to six semester hours graduate credit prior to completing the bachelor's degree. Such approval must be obtained each semester by completing the special application form which is available in the Graduate Office. The approved application must be submitted at the time of registration.

Admission Classifications

Several admission classifications are used by the Graduate Division. The applicant should apply for admission according to the one classification which applies to his or her educational objective. International students, however, must apply for admission as degree students only.

Auditor

Applicants with a bachelor's degree who wish to attend classes without earning credit or receiving grades may be admitted as auditors. A graduate application and transcripts are required. Individuals may register as auditors provided space is available in the class desired and if the instructor accepts auditors. The extent to which an auditor may participate in classroom activities is within the jurisdiction of the instructor. Fees for audit are the same as for credit registration.

Degree Graduate

Admission to a degree program is by departmental approval only. Thus, an applicant who wishes to be admitted as a degree graduate must file an application, transcripts, MAT, GRE, or GMAT scores and supplemental application materials far enough in advance to allow for evaluation by the department or school. The evaluation will include a review of the applicant's undergraduate program and the specification of any prerequisite courses needed to insuare adequate background for the graduate program. In addition to the above requirements, international students must submit a TOEFL score.
Graduate—35

Nondegree Graduate
An applicant who meets graduate admission requirements and wishes to enroll in graduate or undergraduate courses to earn credit without reference to a graduate degree program will be admitted as a nondegree graduate student.

A student classified as nondegree who subsequently wishes to be admitted to a degree program must file a formal request for this change with the director of graduate studies. In addition, the student must submit supplemental application materials as required for the proposed degree program. A maximum of 9 semester hours earned as a nondegree student will be applied toward graduate degree requirements. The Graduate Division cannot assure a student classified as nondegree that any work completed in this status will apply toward a degree.

Post-master's Graduate
An applicant who has a master's or terminal degree from an accredited institution and who is not working toward a degree may be admitted as a post-master’s graduate student. A graduate application, application fee, and transcripts from the university which awarded the master's or terminal degree are required.

Provisional Graduate
An applicant who meets graduate admission requirements but whose file is incomplete may be admitted as a provisional graduate student. This type of admission is valid for one semester and may not be renewed. Further, the provisional graduate must have his or her file completed by the fifth week of the semester or second week of the summer term he or she enrolls. In the event the student fails to complete the graduate file on the specified date, the student will not be permitted to register for a future term.

Transient Graduate
An applicant who has been admitted to a graduate program at another institution and wishes to take courses for transfer to that institution may be admitted as a transient student. A graduate application, application fee, and letter of good standing or certificate of transient admission are required. The letter of good standing or certificate of transient admission must be signed by the graduate dean or major adviser at the institution where the student is pursuing his or her graduate degree.

Upon completion of approved courses, the student should request that the UTC Office of Records forward a copy of his or her transcript to the appropriate institution.

Post-baccalaureate Admission
Post-baccalaureate is an undergraduate admission classification which indicates that the applicant has a baccalaureate degree.

1. A student who does not qualify for graduate admission because of an inadequate grade point average may use post-baccalaureate status to demonstrate that he or she can do acceptable work. The attainment of a B+ average (an average greater than 3.0 on a 4.0 scale) on nine to twelve hours of 300-level or 400-level courses recommended by the proposed major department may be accepted as evidence for admission to graduate study, provided all other requirements are met. Upon earning the required grade point average, the student must reapply for admission to graduate study and complete the admission procedures as specified for the proposed degree program. It should be noted that admission as a post-baccalaureate student allows the student to demonstrate ability but does not guarantee admission to a degree program. In addition, courses completed under post-baccalaureate admission may not count toward a graduate degree.

2. A student who has received one bachelor's degree may receive a second bachelor's degree provided that all specific requirements for both degrees are met, that the curriculum for the second degree includes at least 30 hours (with a 2.0 average) not offered for the first degree, and that an additional year is spent in residence.

3. A student who wishes to take only undergraduate courses for education certification or other purposes may also be admitted in post-baccalaureate status.

Readmission
Any student whose attendance has been interrupted for one or more semesters (excluding the summer session) must apply for readmission to the University. A new graduate application must be submitted prior to the beginning of the semester or summer term in which admission is desired.

Due to the competitive nature of some degree programs, readmission as a degree graduate may require departmental approval. In addition, graduate students who have not been admitted to candidacy must follow the regulations in effect at the time of admission to candidacy.

Graduate Admission Tests
Applicants who request admission to a specific degree program must submit a report of scores from the appropriate admission test. The scores must be no more than five years old. The admission tests (except for TOEFL) are administered several times each year by the UTC Test Supervisor, 30 Founders Hall. Applicants should schedule all examinations well in advance of the date on which they wish to enter graduate study.

The Miller Analogies Test (MAT) is required for applicants to master’s programs in criminal justice, education, music, psychology, and public administration.

The Graduate Management Admissions Test (GMAT) is required of applicants for graduate study in business administration. Information about this test and application forms are available upon request from the Counseling Center or Educational Testing Service, Box 966, Princeton, New Jersey 08540. A score of 450 is required for all prospective international students.
The Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English. A score of 500 must be submitted before action can be taken on the application. Information about this test and application forms are available upon request from Educational Testing Service, Box 899, Princeton, New Jersey, 08540, USA.

All applicants should note that Educational Testing Service reports GRE, GMAT, and TOEFL scores to institutions named by the applicant at the time he or she applies for the test. A fee is charged for later requests. Each applicant is individually responsible for requesting an official copy of the scores from Educational Testing Service. Requests for additional reports of MAT scores should be directed to The Psychological Corporation, 7500 Old Oak Blvd., Cleveland, Ohio 44130.
STUDENT LIFE

38 Student Activities
39 Student Services
41 General Regulations
42 Alumni Association
Student Activities

Athletics
As a member of the Southern Conference, the University maintains a vigorous intercollegiate athletic program with varsity teams in basketball, tennis, football, rifle, soccer, wrestling, and golf. The University also has women’s intercollegiate athletic programs in basketball, volleyball, golf, and tennis.

Facilities for support of these programs are excellent. Chamberlain Field is adapted to various forms of outdoor athletics. The stadium and permanent bleachers have a seating capacity of 12,000. Scrappy Moore Field is a regulation football practice field.

The DeSales Harrison Racquet Center, which is located adjacent to the Student Village, houses two indoor tennis courts and seven racquetball/handball courts.

The Manker Patten Tennis Center, located at the north end of Douglas Street along the Tennessee River, features eight Teneco courts and two indoor courts that are available for UTC varsity teams throughout the year. The courts are used for local and regional tournaments.

Maclellan Gymnasium, constructed in 1965, provides facilities needed for the University’s physical education program and various varsity sports. The UTC Arena seats 12,000 and provides modern facilties for both athletic and entertainment events.

Cultural Opportunities
The University’s departments and organizations sponsor many musical and artistic activities for the University community and the Chattanooga area. Conversely, its urban location makes available to the student the cultural resources of the city: the symphony, opera, art gallery, community concerts, and theater.

Both classical and modern plays are presented each year by the University Theatre, an organization open to students and faculty as well as members of the larger community. Students may participate as performers and crew members in these presentations.

Students interested in musical activities may choose from a variety of organizations. Vocalists may perform in the Chattanooga Singers, Chamber Singers, Singing Mocs, Choral Union, and Opera Workshop. Instrumentalists can play in the Marching Band, Concert Band, UTC Orchestra, Jazz Band, Brass Ensemble, Wind Ensemble, Percussion Ensemble, and chamber music groups.

Students may also audition to perform in the Chattanooga Symphony or the Chattanooga Opera Association.

Under various auspices, outstanding speakers are brought to the campus each year. Prominent among these programs is the Keese Lectureship, established by W.S. Keese Jr. in memory of his mother and father. Each year the Keese Lecture is delivered by a distinguished figure in the field of the humanities and the fine arts. Seminars and discussion groups explore the nature of society, law and government, questions of national and international policy, and the responsibilities of the individual.

Fraternities and Sororities
The University has chapters of eight national fraternities and seven national sororities that individually and collectively, through the Interfraternity Council and Panhellenic, contribute to the social and cultural life of the campus. Many traditional events—the All-Greek Show, Blue Key Follies, and Greek Week—are supported by these groups.

The sororities Alpha Delta Pi, Alpha Kappa Alpha, Chi Omega, Delta Sigma Theta, Pi Beta Phi, Sigma Gamma Rho, and Zeta Phi Beta have chapters on the UTC campus.

Fraternities at UTC include Alpha Phi Alpha, Alpha Tau Omega, Kappa Alpha Psi, Kappa Sigma, Lambda Chi Alpha, Omega Psi Phi, Pi Kappa Alpha, and Sigma Chi.

Intramurals
The University has an outstanding program available to all students, faculty, and staff. The program includes flag football, tennis, handball, water basketball, swimming, volleyball, basketball, racquetball, badminton, wrestling, softball, golf, and weight lifting.

Facilities for tennis, swimming, wrestling, handball, racquetball, and water basketball are excellent. A lighted intramural field is also available.

Publications
The University Echo, the campus newspaper, provides a continual flow of news and opinion concerning campus activities. The Moccasin is the student yearbook, which presents in text and photographs a record of the academic year. The Sequoya Review provides a selection of poetry, prose, art, and photography from the University community. Under the general direction of the Publications Board, these publications are staffed and managed by students.

Recreation
Through the use of facilities located in Maclellan Gymnasium, DeSales Harrison Racquet Center, and the arena, recreational activities are available to students, faculty, and staff. Facilities are open for recreational use when not otherwise scheduled for class or departmental use.

Religious Life
The interest of the University in the religious life of the community is expressed in the existence of denominational centers and groups on campus, occasional religious services, and lectures by representatives of different faiths. Both Patten Chapel and the small Danforth Chapel offer appropriate settings for worship services.

The Baptist Student Union, United Methodist Student Center, Catholic Center, Presbyterian Campus Ministry, and Christian Student Center (Church of Christ) are
centers on campus staffed by persons trained in theology and counseling who seek to minister to the religious needs and interests of the students and the community. Other religious groups are B’nai Brith Hillel, the Christian Science Organization, the Moccasin Christian Fellowship, Seventh Day Adventists, Lutheran, Episcopal, and Christian Church.

Student Government Association
The student’s single campus-wide representative organization is the SGA, which works to protect student rights, promote progressive change in University policies, and provide services for students. Meeting weekly, the Senate acts as the legislative arm of the students, with its elected membership constantly concerned with any and all actions of the University which affect the lives of students. Entertainment and educational programs are also provided for the students by the SGA.

The University Center Association for Campus Entertainment
The Association for Campus Entertainment (ACE) in its advisory role to the University Center staff assists in the development of a broad range of activities for the campus. It is the intention of the association and staff to serve the campus community by providing entertainment activities. Students are encouraged to become members of ACE and participate in planning events through various committees.

Involvement with ACE provides a student with the opportunities to develop leadership skills and to promote campus life. Freshmen are eligible to become ACE members. Interested students should contact the University Center director or the president of ACE.

Bookstore
Located in the Guerry Center, the University Bookstore is a service-oriented function of the University. Textbooks, both used and new, are supplied for all courses. Paperbacks, art and engineering supplies, campus wear, and health and beauty aids are among the many kinds of merchandise stocked by the store. Students may purchase gift items, magazines, greeting cards, school supplies, and many other items at this location.

Check Cashing Service
The bookstore provides a check cashing service and also honors MasterCard and Visa.

College Access Program
The College Access Program is designed to provide support services for college-level learning disabled students at UTC. It is required that students either have documented certification of the learning disability or request CAP diagnostic evaluation.

CAP will provide counseling, tutorial support, diagnostic services, and career counseling for those students who are eligible.

For further information, contact the CAP director in Holt Hall, Room 311.

Counseling and Career Planning
The services of the Counseling and Career Planning Center are available to students, alumni, faculty, and staff. Professionally trained counselors provide assistance in resolving personal, vocational, developmental, transitional, and emotional concerns. The staff also assists the center clientele to explore career and curricular alternatives, as well as maintains resources on careers, graduate opportunities, and other growth and development issues. The center sponsors and cosponsors developmental and educational programs on a variety of issues such as assertion training, values clarification, career and life planning, interpersonal communication, stress management, and other topics. All services are confidential. The services are available without charge, with the exception of testing.

Food Service Facilities
The University-operated Food Services provide meals and snacks in the University Center cafeteria and grill. Food Service credit cards are available; otherwise, all purchases are cash.
Student Life

Handicapped Student Services

On June 3, 1977, Section 504 of the Rehabilitation Act of 1973 became effective. Specifically, as it pertains to the academic and program aspects of colleges and universities, Section 504 prohibits discrimination against handicapped individuals. It mandates that adjustments and accommodations be made in programs and activities in order to provide qualified handicapped persons with opportunities equal to those enjoyed by the qualified nonhandicapped.

The director of affirmative action has the responsibility of assuring University compliance with Section 504. The University is working toward better integration of services for handicapped students within the regular student service system. Dean Betty J. Tucker assists in these matters. Handicapped students desiring assistance should contact Tucker in Student Affairs, 215 University Center, (615) 755-4761.

Health Services

Emergency first aid service under the supervision of a registered nurse is available to all members of the University community during regular business hours. For those on the voluntary University Health Plan (which includes all dormitory residents) a physician makes on-campus sick calls three days a week. In addition, the voluntary health plan covers the cost of the physician's services for the first visit only in those emergency cases referred to the medical center, which is adjacent to the campus. The student is responsible for other expenses, such as surgery, laboratory, and medicine.

Additional services or hospitalization are not covered by the voluntary University Health Plan. The University recommends that the student obtain separate hospitalization and medical insurance. A voluntary student insurance plan is available through the University that covers a schedule of expenses for surgery and hospitalization in case of accident or illness. The insurance plan should be requested at the time of registration. Information is available at the insurance desk as the student pays fees, and also in the Student Health and Student Affairs Offices. This plan is particularly useful for parents whose family policy does not cover the dependent child after the 19th birthday.

Housing

The University feels that a valuable part of college life is living for a period of time in close association with others following academic pursuits. Accommodations are designed and maintained to assure the safety and comfort of the residents at a cost that is within the reach of today's student. Programs and personnel are selected to enhance the academic achievement and personal development of the persons who live in these units.

Applications for both men's and women's residence halls may be obtained from the Housing Office. Housing contracts are a commitment for the academic year, August to May, or for shorter periods as required by midyear registration or certain special academic programs, if arranged for in advance. Only if a student withdraws from the University is a housing contract cancelled, and then in accordance with policies stated in the contract.

On-campus housing includes the Student Village and the Oak Street Apartments, both single-student apartment complexes; Pfeiffer Hall; Stagmaier Hall; and the Vine Street Dorm.

The Village houses 416 men and women students in apartments of four people each. It is carpeted, air conditioned, and surrounded by parking and recreation areas. Each apartment contains four single bedrooms, a living room, and a kitchen area.

The Oak Street Apartments have accommodations for 400 men and women students. Each apartment has two double-occupancy bedrooms, a living room/kitchen area, and a bath. Upper floors have access to balconies.

Pfeiffer Hall houses approximately 70 students; Stagmaier Hall provides housing for 150 students. Stagmaier Hall features four-person suites containing two sitting rooms, two bedrooms, and a bath.

The Vine Street Dorm is a traditional facility with double rooms off a common hall.

Lounge and reception areas are available for recreation and visiting. All halls are air-conditioned. Laundry facilities with ticket-operated automatic washers and dryers are available for use by the students. Each student is normally furnished a bed, desk, chair, and dresser. Residents are expected to bring their own linens, blankets, towels, mattress covers, trash cans, and pillows. All rooms provide lighting, but frequently additional desk lamps are furnished by the student to suit particular needs.

Students may use small electrical appliances such as radios, hair dryers, and clocks in their rooms but are not permitted to use hot plates, percolators, popcorn poppers, immersion heaters, or other cooking equipment.

The University offers a program of differentiated housing which allows students the option of living in facilities with different types of programming and supervision. Further information concerning the details of these plans is available from the Housing Office and is sent with the housing application.

I.D. Cards

The University provides each student with an official University I.D. card. This card is used to check out books from the library, to obtain special rates and privileges at many University functions, and to indicate the individual's right to use University facilities.

I.D. cards for new students are made at registration and distributed free of charge. Replacement cards cost $2. Lost I.D. cards should be reported to the Student Affairs Office immediately. Validation stickers are issued each semester and are placed on the back of the I.D. card. One card is intended to last throughout a student's entire stay at the University.

Placement Services

Located in the University Center, the Placement and Student Employment Center assists degree candidates, alumni, and students in securing full- and part-time employment. The service is free and available year round.

Degree and nondegree job orders are placed on the bulletin board in the Placement Center for students to peruse at their convenience. Part-time jobs—as well as typing, tutoring, and baby-sitting jobs—are posted. Students should register with the center early in their final year to take advantage of the employment recruiting
season, the center’s *job Opportunities* bulletin, and various seminars and workshops. Individual employment counseling is also available.

**Student Handbooks**

Distributed at the beginning of each academic year, the *Student Handbook* provides detailed information on student services. It also contains information on the Student Government Association and specific rules for the purpose of regulating campus life. These rules are stated in the Honor Code, Student Conduct Code, and other codes regulating groups.

**Student Tickets**

A validated student ID card with a picture, as described on page 40, provides admission to the regular season home football, basketball, and wrestling events. These seats are in the student section and are not reserved. Students take these seats on a first-come basis and the number of seats in the student section is limited to a specific figure.

*Student guest tickets:* A student may purchase a guest ticket at a discount price to each home football and basketball game. These tickets may be purchased at the University Center Ticket Office. The guest must sit in the student section.

*Spouse tickets:* A student may purchase a spouse or guest ID with a picture for $15 per semester. These may be purchased at the University Center Ticket Office.

**Family Educational Rights and Privacy Act**

A student’s record is regarded as confidential, and release of the record or of information contained therein is governed by regulations of the federal law on “Family Educational Rights and Privacy.” Only directory information, such as a student’s name, address, telephone listing, birthplace and date, major fields of study, participation in officially recognized activities and sports, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student, may be released by the institution without consent of the student unless the student has asked UTC to withhold such information. The law also provides for the release of information to University personnel who demonstrate a legitimate educational interest, other institutions engaged in research (provided information is not revealed to any other parties), and certain federal and state government officials.

A student may inspect and review records and is entitled to challenge the content of records. However, the student may be denied access to a parent’s financial statement and to confidential letters and statements of recommendation which were placed in the University’s records prior to January 1, 1975.

A more thorough explanation of records maintained on students and copies of records may be obtained from the Office of Records. The director of records or the dean of admissions and records will further explain and clarify the Family Educational Rights and Privacy Act to students, parents, or interested parties upon request.

**Honor Code**

The Honor Code is based upon the assumption that the student recognizes the fundamental importance of honesty in all dealings within the University community and that education is a cooperative enterprise between student and teacher and between student and student. Any act of dishonesty violates and weakens this relationship and lessens the value of the education which the student is pursuing. The Honor Code and the Honor Court and its procedures are detailed in the *Student Handbook*.

**Records**

The Office of Records maintains a permanent record on any student who has ever attended UTC. This record currently includes the student’s name, social security number, address, birthdate, sex, high school and high
school graduation date, admission classification, and credits transferred from other colleges. It includes all courses which a student has taken at UTC with credit hours, grades, and cumulative grade point average. Academic suspension or dismissal is recorded as well as academic probation.

Transcripts
Transcripts of a student's record are released only on the student's written authorization. A student is entitled to one transcript without charge; thereafter, $1 is charged for each subsequent transcript. Requests should be made to the Office of Records in advance of the date on which the transcripts are needed.

Transcripts are not released for students who have an indebtedness of any type to the University or who owe any fines.

Vehicle Operation and Parking
Each person—student, faculty, or staff member—who operates a motor vehicle while at the University must register that vehicle with the Business Office. A University parking authority determines the parking policy, traffic regulations, and fees. This information is published each year in the University Traffic and Parking Regulations.

The large volume of vehicles operated on campus requires strict adherence to the traffic and parking regulations. Therefore, a system of fees for violations of these regulations is enforced by the University. Copies of the Regulations are available each semester at the time students, faculty, and staff apply for parking permits.

Parking Decals
Reserved decals are sold in the fall semester on the first official day of fee payment on a first come basis. One decal is sold per space for each lot.

General decals are sold in the fall semester on the first official day of fee payment. The general decals are oversold in relation to the lots due to the fact with a general decal one may park in any general lot.

In the spring and summer semesters the decals are sold on an availability basis.

When the University of Chattanooga became a major campus of The University of Tennessee on July 1, 1969, all former students and graduates of UC automatically became members of the UT National Alumni Association, which encompasses alumni from all campuses of The University of Tennessee.

The UT National Alumni Association is administered by a board of governors drawn from alumni of all campuses. The Chattanooga campus is represented on this governing body by the UTC chancellor, three UTC alumni, and the president of the UTC Student Government Association.

The UTC Alumni Council, whose membership is limited to those who attended the Chattanooga campus, exists to establish a mutually beneficial relationship between the Chattanooga campus and its alumni. The council sponsors all alumni activities on the Chattanooga campus. The UTC Alumni Council maintains its offices at 605 Oak Street on campus.

UTC alumni are represented on the University of Chattanooga Foundation Board by three alumni trustees, one elected each year by the council to serve three years on the board.

In an effort to acquaint students with the activities, goals and purpose of the Alumni Council, the Association sponsors the Undergraduate Alumni Council. This group is comprised of thirty students who work with the Offices of the Chancellor, Development, and Alumni to promote the University to the community and to act as a liaison between the alumni and UTC students. Application for membership in the Undergraduate Alumni Council may be made in the Alumni Office.

Records on file in the Alumni Office include the current addresses of graduates and, upon request, former students who have completed 24 hours of credit. When available, information about later achievements is added to the records and is included in UTC alumni publications, which are mailed to UTC alumni throughout the nation and many foreign countries.

Usage Notes

The letter r following a course number means that, because of a difference in content from semester to semester, a class may be taken more than once for credit. Example: Art 205r.

A capital letter (A, B, C, D, F, or G) prefixed to a course number means that that course can also be used to satisfy the general education requirement of the category indicated. Example: Mathematics F136.

Category E does not apply to the revised general education requirements (effective for new students entering fall 1982) and has been intentionally left out.

Health and Physical Education 021 plus one additional semester physical education activity

Foreign language through second college year

### Major

66 hours art including 101,105,106, 205r, 206r, 207,208,305r or 306r, 333, 334, 498r: 12 hours from 211, 212, 213, 414, 431, 432.

Student must complete one area of concentration as follows:

- **Painting:** 205r or 206r, 307r, 308r
- **Graphic Design:** 209, 281, 305r or 306r (whichever course not taken above), 309
- **Sculpture:** 227, 343, 344r, 433r (six hours)

Remaining hours in art to total 66

Maximum 12 hours in any one "T" course

2.5 GPA minimum in art courses

Participation in senior art show

9 additional hours other than art in supporting courses from the College of Arts and Sciences beyond general education requirements

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

### Typical courses of study in art (B.F.A.)

- 51 hours art including 101, 103, 105, 106, 205r or 206r, 207, 208, 227, 305r, 323, 324, 333, 343, 490r; 6 hours from 211, 212, 431, 432; 3 hours from 213, 414
- Participation in senior art show
- 33 hours from the School of Education including EDCI 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438; Special Education 333
- For graduation: 2.0 average in art and 2.0 average in School of Education courses
- For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

### Typical course in Art (B.F.A.): art education

**First Semester**
- **Freshman**
  - General Education Category A
  - Mathematics F120
  - General Education Category D
  - Physical Education 021
  - Art 106 Drawing

**Second Semester**
- **Sophomore**
  - General Education Category A
  - Mathematics F120
  - General Education Category D
  - Physical Education 021
  - Art 106 Drawing
Art Courses

101 Visual Fundamentals (3)
   Studio experience with visual and tactile components of two and three dimensional composition. Consideration of line, shape, value, texture, and color as design elements. Every semester.

103 Introduction to Art Education (3)
   Examination of a broad range of historical and philosophical issues in art education. Designed to help the student discover values in art education. Lectures, readings, reports, and discussion. On demand.

105, 106 First Year Drawing (3,3)
   Introductory work in drawing and pictorial composition using basic drawing media. Primary emphasis on observation, analysis, and interpretation through use of line, value, and spatial determinants. 105 fall/106 spring semester. Studio hours 6. Courses are sequential: 705 prerequisite to 706.

111 Introduction to Art (3)
   Consideration of the formal elements, design principles, and technical factors of significance in the production of works of visual art. Examination of selected works representative of a broad range of functions, forms, styles, and artistic intentions. Comparisons between works of different periods. Designed to heighten perception, appreciation, and enjoyment of the visual arts. Every semester.

199r Special Projects (1-4)
   Every semester.

205r, 206r Advanced Drawing (3,3)
   Figure, landscape, and still life subjects approached from the standpoint of their compositional and expressive possibilities. Experimentation with various media. Study of art anatomy. 205 fall/206 spring semester. Prerequisites: 101, 705, 706.

207, 208 Painting and Composition (3,3)
   Painting of still life, landscape, and abstract compositions in oil emphasizing color relationships and composition as essential means of pictorial expression. 207 fall/208 spring semester. Prerequisites for art majors: 707, 705, 706. Courses are sequential for art majors; 207 prerequisite to 208.

209 Typographic Design and Layout (3)

211 Prehistoric through Medieval (3)
   The arts of the prehistoric, ancient Near Eastern, Egyptian, Greek, Roman, Early Christian, Byzantine, Romanesque, and Gothic periods. Fall semester.

212 Renaissance through Romanticism (3)
   Renaissance, Baroque, Rococo, Neo-Classicism, and Romanticism. Spring semester.

213 Realism to the Present (3)
   Realism, Impressionism, Post-Impressionism, Expressionism, Fauvism, Cubism, Dada, Surrealism, Abstract Expressionism, and various other post-World War II styles. Fall semester.

222 Teaching Art Appreciation in the Elementary Classroom (3)
   Emphasizes importance of art appreciation in the public school at the elementary level. Focus on teaching skills appropriate for the appreciation of the visual arts. Application of traditional and new media at the elementary level of instruction. Every semester.

223 Teaching Art Appreciation/Field Experience (1)
   The application of teaching skills related to the appreciation and knowledge of visual arts for the elementary age child through field experiences and seminars. This course will concern itself with curricular and media development. Every semester. Prerequisite: 222.

227 Introduction to Crafts (3)
   Studio work in a number of craft areas: metals, fibers, and clay. Discussion of historical and contemporary trends in crafts. Fall semester alternate years. Studio hours 6.

General Education

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than art: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Foreign language through second college year

Major
40 hours art including 101,105,106,205r or 206r, 207,208,305r or 306r, 333 or 334,498r; 9 hours from 211,212,213,414,431,432; 3 additional hours from 227,333,334,343,433; 3 additional hours from 209,281,305r,306r Participation in senior art show 2.0 average in all art courses

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

Minors

Studio Art (21 hours):
Art 101,105,106, 207, 305,333; 3 hours from Art 227, 343

Graphic Design (21 hours):
Art 101,105,106, 209; Communication 110; 6 hours from Art 281, 305r, 306r, 309, 310r, 381r, Communication 367,465 (Communication majors may not use courses required in their concentration; other courses may be elected from the above group to total 21 hours.)

History of Art (21 hours):
Art 211, 212, 213; 6 hours from Art 414,431,432; 6 hours from American Studies 200; Classics 396; English 203, 204; History 318, 319, 337, 338; Music 315, 316; Theatre & Speech 211, 212; Philosophy 336

TOTAL 128

Art (B.A.)

General Education (see pages 25-27 for list of approved courses)
228 Advanced Crafts (3)
A continuation of Art 227, allowing for more advanced work in selected craft materials and techniques. On demand. Studio hours six. Prerequisite: 227.

250 Graphic Design for Publications (3)
Studio experience in the elements of publication design. Introduction to layout and graphic reproduction techniques used in the print media. Application of typography in communication graphics. Management of print production. (For the nonart major). Fall semester. Studio hours 6. Prerequisite: Communication 110.

251 Photography for Publications (3)
Introduction to black and white photography with an emphasis on photo journalism. Basic camera operation, film processing, and darkroom printing. (For the nonart major). Adjustable lens camera with electronic flash required. Spring semester. Credit not allowed in both Art 251 and 281.

281 Basic Photography (3)
Introduction to black and white photography as an art form with emphasis on composition. Basic camera operation, film processing, and darkroom printing. Adjustable lens camera required. Every semester. Prerequisites: Art 101 for Art and Communication majors. Credit not allowed in both Art 281 and 251.

301 Art Structure
Slides, demonstrations, and studio experience in drawing, painting, sculpture, and other visual arts. Exposure to selected works of art through exploration of techniques and approaches designed to increase the student's understanding of art, particularly of contemporary styles. Every semester. For the nonart major.

305r Printmaking: Intaglio and Relief (3)
Work in single and multicolor intaglio, including line etching, and aquatint. Block and woodcut methods. Fall semester. Studio hours 6. Prerequisites: 101, 105, 106, or approval of department head.

306r Printmaking: Lithography and Serigraphy (3)
Work in single and multicolor lithography, considering the various techniques of stone and metal plate printing. Work in single and multicolor serigraphy, including various stencil methods of silk-screen printing. Spring semester. Studio hours 6. Prerequisite: 207 or approval of department head.

307r, 308r Advanced Painting (3)
Figure, still life, and landscape composition in oil, watercolor, acrylic, and mixed media. Problems in analytical study and creative interpretation. On demand. Studio hours 6. Prerequisites: 207, 208.

309 Graphic Design (3)
Advanced typographic design, layout, and media production. Techniques of illustration for graphic arts field and development of concepts used in visual communications. Spring semester. Prerequisite: 209. Pre- or corequisite: 281.

31 Or Advanced Graphic Design (3)
Illustration for the visual communications market, preparation of portfolio, and exploration in photographic layout and design. Fall semester. Prerequisites: 207, 309.

323, 324 Materials and Procedures in Art Education (3,3)
Exploratory activities designed to acquaint the prospective teacher of art with a representative range of appropriate art materials and the procedures which promote their effective use in grades one through twelve. First semester: elementary, grades one through six. Second semester: secondary, grades seven through twelve. Two-dimensional and three-dimensional studio projects, lectures, and discussion included in both courses. 323 spring/324 fall semester alternate years. Prerequisite to student teaching.

333 Three-Dimensional Design (3)
Basic problems involving mass and space relationships. Experimentation with foundry techniques. Lectures on the historical development of sculpture. Fall semester. Prerequisites: 101, 105, 106.

334 Three-Dimensional Design (3)
Constructions dealing with the manipulation of volumes and surfaces using a variety of materials. Continued development of foundry techniques. Spring semester. Prerequisite: 333.

343 Introduction to Ceramics (3)
Problems in the hand methods of forming clay and use of the potter's wheel. Study of form, color, and texture with a concern for basic ceramic technology. Fall semester. Studio hours 6. Prerequisites: 101, 105, 106, or approval of department head.

344r Advanced Ceramics (3)
Development of student's individual style through use of design elements and technical skill. Kiln use and general laboratory techniques. On demand. Studio hours 6. Prerequisite: 343.

381 Color Photography (3)
Introduction to the principles and theory of color photography. Techniques covered are color film processing, color printing, slide presentations, and applied technology. Exploration of media for creative expression. Every semester. Studio hours 6. Prerequisite: 281 or approval of department head.

414 Major Trends in American Art (3)
The visual arts of the United States including the arts of the European settlers and the first generation Americans of the Colonial Period, the great portraitists of the Revolution and the 19th century, the 19th century landscapists, the pioneer modernist of the early 20th century, and the regionalists of the 30s. Culminates with the first American style to achieve international significance, the New York School, and the resultant dominance of American art in the world today. Spring semester. Prerequisite: 211 or 212 or 213.

422 Three-Dimensional Art for Elementary Education (3)
Introduction to techniques of woodworking, metalworking, ceramics, and weaving. Individual research in new materials. Special emphasis placed on equipment and designs suitable for classroom use. On demand.

431, 432 Arts of the Far East (3,3)
A selective presentation of the visual arts of China, Japan, India, and other culturally significant regions of Asia. First semester devoted to the earlier phases of Chinese and Japanese art and the art of India from the Indus Valley Civilization through the Medieval period. Second semester presents developments in China from the Han Dynasty onward, and in Japan from the Heian period to the present. 431 or 432 offered fall semester alternate years. Courses need not be taken sequentially.

433r Sculpture (3)
Development of student's individual style in three-dimensional art. Emphasis on technical skills. On demand. Prerequisite: 334 or 335.

452 Research and Studio Problems in Elementary School Art (1-3)
Assigned projects in the history, theory, and innovative approaches in art education at the elementary level. Emphasis on studio problems directed toward the individual's need. On demand.

490r Seminar in Art Education (3)
Emphasis on contemporary issues in art education. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497r Research (1-4)
Every semester.

498r Individual Studies (1-4)
Every semester.

499r Group Studies (1-4)
Every semester.
The Department of Biology offers two degrees: a B.A. in biology and a B.S. in medical technology. The course requirements are listed below.

Students are urged to consider attendance at one of the two institutions affiliated with UTC's Department of Biology that offer field course experience in the life sciences: Gulf Coast Research Laboratory, Ocean Springs, Mississippi, offering courses in marine biology; and Tech-Aqua, Smithville, Tennessee, a field station offering educational research opportunities in inland, freshwater field biology.

Preprofessional programs in forestry, dentistry, medical technology, medicine, cytotechnology, dental hygiene, pharmacy, veterinary medicine, and physical therapy are described in the Preprofessional Programs section of the Bulletin.

Minor
The Biology Department offers a minor requiring 20 hours of biology including Biology 121,122 plus any four courses chosen, one each, from the organismic, physiological, population, and developmental requirements for the biology major (see major). Two of the four courses must be at the 300 level or above.

Biology Courses

121 Principles of Biology I (4)
An introduction to the basic biological ideas including the methods of the biologist, Darwin’s evolutionary theory, cell structure, digestion, respiration, body fluid regulation, cell division and reproduction, Mendelian and molecular genetics, and animal behavior. Every semester. Lecture 3 hours, laboratory 2 hours.

122 Principles of Biology II (4)
Continues examination of basic biological principles including energy transformations, hormones, nervous control, effectors, organism development, modern evolutionary theory, ecology, origin of life, and survey of major groups within the kingdoms of organisms. Every semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 121.

191 Functional Human Anatomy (4)
The structure of the human body as seen in its various levels of organization: cellular, tissue, organ, and system. Every semester. Lecture 3 hours, laboratory 2 hours.

199 Special Projects (1-4)
On demand. Maximum credit 4 hours. Prerequisite: approval of instructor.

207 Plant Morphology (4)
A study of the form, reproductive processes, and evolutionary relationships of the principal nonvascular and vascular plant groups. Fall semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 122 or equivalent.

208 Human Physiology (3)

209 Laboratory Studies in Human Physiology (1)
Laboratory studies of the physiological functions of the human body. Formerly 193. Every semester. Laboratory 2 hours. Pre- or corequisite: 208.

210 Microbiology and Health (4)
Microorganisms as related to disease, immunity, food preservation, and sanitation. Every semester. Lecture 3 hours, laboratory 2 hours. Credit not allowed toward a biology or medical technology major. Prerequisite: Chemistry 121 or equivalent.

300 Genetics: A Human Concern (3)
An investigation of our current knowledge of genetics, both traditional and modern molecular, and the use of this knowledge as it affects our lives. Specifically, after a review of what we now know about human inheritance, discussions will center around the ethical, social, and legal ramifications of our present understanding and capabilities to utilize this knowledge both now and in the future. Spring semester alternate years.

302 Comparative Anatomy of Vertebrates (4)
Structure and evolution of vertebrates. Dissection of dogfish, amphibian, and cat. Spring semester alternate years. Lecture 2 hours, laboratory 4 hours. Prerequisite: 122 or equivalent.

303 Vertebrate Embryology (4)
Comparative development of the body from gamete formation through early organ formation in selected vertebrates. Consideration of advances in experimental embryology. Spring semester. Lecture 2 hours, laboratory 4 hours. Prerequisite: 122; 302 or 313 recommended.

304 Plant Physiology (4)
Vascular plant structure and function emphasizing physiological activities, such as photosynthesis, water relations, mineral nutrition, and hormonal action. On demand. Lecture 3 hours, laboratory 2 hours. Prerequisites: 122; Chemistry 121,122 or equivalent. Pre-or corequisite: Chemistry 351.

306 Ecology (3)
The community concept with reference to structure, energy, cycles, and populations; the distribution of plants and animals with analyses of the factors involved. Spring or fall semester. Prerequisite: 122 or equivalent, or approval of instructor.

307 Ecology Laboratory (1)
Field application of ecological principles. Spring or fall semester. Laboratory 2 hours. Field trips. Prerequisite: 122 or equivalent. Corequisite: 306.

311 Principles of Microbiology (4)
Morphology and physiology of microorganisms. Every semester. Lecture 2 hours, laboratory 4 hours. Credit not allowed in both Biology 210 and 311. Prerequisites: 122; Chemistry 122 or equivalent.

312 Invertebrate Zoology (4)
A survey of the invertebrate phyla up to the chordates with an emphasis on their evolution, morphology, and physiological adaptations. Formerly 225. Fall semester alternate years. Lecture 3 hours, laboratory 2 hours. Prerequisite: 122 or equivalent.
313 Chordate Zoology (4)
The biology of the invertebrate chordates and vertebrate classes with an emphasis on their evolution, morphology, physiology, and behavior. Formerly 226. Spring semester alternate years. Lecture 3 hours, laboratory 2 hours. Prerequisite: 122 or equivalent.

315 Evolution (3)
Evidences of evolution; mechanism of natural selection; role of genetic factors in the diversity of populations; origin of races; species and higher categories; adaptation and behavior; recognition of evolutionary relationships; significance of evolution to the human species. Fall semester alternate years. Prerequisite: 122 or equivalent.

325 Genetics (3)
The structure and function of the gene and chromosome; control of protein synthesis; mutation; genetic regulation; genetic transfer and recombination. Viruses, bacteria, and higher organisms will be discussed. Every semester. Prerequisites: 122; Chemistry 122 or equivalent.

326 Genetics Laboratory (1)
Genetics investigations utilizing a variety of organisms. Every semester. Laboratory 2 hours. Pre- or corequisite: 325.

329 Cellular Biology (4)
Morphological and chemical organization of the cell; cellular metabolism; metabolic energy relationships; nature of enzymes; fermentative and oxidative metabolism; photosynthesis. Every semester. Lecture 3 hours, laboratory 2 hours. Prerequisites: 122; Chemistry 122 or equivalent. Pre- or corequisite: Chemistry 351.

330 Histology (4)
Structure of animal tissues and organ levels with emphasis on recognition, origin, and function of mammalian tissues. Fall semester alternate years. Lecture 2 hours, laboratory 4 hours. Prerequisites: 122; Chemistry 122 or equivalent. Pre- or corequisite: Chemistry 351.

342 Entomology (4)
Principles of entomology including the morphology, development, taxonomy, ecology, and importance of insects. Fall semester alternate years. Lecture 3 hours, laboratory 2 hours. Prerequisite: 122 or equivalent.

352 Taxonomy of Vascular Plants (4)
Speciation; breeding systems; pollination systems; edible and poisonous plants; and origin of flowering plants. Laboratories emphasize identification of flowering plants, conifers, and ferns. Some field work required. Spring semester. Lecture 2 hours, laboratory 4 hours. Prerequisite: 122 or equivalent.

408 Parasites of Man (4)
Life cycles, ecology, and physiology of the parasites of human beings including the diseases caused by these parasites. Formerly 308. On demand. Lecture 2 hours, laboratory 4 hours. Prerequisite: 122 or equivalent, or approval of instructor.

412 Immunology and Virology (3)
Reactions of the mammals, including humans, to foreign substances. A study of viruses using, in part, immunological and serological procedures. Spring semester. Prerequisite: 210 or 311.

416 Biogeography (3)
A study of the distribution of plants and animals from a climatic and historical perspective. Fall semester. Prerequisite: 122.

420 Molecular Genetics (3)
Genetic code, gene control, recombinant DNA, cloned genes, mutagenesis, antibody genes, tumor viruses, transferring genes into mammalian cells, recombinant genes and diseases. Spring semester alternate years. Prerequisite: 325 or 328.

423 Animal Physiology (4)
A detailed analysis of selected aspects of animal physiology. For students whose primary interest is biological science. On demand. Lecture 3 hours, laboratory 3 hours. Prerequisites: Biology 122 or equivalent, and a course in organic chemistry.
52—Chemistry

341 Basic Techniques in Marine Science for Teachers (3)
A course designed to introduce the students, particularly in-service teachers, to the study of marine science and to promote the teaching of marine biology at all grade levels. (Same as GCRL BOT 441.) Prerequisite: 122 or consent of instructor.

344 Salt Marsh Ecology (4)
A study with emphasis on the botanical aspects of local marshes; includes plant identification, composition, structure, distribution, and development of coastal marshes. (Same as GCRL BOT 444.) Prerequisites: 122, 306.

342 Marine Fisheries Management (4)
A general course in fisheries management designed to acquaint students with the philosophy, objectives, problems, and principles involved in management decisions. Lecturers will include specialists in biology, fisheries statistics, sanitation, and marine law. (Same as GCRL Z0442.) Prerequisite: 122.

352 Marine Microbiology (6)
Role of microorganisms in ecology of oceans and estuaries. Includes sampling procedures, taxonomy and marine bacteria, mineralization, microbial fouling, pollution, and diseases of marine animals. (Same as GCRL MIC 452.) Prerequisite: 311 or consent of instructor.

360 Marine Ecology (5)
Relationship of marine organisms to their environment. Includes effects of temperature, salinity, light, nutrient concentration, currents, and food on the abundance and distribution of marine organisms. (Same as GCRL Z0452.) Prerequisites: 207, 306, 312; Chemistry 342.

364 Aquaculture (6)
Introduction to history, principles, problems, and procedures relating to culture of commercially important Gulf Coast crustaceans, fish, and mollusks. (Same as GCRL Z0464.) Prerequisite: 122.

Courses available at Upper Cumberland Biological Field Station (Tech Aqua), Center Hill Lake, Tennessee

427 Field Botany (5 quarter hours)
Systematic botany of the flowering plants. Prerequisite: 122.

437 Freshwater Algae (5 quarter hours)
Morphology, systematics, physiology, ecology, and phylogeny of freshwater algae. Prerequisite: 122.

447 Ecosystems Analysis (5 quarter hours)
Structure and function of regional ecosystems, including production, food webs, nutrient cycling, diversity and stability. Prerequisite: 122.

455 Dendrology (5 quarter hours)
Classification, identification, ecology, economic characteristics, and nomenclature of woody plants of middle and eastern Tennessee. Prerequisite: 122.

467 Freshwater Invertebrates (5 quarter hours)
Morphology, physiology, systematics, and ecology of aquatic invertebrates. Prerequisite: 122.

468 Ornithology (5 quarter hours)
General survey of the class Aves with emphasis on morphology, identification, and ecology of local birds. Prerequisite: 122.

484 Limnology (5 quarter hours)
Fundamental concepts of the interrelationships between aquatic organisms and their environments in lakes and rivers. Prerequisite: 122.

487 Ichthyology (5 quarter hours)
Identification, classification, anatomy, physiology, ecology, and adaptations of fishes; emphasis on North American freshwater species. Prerequisite: 122.

Brock Scholars Program

Business Administration
See School of Business Administration, page 109.

Chemistry

Professor Gross, Head
Professors McNeeley, Waddell
Associate Professors Grant, Kutz, Lynch
Assistant Professors Mebane, Meyer, Rybolt

The chemistry curriculum provides programs leading to B.A. and B.S. degrees. The B.A. program emphasizes the liberal arts with specialization in chemistry and offers the opportunity to develop a broad background in the sciences for students who are preparing for professional study in the health sciences. The B.S. program offers a greater concentration in chemistry, physics, and mathematics and is recommended for students with a career interest in chemistry. This program, which has been approved by the Committee on Professional Training of the American Chemical Society, is recommended for students who are planning for graduate study in chemistry. Both programs provide strong emphasis on theory and laboratory experience. The department also offers a minor in chemistry.

Preprofessional programs in forestry, dentistry, medical technology, medicine, cytotechnology, dental hygiene, pharmacy, veterinary medicine, and physical therapy are described in the Preprofessional Programs section of the Bulletin.

Chemistry (B.A.)

General Education (see pages 25–27 for list of approved courses)

Category A
2 approved courses in written communication in the English language, (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course other than chemistry with laboratory (4 hours; approved related course below will apply)

Category F
1 approved mathematics course (3 hours; approved related courses below will apply)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Foreign language through second college year
Major and related courses
Mathematics F145, F150, 160
Physics D103, 104
32 hours chemistry including 121, 122, 341, 351, 352, 371, 386, 443; 1 hour of seminar (486r) or research (Chemistry 495r, 496r, 497r, 498r)
2.0 average in all chemistry courses (excluding Chemistry 211)

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

**Typical course of study in chemistry (B.A.)**

**Chemistry Courses**

111 Chemistry and the Environment (3)
Basic concepts and methods of investigation with applications of chemical principles to the environment. Fall semester. Credit may not be applied toward a chemistry major.

121 General Chemistry I (4)
Survey of principles and concepts involving structure, properties, and reactions of matter with experiments to demonstrate these principles. Every semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 2 years of high school algebra or Mathematics 105. Chemistry 125 may be substituted for Chemistry 121 in meeting all requirements.

122 General Chemistry II (4)
Survey of applications of principles to inorganic, organic, biological, analytical, and physical chemistry. Laboratory experiments in qualitative analysis. Every semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 121.
54—Communication

125 Honors General Chemistry (4)
Advanced survey of principles and concepts of chemistry including structure, properties, and chemical reactions. Experimental work with emphasis on advanced laboratory procedures. Fall semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: approval of instructor and either nomination by high school chemistry teacher or a minimum score of 24 on the composite ACT. Chemistry 125 may be substituted for Chemistry 121 in meeting all requirements.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

211 Forensic Chemistry (3)
Survey of the applications of chemical analysis to criminalistics including studies of physical evidence, microscopy, analysis of drugs, toxicology, arson investigation, serology, firearms, and documents. On demand. Credit may not be applied toward a chemistry major.

341 Quantitative Analysis (4)
Theory and practice of volumetric, electrochemical, and spectrophotometric analysis applied to the study of stoichiometry and equilibrium. Every semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 122.

342 Analytical Methods (4)
Advanced theory and practice of analytical chemistry including instrumental approaches to separation and analysis. Spring semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 341.

351, 352 Organic Chemistry (4,4)
Study of compounds of carbon with emphasis on structure, synthesis, reactions, and reaction mechanisms with experiments to demonstrate principles and reactions. Qualitative organic analysis included in Chemistry 352. 351 fall/352 spring semester. Lecture 3 hours, laboratory 3 hours. Prerequisites: 122; 351 is prerequisite to 352.

367 Current Topics in Biochemistry (3)
Study of the biosynthesis of biologically active molecules, including amino acids, immunoglobulins, and hormones, with special emphasis on current research in these areas. On demand. Prerequisite: 352.

371, 372 Physical Chemistry (4,4)
Thermodynamic, kinetic, and other descriptions of laws governing physical and chemical change. 371 every/372 spring semester. Lecture 3 hours, laboratory 4 hours. Prerequisites: Chemistry 341, Mathematics 160. Co- or Prerequisite: Physics 104 or 231. Chemistry 371 is prerequisite to Chemistry 372.

386 Chemical Literature (1)
Survey of primary, secondary, and tertiary sources of chemical information including individual assignments in the use of these sources. Fall semester. Prerequisite: 76 semester hours of chemistry.

406 Advanced Inorganic Chemistry (5)
Advanced concepts in theoretical and descriptive inorganic chemistry with emphasis on valence bond, molecular orbital, and crystal field theories. Spring semester. Lecture 3 hours, laboratory 4 hours. Prerequisites: 352, 371.

443 Instrumental Analysis (4)
Theory and use of infrared and ultraviolet spectroscopy, nuclear magnetic resonance, atomic absorption, gas chromatography, thermal analysis, electrochemical analysis, and other instrumental methods of characterizing chemical structure. Spring semester. Lecture 3 hours, laboratory 3 hours. Prerequisites: 341 and 351. Co- or Prerequisite: Physics 104 or 231.

453 Advanced Organic Chemistry (4)
Advanced concepts of organic chemistry: principles of synthesis, structure, reaction mechanisms, and stereochemistry as applied to current research problems. Laboratory syntheses involve advanced techniques. Fall semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 352.

466 Biochemistry (3)
Survey of chemical aspects of metabolism in living systems including respiration, photosynthesis, lipid, and amino acid degradation; significance of nucleic acids, nucleotides, amino acids, and proteins. Fall semester. Prerequisite: 352.

475 Polymer Chemistry (2)
Chemistry of synthetic polymers including mechanisms of polymerization and relation of properties to structure. On demand. Prerequisites: 352 and 371 or equivalent knowledge.

486r Seminar (1)
Participation seminar based on student papers, invited speakers, and other activities. Every semester. Prerequisite: 24 semester hours of chemistry. Maximum credit 2 hours.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See “Departmental Honors,” page 31.

496r Industrial Research (2)
Group participation in research project sponsored jointly by the Chemistry Department and a local industry. Written report required. Spring semester alternate odd years. Laboratory 4 hours. Prerequisite: 20 semester hours of chemistry.

497r Research (2)
Laboratory or library research on individual chemical problem under staff supervision. Seminar presentation of results. Student should confer with instructor prior to registration. Every semester. Laboratory 4 hours. Maximum credit 4 hours.

498r Individual Studies (1-4)
Individual or group projects. Credit may be earned through University, governmental, or industrial laboratory experience approved by the department. Every semester. Maximum credit 4 hours.

499r Group Studies (1-4)
Special topic of a selected area of chemistry as specified in schedule of classes. Student should confer with instructor prior to registration. On demand.

Classical Civilization
See Foreign Languages and Literatures, page 65.

Communication

Associate Professor Pringle, Head
Associate Professor Rushing
Assistant Professors Dardenne, De Riemer

The Department of Communication offers a Bachelor of Arts degree requiring a combination of broad liberal learning and specialized study in communication. In addition to meeting the general education requirements, the communication major must study in some depth in one or two departments outside the program. Concentrations in communication are available in advertising, broadcasting and electronic media, broadcast journalism, journalism, and public relations.
**Communication (B.A.)**

**General Education** (see pages 25-27 for list of approved courses)

### Category A
2 approved courses in written communication in the English Language (6 hours)

### Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

### Category C
2 approved behavioral or social science courses (6 hours)

### Category D
1 approved physical or natural science course with laboratory (4 hours)

### Category F
Mathematics F210

### Category C
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester of physical education activity

Foreign Language through second college year

**Related Study**
Completion of one of the following—

1. Two minors* in different departments in the College of Arts and Sciences, including at least one from humanities/fine arts or behavioral/social sciences (economics may be included), approved by the adviser.

2. A major in a department in the College of Arts and Sciences, other than Communication, approved by the adviser.

*Approved courses in the minors may also be used to satisfy general education requirements.

**Major**
Completion of one of the following concentrations—

1. **Advertising:**
   Communication 101, 110, 260, 271, 365, 450, 451, 465, 480 or 485r; Art 250; English 370; Marketing 313, 362.

2. **Broadcasting and Electronic Media:**
   Communication 101, 110, 260, 290, 340, 345, 364, 450, 451, 480 or 485r, 490.

3. **Broadcast Journalism:**
   Communication 101, 110, 260, 290, 340, 345, 360, 381, 450, 451, 480 or 485r, 481.

4. **Journalism:**
   Communication 101, 110, 260, 360, 361, 363, 367, 450, 451, 462, 480 or 485r; Art 251; English 370.

5. **Public Relations:**
   Communication 101, 110, 260, 271, 360, 363, 450, 451, 471, 480 or 485r; Art 250, 251; English 370.

2.0 average in all communication courses

Minimum of 30 hours of 300 and 400 level courses. Electives to complete 128 hours.

### Minor

A total of 18 hours, including Communication 101, 110, and 260. Nine hours of approved Communication courses at the 300 level or above.

### Communication Courses

**101 Introduction to Mass Communication (3)**

History, theory, and practice of mass communication designed to expose beginning students to the broad subject of communication. Major media issues explored. Formerly Theatre & Speech 270. Every semester.

**110 Fundamentals of Media Communication (3)**

Application of communication principles to the mass media. Introduction to media technology and procedures, analysis of and practice in the preparation of basic content for electronic and print media. Every semester.

**120 Mass Media in American Society (3)**

Course examines the effects of the development and growth of mass media in American society. Mass media effects are discussed as these relate to research findings. The role of mass media in the individual's daily life is studied through discussion of such concepts as selective exposure and perception, agenda setting by mass media, media dependency, video-malaise, and other mass media effects. On demand.

**199r Special Projects (1-4)**

Individual or group studies. Every semester.

**210 History of American Journalism (3)**

History of American journalism; examination of current issues in journalism. Formerly English 271. On demand.

**260 Writing for the Mass Media (3)**

Intensive practice in writing techniques used by the print and electronic media. Style, usage, and format will be studied in depth. Every semester. Prerequisites: 707, 770; English 121 and the ability to type 30 wpm; or approval of instructor.
271 Principles and Practices of Public Relations (3)
Fundamentals of establishing and maintaining effective relations with organizational publics. Introduction to publicity methods and managing the public relations function. Case study approach. Fall semester. Prerequisites: 101, 110, 260, or approval of instructor.

290 Introduction to Broadcasting and Electronic Media (3)

340 Audio Production and Presentation (3)
Producing and presenting content in radio and nonbroadcast audio media, using both studio and portable facilities. Studio, control room, and field production procedures, recording and editing, music and sound effects. Fall semester. Prerequisite: 110.

345 Video Production and Presentation (3)
Producing and presenting content in television, cable TV, and non-broadcast video media, using both studio and portable facilities. Studio, control room, and field production procedures, recording and editing, lighting, and graphics. Spring semester. Prerequisite: 340.

360 News Writing and Reporting I (3)
Fundamentals of news gathering, news writing, news evaluation, and the structure of news stories. Formerly English 371. Every semester. Prerequisites: 260, typing proficiency of 36 wpm, or approval of instructor.

361 News Writing and Reporting II (3)
Instruction and practice in reporting news gathered from the traditional news beats (courts, county-city government, university, city, etc.) Spring semester. Prerequisite: 360 or approval of instructor.

363 Feature Writing (3)
Nonfiction writing for magazines and for specialized publications. Formerly English 374. Fall semester. Prerequisite: 360 or approval of instructor.

364 Writing for Broadcast and Electronic Media (3)
Techniques of writing for radio, television, cable TV, and for non-broadcast audio and video media. News, commercials, public service announcements, continuity, and institutional communication content. Spring semester. Prerequisites: 260, 290; typing proficiency of 36 wpm; or approval of instructor.

365 Advertising Copy Writing (3)
Principles and practices in the preparation of effective advertising copy for a variety of media. Includes basic consumer research, creative conceptual and campaign design, copy testing. Emphasis on print advertising, but radio and TV covered. Fall semester. Prerequisites: Marketing 362, typing proficiency of 36 wpm, or approval of instructor.

367 Newspaper Editing and Design (3)
Principles and practices of editing and evaluating news copy, writing headlines and captions, newspaper layout and design practices, electronic editing, and newspaper production processes. Spring semester. Prerequisite: 360.

381 Broadcast News and Public Affairs I (3)
Researching, writing, reporting, and producing news and public affairs programs for radio and television. Legal, ethical, and managerial concerns. Spring semester. Prerequisites: 340, 360.

450 Communication Research (3)
Analyzing and using research in the mass media. Interpreting audience and message research. Fundamentals of media research methods and participation in a media research project. Fall semester. Prerequisites: junior standing and Math 210.

451 Legal and Ethical Aspects of Mass Media (3)
Rights and privileges, secrecy and censorship, libel, privacy, contempt, broadcasting law, commerce provisions, and copyright. Contemporary case studies. Fall semester.

462 Interpretive and Editorial Writing (3)
Instruction and practice in analytical, interpretive, persuasive writing; concepts of editorial responsibility. Formerly English 372. Spring semester. Prerequisite: 361 or approval of instructor.

465 Advertising Campaign (3)
Planning and implementing the complete advertising campaign, from designing the creative platform to writing and producing advertisements and commercials in the several media; procedures in media buying; methods of evaluating campaign results. Use of case studies and workshops. Spring semester. Prerequisite: 365.

471 Publicity Methods (3)
Planning and implementing the public relations campaign. Using the mass media to achieve publicity objectives. Case studies of publicity campaigns and class implementation of a campaign. Spring semester. Prerequisite: 271 or approval of instructor.

475r Specialized Public Relations Practice (3)
Intensive exploration of specialized application of public relations in such areas as fund-raising, employee communication, consumer behavior, and environmental public relations. Topics vary. Offerings are announced at preregistration. On demand. Maximum 6 hours credit. Prerequisite: 271 or approval of instructor.

480 Directed Project (3)
Guided project designed to demonstrate proficiency at preprofessional level in area of concentration. Every semester. Prerequisites: senior standing and approval of adviser.

481 Broadcast News and Public Affairs II (3)
A continuation of Communication 381 with the emphasis on television news and public affairs. Spring semester. Prerequisite: 381.

485r Individual Internship (3)
Professional service, arranged and supervised individually, with newspapers, radio and television stations, advertising agencies, and other media institutions. Every semester. Prerequisites: senior standing; approval of adviser one full semester in advance. Maximum 6 hours.

490 Broadcast and Electronic Media Management (3)
Principles of management and their application to radio, television, cable television, and other electronic media systems. Emphasis on personnel, programming, sales, and promotion. Spring semester.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms) Every semester. See "Departmental Honors," page 31.

497r Research (1-4) Every semester. Prerequisite: approval of department head.

498r Individual Studies (1-4) Every semester. Prerequisite: approval of department head.

499r Group Studies (1-4) Every semester.

English

Professor J. Ware, Head
Professors Barrow, Fulton, Herron, Ramsey, Richards, Sanderlin, Tinkler, Trimpey
Associate Professors R. Jackson, Meagher, Shawen, R. Vallier
Assistant Professors Bender, Young
Visiting Associate Professor Leonard
Visiting Instructors R. McNutt, B. Pitt, J. Vallier, R. Ward

In addition to providing a variety of courses for general education and for electives, the English Department offers programs leading to the B.A. (in English and American language and literature) and to the B.S. (in secondary education: English). Beyond the traditional freshman program in rhetoric and composition, most of the offerings in the English curriculum are based on the study of literature, such as genre studies, courses in major authors, and surveys of literary periods. There are also several upper level courses which stress the development of skills in various forms of writing. It is in fostering and advancing the humanistic traditions, however, that the English Department makes its principal contribution to liberal education.

### English and American Language and Literature (B.A.)

Health and Physical Education 021 plus one semester physical education activity

**Major and related courses**

Foreign language through second college year

39 hours English in addition to general education requirements including: English 203; 207 or 442r; 211 and 212; 213 and 214; 361; at least one course in novel at the 300 or 400 level

At least 9 of the remaining hours must be in 300- and 400-level courses, with one course in English literature before 1800

12 hours additional in supporting courses beyond the general education requirements: these courses chosen in conjunction with the academic adviser

2.0 average in all English courses (excluding general education Category A courses)

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

For teacher certification see School of Education section.

### Writing Concentration

The Department of English permits a Concentration in Writing within the English major. To take a Concentration in Writing a student must complete the major in English including at least 12 hours from the following courses, no more than two courses on the 200 level and at least one at the 400 level: English 270, 277, 278, 279, 300, 370, 375, 376, 410, 471, 495 when topic is appropriate, Communication 260, 363.

**Typical course of study for English and American language and literature (B.A.)**

| Freshman | English 121, 122 | 6 |
|          | Behavioral Science | 6 |
|          | Humanities, Fine Arts | 6 |
|          | Mathematics, Natural Science | 7 |
|          | Foreign Language | 8 |
|          | Physical Education | 2 |
|          | Total | 35 |

| Sophomore | English 203 | 3 |
|           | English 211, 212 | 6 |
|           | English 213 and 214 | 6 |
|           | Humanities, Fine Arts | 3 |
|           | Foreign Language | 6 |
|           | Support course (chosen with adviser) | 3 |
|           | Electives | 6 |
|           | Total | 33 |

| Junior | English 207 or 442r | 3 |
|        | English Electives, including novel course | 9 |
|        | Support courses (chosen with adviser) | 6 |
|        | Perspectives | 3 |
|        | Electives | 9-12 |
|        | Total | 30-33 |

| Senior | English 361 | 3 |
|        | English Electives (300-400 level) | 12 |
|        | Support course (chosen with adviser) | 3 |
|        | Electives | 9-12 |
|        | Total | 27-30 |

Minor

The English Department offers a minor in English, a program of study composed of the following set of courses:

English 103; English 203 or English 204; English 211 or English 212; English 213 or English 214; English 207 or English 442. At least two courses at the 300 or 400 level to be chosen in conjunction with an academic adviser. A total of 21 hours.

### English Courses

**100 Special Skills in Basic English (3)**

A review of basic reading skills, language concepts, sentence types and structures. Requires extensive practice in the writing of sentences and paragraphs as well as in the practice of editing for proper punctuation and accurate grammatical construction. Fall and spring semester. Graded on a satisfactory/no credit basis.
121 Rhetoric and Composition (3)
The principles and practice of effective reading and writing. Frequent themes, exercises, selected readings. Attention to individual problems of grammar and usage. Formerly English 101. Every semester. In rare instances exemption from English 121 may be recommended by the department.

122 Rhetoric and Composition (3)
Review of competencies stressed in English 121 with emphasis on the extended essay; use of research matter in writing; attention to diction, figurative and symbolic language, relationship of style and meaning. Formerly English 102. Every semester. Prerequisite: English 121 or placement.

131 Values in 20th Century American Fiction (3)
A study of contemporary man's search for values as reflected in selected twentieth century American novels and short stories from World War I to the present. Formerly English 111. Spring semester alternate years.

133 Introduction to Literature (3)
Readings from poetry, fiction, and drama to demonstrate how the writer selects from ideas, experience, and language and combines these elements to speak of and to the human condition. Formerly English 103. Fall and spring semester.

161 Writing and Study Skills for Foreign Students (6)
A rapid review of English grammatical structures and pronunciation with intensive oral and written drill. Required during the first term of residence of all foreign students who are not excused from it on the basis of the English proficiency examination offered during each fall term. On demand.

166 Vocabulary Development (1)
Designed to enhance and strengthen the student's vocabulary by exercises stressing technical as well as general uses of language, the importance of context, and etymology. Fall and spring semester.

199r Special Projects (1-4)
Individual or group projects. Every semester. Maximum credit 4 hours for B.A. in English or B.S., Secondary Education in English. By permission of department head.

203 Literature of the Humanities (3)
Selections from the literature of the Western tradition, from Homer to the end of the Renaissance; read in English and studied in the context of the other humanities and the fine arts. Every semester.

204 World Literature from the Renaissance (3)
Selections from English literature of the Renaissance and later periods and from European and American writers. Spring semester alternate years.

207 Shakespeare: an Introduction (3)
Every semester.

211 Survey of English Literature to 1800 (3)
Fall semester.

212 Survey of English Literature since 1800 (3)
Spring semester.

213 American Literature to 1855 (3)
Representative works from the Colonial and Romantic periods. Fall semester.

214 American Literature from 1855 (3)
Representative works from the late 19th and 20th centuries. Fall and spring semester.

228 Children's Literature (3)
A survey and evaluation of some of the best literature for children, with special attention to literature for preschool and elementary school years. Fall and spring semester. Prerequisite: one lower level course in written communication in English.

229 Literature for the Adolescent (3)
A survey and evaluation of literature whose primary audience is the adolescent, with special attention to the usefulness of such literature in secondary education. Spring semester alternate years. Prerequisite: one lower level course in written communication in English.

230 Popular Fiction (3)
Science fiction or detective fiction or other type of popular fiction, one or another of which will be studied for its literary merit: the type of popular fiction to be studied in any particular section will be specified in the schedule of classes. On demand.

233 The Uses of Tradition: India and Japan (3)
A comparison of two mythic and traditional cultures confronting modernism, as reflected in expository reading, documentary films, and the arts, including fiction, poetry, music, and dramatic film. On demand.

257 The Romantic Experience (3)
An interdisciplinary survey of "Romanticism" in European civilization, ca. 1789 to 1918, addressing and analyzing some of the main historical, philosophical, and aesthetic forces involved in this broad cultural experience. On demand.

270 Creative Writing (3)
Instruction and practice in writing imaginative literature for magazines and specialized publications. Fall and spring semester.

277 Professional Writing (3)
An introduction to the theory and practice of the basic forms of writing used in any profession. Emphasis on the processes of communication in addition to their various forms: practice in the reading and writing of memoranda, prospectuses, digests, charts, extended reports, etc. Fall and spring semester.

278 Scientific Writing (3)
An introduction to the theory and practice of science writing. Emphasis on the problems of communicating to specialized audiences and the problems of translating specialized language for general audiences; practice in the translation and writing of technical reports and supporting materials, proposals, articles, reports, etc.; practice in the conversion of technical information and formulas into everyday language. Spring semester.

279 Writing for the Human and Social Sciences (3)
An introduction to the theory and practice of the modes of discourse used in human and social sciences. Emphasis on the processes of thinking involved in researching, reading, and communicating in these fields; extended research, and original essays with opportunities for the student to focus on his or her academic field. Spring semester alternate years.

300 Intermediate Rhetoric and Composition (3)
An introduction to the theory and practice of the basic kinds and combinations of discourse and their aims; extended essays and other writing assignments in these kinds of discourse. Fall and spring semester.

301 The Literature of England to 1300 (3)
Representative works in translation. On demand.

302 The Literature of England, 1300-1500 (3)
Representative works including Chaucer. On demand.

303 Early Renaissance Literature to 1600 (3)
Representative works from Tudor and Elizabethan periods. Fall semester alternate years.

304 Milton and the Seventeenth Century (3)
Representative works from the Jacobean and late Renaissance periods. Spring alternate years.

305 Age of Dryden, Pope, and Swift (3)
Representative works from the early 18th century. On demand.

306 Age of Johnson (3)
Representative works from the mid and late 18th century. On demand.
Approach to Literature (3)
Focus on the relationship between the subject matter learned as an English major and the subject matter to be used as a teacher of secondary English; emphasis on the difference between "content" specialist and high school teacher. On demand.

Approach to Composition (3)
Designed to improve the student's writing and to improve the individual's ability as a critic of writing, particularly as a potential teacher of writing; focus on expository prose. Fall and spring semester.

Approach to Critical Reading (3)
Designed to increase the student's knowledge of the techniques involved in a close reading of literary texts, with special attention to the applicability of these techniques to teaching. On demand.

Early English Drama, Origins to 1642 (3)
The English drama as a literary type, its history and development from Medieval times to 1642, exclusive of Shakespeare. On demand.

Later English Drama, 1660-1800 (3)
Study of English drama from the Restoration through the 18th century. On demand.

American Novel to 1900 (3)
Representative novels of American romanticism, realism, and naturalism. On demand.

Development of the British Novel: from Defoe to George Eliot (3)
The development of the British novel from its origins in the 18th century through George Eliot and her contemporaries. On demand.

The Modern British Novel (3)
On demand.

Modern Poetry, British and American (3)
On demand.

Twentieth-Century American Novel (3)
On demand.

Modern Drama (3)
On demand.

Major British Figures (3)
A reading course in the works of a major British writer; the writer to be studied will be specified in the schedule of classes. On demand. Maximum credit 6 hours for the degree.

Major American Figures (3)
A reading course in the works of a major American writer. On demand. Maximum credit 6 hours for the degree.

Modern English Grammar (3)
An introduction to the system—phonological, morphological, syntactical—of present-day American English. Emphasis on various recent presentations of this system. On demand. Prerequisites: 360,361, or special permission of the department head.

Writing Workshop (3)
An advanced seminar in writing with individual projects in imaginative, expository, or critical writing. On demand. Prerequisites: two writing courses above the 100 level.

Departmental Honors (1-3 hours per term, 4 hours for the two terms)

Research (1-3)
Individual research projects by special permission of department head. On demand. Maximum 3 hours for B.A. in English or B.S., Secondary Education in English.
Environmental Studies

Professor Perfetti, Head
Professors B. Benson, Weisbaker, R.L Wilson
Associate Professors D. Anderson, Litchford

The environmental studies major consists of two parts: 1) a core curriculum required of all majors and 2) a concentration of study in one of the following areas: biology, chemistry, engineering, geology, geography, mathematics, physics, or sociology/anthropology. Environmental studies courses are described below; all other required courses are described in the listings of other departments named.

Environmental Studies (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than discipline concentration (6 hours)

Category D
1 approved physical or natural science course, other than environmental studies or discipline concentration, with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related courses below will apply)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester of physical education activity

Major

The following core courses are required of all Environmental Studies majors:
Environmental Studies 150, 151, 240, 250, 340, 360, 410, 480, 484, and a senior experience for at least 2 credits (may include 490,496r,or 498r), and Geography 465
Mathematics F145, F150, F210

In addition, each major must complete the requirements for one of the following concentrations —

Biology:
Computer Science 117 or 118 or 210
Chemistry D121, 122, 341, 351
Biology 121, 122, 306, 307
Two courses from Biology 207, 311, 312, 313, 342, and 352
One course from Environmental Studies 406 or 465

Chemistry:
Computer Science 118 or 210
Biology D121, 122, 306, 307
Chemistry 121, 122, 341, 342, 351, 352, 443
Recommended: Chemistry 371 for students seeking federal certification. Chemistry 371 has Mathematics 160 and Physics 104 as prerequisites.

Engineering science:
Computer Science 118
Biology 122
Engineering 103, 104, 225, 232, 303, 307, 322, 325, 431
Mathematics 160, 250, 260
Physics 231, 232

Geology:
Computer Science 117 or 118 or 210
Chemistry D121, 122
Geography 101, 206, 209
Geology 111, 112, 225, 341, 342, 404
6 additional hours at the 300-400 level from geography or environmental studies with permission of the Geosciences/Environmental Studies department head

Mathematics:
Computer Science 118
Mathematics 160, 250, 260, 295, 308, 350, 407, 408,412; two courses from 414, 418, 424, 428, 440, 445, 460, or 470
1 two semester sequence from biology, chemistry, engineering, geology, physics

Physics:
Computer Science 118 or 210
Chemistry D121, 122
Mathematics 160
Physics 103,104, 231, 232; 12 hours from 303, 304, 307, 310, 318, 341, 342, 411, or 412

Sociology-Anthropology:
Computer Science 117 or 210
Sociology 151, 314, 394; either Anthropology 152 or 208; either Anthropology 302 or Sociology 312; additional 15 hours from Anthropology 211, 335, 356, 410, 425r and Sociology 209, 219, 305,317, 318, 331, 340, 400r, 415,430,440,445r (minimum 9 hours selected from these additional courses at 300-400 level); one two-semester sequence from biology, chemistry, geology, or physics.

2.0 average in all environmental studies courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

1 Majors in the biology or sociology-anthropology concentration may substitute Mathematics 135, F136
2 This requirement may be satisfied by a concentration-related statistics course if one is available.
Typical courses of study in environmental studies (B.S.)

Environmental Studies—63
Environmental Studies

Environmental studies (B.S.): sociology-anthropology concentration

First Semester                     Second Semester
Freshman                          
Environmental Studies 150         Environmental Studies 151 4
General Education Category A     Anthropology 152 or 208 3
Sociology 151                    General Education Category A 3
First semester of either Biology, Chemistry, Geology or Mathematics 135 3
Mathematics F136 4                17 17
Sophomore                         
Environmental Studies 240         Environmental Studies 250 3
General Education Category B     General Education Category B 3
General Education Category G     Computer Science 117 or 210 3
Anthropology 211                 General Education Category C 3
Physical Education 021           Mathematics F210 3
Elective                          General Education Category B 3
Sophomore                         
Environmental Studies 150         Environmental Studies 151 4
General Education Category A     Anthropology 152 or 208 3
Sociology 151                    General Education Category A 3
First semester of either Biology, Chemistry, Geology or Mathematics 135 3
Mathematics F136 4                17 17
Sophomore                         
Environmental Studies 340         Environmental Studies 360 3
Sociology 314                    Sociology 394 3
Anthropology 302 or              Anthropology 356 3
Sociology 312                    Anthropology 335 3
Elective                          Geography 465 3
General Education Category C 3   Physical Education Activity 1
Senior                            
Environmental Studies 410         Environmental Studies 480 1
Environmental Studies 484        Anthropology 410 3
Electives                         Anthropology 425 or Sociology 400 or 455 3
                               Elective 4
                               15 13

Minors

For science majors: 19-21 hours including Environmental Studies 150, 151, 480, either 250 or Geography 407, and two additional upper level environmental studies laboratory courses.

For nonscience majors: 18 hours including 150, 151, 480, either 250 or Geography 407 and two additional upper level environmental studies courses.

Environmental Studies Courses

150 Introduction to Environmental Problems I (4)
An introduction to current environmental problems at the global, national and local levels. Topics to be covered include: ecosystems, geochemical cycles, domestic and industrial wastes, pest control, resources, energy sources, land use, and population dynamics. The laboratory integrates the scientific approach as applied to such environmental problems as population growth and energy alternatives and provides hands-on experience in identification of abiotic and biotic factors affecting environmental quality. Open to all students interested in environmental issues. Every semester. Lecture 3 hours, laboratory 2 hours.

151 Introduction to Environmental Problems II (4)
Continues examination of current environmental problems, including environmental impact assessments, risk analysis and environmental health, an overview of environmental legislation, and selected high risk ecosystems (e.g. wetlands, bottomland hardwoods, etc.). Spring semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 750.

199r Special Projects (1-4)
On demand. Maximum credit four hours.

240 Introduction to Soil Resources (3)
Geologic origin, characteristics, and taxonomic groupings of soils, together with emphasis on survey methods and mapping procedures. Conservation and the environmental impact of agricultural and nonagricultural soil and land use. Spring semester alternate odd years. Lecture 2 hours, laboratory 2 hours.

250 World Resources (3)
Location, utilization, production, consumption, and significance of resources to society. Introduction to the vast, interlocking network of activities that produce and affect the world's use and consumption of resources. Spring semester alternate odd years. May be registered as Geography 250. Lecture 3 hours.

340 Environmental Survey Methods (4)
Field survey methods for compiling of botanical, zoological, geological, and archaeological data. To include mapping, sampling, and recording. Fall semester alternate even years. Lecture 2 hours, laboratory 4 hours.

360 Air and Water Pollution Control (3)
The study of the origin, monitoring and control of air and water pollutants; to include sample taking, testing and observation of procedures used in community laboratories. Spring semester alternate odd years. Lecture 2 hours, laboratory 2 hours. Prerequisites: one year of a natural science or engineering and fulfillment of the mathematics and statistics requirement for the respective concentration.

406 Limnology and Reservoir Ecology (3)
Chemical, physical, and biological processes in lake and reservoir systems (nutrient budgets and cycling, hydrodynamics, phytoplankton/benthic dynamics, and physical similarities and differences in lakes and reservoirs). Fall semester alternate odd years. Lecture 2 hours, laboratory 2 hours. Prerequisites: general chemistry, general biology, ecology, junior standing; general physics recommended.

410 Environmental Law and Agencies (3)
Survey of national, state, and local environmental agencies, and provisions of environmental laws and ordinances at all levels of government. Emphasis on National Environmental Policy Act (NEPA). Analysis and composition and environmental impact statements. Spring semester alternate odd years. Prerequisite: senior standing.

430 Problems in Environmental Management (3)
Case history studies of problems in environmental management, with emphasis on the kinds of environmental precautions required in specific situations and on factors contributing to legal challenges to industrial and technological activities which have environmental consequences. On demand.

455 Demographic Analysis (3)
Techniques of measuring and analyzing human population growth and distribution. Emphasis is placed on relationships of human population changes on environmental resources as well as effects of environment on morbidity and mortality. On demand.

465 General Toxicology (3)
Basic concepts of toxicology including an overview of toxic agents, the nature of toxic damage, and the methods used in quantitative toxicology. On demand. Lecture 3 hours. Prerequisites: 150; Biology, either 121 or 122; Chemistry 121 and 122. Recommended: Chemistry 351.

480 Seminar on the Environment (1)
Seminar and discussion of topics of current environmental interest. Student presentation required. Spring semester. Prerequisite: senior or graduate standing.

481 Politics and the Environment (3)
A political analysis of the conflicting interests involved in implementing policies to protect the environment, develop alternative energy sources, and promote economic growth. On demand.
482 Technology and the Environment (3)
Explores the complex relationships between technology and the environment that have existed since the Paleolithic Period. Special attention to the study of tools for extracting materials and energy from the environment and to the effect of these tools upon the landscape. On demand.

483 Economics and the Environment (3)
An economic analysis of causes and effects of pollution; the role of economic policy in controlling pollution with special emphasis on water, air, and solid waste residuals; an evaluation of the alternative environmental controls. On demand.

484 Values and the Environment (3)
An examination of the personal and social values at issue in the environmental problems of urban and nonurban regions. Attention to the emerging concern for an environmental ethic. Fall semester alternate odd years. Prerequisite: 150.

490 Environmental Studies Senior Project (3)
A group project involving analysis and solution of an environmental problem; oral and written presentation of progress and final results required. Fall semester alternate even years. Prerequisite: senior standing.

491T Environmental Studies Internship (Specific Agency, etc.) (1-4)
A cooperative arrangement between the University and agencies, organizations, groups, and businesses involved with environmental problems. Designed to provide students with a learning, observing, and work experience through direct contact with individuals working on problems related to their field. Maximum credit: 9 hours. Every semester. Prerequisite: junior or senior standing and consent of environmental studies coordinator.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand. Prerequisites: approval of instructor and head of the department.

498r Individual Studies (1-4)
Every semester. Prerequisites: approval of instructor and head of the department.

499r Group Studies (1-4)
Every semester.

Foreign Languages and Literatures

Associate Professor Bohrer, Head
Professors Campa, Seay, Sumber
Associate Professors T. Jones, Phillips, Sturzer
Assistant Professor Stanley

The department offers the B.A. degree in French, Greek and Latin, Latin, and Spanish. A student may also pursue a B.A. in humanities degree with an emphasis in classical civilization. Elementary and intermediate German are offered and may be chosen to fulfill the foreign language requirement. Modern language courses, taught in English, which deal with foreign literatures and civilizations, afford the nonforeign language student a broader perspective of other peoples and cultures.

There is no prescribed program which departmental majors should follow other than to meet the required number of hours for the respective major. Upper level courses are offered based on student needs.

The department also offers a minor program in Latin, Greek, Spanish, or French.

A native speaker of a language which is offered for credit by the Department of Foreign Languages and Literatures or anyone with native speaker proficiency in such a language must consult the department for proper placement and permission to enroll.

Classical Civilization

110 Major Triumphs of Greece and Rome (3)
Major accomplishments of the Greco-Roman civilization and their impact upon the modern world. On demand.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit four hours.

300 Scientific Terminology (2)
Designed to meet the needs of nonlanguage students. Origin and derivation of English words in common scientific usage. On demand.

301 Greek Art and Archaeology (3)
A study of the development of art and archaeology from the Minoan-Mycenaean period through the age of classical Greece. On demand.

302 Etruscan and Roman Art and Archaeology (3)
The development of Etruscan and Roman art and archaeology including a brief survey of the Hellenistic period. On demand.

310 The Greco-Roman World (3)
The history, culture, and lifestyles of the ancient Greeks and Romans. On demand. May be registered as History 310.

395 Greek and Roman Tragedy in Translation (3)
A study of the origin of tragedy and its dramatic and philosophical development in the works of Aeschylus, Sophocles, Euripides, and Seneca. On demand. May be registered as English 395.

3% Classical Mythology (3)
A study of the origins and meaning of Greek and Roman myths, their importance for understanding ancient culture, and their influence on later literature and art. On demand.
66—Foreign Languages

397 Greek and Roman Comedy in Translation (3)
A study of the origins, development, and changes in comedy as seen in the works of Aristophanes, Menander, Plautus, and Terence. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

French

Foreign Languages: French (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than French: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course other than Foreign Languages (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major
22 hours French beyond second college year
2.0 average in all French courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in foreign languages: French (B.A.)
(For a student with 2 years of high school French)

Minor

18 hours in French including second year; 9 hours must be at the 300 level or above. Beginning language students must complete 23 hours.

French Courses

101, 102 Elementary French (4,4)
Basic grammar, elementary reading, and conversation. 101 fall/102 spring semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

211, 212 Intermediate French for Conversation (3,3)
Grammar review, intensive oral practice in French, limited readings. 211 fall/212 spring semester. Prerequisites: 101, 102 or 2 years high school French.

213, 214 Intermediate French for Reading (3,3)
Grammar review, extensive reading in French with discussion in English. 213 fall/214 spring semester. Prerequisites: 101, 102 or 2 years high school French.

311, 312 Composition and Conversation (3,3)
Selections from French literature, topics of current interest and articles from French newspapers and magazines may be used as a basis for discussions and compositions. 311 fall/312 spring semester on demand. Prerequisites: 211, 212 or approval of the department.

321 Advanced French Grammar (3)
Special problems in syntax, illustrative reading, composition. On demand. Prerequisites: 211, 212 or approval of the department.

323 Introduction to French Culture (3)
The fine arts, patterns of living, and total life-style of the French people approached through their language, geographical and historical backgrounds included. On demand. Prerequisites: 211, 212 or approval of the department.

331, 332 Introduction to French Literature (3,3)
Representative works from the beginning to 1800 with attention to cultural, political, and social background. Sequel from 1800 to the present. 331 fall/332 spring semester on demand. Prerequisites: 211,212 or approval of the department.

401r Special Topics in French Language or Literature (2-3)
A reading course with emphasis on a field, period, or author, or on a topic of philology or linguistics, or on teaching methods. On demand. By special arrangement with the head of the department and the instructor. Prerequisites: 211, 212 or approval of the department.

The focus of the following courses may include the development of the novel, the theater, poetry, narrative techniques, the moralist tradition, and various critical approaches to works within a century.

407 Seventeenth Century French Literature (3)
On demand. Prerequisites: 277, 272 or approval of the department.
409 Eighteenth Century French Literature (3)
On demand. Prerequisites: 211, 212 or approval of the department.

411 Nineteenth Century French Literature (3)
On demand. Prerequisites: 211, 212 or approval of the department.

413 Twentieth Century French Literature (3)
On demand. Prerequisites: 211, 212 or approval of the department.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

German

101, 102 Elementary German (4,4)
Basic grammar, elementary reading, and conversation. 101 fall/102 spring semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit four hours.

211, 212 Intermediate German for Conversation (3,3)
Grammar review, intensive oral practice in German, limited readings. 211 fall/212 spring semester on demand. Prerequisites: 101, 102 or two years high school German.

213, 214 Intermediate German for Reading (3,3)
Grammar review, extensive reading in German, with discussion in English. 213 fall/214 spring semester on demand. Prerequisites: 101, 102 or two years high school German.

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Greek

Foreign Languages: Greek and Latin (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than Greek and Latin: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category G
1 approved perspectives course other than Foreign Languages (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major
18 hours Latin beyond 101, 102
12 hours Greek
2.0 average in all Greek and Latin courses
Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study for foreign languages:

Minor in Greek
21 hours of Greek with at least 9 hours at the 300 level or above.

Greek Courses

101, 102 Elementary Greek (3,3)
Elements of the Greek language. Reading of Greek prose. 101 fall/102 spring semester.

199r Special Projects (1-4)
On demand.

203 Greek Epic (3)
Readings from the Iliad and the Odyssey of Homer. On demand.

310 Readings of Greek Literature (3)
A study of the development of Greek literature with selections from representative authors. On demand.

312 Advanced Greek Grammar and Composition (3)
On demand.
Foreign Languages: Latin (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than Classics and Latin: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category G
1 approved perspectives course other than Foreign Languages (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major
21 hours Latin beyond 101,102; 9 hours from Classics 310, 395, 396, 397
2.0 average in all Latin courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Latin Courses

101, 102 Elementary Latin (3,3)
Elements of the language. Reading of Latin prose. 101 fall/102 spring semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

201 Intermediate Latin (3)
Intensive review of basic Latin grammar; selections from Cicero, Livy, Pliny, and Ovid. Fall semester. Prerequisites: Latin 101,102 or 2 years of high school Latin. At the discretion of the department properly qualified students with only 1 year of high school Latin may be admitted.

202 Intermediate Latin (3)
Readings from Vergil's Aeneid. Spring semester. Prerequisite: Latin 201.

207 Cicero (3)
Selected readings from the Letters and Orations of Cicero. On demand.

208 Horace (3)
Selections from the Odes and Epodes. On demand.

310 Readings in Latin Literature (3)
A study of the development of Latin literature with selections from representative authors. On demand.

312 Latin Prose and Composition (3)
On demand.

350r Latin Prose (3)
Sallust, Caesar, Tacitus, Seneca, and Petronius considered in different semesters. On demand. Maximum credit 9 hours.

351r Latin Poetry (3)
Latin lyric poetry, Roman comedy, Latin satire, and Lucretius considered in different semesters. On demand. Maximum credit 9 hours.
425r Special Topics in Latin Literature (2)  
Readings in a specific author, genre, or period. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)  
On demand. See "Departmental Honors," page 37.

497r Research (1-4)  
On demand.

498r Individual Studies (1-4)  
On demand.

499r Group Studies (1-4)  
On demand.

## Modern Languages

### 100 A Profile of French Culture (3)  
A humanistic view of the patterns of living and total life-style of the French people with special attention to their art, music, and literature (in translation). Geographical, historical, and linguistic backgrounds included. On demand. No foreign language credit.

### 110 A Profile of German Culture (3)  
A humanistic view of the patterns of living and total life-style of the German people with special attention to their art, music, and literature (in translation). Geographical, historical, and linguistic backgrounds included. On demand. No foreign language credit.

### 120 A Profile of Hispanic Culture (3)  
A humanistic view of the patterns of living and total life-style of the Hispanic people with special attention to their art, music, and literature (in translation). Geographical, historical, and linguistic backgrounds included. On demand. No foreign language credit.

### 199r Special Projects (1-4)  
Individual or group projects. On demand. Maximum credit 4 hours. No foreign language credit.

### 201 Modern French & German Literature: Alienation through Conflict (3)  
French and German literature in translation; the study of dramatic and fictional works which reveal aspects of man’s attempt to understand and explain his world. On demand. No foreign language credit.

### 202 Language, Literature, and the Exile Experience (3)  
A literary and linguistic view of the exile experience. Selected readings from the literary outputs of exile communities in Europe and the U.S. Studies in language preservation and rejection in exiled communities. On demand. No foreign language credit.

### 300 Masterpieces of French Literature in Translation (3)  
Study of representative works from French literature in relation to their cultural context. On demand. No foreign language credit.

### 310 Masterpieces of Germanic Literature in Translation (3)  
Study of representative works from German or Germanic literature in relation to their cultural context. On demand. No foreign language credit.

### 320 Masterpieces of Hispanic Literature in Translation (3)  
Study of representative works from Spanish, Catalan, Portuguese, or Latin-American literature in relation to their cultural context. On demand. No foreign language credit.

### 330 Masterpieces of European Literature in Translation (3)  
Study of representative works from French, German, or Hispanic literature in relation to their cultural context with emphasis on a specific period, genre, or theme. On demand. No foreign language credit.

### 497r Research (1-4)  
On demand.

## Spanish

### Foreign Languages: Spanish (B.A.)

#### General Education (see pages 25-27 for list of approved courses)

**Category A**  
2 approved courses in written communication in the English language (6 hours)

**Category B**  
3 approved courses other than Spanish; one from humanities, one from fine arts, and one from either (3 hours each)

**Category C**  
2 approved behavioral or social science courses (6 hours)

**Category D**  
1 approved physical or natural science course with laboratory (4 hours)

**Category F**  
1 approved mathematics course (3 hours)

**Category G**  
1 approved perspectives course other than Foreign Languages (3 hours)

**Health and Physical Education**  
021 plus one additional semester physical education activity

### Major

22 hours Spanish beyond second college year  
2.0 average in all Spanish courses

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

### Typical course of study in foreign languages: Spanish (B.A.)

(For a student with 2 years of high school Spanish)

Spanish Courses

101, 102 Elementary Spanish (4,4)
Basic grammar, elementary reading, and conversation. 101 fall/102 spring semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

211, 212 Intermediate Spanish for Conversation (3,3)
Grammar review, intensive oral practice in Spanish. Prerequisites: 101, 102 or 2 years high school Spanish. fall/212 spring semester.

213, 214 Intermediate Spanish for Reading (3,3)
Grammar review, extensive reading in Spanish with discussion in English. Prerequisites: 211, 212 or 2 years high school Spanish.

311, 312 Composition and Conversation (3,3)
Selections from Spanish literature, topics of current interest, and articles from Spanish newspapers and magazines may be used as a basis for discussions and compositions. 311 fall/312 spring semester.

321 Advanced Spanish Grammar (3)
Special problems in syntax, illustrative reading, and composition. On demand. Prerequisites: 211, 212 or approval of the department.

323 Introduction to Spanish Culture (3)
The fine arts, patterns of living, and total life style of the Spanish people approached through their language. Geographical and historical backgrounds included. On demand. Prerequisites: 211, 212 or approval of the department.

325 Introduction to Spanish-American Culture (3)
The fine arts, patterns of living, and total life style of the Spanish-American people approached through their language. Geographical and historical backgrounds included. On demand. Prerequisites: 211, 212 or approval of the department.

331 Masterpieces of Spanish Literature (3)
Readings of representative works from the earliest epic and lyric poetry to the modern novel and theater with attention to cultural, political, and social background. On demand. Prerequisites: 211, 212 or approval of the department.

400r Topics in Spanish Literature (3)
Study of topics such as Spanish literature of the Golden Age, 18th and 19th century Spanish literature, The Generation of 1898, and contemporary Spanish literature. On demand. Prerequisites: 211, 212 or approval of the department.

401r Special Topics in Hispanic Language or Literature (2-3)
A reading course with emphasis on a field, period, or author, or on a topic of philology or linguistics. On demand. By special arrangement with the department head and the instructor. Prerequisites: 211, 212 or approval of the department.

402r Topics in Spanish-American Literature (3)
Study of topics such as Spanish-American novel, Spanish-American theater and poetry, and Spanish-American essay. On demand. Prerequisites: 211, 212 or approval of the department.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
required, however, that at least 30 hours be completed at UTC. Through an agreement with Memphis State University, UTC students are accepted preferentially for Memphis State’s Geology Field Camp (Geology 4622, 6 hours credit) held each summer in the Black Hills of South Dakota. Additional information and application forms are available from the Geosciences Department.

Graduate study preparation
Most graduate schools in geology require a minimum of 1 year of calculus, 1 year of calculus-based physics, and a good background in courses from biology, chemistry, and computer science. Therefore, students intending to pursue a master’s degree in geology should take those courses (beyond UTC’s major requirements) that will best prepare them for the graduate program of their choice. It is strongly recommended that the prospective graduate student also take Geology 497r.

*Mathematics 106, 135, and F145 may be recommended to precede Mathematics F150, depending on preparation of the individual student.

**Minors**

**Geology:**

18 hours of geology beyond the 100 level. At least 9 hours 300 level or above.

**Geography:**

18 hours of geography including 101 and 104 and at least 9 hours 300 level or above.

---

**Geology Courses**

**100 Earth Science (4)**

An interdisciplinary approach to the planet earth: an overview of the origin and evolution of the earth—earth’s interior and surface features, as well as the oceans and atmosphere. Explores the advances of modern technology in the confirmation of the plate tectonic theory and a look toward Earth’s future. On demand. Lecture 3 hours, laboratory 2 hours.

**111 Physical Geology (4)**

Introduction to geology: age and origin of the earth; earth materials, processes, and resultant structures. Field trips. Every semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 2 years of high school algebra or Mathematics 106.

**112 Historical Geology (4)**

Origin of the earth and its geologic history, the concept of geologic time, the fossil record. Spring semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 111 or permission of instructor.

**199r Special Projects (1-4)**

Individual or group projects. On demand. Prerequisites: consent of instructor, receipt of an acceptable proposal, and permission of the department head. Graded on a satisfactory/no credit basis. Maximum credit 4 hours.

**225 Oceanography (3)**

**303 Sedimentary Rocks and Stratigraphy (4)**

Introduction to the principles of sedimentary rock classification and stratigraphic correlation with an emphasis on the classic stratigraphy of the U.S.; the facies concept; correlation, and paleogeographic reconstruction techniques. Field trips. Fall semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 112.

**307 Geology of Tennessee (3)**

Geologic resources, structure, and history of Tennessee and adjacent areas. Lecture and field trips. On demand. Prerequisite: a previous course in geology.

**321 Invertebrate Palentology (4)**

Characteristics of the fossil record, centering on the invertebrate animals; principles of taxonomy and population analysis; interpretation of faunal assemblages; concept of biostratigraphy. Laboratory work centers on the morphology and time range of the major fossil groups. Field trips. Spring semester alternate even years. Lecture 3 hours, laboratory 3 hours. Prerequisite: 112.

**330 Sedimentation (4)**

Recognition of modern environments such as tidal flat and beach and stream channel deposits in ancient rocks. Mapping of critical criteria in ancient deposits in outcrop and from well logs to interpret environments of deposition. Extensive field work. Spring semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 303.

**341 Mineralogy (4)**

Crystallography, physical properties, and geochemistry of minerals and their occurrence and classification in natural rocks. Fall semester alternate odd years, lecture 3 hours, laboratory 3 hours. Prerequisite: 111. Pre- or corequisite: Chemistry 121.

**342 Petrology (4)**

Study of igneous and metamorphic rocks, their classification and their geological environments of formation. Field trips on weekends. Spring semester. Lecture 3 hours, laboratory 3 hours. Prerequisite: 341.

**351 Field Methods and Structure I (4)**

Instruments and methods of geologic mapping, local stratigraphic studies along with the preparation of geologic maps and reports. Fall semester. Variable lecture and laboratory time. Pre-requisites: 111 and 342.
Lecture 3 hours, laboratory 3 hours. Prerequisites: Geology 111 and Physics 104 or 230.

404 Geologic Mapping (3)
Mapping of sedimentary and crystalline rocks with approximately equal emphasis. Techniques of both small-scale and large-scale mapping of a variety of rock types and structural features. Requires drafting, report writing, and weekend field work. Spring semester alternate odd years. Prerequisites: Geology 352 or Environmental Studies 340 and approval of instructor.

405 Principles of Geochemistry (4)
Origin and distribution of the elements. Applications of chemistry to geological problems. Spring semester alternate odd years. Lecture 3 hours, laboratory 3 hours. Prerequisites: Geology 342 and 1 year of college chemistry.

431 Sedimentary Petrology (3)
Genesis of sedimentary rock clasts including arkose, graywacke, orthoquartzite, and carbonates. Microscopic analysis and field studies. Fall semester alternate even years. Variable lecture and laboratory time dependent on topic. Prerequisite: 330.

433 Coal Geology (2)
Stratigraphic and sedimentological study of coal environments, especially of the Cumberland Plateau. Topics include coal sedimentation and stratigraphy of Tennessee and adjacent areas, coal characterization, reserve evaluation, extraction methods. Extensive field trips. On demand. Prerequisite: 330.

435 Coal Petrology (4)
Techniques in microscopic analysis of coal as a heterogenous solid. On demand. Lecture 3 hours, laboratory 3 hours. Prerequisite: 303 or permission of instructor.

440 Petroleum Geology (3)
Reading of radioactive well logs and preparation of panel diagrams, structure contour maps and isopach maps with a view of developing an explorational philosophy in the search for oil and gas. Spring semester alternate years. Prerequisites: 111 and 112.

445 Hydrology (3)

450 Economic Geology (4)
The origin, distribution, and classification of mineral deposits formed by igneous, sedimentary, and metamorphic rocks, as well as secondary processes. Introduction to methods of exploration and development. Spring semester alternate even years. Lecture 3 hours, laboratory 3 hours. Prerequisites: 342 and Chemistry 122.

470 Engineering Geology (4)

490 Senior Seminar (2)
A culminating senior experience giving students an opportunity to exercise judgment in solving geological problems. Spring semester. Prerequisite: consent of instructor.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
On demand. Graded on a satisfactory/no credit basis. See "Departmental Honors," page 31.

497r Research (1-4)
On demand. Consent of instructor, receipt of an acceptable proposal, and permission of the department head. Graded on a satisfactory/no credit basis. Maximum of 4 hours.

498r Individual Studies (1-4)
Spring semester. Consent of instructor, receipt of an acceptable proposal, and permission of the department head. Graded on a satisfactory/no credit basis. Maximum of 4 hours.

499r Group Studies (1-4)
Fall semester. Consent of instructor. Maximum of 4 hours.

Geography Courses

101 Physical Geography (3)
The physical environment with emphasis on processes that influence the distribution and pattern of landforms, water, climate, vegetation, and soil. Fall semester.

104 Cultural Geography (3)
Human perception of environment, rural/urban behavior, territoriality, prejulicial use of space, spatial diffusion, migration, and spatial patterns of selected cultural activities. Every semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Graded on a satisfactory/no credit basis. Consent of instructor, receipt of acceptable proposal, and permission of department head. Maximum credit 4 hours.

206 Atmosphere, Climatology, and Mankind (3)
The atmosphere about us and its interactions with human society. Atmospheric origin, composition, moisture, temperature, general circulation, and pollution problems. Jet streams and variations of weather and climate over time and space. Fall semester alternate even years.

209 Economic Geography (3)
Spatial influences on economic behavior, analysis of the location and spatial structure of world economic activities. Fall semester.

221 Maps and Map Interpretation (3)
Nature and use of maps, with particular reference to the construction of map projections. Use of special maps and the interpretation of aerial photographs. Spring semester alternate odd years.

250 World Resources (3)
Location, utilization, production, consumption, and significance of resources to society. Introduction to the vast, interlocking network of activities that produce and affect the world’s use and consumption of resources. Spring semester alternate odd years. Lecture 3 hours. May be registered as Environmental Studies 250.

407 Environmental Conservation (3)
Theories, methods, and practices of environmental management and resource utilization. Emphasis on soil, forest, water, mineral, and human resources. Spring semester.

415 Urban Geography: Urban Land Development & Redevelopment (3)
Settlement of the land, and use, misuse, and reuse of urban land in a changing society. On demand. May be registered as Sociology 415.

430 Permitting of Coal, Oil, and Gas Lands (2)
Consideration of the permitting process for exploitation of coal, oil, and gas properties, especially as applied to Tennessee, but emphasizing the common features of state and federal regulations in the adjoining states. On demand.
440 Environmental Impact of Coal Extraction (3)
Consideration of the environmental impact of coal's extraction by strip
and deep processes. Case study approach to the problem. Emphasis is on
most environmentally sound techniques available. On demand.

465 Remote Sensing and Imagery Analysis (3)
Principles of aerial and satellite photography and infra-red, multispectral,
and microwave sensing. Interpretation of remotely sensed data,
including application to problems in a variety of environmental
sciences. On demand. Lecture 2 hours, laboratory 2 hours. Prerequisites:
senior standing and approval of instructor.

497r Research (1-4)
On demand. Consent of instructor, receipt of an acceptable proposal,
and permission of the department head. Graded on a satisfactory/no
credit basis. Maximum of 4 hours.

498r Individual Studies (1-4)
On demand. Consent of instructor, receipt of an acceptable proposal,
and permission of the department head. Graded on a satisfactory/no
credit basis. Maximum of 4 hours.

499r Group Studies (1-4)
On demand. Consent of instructor. Maximum of 4 hours.

History

Associate Professor Moore, Head
Professors Harbaugh, Ingle, Linnemann, Ward, Wright
Associate Professors Deierhoi, Rice, Russell

History (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6
hours)

Category B
3 approved courses other than history; one from humanities, one from
fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than history
(6 hours)

Category D
1 approved physical or natural science course with laboratory (4
hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course other than history (3 hours)

Health and Physical Education 021 plus one additional semester
physical education activity

Foreign language through second college year

Major
33 hours history including 101, 102, 201, and either 400 or 401; no more
than one-half of the history courses at the 100 and 200 level
12 hours of related courses beyond the general education requirements;
6 in the humanities and fine arts and 6 in the behavioral and social
sciences; 6 to be taken at the 300 level or higher. Courses suitable as
related courses will vary according to a student's program and will be
determined by a student's adviser.

2.0 average in all history courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in history (B.A.)

Some of the electives should be chosen to complete the related course
requirement for majors. Students should make certain they select
enough electives to complete 128 hours.

Minor

A minor in American history requires History 203-204 (6 hours) plus an
additional 12 hours in American history at the 300-400 level (total of 18
hours). A minor in world history (European or non-Western history)
requires History 101-102 or 207-208 or 211-212 (6 hours) plus an
additional 12 hours in European or non-Western history at the 300-400
level (total of 18 hours).

History Courses

101, 102 Emergence of the Modern World (3, 3)
A survey of the processes, ideas, and events that have shaped our
contemporary world, emphasizing modernization and industrialization;
imperialism, nationalism, and competing ideologies in a world setting.
First semester concentrating on the period from approximately 1300-
1800; second semester extending from 1800 to the present. Every
semester.
74—History

114 Heroes and Villains (3)
A biographical approach to world history. Personalities and their roles in shaping the modern world, to be selected from a variety of fields of human activity: politics, science, philosophy, religion, economics, war, etc. Attention given to interpretations concerning the role of individuals in history. Every semester.

120x Historical Themes (3)
An analysis of some topic of contemporary significance from an historical perspective. The theme under study to be viewed in a number of historical settings to add insights to our understanding of the present. On demand.

199r Special Projects (1-4) Individual or group projects. Every semester. Maximum credit 4 hours.

203, 204 United States History (3, 3)
A survey of American history; a brief review of early colonial period; more intensive study beginning with 1763; special attention given to national leaders, their ideas and contributions, as well as to the main currents and developments in American life. First semester study extending to 1865. Every semester.

207 Introduction to Asian Civilization: Middle East and India (3)
A survey of the major trends of Islamic and Indian history. Emphasis placed on traditional cultural values, periods of power and greatness, problems of modernization, and recent developments. Students should gain perspective on such current issues as the Arab-Israeli conflict and the oil crisis. On demand.

208 Introduction to Asian Civilizations: China and Japan (3)
A survey of the major trends of Chinese and Japanese history. Emphasis placed on traditional cultural values, periods of power and greatness, problems of modernization, and recent developments. Students should gain perspective on current conditions in China and Japan. On demand.

211 History of Subsaharan Africa to 1880 (3)
Geography and people of Africa; origin of traditional African societies, major African empires; Islamic impact on Africa; oral traditions; the slave trade; African artistic, musical, architectural, and religious traditions; early European presence in Africa; Swahili city states; African commerce and technology; major central and southern African politics. Fall semester alternate years.

212 History of Subsaharan Africa, 1880-Present (3)
Partition of Africa; ideology of imperialism; growth of colonial systems and the African reaction; colonial devolution and independence; apartheid; the European colonial legacy; the European impact on traditional African social and political structures; the nature of modern African cultural trends and developments. Spring semester alternate years.

215, 216 Latin American History (3, 3)
A survey of Latin American history from the time of discovery to the present, emphasizing economic, political, and social institutions as well as cultural developments; the first semester, the colonial period (to about 1825); the second semester, since independence. On demand.

221 Science, Technology, and Society in the Industrial Age (3)
An historical examination of the impact of scientific and technological change in Western society since the advent of the Industrial Revolution. On demand.

301 Seminars in History (3)
An introduction to historical interpretation and analysis through an examination of specific topics in American, European, or non-Western history. Required of both those majoring in history or secondary education in history, but other students welcome. Every semester.

310 The Greco-Roman World (3)
The history, culture, and life-styles of the ancient Greeks and Romans. On demand. May be registered as Classics 310.

311, 312 Medieval Europe (3,3)
Europe from the fall of the Roman Empire to the Italian Renaissance; the first semester emphasizing the formation of medieval institutions to c. 1200; the second semester stressing the shattering of the medieval synthesis. 311 fall/312 spring semester alternate years.

313 The Age of the Renaissance (3)
Economic, social, artistic, and political developments, 1300-1500; Italian Humanism; Christian Humanism; and ferment in the Church. Fall semester alternate years.

314 The Age of the Reformation (3)
Religious, political, social, and economic factors involved in the Protestant and Catholic Reformation in the 16th century. Spring semester alternate years.

315 Early Modern Europe, 1600-1750 (3)
Religious, political, economic, and social development in this period of contradiction and intellectual ferment; Puritans, counter-Reformation; Constitutionalism, Absolutism; Scientific Revolution, the Baroque in the arts. On demand.

316 The Enlightenment (3)
Intellectual developments from the mid-17th century through the 18th century, scientific revolutions, virtuosos, and the Philosophers. On demand.

317 The ERA of the French Revolution and Napoleon (3)
Developments leading to the French Revolution and the fall of the monarchy, the noble resurgence and the phases of the revolution; accomplishments and failures of the revolution; Napoleon Bonaparte as heir to the Bourbons and the Enlightenment and Revolution, and as a social engineer. Spring semester alternate years.

318 Europe in the Nineteenth Century (3)
Europe from the creation of the Napoleonic Empire to the outbreak of World War I; the development and failure of the Congress System; the operation of the balance of power and international relations; national consolidation and domestic political developments, the rise of imperialism, and the spread of industrial society. Fall semester alternate years.

319 Europe in the Twentieth Century (3)
Political, economic, and social development of the European states from the outbreak of World War I to the present. Special attention given to the problems of world wars and reconstruction, with development of conflicting ideologies, the impact of worldwide depression, the decline of European colonial systems, and the diplomacy of the cold war. Spring semester alternate years.

323, 324 History of England (3, 3)
The history of Britain from the earliest times to the present; the first semester emphasizing constitutional and institutional developments to 1660; the second semester, the growth of political democracy, the British Empire, economic and social change. 323 fall/324 spring semester alternate years.

325, 326 History of the British Empire and Commonwealth (3, 3)
A study of the rise and fall of the first British Empire, social reform and the rise of opposition to imperialism, mid-Victorian Imperialism, the growth of the second British Empire, the origins of African and Asian nationalism, the impact of World Wars I and II, the emergence of the Commonwealth and colonial devolution. First semester to c. 1867. 325 fall/326 spring semester alternate years.

327 Russian History since 1800 (3)
Characteristics of Tsarist society in the 19th century, attempts to reform the nation, the revolutions of 1905 and 1917, and the Soviet system. Fall semester alternate years.

331 Colonial North America (3)
The Colonial Period of American history, from the beginnings to 1776; background of English colonization of America, colonial settlements, the development of colonial society and institutions. On demand.

333 U.S., 1776-1815 (3)
Founding the American nation. The Revolutionary, Federalist, and Jeffersonian periods of American history. On demand.
334 U.S., 1816-1850: The Middle Period (3)
The westward movement and the beginnings of industrialism, Jacksonian democracy, slavery, and Manifest Destiny through the war with Mexico and the Compromise of 1850. On demand. Prerequisites: History 101, 102, or permission of instructor.

335 The Civil War and Reconstruction (3)
The Old South and the causes of the Civil War; the leaders; the chief political, military, and economic developments from the Compromise of 1850 to the end of Reconstruction. On demand.

336 The Emergence of Modern America (3)
The United States from the end of the Civil War to 1900. On demand.

337 Progressive America: From TR to FDR (3)
An examination of the political, economic, cultural, and diplomatic forces that shaped America in the early 20th century; topics include progressivism, World War I, the roaring twenties, and the Great Depression. Fall semester alternate years.

338 Contemporary America Since 1945 (3)
An examination of political, economic, and social aspects of the recent past, including post-World War II readjustments, the Cold War, the Kennedy years, the Vietnam trauma, and the downfall of the "imperial presidency." Spring semester alternate years.

341 A History of the South (3)
The role of the South in the formation of the nation. Interpretations of the institutions and developments that made the South unique. On demand.

343 History of Tennessee (3)
A study of the political, economic, social, and cultural development of the state from the days of the Indians to the present. On demand.

346 Afro-American History (3)
A historical survey of Black Americans with some attention to African backgrounds; emphasis on the reaction of blacks to their experience in the New World. On demand.

350 War Through the Ages (3)
The evolution of war as an instrument of national policy and the effects of wars on the world balance of power. Treatment will be episodic, concentrating on the Persian and Peloponnesian Wars, the Punic Wars, the Hundred Years War, the Seven Years War, the Wars of the American and French Revolutions and Napoleon, and the World Wars of the 20th century. Fall semester.

364 Traditional China: History and Culture (3)
A survey of Chinese history and culture prior to the impact of the West. Course readings provide a basic political and chronological orientation, but emphasis placed on literary and philosophical writings in translation, and on studies of the social structure of traditional Chinese society. On demand.

365 Traditional Japan: History and Culture (3)
A survey of traditional Japanese history and culture prior to the impact of the West. Course readings provide a basic political and chronological orientation, but emphasis placed on literary, cultural, and artistic achievements, and on studies of the social structure of traditional Japanese society. On demand.

368 The Far East in Modern Times (3)
East Asia since the mid-19th century and the effects of the West; the Opium War, modernization, the Chinese Revolution of 1911, Japanese expansion, Pearl Harbor and Hiroshima, Mao Tse-tung and the Chinese Communists. On demand.

369 China Since 1949 (3)
Examines the People’s Republic of China from its founding in 1949 to the present. Both domestic developments and foreign affairs considered. Topics include: Mao Tse-tung, the Korean War, Great Leap Forward, the Cultural Revolution, and events since Mao’s death in 1976. On demand.

370 The Middle East (3)
Background and setting of the modern Middle East; factors influencing Great Power strategy; Islam; rise and decline of the Ottoman Empire; imperialism and the breakup of the Ottoman Empire. On demand.

372 South Asia in Modern Times (3)
The sunset of the British Raj in India; Gandhi, Nehru, and the Indian independence movement; the partition between India and Pakistan; postindependence years including the government of Indira Gandhi. On demand.

385R National History (3)
A course dealing with a selected national history. On demand. Prerequisites: by special arrangement with the department head and instructor; specific prerequisites to be given when the topic is announced.

400 Historical Writing: Theory and Practice (3)
Readings in the works of selected, representative historians from the ancient Greeks to contemporary Americans: Herodotus to Hofstadter. Designed to provide an introduction to the development of Western historiography and some familiarity with the great figures and works of our historical tradition. Primarily for senior majors in history and others interested in the development of historical writing. On demand.

401 Senior Tutorial (3)
Directed readings, special study, and investigation. Primarily for senior majors in history and others interested in an intensive study of historical problems. Every semester.

411, 412 American Intellectual and Social History (3,3)
Survey and analysis of American assumptions, social attitudes, and institutions, and their effects on American life. First semester coverage extends to 1865. 411 fall/412 spring semester alternate years.

415, 416 Economic History of the United States (3,3)
First half from colonial period to 1873. Origins, development, and expansion of the American economy with emphasis on roles of government and business. Relationship between economic growth and social development designed to provide perspective on problems of modern society. On demand.

417, 418 Diplomatic History of the U.S. (3,3)
The history of American foreign relations from their colonial origins to the present. On demand.

419 The City in American History (3)
Role of the city in American history from colonial times to the present; emphasis on emergence of the 20th-century metropolis; city planning, problems of modern mass living, and other topics peculiar to urban history also considered. On demand.

420 History of the American Presidency (3)
A seminar on the nature, development, and problems of the American presidency in historical context with emphasis on those presidents who have contributed significantly to its range and scope, from Washington to Reagan. On demand. Prerequisites: 203, 204, or permission of instructor.

421 Changing Interpretations in American History (3)
An analysis of changing interpretations of selected topics in American history, from the Puritans to the present. On demand. Prerequisites: 203, 204, or permission of instructor.

461 European Diplomatic History (3)
From the defeat of Napoleon to the Cold War; attempts to create a European system, the failure of the Congress system, and the operation of the balance of power; the diplomacy of imperialism; World Wars I and II; 20th-century attempts at a world order. On demand.

463 Social and Economic History of Europe (3)
The impact of the social and industrial revolutions on the societies of Europe: agrarian conditions, urbanization, and the population explosion, living standards, status and class and social movements. On demand.
**Interdisciplinary Studies**

*Professor John E. Trimpey, Acting Head*

The Department of Interdisciplinary Studies coordinates a number of programs leading to baccalaureate degrees as well as several other nondegree programs. Because of their interdisciplinary nature, these programs draw upon the varied resources of a number of departments.

Degree programs: American Studies (B.A.); Humanities (B.A.). Nondegree program: University Studies.

---

**American Studies**

*Professor John E. Trimpey, Coordinator*

The American studies major is a Bachelor of Arts degree consisting of two parts: 1) a core curriculum required of all majors and 2) a concentration of study in one of the following areas: American literature, American history, philosophy and religion, political science, or sociology- anthropology. American studies courses are described below; all other required courses are described in the listing of each named department.

**American Studies (B.A.)**

**General Education** (see pages 25-27 for list of approved courses)

- **Category A**
  - 2 approved courses in written communication in the English language (6 hours)

- **Category B**
  - 3 approved courses; one from humanities, one from fine arts, and one from either (3 hours each; approved related courses below will apply)

- **Category C**
  - 2 approved behavioral or social science courses (6 hours: approved related courses below will apply)

- **Category D**
  - 1 approved physical or natural science course with laboratory (4 hours)

- **Category F**
  - 1 approved mathematics course (3 hours)

- **Category G**
  - 1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Foreign Language through second college year.

**Major**

The following core courses are required of all majors:

American Studies 200: Introduction to American Studies
American Studies 400: American Studies Seminar
American Studies 499r: Topics in American Studies
Computer Science 210: Computer Information Systems I
Economics C101, C102: Principles of Economics
ED Curr. & Instr. 201: History of Education in U.S.
English 213, 214: American Literature
History B203, B204: United States History
Typical course of study in American studies (B.A.)

Below is a typical program of study for an American studies major. The specific courses, however, might vary from student to student since one’s area of concentration considerably affects course choices, especially for the junior and senior year.

American Studies (B.A): American history concentration

American Studies Courses

199r Special Projects (1-4)
Individual and group studies. On demand.

200 American Ideals in the Arts (3)
Specific works of art drawn from music, painting, architecture, theater, and literature considered in relation to each other and to American social and spiritual ideals. In addition to the instructor, specialists from various disciplines and the community will serve as guest lecturers. On demand.

400 American Studies Seminar (3)
Advanced level discussion of the interrelationship of methodologies and some research project in which each student applies the methodology of an area of concentration to a broad cultural phenomenon within American life. On demand. Prerequisite: 200.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand. Prerequisite: approval of the coordinator and the department head.

498r Individual Studies (1-4)
On demand. Prerequisite: approval of the coordinator and the department head.

499r Topics in American Studies (1-4)
Special topics, themes, and studies. On demand.

Humanities

Professor Fulton, Coordinator
Professor J. Trimpey

The humanities generally comprise languages and literature, philosophy, religion, history, and the fine arts. With the approval of the Faculty Board for the Humanities, each major designs a program of study by selecting appropriate courses from those disciplines and from the humanities courses listed below.

Humanities (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)
78—Mathematics

Category F
1 approved mathematics course (3 hours)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Foreign language through second college year

Major and related courses

45 hours approved program of studies related to the culture of a time and place (America, Europe, or the non-Western world) or to a major idea or theme lending itself to analysis through the disciplines of the humanities. Focus on human experience as revealed in the religious, intellectual, artistic, linguistic, and social actions which characterize the chosen area of study. No more than 15 hours at 100-200 level and no more than 18 hours in any one discipline. Maximum of 15 of the 45 hours may be awarded by the Faculty Board for the Humanities for independent study on campus or for knowledge gained in travel or in work.

 Humanities 490: Senior Educational Experience
2.0 average in the approved program courses

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

Typical course of study in humanities (B.A.)

Because each student follows a unique program of study, it is impossible to outline a typical curriculum. Hypothetically, however, supposing a student chose to focus on Medieval and Renaissance Europe, the course of study might look like this.

University Studies

Professor John E. Trimpey, Acting Head

A variety of interdisciplinary courses and seminars which may be taken for elective credit or, when approved, may satisfy certain major or general education requirements.

199r Interdisciplinary Seminars (1-4)
Specific topics, themes, and subjects for which the interdisciplinary approach is especially useful. On demand.

210 Death and Life in Literature (3)
The study of themes of death and dying in imaginative literature, with emphasis on the correlation between fictional representations of death and of life, its content and values; and on the connection between metaphors of death and approaches to textual interpretation. Primary texts include poetry, short stories, essays, novels, and plays. On demand.

499r Interdisciplinary Seminars (1-4)
Specific topics, themes, and subjects for which the interdisciplinary approach is useful. On demand.

For current offerings see schedule of classes.

Mathematics

Professor J. Ware, Head

Professors W. Edwards, Jayne, McIntosh, Nymann
Associate Professors Hutcherson, Kindermann, Kuhn, Rozema, Schlereth, R. Smith, Walters
Assistant Professors Byrd, Cuffe, Darken, Fordyce, W. Walton
Instructors Bennett, Fitzmaurice, Griswold, J. Morgan, V. Waddell

Mathematics Learning Center Coordinators Banasiak, Urcavich

The Department of Mathematics offers two degree programs, the B.A. and the B.S. in applied mathematics. The B.A. is the traditional liberal arts degree with a major in mathematics.
The B.S. in applied mathematics is a relatively new degree program designed to examine the growing influence of mathematics in business and industrial practices. The student must select a concentration in one of the following areas: actuarial science, computer science, corporate science (formerly business administration), or systems science.

It is also possible for a student to receive a B.S. degree in education with a teaching area in mathematics. See School of Education listing.

The Department of Mathematics also offers a minor in mathematics.

### Applied Mathematics (B.S.)

#### General Education

(see pages 25-27 for list of approved courses)

### Major and related courses

**Computer Science 118**
Mathematics (135 and/or F145)*, F150, 160, 250, 260, 295, and 18 hours 300 and 400-level mathematics courses including 321, 350, but excluding 415, 416, 451

Physics 230, 231

2.0 average in all mathematics courses and also in all 300, 400-level mathematics courses
Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

- Mathematics sequence may begin with 135 and/or F145 rather than 150 depending on preparation.

**Typical course of study in mathematics (B.A.)**

(Mathematics 160 in summer school — if needed)

**Sophomore**

- Mathematics 250 | 4
- Mathematics 295 | 3
- General Education Category B | 3
- Language (2nd year) | 3
- Elective | 3
- Total | 16

**Junior**

- Mathematics 350 | 3
- Mathematics 321 | 3
- Physics 231 | 4
- Electives | 6
- Total | 16

**Senior**

- Mathematics Elective | 3
- Mathematics Elective | 3
- Electives | 12
- Total | 15

- Mathematics sequence may being with 135 and/or F145 rather than 150 depending on preparation.

**Minor**

Required courses: Mathematics 150, 160, 250, 260
Elective courses:
- Three courses totaling at least 9 hours from: Mathematics 295 and/or any 300-400 level mathematics course (excluding 415, 416, 451)
  (Note: 295 is not required for minor.)
- A 2.0 average on all elective courses.
- At least two elective courses must be taken at this institution

**Mathematics Courses**

A minimum grade of C must be made on any mathematics course used as a prerequisite for any other mathematics course.

105 **Elementary Algebra (4 hours institutional credit)**
- Review of fractions, percents, and decimals. Basic topics in algebra, including operations with signed numbers and polynomials, linear equations and inequalities, factoring, rational expressions, radicals, basic graphing techniques, and elementary applications. Every semester. Credit not applicable toward any degree.

106 **Intermediate Algebra (4 hours institutional credit)**
- The real number system, first degree equations and inequalities, exponents and polynomials, factoring, rational expressions, rational exponents and roots, linear equations and inequalities in two variables, quadratic equations, systems of equations, absolute value equations, functions and applications. Formerly Mathematics 107. Every semester. Credit not applicable toward any degree.

109r **Special Projects (1-4)**
- Individual or group projects. On demand. Maximum credit 4 hours.

120r **Introduction to Contemporary Mathematics (3)**
- A study of the nature and techniques of mathematics, including such topics as number systems, modern geometry, probability, the history and development of mathematical ideas. Fall and spring semesters. Prerequisites: 2 years of high school algebra and acceptable test scores or 106.

124 **Elementary Linear Programming (1)**
- Linear programming and other selected topics which would not be covered in a traditional college algebra or precalculus course. Includes use of the computer. On demand. Prerequisite: permission of the department.

135 **Precalculus I (3)**
- Solving linear and quadratic equations and inequalities; solving polynomial equations; rational expressions; graphing techniques; functions; exponential and logarithmic functions; systems of linear equations; matrices; geometric linear programming. Every semester. Prerequisites: 2 years of high school algebra and acceptable test scores or 106. Credit not allowed in 135 after 136; 145, or 150 with grades of C or better.

136 **Calculus for Management, Life, and Social Sciences (3)**
- Introduction to calculus: limits, differentiation of functions, optimization, marginal analysis, integration, the Fundamental Theorem of Calculus, applications of integration. Every semester. Prerequisites: 4 years of college preparatory mathematics and acceptable test scores or 135 with minimum grade of C. Credit not allowed in 136 after 150.

145 **Precalculus II (3)**
- Exponential and logarithmic functions; complex numbers; the remainder and factor theorems; trigonometry; conic sections; sequences and series; applications; other selected topics. Every semester. Prerequisites: 2 years of high school algebra, advanced mathematics, and acceptable test scores for 135 with a minimum grade of C. Credit not allowed in 145 after 150 with a grade of C or better.

150 **Calculus I with Analytic Geometry (4)**
- Topics in analytic geometry; limits; derivatives of algebraic functions and their applications: integrals of algebraic functions. Every semester. Prerequisites: 4 years of college preparatory mathematics and acceptable test scores or 145 with minimum grade of C. Credit not allowed in 135 or 136 after 150.

155 **Honors Calculus (4)**
- Calculus of functions of one variable with applications; historical, biographical, philosophical material. Fall semester. Prerequisite: Brock Scholar, others by consent of the department head. Credit not allowed in both 150 and 155 or in 136 after 155. May be substituted for 150 in meeting all requirements.

160 **Calculus II with Analytic Geometry (4)**
- Additional topics in analytic geometry; applications of integration; transcendental functions; hyperbolic functions; techniques of integration, infinite series. Every semester. Prerequisite: 150 with minimum grade of C.

199r **Special Projects (1-4)**
- Individual or group projects. On demand. Maximum credit 4 hours.

210 **Introductory Statistics (3)**
- An introductory course suitable for students in a variety of disciplines, including such topics as: nature, sources, collection, and presentation of data; measures of central tendency; probability; sampling distributions;
82—Mathematics

hypothesis testing; regression and correlation; analysis of variance; other non-parametric statistics. Every semester. Prerequisites: 2 years of high school algebra and acceptable test scores or 106. Credit not allowed in 210 after any other statistics course.

225 Topics in Mathematics for Management, Life, and Social Sciences (3)

Topics from mathematical modeling, the calculus, probability, Markov processes, linear programming, game theory, and other applications. On demand. Prerequisites: linear programming (124 or 135) and calculus (136 or 150) with minimum grades of C.

250 Introduction to Ordinary Differential Equations (4)

Topics in linear algebra and in differential equations. Every semester. Prerequisite: 160 with minimum grade of C.

260 Multivariate Calculus (4)

Vector analysis, three dimensional analytic geometry, polar coordinates, multiple integration and partial differentiation. Every semester. Prerequisite: 160 with minimum grade of C.

295 Foundations of Mathematics (3)

Introductory concepts of sets, functions, equivalence relations, ordering relations, logic, methods of proof, and axiomatic theories. Fall and spring semesters. Prerequisite: 160 with minimum grade of C or permission of instructor. This course is a prerequisite for 321, 322, 350, 412 and 452. Mathematics majors should enroll in it during their sophomore year.

303 Discrete Structures (3)

Topics from combinatorics, graph theory, abstract algebra, and formal logic. Designed to acquaint students with some of the terminology, concepts, and techniques of several areas of discrete mathematics, especially those often applied in computer science, and to give students an appreciation for the nature and utility of precise definitions and careful logical arguments concerning their consequences. Fall and spring semesters. Prerequisites: Mathematics 160 or 225 with minimum grade of C and Computer Science 117 or 118 or 121.

307 Applied Statistics (3)

Introduction to probability and statistical methods with applications to various disciplines. A study of some basic statistical distributions, sampling, testing of hypotheses, and estimation problems. Fall and spring semesters. Prerequisite: 160 with minimum grade of C. Credit not allowed in both 307 and 407-408.

308 Numerical Methods (3)

Accuracy and significance of approximate calculations, finite differences and interpolation, solutions of non-linear equations, systems of linear equations, numerical differentiation and integration, solutions of ordinary differential equations. Fall and spring semesters. Prerequisites: Computer Science 118 or equivalent, Mathematics 250 with minimum grade of C. Pre- or corequisite: Mathematics 260.

321 Introduction to Modern Algebra (3)

Integral domains, rings, fields, groups, elementary number theory, and other selected topics. Spring semester. Required of all B.A. mathematics majors. Prerequisite: 295 with minimum grade of C.

322 Introduction to Point Set Topology (3)

Introductory set theory, topologies and topological spaces, continuous mappings, compactness, connectedness, separation axioms and metric spaces. Summer on demand. Prerequisite: 295 with minimum grade of C.

350 Fundamental Concepts in Analysis (3)

Classical treatment of the basic concepts of calculus: limits, continuity, differentiation, Riemann integration, sequences and series of numbers and functions. Fall semester. Required of all mathematics majors. Prerequisites: 250, 260, 295 with minimum grades of C.

407 Introduction to Probability and Statistics (3)

Introduction to the theory of probability and its applications, counting techniques, sample spaces, random variables and their distributions, mathematical expectation, moment generating functions, binomial, Poisson, and normal distributions. Central Limit Theorem. Fall semester. Prerequisite: 260 with minimum grade of C.

408 Mathematical Statistics (3)

A continuation of 407 with an introduction to the theories of point and interval estimation, hypothesis testing, regression and correlation analysis, goodness of fit, chi-square, t and F distributions. Spring semester. Prerequisite: 407 with minimum grade of C.

410 Number Theory (3)

Divisibility, primes, congruences, Fermat's Theorem, number theoretic functions, primitive roots and indices, the quadratic reciprocity law. Summer on demand. Prerequisites: either 250 or 260 and 295 with minimum grades of C.

412 Introduction to Linear Algebra (3)

Vector spaces, linear transformations, matrix algebra, determinants, systems of linear equations. Applications to science and engineering. Fall semester. Prerequisites: 260, 295 with minimum grades of C.

414 Operations Research (Linear) (3)

Introduction to linear programming, duality, transportation and assignment problems, integer programming. Spring semester alternate years. Prerequisites: Computer Science 118, Mathematics 412 with minimum grade of C or approval of instructor.

415 Numeric Concepts for Elementary Teachers (3)

Designed to reinforce mathematical concepts for those teaching in the elementary grades. Emphasis on the relationship between mathematical ideas and reality. Logic and set operations, algebraic systems, and number systems included. Summer on demand. Prerequisites: 115, 116 with minimum grades of C or equivalent teaching experience. Not applicable on mathematics major.

416 Geometric Concepts for Elementary Teachers (3)

Designed to reinforce the understanding and use of basic geometric concepts for those teaching in the elementary grades. The inductive and deductive approaches to geometry will be considered. Topics include parallelism, congruence, similarity, perimeter, area, volume, networks, and topological concepts. Summer on demand. Prerequisites: 115, 116 with minimum grades of C or equivalent teaching experience. Not applicable on mathematics major.

418 Advanced Numerical Methods (3)

A more extensive treatment of the material of Mathematics 308 with emphasis of the methods of obtaining numerical solutions of ordinary and partial differential equations, and systems of linear equations. Spring semester. Prerequisites: 260, 308 with minimum grades of C, or approval of instructor.

424 Operations Research (Non-Linear) (3)

Network flows, Markov chains and applications, queuing theory and applications, inventory theory, decision theory, and games. Spring semester alternate years. Prerequisites: Computer Science 118, Mathematics 307 or 407 with minimum grade of C, or approval of instructor.

428 Packages for Mathematical Computations (3)

The nature of libraries of procedures for solving mathematical problems, including the design parameters, selection of algorithms, problems with reliability and transportation. Several major mathematical packages will be examined in detail, including IMSL, UNPACK, EISPACK, MINPACK. On demand. Prerequisites: Computer Science 118, Math 250, and one of the following: Math 308, Engineering 225, Computer Science 231 with minimum grades of C.

440 Applied Analysis (3)

Vector analysis through Stokes' Theorem and the Divergence Theorem. Topics in advanced calculus including implicit functions, Jacobians, interchange of limit processes, and uniform convergence of series of functions; introduction to power series solutions of differential equations. Spring semester alternate years. Prerequisites: 250, 260 with minimum grades of C.

445 Advanced Differential Equations (3)

Systems of differential equations; existence and uniqueness theorems; linear systems; phase plane analysis; stability theory; applications. Fall semester alternate years. Prerequisite: 250, 260 with minimum grades of C.
450 Modern Analysis (3)
Differentiation; inverse and implicit function theorems; functions of bounded variation, integration and measure; integration on manifolds; Stokes' and Green's Theorems; other selected topics. On demand.
Prerequisite: 350 with minimum grade of C.

451 Basic Concepts of Modern Mathematics (3)
Basic mathematical concepts from modern algebra, set theory, logic, probability and statistics, geometry, and number theory including examination of underlying assumptions in these areas. On demand.
Prerequisite: 1 year of college mathematics. Not applicable on B.A. mathematics major. Restricted to mathematics education majors, teachers currently certified to teach mathematics in grades 7-12, or students approved by instructor.

452 Basic Concepts of Geometry (3)
Deficiencies in Euclidean geometry, Euclid's parallel postulate, introduction to non-Euclidean geometry, consistency and validity of non-Euclidean geometry, incidence geometries, affine geometries, linear, planar, and spatial order properties. Summer on demand.
Prerequisite: 295 with minimum grade of C or approval of instructor.

454 Abstract Algebra (3)
A study of special topics from advanced algebra, various algebraic structures, and the applications of algebra. On demand.
Prerequisite: 321 or 412 with minimum grade of C or approval of instructor.

460 Techniques of Applied Mathematics (3)
Additional topics in vector calculus; series of orthogonal functions; integral transforms; treatment of some elementary partial differential equations arising in applications. Spring semester alternate years.
Prerequisite: 250, 260 with minimum grades of C.

470 Introductory Complex Variables (3)
Complex numbers; differentiation and integration of functions of a complex variable; analytic functions; Cauchy's Theorem; power series; residues and poles; conformal mapping; contour integration. Fall semester alternate years.
Prerequisites: 250, 260 with minimum grades of C.

475 Research Seminar (1)
Investigation of special topics in mathematics using the directed research technique. On demand.
Prerequisite: approval of department.
Graded satisfactory/no credit.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Music

Cadek Department of Music

Professor Gerschefski, Head
Professors Abril, Breland, Draper, Rivituso, Stroud, Temko
Associate Professors Cox, D’Andrea, Littleton, Miller, Pennebaker, Sanders, Stryker, Zimmer
Assistant Professors Bokser, Coleman, Coulter, Tate
Director of Choral Activities Draper
Director of Bands D’Andrea
Director of Orchestras Stroud

The requirements for entrance and graduation as set forth in the catalog are in accordance with the published regulations of the National Association of Schools of Music and the Tennessee regulations for certification of teachers.

The Cadek Department of Music offers three degree programs at the undergraduate level: Bachelor of Arts with a major in music, Bachelor of Music, and Bachelor of Science with a major in music education. The B.M. degree provides four concentrations for the major: instrumental performance, vocal performance, sacred music, and theory/composition. The B.S. degree in music education provides two concentrations for the major: instrumental and vocal.

The BA degree is offered students who desire a strong liberal arts background with a major in music. Approximately one-third of the four year program is in music, and numerous elective hours outside the department permit considerable study in other academic areas. The B.M. degree affords the student a more concentrated course of study in the major area: approximately two-thirds of the four year program is in music. The B.S. degree is especially appropriate for students who plan a career teaching public school music. It combines general education with music content and teaching methodology in a highly structured course of study. Successful completion of the program gains the student public school teaching certification. All three degree programs represent appropriate preparation for graduate study.

In addition to University admission standards, prospective music majors will stand an audition in their primary performing area which will determine the appropriate applied music course level and degree program. The student will also take an entrance test in music theory. All music majors are required to participate in an ensemble for each semester of residence, and must accumulate a minimum of eight hours credit. For all music majors, a 2.0 average in music courses is required for enrollment in 300 and 400 level music courses. A senior educational experience is required of all majors.

In addition to degree requirements herein listed, other regulations for music majors appear in the current Music Student Handbook.

The following are suggested courses of study for the several degrees in music. Specific course requirements are listed by course number; general education category
84—Music

requirements are indicated by category only. Elective
courses other than those included in general education
requirements are indicated as "elective." Appropriate
music ensemble requirements are indicated only as
"ensemble" in the courses of study. Applied Music Study
is indicated only as "Applied Music;" specific course
numbers are determined according to level of study and
specific instruments studied.

Music (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6
hours)

Category B
3 approved courses other than music: one from humanities, one from
fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category G
1 approved perspectives course other than music (3 hours)

Health and Physical Education 021 plus one additional semester physical
education activity

Foreign language through second college year

Major
Music 103, 104, 107, 108, 203, 204, 207, 208, 315, 316
Ensemble participation required each semester of residence, minimum
8 hours credit (4 hours of credit permitted beyond 42-hour limit in
music).
8 semesters (8 hours) primary instrumental or vocal study
4 hours music electives in music history, music theory, or composition
4 hours music electives
2.0 average in all music courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in music (B.A.)

First Semester                                  Second Semester

1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course other than music (3 hours)

Health and Physical Education 021 plus one additional semester physical
education activity

Foreign language through second college year

Major
Core: Music 103, 104, 107, 108, 203, 204, 207, 208, 315, 316; ensemble
participation required each semester of residence, minimum 8 hours
credit; 4 semesters (4 hours) piano study for nonkeyboard majors.
Performance majors required to present a half-recital in junior year,
full recital in senior year.

One of the following concentrations—

1. Instrumental Performance: 8 semesters (32 hours) primary applied
   study, 16 hours at the 200 level and 16 hours at the 400 level; Music 332
   (for piano majors). 19-21 hours music electives other than primary
   applied study

2. Vocal Performance: 8 semesters (32 hours) voice study, 16 hours at
   the 200 level and 16 hours at the 400 level; Music 217, 218; 333.
   13 hours music electives other than primary applied study

3. Sacred Music: 8 semesters (24 hours) keyboard or voice study; 4
   semesters (4 hours) secondary applied study in keyboard or voice;
   Music 302, 305r (2 hours), 309, 310, 404, 405, 406, 496r (field work).
   12 hours music electives other than primary applied study
4. **Theory and Composition:** 8 semesters (8 hours) primary instrument or voice study; Music 302; 4 hours of 305r; 307; 4 hours from 309,310, 327, 328; 8 hours of 401, or 407, 408, 409, 410.

20-21 hours music electives

2.0 average in all music courses

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

**Typical courses of study in music (B.M.)**

**Music (B.M.): instrumental performance concentration**

Music Education (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than music: one from humanities, one from
fine arts, and one from either (3 hours each), plus courses in humanities/fine arts to total 12 hours in three fields other than history

Category C
2 approved behavioral or social science courses plus one course to total 9 hours behavioral or social science in two fields other than education; for certification purposes, 3 of the hours may be in history

Category D
2 natural science courses to total 8 hours in natural sciences (one course must be approved laboratory science)

Category F
Mathematics F120

Category G
1 approved perspectives course other than music (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
20 hours applied music including: ensemble participation required each semester of residence, with the exception of student teaching semester, minimum of 8 hours credit; 8 semesters (8 hours) primary instrumental or vocal study or 6 hours primary and 2 hours secondary; Music 131, 132, 141, 142, for piano proficiency

One of the following concentrations—

1. Instrumental: Music 221; 3 hours of 223r, 3 hours of 224r; 2 hours of 225r; 226; 307 or 326; 325, 327, 328

2. Vocal: 133, 134, 221, 222; 307, 309, 310, 333, 2 hours applied piano study in addition to piano proficiency study

33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 432, 436, 437, 439; Special Education 333; Music 321

For graduation: 2.0 average in music and 2.0 average in School of Education courses

For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter.

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

See School of Education section for teacher education, certification, and student teaching requirements.

### Minor

Requirements for the music minor include a core of 14 required hours plus electives in music for a total of 22 hours. Core courses include Music 100 (2), Music 101 (2), Music 315 (3), Music 316 (3), and 4 hours of applied music instruction at the 200 level. Six of the elective hours must be taken at the 200 level or above. A maximum of 2 hours of ensemble credit will be accepted toward the program. Music 107 (3) and Music 108 (3) may be substituted for Music 100 and Music 101.

### Performing Organizations

The performing organizations mentioned below are open to University students with sufficient technical ability. Regular attendance at public performances and rehearsals by the appropriate group is required.

#### 020r Chattanooga Singers (1)

Study of music of all periods for large mixed chorus. Rehearsal and extensive performance experience emphasized. Performances in Chattanooga and throughout the world. Every semester. **Prerequisite:** audition

#### 022r Chamber Singers (1)

Study of repertoire for small choruses through rehearsal and performance. Every semester. **Prerequisite:** audition

#### 023r Choral Union (1)

Study of problems of ensemble participation through reading and rehearsing of music representing a wide variety of styles and periods. Every semester.

#### 025r Singing Mocs (1)

Study of styles and techniques appropriate to the performance of music in the popular idiom. Every semester. **Prerequisite:** audition

#### 030r Marching Band (1)

Study of marching band functions and literature through performances at University athletic and other events which could appropriately utilize the participation of a marching musical group. Every semester. **Prerequisite:** audition

#### 031r Concert Band (1)

Reading, rehearsing, and performing contemporary and traditional band literature. Laboratory organization for instrumental conducting and band arranging classes. Spring semester. **Prerequisite:** audition

#### 035r Wind Ensemble (1)

A select ensemble which rehearse and performs literature for larger Wind Ensembles of all periods with emphasis on music of the 20th century. Every semester. **Prerequisite:** audition

#### 036r Jazz Band (1)

Study of types of styles of big band jazz. Emphasis on sight reading, improvisation, and performance. Every semester. **Prerequisite:** audition

#### 040r Opera Workshop (1)

Study of and practical experience in preparation and performance of operas and opera scenes. Attention to requirements of various style
Music Courses

000r Recital (0)
Every semester.

100 Elements of Notation, Dictation, and Sight Singing (2)
Fundamentals of music theory. Designed for those taking music theory without previous experience and as the first course in music theory for music majors. Every semester. May not be included as a music elective for music majors.

101 Conceptual Overview of Music Theory (2)
An elements-based approach to the analysis of music from a broad spectrum of styles, genres, and historical periods. A continuation of Music 100 for music minors. Spring semester. Prerequisite: Music 100.

103, 104 Ear Training I (1,1)
Studies in sight singing and dictation. Interval, melody, counterpoint, diatonic, and chromatic harmonic materials. 103 fall/104 spring semester. Class hours 2. Prerequisite: 100 or placement; 103 is prerequisite to 104.

107, 108 Theory I (3,3)
A comprehensive approach to the study of melody, counterpoint, diatonic and chromatic harmony, basic instrumentation and aural skills. Performance, composition, and analysis of music from all periods and styles. 107 fall/108 spring semester. Prerequisite: 100 or placement examination; corequisite: 103. Music 107 prerequisite to Music 108. Class hours 4.

110 Music Literature for Children (3)
Study of music for children; fundamentals of the musical language and basic concepts of music. Repertoire selected from a broad range of styles and media. On demand.

111 Introduction to Music (3)
Understanding basic elements and structure of music and the evolution of musical style through performance. Understanding the musical artist in historical context. Extensive use of recorded materials. Every semester. Credit not permitted toward graduation for music majors.

115 Introduction to Electronic Music (2)
An introduction to the appreciation and composition of electronic music. Basic tape manipulation technique; the vocabulary and usage of synthesizers; rudimentary electronics and acoustics; composition and analysis. For nonmusic majors. On demand. Prerequisite: permission of the instructor.

121 Piano Class (1)
For persons without keyboard or music reading experience. Every semester. Class hours 2.

131, 132 Piano Class (1,1)
For persons without keyboard experience. Every semester. Class hours 2. 131 prerequisite to 132.

133, 134 Voice Class (1,1)
For persons without vocal experience. 133 fall/134 spring semester. Class hours 2. 133 prerequisite to 134.

135, 136 Guitar Class (1,1)
For persons without guitar experience. An introduction to the technique and classical literature of the guitar. 135 fall/136 spring semester. Class hours 2. 135 prerequisite to 136.

141, 142 Piano Class (1,1)
Every semester. Class hours 2. Prerequisite: 132 or audition; 141 prerequisite to 142.

190r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

201r Chamber Orchestra (1)
Rehearsal and performance of selected works from the symphonic repertoire from 1700 to the present. Every semester. Prerequisite: audition.

203, 204 Ear Training II (1,1)
Continued studies in sight singing and dictation. Aural structural analysis, advanced melodic and harmonic studies, twentieth century techniques. 203 fall/204 spring semester. Class hours 2. Prerequisite: 104; 203 prerequisite to 204.

205r Fundamentals of Music Composition (1)
Basic skills of music composition designed to prepare promising lower division students for advanced study. Analysis focusing on applied compositional skills. Modeled composition. Spring semester. Prerequisite: Music 107 or permission of instructor.

207, 208 Theory II (3,3)

209, 210 Keyboard Harmony (1,1)
The use of harmonic materials at the keyboard. Every semester. 209 prerequisite to 210.

211 The Literature of the Symphony Orchestra (3)
Symphonic music from the middle of the 18th century to the present. Discussion, analysis, and recorded performance of standard masterpieces in the field. On demand.

212 America's Musical Heritage (3)
An historical study of musical development in the United States from the Colonial period to the emergence of the native American composer and performer of distinction in the 20th century. On demand.

214 Music in Non-Western Culture (3)
Selected traditions of music other than classical Western art music. The role of music in the society, the uses of music, and changes in music as a result of the spread of Westernization. Four cultures—Chinese, Indian, West African, and U.S. Native American—will be examined. On demand.

215 Music of the Tonal Period (3)
A study of the Euro-American art music of the tonal period (1700-1920) as it reflected and contributed to contemporary culture. Attention to the impact of the Baroque, Classical, and Romantic periods on the tonal system and on musical style; emphasis on the music of Bach, Haydn, Mozart, Beethoven, Schubert, Verdi, Wagner, Brahms, Mahler, and Schoenberg. For nonmajors; no knowledge of music theory required. On demand.
217, 218 Diction for Singers (2,2)
An introduction to the pronunciation of Italian, German, French, and English based on the International Phonetic Alphabet. 217 fall/218 spring semester. Open to voice majors; others by permission.

221 String Methods (2)
Class instruction of the string instruments: violin, viola, cello, and double bass. Ensemble playing. Fall semester.

222 Instrumental Methods for Vocal Music Education Majors (3)
Class instruction of woodwinds, brass, and percussion instruments; tuning and care of instruments. Teaching techniques. Flute, single, and double reed instruments; trombone, French horn, and piston valve instruments; drum and mallet instruments. Spring semester. Prerequisite: Vocal Music Education Major status.

223 Woodwind Methods (1)
Class instruction of woodwind instruments; tuning and care of instruments. Single reed instruments, double reed instruments, and flute. Fall semester. Class 1 hour, laboratory 1 hour.

224 Brass Methods (1)
Class instruction of brass instruments; tuning and care of instruments. Teaching techniques. Piston valve instruments, French horn, and trombone. Spring semester. Class 7 hour, laboratory 1 hour.

225 Percussion Methods (1)
Class instruction of percussion instruments; sticking techniques; care of the instruments; teaching techniques. Drum and mallet instruments. Spring semester. Class 7 hour, laboratory 1 hour.

226 Marching Band Techniques (2)
A study of the techniques and style employed in training the marching band. Fall semester.

251 Keyboard Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

253 String Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

255 Voice Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

257 Woodwind Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

259 Brass Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

261 Percussion Instruction (1-4)
Four hours practice per week required for each hour credit. Every semester. Prerequisite: audition.

302 Counterpoint (2)
An analytical survey of contrapuntal techniques. Spring semester alternate years. Prerequisites: 107, 108, or permission.

304 Arranging and Composing for Percussion Instruments (1)
Aspects of composing and arranging peculiar to instruments of the percussion family. Nature of sound as related to specific available instruments, technical problems, and notation practice. Investigation of percussion instruments in combination with other instruments, solo contexts, and in ensembles composed entirely of percussion instruments. On demand. Prerequisite: 208 and permission of instructor.

305 Composition (1-4)
Beginning composition study concentrating on small groups and short forms. Every semester. Prerequisites: 207, 208.

307 Orchestration (2)
Scoring for strings, woodwinds, brasses, and full orchestra. Piano transcriptions from orchestral scores. Fall semester alternate years. Prerequisites: 207, 208.

309, 310 Choral Conducting (2, 2)
First semester designed to teach the student to train choral groups, read choral scores, and conduct effective rehearsals; basic patterns for choral and orchestral conducting. Second semester devoted to interpretation and building of repertoire of both secular and sacred choral compositions. Actual conducting of works of all periods with and without instrumental accompaniment. 309 fall/310 spring semester. 309 prerequisite to 310. Prerequisites: 207, 208.

315, 316 History of Music (3, 3)
A general survey of the history of music in Western civilization. 315 fall/316 spring semester. Prerequisite: 105.

317 Survey of Jazz (3)
A survey of jazz from its ethnic origins through its chronological development to its current styles. Every semester.

321 Elementary School Music Methods, Materials, and Observation (3)
A study of music teaching-learning methods and strategies. Basic concepts of musical organization, musical skills, and literature for the classroom. Every semester.

322 Music Education in Early Childhood (3)
Methods and materials designed to involve the infant and young child in musical experiences as an outgrowth of play. Developmental paths to music making and learning explored through informal and formal settings. Activities including music and movement, rhythmic speech, song, imitation and improvisation, music-drama, and music pictures. On demand.

325 Band Organization and Management (2)
The techniques used in the organization, administration, and preparation of school bands. The selection, care, and repair of materials, instruments, and other equipment. Fall semester.

326 Band Arranging (2)
Band instrumentation and general principles of arranging; special reference to writing for bands having incomplete instrumentation and less experienced players. Spring semester.

327, 328 Instrumental Conducting (2,2)
First semester includes techniques of the baton; basic score reading; fundamentals of conducting. Second semester includes style, nuances, musical interpretations, advanced score reading, and actual band conducting. 327 fall/328 spring semester. 327 prerequisite to 328. Prerequisites: 207, 208.

332 Piano Pedagogy (2)
Piano methods and materials. For advanced students planning to teach piano. Fall semester alternate years.

333 Vocal Pedagogy (2)
A comparative study of the major concepts in current vocal training for soloist, choral group, and voice class; analysis of corrective procedure for vocal problems; elementary study of vocal anatomy, vocal acoustics, and the psychology of singing. Fall semester.

370 Electronic Music (2)
An introduction to and continuing experience with the aesthetics, analysis, and composition of electronic music. Tape recorder terminology; tape manipulation techniques; synthesizer technique; electronics; acoustics; composition and analysis. For music majors. Every semester. Prerequisite: 132, 208, or permission.

397 Music, Poetry, and Ideas (3)
A consideration of technique, meaning, style, form, expression, and value in music and poetry. On demand. May be registered as English 397.

401 Composition II (1-4)
Advanced composition study. Every semester. Prerequisites: 305, 307.
**90—Philosophy & Religion**

**404 Liturgies and Service Structure (2)**
History, content, theology of worship; similarities in Jewish and Christian worship and liturgy; application of liturgical principles to various types of worship service; service playing. On demand. Open to music majors; others by permission.

**405 Ministry of Music (2)**
Philosophy of music in the church; the role of music in worship; the organization of a church music program; staff relations. On demand. Open to music majors; others by permission.

**406 Hymnology (2)**
Historical development of the Christian hymn; criteria for use of hymns and hymn tunes; the composition of hymns. On demand. Open to music majors; others by permission.

**407, 408 Advanced Analysis (2,2)**
Compositional, analytic techniques, and formal procedures, with emphasis on the 20th century. 407 fall/408 spring semester alternate years. Prerequisite: 208 or permission of instructor; 407 prerequisite to 408.

**409, 410 Musical Styles (2,2)**
Literature of the various periods of music history, including characteristic features of musical style. 409 fall/410 spring alternate years. Prerequisite: permission of instructor.

**411 Music Before 1600 (3)**
A study of works, both monodic and polyphonic, characteristic of European music before 1600. On demand. Prerequisites: 208 or permission of instructor.

**412 Music from 1600 to 1750 (3)**
A study of works characteristic of the period and illustrative of musical trends in the era. Fall semester. Prerequisites: 208 or permission of instructor.

**413 Music from 1725 to 1825 (3)**
A study of works characteristic of the period and illustrative of musical trends in the era. Extensive examination of representative scores. Spring semester. Prerequisites: 208 or permission of instructor.

**414 Nineteenth Century Music (3)**
A study of works characteristic of the period and illustrative of musical trends in the era. On demand. Prerequisites: 208 or permission of instructor.

**415 Twentieth-Century Music (3)**
A study of works characteristic of the period and illustrative of musical trends in the era. On demand. Prerequisites: 208 or permission of instructor.

**426 Jazz Arranging (2)**
Fundamentals of composing and arranging for the contemporary jazz ensemble. On demand. Prerequisites: 208, 307 or 326, or permission of instructor.

**451r Keyboard Instruction (1-4)**
Four hours per week practice required for each hour credit. Every semester. Prerequisite: 76 hours of 251r and successful audition for the division jury.

**453r String Instruction (1-4)**
Four hours practice per week required for each hour credit. Every semester. Prerequisite: 76 hours of 253r and successful audition for the division jury.

**455r Voice Instruction (1-4)**
Four hours practice per week required for each hour credit. Every semester. Prerequisite: 76 hours of 255r and successful audition for the division jury.

**457r Woodwind Instruction (1-4)**
Four hours practice per week required for each hour credit. Every semester. Prerequisite: 76 hours of 257r and successful audition for the division jury.

**459r Brass Instruction (1-4)**
Four hours practice per week required for each hour credit. Every semester. Prerequisite: 76 hours of 259r and successful audition for the division jury.

**461r Percussion Instruction (1-4)**
Four hours practice per week required for each hour credit. Every semester. Prerequisite: 76 hours of 261r and successful audition for the division jury.

**495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)**

**497r Research (1-4)**
On demand.

**498r Individual Studies (1-4)**
On demand.

**499r Group Studies (1-4)**
On demand.

**Nursing**
See page 172.

**Philosophy and Religion**

**Professor** Burhenn, Head

**Professors** Dowse, Hall, Klinefelter, Weisbaker

**Associate Professor** Phillips

The Department of Philosophy and Religion offers a 30-hour undergraduate major (B.A.) with separate concentrations in philosophy, religious studies, and philosophy and religion; and an 18-hour minor with separate concentrations in philosophy and religious studies. Through its curricular and extracurricular programs the department seeks to expose the student to a wide variety of influential philosophical and religious thinkers in both Western and non-Western cultures.

**Philosophy and Religion (B.A.): Philosophy, Religious Studies, Combined Concentrations**

**General Education** (see pages 25-27 for list of approved courses)

**Category A**
2 approved courses in written communication in the English language (6 hours)

**Category B**
3 approved courses other than philosophy and religion: one from humanities, one from fine arts, and one from either (3 hours each)

**Category C**
2 approved behavioral or social science courses (6 hours)

**Category D**
1 approved physical or natural science course with laboratory (4 hours)

**Category F**
1 approved mathematics course (3 hours)
**Typical courses of study in philosophy and religion (B.A.)**

**Philosophy and religion (B.A.): philosophy concentration**

This course does not count toward major.

In addition to Philosophy 351, 353, and 498r (or Religion 498r), major requires 21 hours in religion with two courses from each of the following groups:

(a) Religion 211, 313, 314, 316r, 493r
(b) Religion 232, 337, 355, 467, 482, 492r

Not more than 42 hours in any one department may be applied toward a B.A. degree. One course outside the department may count toward major with approval by department head.

**Philosophy and religion (B.A.): combined concentration**

**Philosophy Courses**

106 **Philosophy and Human Nature** (3)
Interpretations of human nature and analyses of the human condition from Plato to Russell and others in the 20th century. Lectures and discussions aimed at clarification of present meanings and values. Every semester.

199 **Special Projects** (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

201 **Introduction to Philosophy** (3)
An approach to the discipline through the perennial and changing issues of the field: freedom and determinism, the real and our knowledge of it, cosmological ideas, God, meaning, and moral values. Every semester.

211 **Logic, Language, and Evidence** (3)
An examination of accepted forms of reasoning and of the varied ways in which language functions; fallacy, definition, metaphor, and theories of meaning; examples from such areas as science, law, politics, theology, and philosophy; classical and symbolic logic; deductive techniques; induction and deduction contrasted. Fall semester.

212 **Symbolic Logic** (3)
Sentential and quantification logic; techniques of natural deduction; relations, identity, definite descriptions; consistency and completeness of formal deductive systems. On demand. Prerequisites: 2 years of high school algebra and acceptable test scores or Mathematics 106.

221 **Introduction to Ethics** (3)

230 **Social and Political Philosophy** (3)
An inquiry into various philosophical theories of the state and society, with critical examination of such concepts as law, rights, sovereignty, justice, liberty, and civil disobedience. On demand.

322 **Ethical Theory** (3)
A critical analysis of contemporary ethical theories. Emphasis on the writings of philosophers such as Moore, Stevenson, Dewey, Rawls, Baier, Hare, and Searle. Alternate years.

333 **Philosophy of Religion** (3)
A philosophical examination of religion, including traditional and modern arguments for the existence and nature of God, the nature of religious experience and belief, and the functions of religious language. Alternate years.

336 **Aesthetics** (3)
A study of the nature and value of art, of human creativity, and of aesthetic response. Close attention to theoretical analysis and to the interpretation and critique of important artistic achievements. On demand.

341 **Metaphysics** (3)
A study of classical and contemporary approaches to the question of what is ultimately real; consideration of modern challenges to the legitimacy of metaphysics. Alternate years.

345 **Epistemology** (3)
A critical examination of the nature of knowledge and the philosophical problems concerning skepticism; knowledge of the self, material objects, other minds; the past, present, and future; universal and necessary truth. Selections from both historical and recent writings. Alternate years.

348 **Philosophy of Science** (3)
An introduction to philosophical problems in the natural and social sciences: the nature of explanation, induction, evidence, probability, verification, causation; the role of observation; the relations among the sciences. Spring semester alternate years.

351 **History of Ancient Philosophy** (3)
Selections from the pre-Socratics through the late Greco-Roman writers, including Platonius. Emphasis on Plato and Aristotle. Fall semester.

353 **History of Modern Philosophy** (3)
Rationalism and empiricism as developed by leading thinkers; selections from chief representatives from Hobbes and Descartes through Kant. Spring semester.

360 **American Philosophy** (3)
Earlier American thought in its reaction to European movements; the emergence of a genuinely American philosophy. Emphasis on James, Pierce, Santayana, Royce, Lewis, and Whitehead. Alternate years.

364 **Existentialism and Phenomenology** (3)
Presentations on the major figures and themes of this movement; discussions of selected passages from Kierkegaard, Nietzsche, Husserl, Heidegger, Sartre, and Ricoeur. Alternate years.

425 **Ethics and the Professions** (3)
An examination of ethical issues and principles related to problems and
standards in the professions. Special attention to professional codes and case studies in relation to traditional and contemporary moral philosophy. Designed as a general course for students not majoring in philosophy and religion. Fall semester.

481 r Interdisciplinary Seminar (3)
Critical inquiry into the most comprehensive questions raised by particular disciplines; reading and discussion of significant primary sources from scholars in the special field and philosophers. Two faculty members. On demand.

491 r Studies in Philosophy (3)
A seminar or tutorial for the intensive consideration of one philosophical problem, movement, or figure. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
Must be taken for at least three hours in one semester by all majors. Every semester.

499r Croup Studies (1-4)
On demand.

Religion Courses

103 Introduction to the Study of Religion (3)
Consideration of the various elements of religion and the methods for studying them; attention to beliefs, world-views, and sacred literature; rituals, myths, symbols; religious communities and organizations; types of religious experience. Every semester.

19r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

211 Religions of the World (3)
An introduction to major world religions with emphasis on Hinduism, Buddhism, and Islam. Every semester.

221, 222 Biblical Literature (3,3)

232 Religion and the Modern Consciousness (3)
Examination of the influence of modern scientific discoveries on the interpretation of some principal Jewish and Christian beliefs. Particular attention to the impact of astronomy, evolutionary theory, and psychoanalysis. Background lectures. Reading and discussion of modern interpreters of Christian faith. Spring semester.

236 Religion in American Life (3)
Attention to distinctly American phenomena, with the intention of assessing the present role and status of religion; consideration of such topics as separation of church and state, revivalism, the influence of immigration, sects, and cults. Fall semester.

313 Religion in the Middle East (3)
A study of non-Christian religions originating in the Middle East with particular attention to Islam as influenced by Zoroastrianism and Judaism. Alternate years.

314 Primitive Religion (3)
The place of religion in the social and cultural settings of selected peoples as evidenced through magic, myth, totemism, fetish, sacrifice, shamanism, and initiation rites; an attempt to delineate the common elements of primitive religion. On demand.

316r Religions of Asia (3)
Concentration alternates among three major religious traditions of Asia: (1) Hinduism; (2) Buddhism; (3) interrelated traditions of Taoism, Confucianism, and Shinto as found in China and Japan. Use of primary materials in translation. Philosophical and religious concepts examined along with historical developments and changes. Alternate years.

337 Interpretations of Religion (3)
An examination of ways in which religious belief and practice may be understood; sympathetic and opposing views drawn from several fields and represented by such authors as Feuerbach, Freud, James, Malinowski, Berger, Levi-Strauss, Yinger, Fromm, and N.O. Brown. Alternate years.

355 Classics of the Christian Tradition (3)
Selected readings in leading works of Christian literature from the Patristic, Medieval, Reformation, and Enlightenment periods as represented by such authors as Augustine, Anselm, Aquinas, Luther, Calvin, and Wesley. Alternate years.

362 Theology in the Modern Period (3)
An examination of the major post-Kantian developments in Europe, Britain, and America, including such figures as Schleiermacher, Newman, Buber, Niebuhr, Barth, and Tillich. On demand.

467 Contemporary Religious Thought (3)
Analysis of changing religious ideas in Europe and America from 1950 to the present; readings selected from Protestant, Catholic, and Jewish writers with emphasis on the interrelationship of faith and culture. On demand.

470 Psychology of Religion (3)
Analysis of empirical data and psychological theories involving religious beliefs, practices, and experiences. Every semester. Prerequisites: 6 units psychology or philosophy-religion. May be registered as Psychology 470.

482 Christian Faith and Recent Philosophy (3)
Recent attempts to utilize philosophy as a resource for theology; special attention to one philosophical tradition—analytic, existentialist, or process philosophy—together with related religious thinkers. On demand.

491 r Studies in Religion (3)
A seminar or tutorial for the intensive consideration of one problem, movement, or figure in the field of religion. On demand.

492r Studies in Western Religious Thought (3)
A seminar or tutorial for the intensive consideration of one problem, movement, or figure in Western religious thought. On demand.

493r Studies in the History of Religions (3)
A seminar or tutorial for the intensive consideration of one problem, movement, or figure in the history of religions. On demand.

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
Must be taken for at least 3 hours in one semester by all majors. Every semester.

499r Croup Studies (1-4)
On demand.
Physics and Astronomy

Professor Walker, Head
Professor Lane

/Associate Professors J. Davis, R. Peterson
Assistant Professor Marlowe

Physics (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course other than physics with laboratory (4 hours; approved related courses below will apply)

Category F
1 approved mathematics course (3 hours; approved related courses below will apply)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity.

Major and related courses

Major and related courses

One of the following options:
1. Two semesters of French or German
2. Computer Science 118 or Engineering 124
Mathematics F150, 160, 250, 260
Chemistry D121, 122
Physics 191 and 230 (or 103 and 104)

Required courses: Physics 230 (or 103 or Engineering 103 and 104), Physics 231, Physics 232 (or 104).
Elective courses: A planned program of at least 12 hours of physics at the 300-400 level selected with the prior approval of the department.

Astronomy Courses

101 Introduction to Astronomy-The Solar System (4 with lab, 3 without)
Descriptive and conceptual. The structure, nature, and origin of the solar system. Optional 2-hour laboratory illustrates concepts of practical astronomy. On demand. Lecture 3 hours.

102 Introduction to Astronomy-Stars to Galaxies (4)
The nature of stars and galaxies. The evolution and structure of the observable universe. Lecture 3 hours, laboratory 2 hours. Spring semester. Prerequisite: two years of high school algebra or Mathematics 706. Corequisite: Astronomy 102 laboratory.

300r Advanced Astronomy Laboratory (1)
Laboratory techniques in astronomy. Applications of spectroscopy, optics, modern photographic techniques, and photometry to observational astronomy. Extensive use of the University’s observatory. Every semester. Maximum credit 2 hours. Prerequisite: Astronomy 101 or 102 or permission of instructor.

401 Solar System Astrophysics (3)
Application of basic physical laws to the problem of the origin and evolution of the solar system. Solar structure and energy sources, radiative transfer, the solar magnetic field, the interplanetary medium, celestial mechanics, comets, meteors, asteroids, the planets, and their satellites. On demand. Prerequisite: Physics 342.

498r Individual Studies (1-4)
On demand.

General Science Courses

111 The Physical Environment: Atoms to Galaxies (4)
Explores physical science in three ways: physical science in its historical and sociological significance, the process of science, and the present content of scientific fact and theory. Topics include physics, chemistry, geology, and astronomy. Fall semester. Lecture 3 hours, laboratory 2 hours. Prerequisite: 2 units of college preparatory mathematics or Mathematics 106.

Physics Courses

103, 104 General Physics (4,4)
The basic principles of physics with applications to problems of modern science and technology. Required in premedical, predental, pre-pharmacy, and physical therapy programs. Fall and spring semester. Lecture 3 hours, laboratory 2 hours. Prerequisites: 3 units of college preparatory mathematics.
191 Laboratory Practice in Physics (1)
An introduction to standard techniques in experimental physics with an emphasis on the design, construction, and use of apparatus for making a variety of measurements. Spring semester. Laboratory 2 hours.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

230 Principles of Physics—Mechanics and Heat (4)

231 Principles of Physics—Electricity, Magnetism, Waves, Light (4)
Fundamental principles and methods of physics: electricity and magnetism, wave motion, light. For all engineering students. Fall semester. Lecture 3 hours, laboratory 2 hours. Prerequisites: Engineering 103, 104 or Physics 104; Mathematics 150, 160.

232 Principles of Physics—Optics, Modern Physics (4)
Fundamental principles and methods of physics: modern physics, atomic physics, nuclear physics. For all engineering students. Spring semester. Lecture 3 hours, laboratory 2 hours. Prerequisites: Engineering 103, 104 or Physics 230 or 231; Mathematics 150, 160.

303 Basic Electronics (4)
Fundamental theory of electronic devices including vacuum tubes and semiconducting devices. Characteristics and applications of components in basic electronic circuits including amplifiers and power supplies. Spring semester, lecture 3 hours, laboratory 2 hours. Prerequisites: 103, 104 or 231.

304 Electronic Circuits (4)
The theory and use of basic electronic instruments for electrical measurement or control. Multi-stage amplification, feedback, oscillators, and digital/logic circuitry treated with varying emphasis. On demand. Lecture 3 hours, laboratory 2 hours. Prerequisite: 303.

307 Optics (4)
Geometrical and physical optics, including refraction, refraction, interference, diffraction, and polarization; introduction to theory of spectra. Fall semester on demand. Lecture 3 hours, laboratory 2 hours. Prerequisites: 230, 231, 232 (or 103, 104); Mathematics 160.

310 Introduction to Thermal Physics (4)
The laws of thermodynamics, kinetic theory, and statistical mechanics through the macroscopic description and microscopic theory of thermal phenomena. Spring semester on demand. Prerequisites: 230, 231, 232 (or 103, 104); Corequisite: Mathematics 260.

318 Radiation Physics and Introductory Health Physics (3)

341 Methods of Theoretical Physics I—Classical Mechanics (4)
An introduction to the mathematical techniques used in the classical descriptions of the dynamics of particles and continuous media. Newton’s law of motion, conservation laws, generalized coordinates, Lagrange’s equations, and the principle of least action. The mechanics of continuous media, wave motion, sound, hydrostatics, rotational and irrotational flow, the equation of continuity, Laplace’s equation. Fall semester. Lecture 3 hours, recitation 2 hours. Prerequisites: 230, 231 or 103 & 104. Corequisite: Mathematics 250 or 260.

342 Methods of Theoretical Physics II—Electricity and Magnetism (4)
Basic laws of electromagnetism, electric and magnetic properties of materials, Maxwell’s equations, boundary value problems, electromagnetic waves. Spring semester, lecture 3 hours, recitation 2 hours. Prerequisite: 341 or Mathematics 250, 260.
96—Political Science

Analysis of experimental results will be used to study theoretical models of physical processes. Fall semester. Maximum credit 4 hours. Lecture 1 hour, laboratory 2 hours. Prerequisites: 230, 231, and 232 (or 103, 104); Mathematics 250.

482r Nuclear and Health Physics Laboratory (2)
A laboratory course in nuclear physics emphasizing the use of modern detection and counting equipment. Laboratory exercises include radiation dosimetry, radioisotope techniques, neutron scattering, gamma-gamma correlation, and the study of nuclear radiation detection. Spring semester. Maximum credit 4 hours. Lecture 1 hour, laboratory 2 hours. Prerequisites: 230, 231, 232 (or 103, 104, 318); Mathematics 250.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Political Science

Professor Swansbrough, Head
Professors Brodsky, Carrithers, Moughrabi
Associate Professor Richard Wilson
Assistant Professor Bush

Students majoring in political science may earn a B.S. degree, choosing either the public administration concentration, emphasizing preparation for government service and graduate training, or the preprofessional concentration, emphasizing preparation for careers in law, international business, and the diplomatic service.

The department offers courses in five major subfields of the discipline: political behavior and methodology (202, 203, 301, 302, 303, 401r, 402r); political theory (212, 213, 214, 312, 313, 314, 411r); public law and administration (222, 223, 322, 323, 324, 421r); American institutions and processes (232, 233, 234, 331, 332, 335, 431r); and international relations and comparative government (242, 243, 244, 243, 342, 343, 344, 345, 441r, 442r). Certain students may also participate in the State Government Internship Program, the Metropolitan Government Internship Program, and the Dual Degree Program for combined undergraduate and graduate study in political science or public administration. The Dual Degree Program is offered in conjunction with The University of Tennessee, Knoxville.

Political Science (B.S.): Public Administration Concentration

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than political science: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than political science (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course other than political science (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
3 hours Political Science 101
3 hours Political Science 201
3 hours Political Science 301
9 hours from political science courses at the 200 level (excluding 201) distributed among three of five subfields listed above
9 hours from political science courses at the 300 level (excluding 301)
12 hours from political science courses at the 400 level including at least 3 hours but no more than 6 hours from Political Science 461r, 462r, 463, 464, 471r, 480, 495r, 497r, 498r or 499r
Related courses (21 hours):
3 hours Mathematics F210
3 hours Computer Science 210 or 340
3 hours Economics C101 or C102
3 hours English 300
9 hours additional from Sociology 209, 317, 318, 340; Philosophy 211, B221, 322, 348, B425; Human Services G300; History at 200, 300, 400 level approved by departmental adviser
2.0 average in all political science courses

Minimum of 30 hours of 300 and 400 level courses
Approved program of elective courses outside the Department of Political Science sufficient to fulfill the general University requirement of 128 credit hours necessary for graduation; list of courses normally prepared by the student and approved by the departmental adviser.

Typical course of study in political science (B.S.): public administration concentration

First Semester                      Second Semester

Freshman

Minor
Required and elective courses totaling 18 hours.

Required: 18 hours of political science including Political Science 201, 15 hours distributed among three of the five subfields described above.
Nine hours must be at upper levels with no more than 3 hours from Political Science 461r, 462r, 463, 464, 471r, 480, 495r, 497r, 498r, or 499r.

Political Science Courses

101 American Government (3)
Contemporary issues in American national politics with emphasis on national political processes and institutions. Every semester.

102 World Politics (3)
The evolution of the contemporary international political system with a comparison of ideologies and governments in Western and non-Western countries. Every semester.

199r Special Projects (1-4)
Individual or group projects. Every semester.

201 Introduction to Political Science (3)
Language, symbols, methods, and data of political discourse and analysis. Required for political science majors. Spring semester.

202 Political Behavior (3)
Political attitudes, beliefs, and behaviors; their sources and effects. Emphasis primarily on the United States with selected examples from Western European democracies. On demand.

203 Public Opinion (3)
Sources, content, and impact of public opinion on the political process. On demand.

212 Theories of Politics (3)
An introduction to such theoretical concerns of Western political science as sovereignty, rights, justice, property, liberty, and equality. Readings from Plato, Aristotle, Locke, Montesquieu, Mill, and Marx. On demand.

214 Southern Political Ideas (3)
The political ideas of selected southerners from revolutionary America to the present day. On demand.

222 Introduction to American Constitutional Law (3)
Case studies of key Supreme Court decisions affecting the distribution of power in American society. Fall semester.

223 Introduction to Public Administration (3)
Principles of government organization, management, financial control, personnel practices, and administration. On demand.
233 State and Local Government and Politics (3)
Tennessee state and local government and politics with comparisons to government and politics in the other states. Spring semester.

234 The Presidency (3)
The nature of the presidency as an institution. Presidential decision making and relations with other branches of government. On demand.

242 International Relations (3)
An examination of the theoretical, historical and behavioral causes of war and peace. Focus on the role of power, sovereignty, and international law on world politics. On demand.

244 Comparative Public Policy (3)
The formation and implementation of social welfare policies in developed and developing nations. On demand.

301 Research Methods (3)
Basic techniques in political science research. Required for political science majors. Fall semester.

302 Political Psychology (3)
Psychological bases for political action. On demand.

303 Politics and Communication (3)
Propaganda and other means of political and social control. On demand.

312 Classical Political Ideas (3)
The political ideas of the classical period with emphasis on Plato and Aristotle. On demand.

313 Democratic Theory (3)
The democratic state as seen by selected theorists from antiquity to the present day. On demand.

314 Contemporary Political Ideas (3)
The competing ideologies of the 20th century with emphasis on contemporary political and social thought including Marxism and Fascism. On demand.

315 American Political Ideas (3)
The major sources of American political ideas as a background to analyzing the political theory of the Founding Fathers. Formerly Political Science 213. On demand.

322 Civil Liberties (3)
Case studies of key Supreme Court decisions affecting the rights and freedoms of the individual in American society. On demand.

323 Law and Politics (3)
Lawyers, judges, police, and the political process. On demand.

331 Urban Politics and Policy (3)
An examination of political institutions in urban areas with a focus on public bureaucracies and the policy-making process. On demand.

333 Political Parties and the Election Process (3)
An examination of America's two-party system, political machines, third parties, modern campaign techniques, electoral behavior, and election administration. On demand.

335 Congress (3)
The contemporary Congress. The roles of congressmen and women, the distribution of power within Congress, relations with other branches of government, and prospects of reform. On demand.

343r Comparative Government and Politics (3)
The study of the governmental structures, processes, and ideologies of different regions of the world, comparing their political, economic, and social policies. May be repeated to focus on different regions of the world. On demand.

345 American Foreign Policy (3)
The basic foreign policy problems confronting the United States. Spring semester.

401r Advanced Topics in Political Behavior (3)
Selected topics in political behavior. May be repeated once. On demand.

411r Advanced Topics in Political Theory (3)
Selected topics in political theory. May be repeated once. On demand.

421r Advanced Topics in Public Law and Administration (3)
Selected topics in public law and administration. May be repeated once. On demand.

431r Advanced Topics in American Institutions and Processes (3)
Selected topics in American institutions and processes. May be repeated once. On demand.

441r Advanced Topics in International Relations and Foreign Policy (3)
Selected topics in international relations and foreign policy. May be repeated once. On demand.

442r Advanced Topics in Comparative Government (3)
Selected topics in comparative government. May be repeated once. On demand.

461r, 462r, 463, 464 State Government Internship Program (3)
Internship conducted during the legislative session in governor’s and legislative offices in Nashville. Spring semester. No more than 6 credit hours may apply toward the major degree requirements in the department. Prior approval of instructor.

471r Metropolitan Government Internship Program (3-6)
Internship conducted in various governmental offices in Chattanooga. Fall semester. No more than 6 credit hours may apply toward the major degree requirements in the department. Prior approval of instructor.

480 Senior Tutorial (3)
Independent research. Primarily for political science majors. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See ”Departmental Honors,” page 31.

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Psychology

Professor Green, Head
Professors Hood, Reid
Associate Professors Biderman, Helton, Ourth, Watson
Assistant Professors Ozbek, Warren-Leubecker

The Department of Psychology has developed a curriculum which meets the needs of a wide spectrum of interests. It is designed moreover to provide a broad but intensive educational experience for students in other fields who have an interest in particular areas of psychology which may bear upon other career plans or goals. The department offers both undergraduate and graduate degrees. Requirements for the B.A. and B.S. degrees follow.
Psychology (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than psychology (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Foreign language through second college year

Major and related courses
All psychology majors must take either an established minor from another department, or they must take either Philosophy 348, Philosophy of Science, or one of the ethics courses. Philosophy 221, 322 or 425 as part of the major-related degree requirements. In addition, each student must select at least three courses from one of the areas listed below. At least two courses are to be selected from 200 level or above. Courses selected from these areas to fulfill the major-related degree requirements cannot be simultaneously used to meet general education requirements of the University.

The areas:
1. Biology, chemistry, physics
2. History, political science, sociology/anthropology
3. Business administration, education, human services
4. Computer science, mathematics
5. Literature*, theatre & speech, philosophy

27 hours psychology including 101
One course from two of the following:
1) Psychology 311, 312, 314
2) Psychology 308, 331, 448
3) Psychology 406, 407, 484

Both courses from one of the following:
1) Psychology 331, 431
2) Psychology 448, 410
3) Psychology 221, 421
4) Psychology 311, 411

Either Psychology 460 or 461
The same course may not be used to fulfill two different requirements
Maximum of 6 hours of one psychology course labeled "r" and maximum of 9 hours of all psychology courses labeled "r" will count towards the 27 hours required for the major
Recommended: courses in statistics and research methodology
2.0 average in all psychology courses
Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

*Including non-English Department literature courses

Typical course of study in psychology (B.A.)

Representative Programs
It is recognized that the particular needs and interests of individual students vary widely. The accompanying typical courses of study are not intended to indicate, with the exception of the statistics and research methods course for the B.S. program, required courses of study. They are intended to serve as a model around which a student may construct his or her own program. Indicated are the general requirements for hours, limitations upon major hours for the B.A., and general education requirements.

### Psychology Courses

**101 Introduction to Psychology (3)**

Development of the human from infancy to adulthood; selected topics in learning, motivation, emotion, and perception integrated in an exploration of the dimensions and processes of human adjustment from the standpoint of basic psychological theory and research. Every semester. May not be taken for credit if Psychology 103 has been taken previously.

**199r Special Projects (1-4)**

Individual or group projects. Every semester. Maximum credit 4 hours.

**201 Research Methodology: Introductory Statistics in Psychology (3)**

Descriptive and inferential statistics, research design, and computer analysis of psychological data. Unique applications of quantitative analysis to problems in research techniques in psychology, consideration of requirements for rigorous analysis of special problems in research in behavioral processes. Every semester. Prerequisite: 2 years of high school algebra or Mathematics 106.

**202 Research Methodology: Laboratory Techniques (3)**

A study of laboratory methods making use of both human and infrahuman organisms. Conducting original research through the process of laboratory experimentation and analysis of data for preparation of research reports. Fall semester. Prerequisites: 101 and 201 (or equivalent).

**203 Research Methodology: Field Research Techniques (3)**

A study of psychological research methods appropriate to non-laboratory settings. Emphasis on research utilizing both quantitative and qualitative methods of analysis. Conducting original research. Critical evaluation of the research of others. Every semester. Prerequisites: 101 and 201 (or equivalent).

**221 The Psychology of Child Development (3)**

Infancy through childhood. Concepts of development and functioning derived from both research and clinical observation. Emphasis on cognitive, social, and emotional development. Child-rearing applications. Every semester. Prerequisite: 101 or equivalent. Credit not allowed in both Education 204 and Psychology 221.

**222 The Psychology of Adolescence and Adulthood (3)**

Psychodynamic principles of adolescent functioning. Evaluation of various theories of adolescence. Consideration of life-span development concepts and the adjustment problems related to aging. Emphasis on age-related changes. Every semester. Prerequisite: 101 or equivalent. Credit not allowed in both Education 204 and Psychology 222.

**223 Psychology of Aging (3)**

Theoretical and empirical introduction to the psychological development of older adults. Discussion of cognition, personality, social behavior, and sensori-motor changes as they evolve at the adult end of the life span. Examination of psychological issues in adult coping, death and dying, and work and family roles. Every semester. Prerequisite: 101 or equivalent.

**241 Psychology of Individual Differences (3)**

Consideration of individual differences in the dimensions of intelligence, personality, interests, and values. Discussion of group differences related to sex, age, race, social class, and intelligence. Examination of genetic and environmental factors influencing these differences. Fall semester.

**242 Psychology of Black Experience (3)**

Impact of cultural differences from a psychological perspective. Principles, theories and research in psychology applied to black experience. Differences in socialization, personality, and social processes. Topics include intelligence, racial identity, and psycholinguistics. Spring semester.

**251 The Psychology of Personal Adjustment (3)**

An overview of the major theories of adjustment and maladjustment, including classical psychoanalysis, neo-Freudian analysis, humanistic psychology, and social learning and behavior theory. Other topics will include the role of religion, economic status, and cultural context in adjustment. Every semester. Prerequisite: 101.
308 Principles of Abnormal Psychology (3)
A bio-social approach to theories of causation, development, and symptomatic behavior in emotional disorder; theoretical bases of the various therapies and of positive means of prevention. Every semester. Prerequisite: 6 hours of psychology.

311 Learning and Motivation (3)
Study of the effective conditions for various learning phenomena; roles of motivation, reinforcement, and punishment in learning. Fall semester. Prerequisite: 101 or equivalent; 201 recommended.

312 Sensation and Perception (3)
Study of sensory and perceptual processes; examination of the sense organs and related neurophysiological mechanisms, and the necessary stimulus conditions for particular perceptual phenomena. Laboratory. Spring semester. Prerequisite: 101 or equivalent; 201 recommended.

313 Cognitive Processes (3)
Examination of the ways in which people process information; topics from perception, thinking, problem solving, and language behavior. Spring semester. Prerequisite: 101 or equivalent; 201 recommended.

314 Physiological Psychology (3)
The study of the physiological bases of behavior with emphasis on the functional neural systems of the brain which mediate behavior. Laboratory designed to familiarize students with basic neuroanatomy and neurophysiological techniques used in the investigation of brain functions and behavior. Spring semester. Prerequisite: 101 or 6 hours of college biology courses, or permission of instructor.

316 Psychology of Communication (3)
An examination of complex behavioral processes within and between systems. The role of communications in thinking and problem-solving both by individuals and groups. Practical applications and problems of communication in such areas as management, market research, industry, and intelligence. Laboratory. Fall semester. Prerequisite: 101 or equivalent.

331 Social Psychology (3)
Survey of the general concepts and research areas in social psychology. Emphasis upon the interactions between the individual and society with consideration of such topics as attitudes, prejudices, conformity, deviance, socialization, and interpersonal attraction. May be registered for as Sociology 331. Every semester. Prerequisite: 6 hours of psychology or sociology. Credit not allowed in both Psychology 331 and Sociology 331.

345 Psychological Tests and Measurements (3)
Principles of psychological measurements including reliability, validity, errors of measurement, techniques of test construction, and problems in assessment and prediction. Laboratory use of selected tests. Fall semester. Prerequisite: 6 hours of psychology and an introductory statistics course.

401 Intermediate Statistics in the Behavioral Sciences (3)
Consideration of the theory and application of nonparametric and parametric measures in research design; introduction to computer utilization in the analysis of data. On demand. Prerequisite: introductory statistics course.

405 Industrial/Organizational Psychology (3)
Introduction to the study of organizations with emphasis on personnel selection, criteria, and training. Special consideration of work motivation, job satisfaction, and the role of the organization in behavior. Fall semester. Prerequisite: introductory statistics course.

407 Professional Psychology (3)
Role models of the psychological practitioner in community settings. Discussion of the foundations, methods, ethics, legal issues, and relationships with other specialists involved in professional psychology. On demand. Prerequisite: 9 hours of psychology or permission of instructor.

410r Advanced Topics in Personality Research (3)
Intensive study of selected topics of current theoretical and research interest in personality, abnormal psychology, and individual differences as they relate to personality. On demand. Prerequisite: 101 or equivalent; 6 hours of upper division psychology, including 448; and approval of the instructor.

411 Experimental Analysis of Behavior (3)
A rigorous analysis of complex behavior from the standpoint of contemporary behavioral systems. Spring semester. Prerequisites: 6 hours psychology.

412 Advanced Seminar for Psychological Processes (3)
A comprehensive review of the field as summary experience, especially for senior major students planning to enter graduate study. On demand. Prerequisite: 18 hours of psychology and senior standing, or by permission of the instructor.

421 Advanced Developmental Psychology (3)
The growth of children through high school years with special attention to research methodology and findings in relation to factors of development and the acquisition of skills; understanding the development of attitudes, habits, and personality. Spring semester. Prerequisites: 101 or equivalent, 221 or 222, or equivalent.

431 Advanced Social Psychology (3)
Intensive treatment of selected research areas in social psychology. Emphasis upon the interrelationship between current theoretical perspectives and appropriate methodological procedures. May be registered for as Sociology 431. Spring semester. Prerequisite: 331 or equivalent.

448 Theories of Personality (3)
Survey of basic theories of personality including the psychoanalytic, sociocultural, factor analytic, the bio-social, and the phenomenological. Strongly suggested for guidance majors. Every semester. Prerequisite: 6 hours of psychology.

451 Psychology of Women (3)
Analysis of empirical data and theoretical viewpoints concerning the psychological development of women. Psychological effects of sex roles, achievement motivation, and abilities of women; models of socialization practices, personality development, and stages of adjustment. Fall semester. Prerequisite: 6 hours of psychology and junior standing.

456r Individual Practicum (1-3)
Supervised contact program in community schools or social service agencies. Academic and personal development sought in the individual or small group activities conducted in this program. An activities log and final written report required. On demand. Prerequisites: 6 hours of upper division psychology and approval of instructor. Maximum credit 6 hours. Course graded on a satisfactory/no credit basis.

460 Systems of Psychology (3)
The historical development, major theses, elements of strength, shortcomings, and current trends of the principal schools of psychological thought. Reading and discussion course for psychology majors and graduate students. Spring semester. Prerequisites: 9 hours of psychology.

461 Philosophical Psychology (3)
Critical analysis of philosophical aspects of current systems of psychology. Particular focus upon assumptions and consequences of various modes of explanation and description. Fall semester.

470 Psychology of Religion (3)
Analysis of empirical data and psychological theories involving religious beliefs, practices, and experiences. May be registered for as Religion 470. Every semester. Prerequisites: 6 units psychology or philosophy-religion.

484 Social Psychology of Education (3)
Topics in the social psychology of education with particular emphasis on educational issues and problems from a social psychological perspective. On demand. Prerequisite: 9 hours of psychology or permission of instructor.
Sociology and Anthropology

Professor Cahill, Head
Associate Professors L. Cox, Geevarghese, Kileff, Miles, Pate, Robinson, Thurston
Assistant Professor Honerkamp

Any student in good standing with the University may be admitted to the major program. Various concentrations within the major field have been designed to meet the special needs of students majoring in sociology, anthropology, or urban studies.

To enhance opportunities for the anthropology major and to provide services to the community, the University established the Institute of Archaeology in 1976. The institute is an instructional and research museum located in Brock Hall that specializes in archaeological investigations of 19th century industrial, domestic, and military sites. Students may use the collections and archives of the institute for academic projects. By enrolling in specified courses, students may also engage in archaeological survey and excavation, the analysis of archaeological data, the conservation of artifacts, and the organization of museum collections.

Sociology and Anthropology: General, Anthropology, Sociology, Urban Studies Concentrations (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than anthropology and sociology (6 hours)

Category D
1 approved physical or natural science course other than anthropology with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course other than anthropology and sociology (3 hours)

Required: courses in statistics and research methodology
2.0 average in all anthropology and sociology courses

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical courses of study for sociology and anthropology (B.A.)

Sociology and anthropology (B.A.): anthropology concentration

### Sociology and Anthropology (B.A.): Sociology concentration

#### First Semester

**Sophomore**
- Sociology or Anthropology Elective: 3
  - Language (2nd year): 3
  - General Education Category C: 3
  - General Education Category B: 3
  - General Elective: 4
- General Education Category A: 3
  - Language: 4
  - Social Science Elective: 3
  - Physical Education 021: 1
- Urban studies: 3
  - Sociology, 300-400 level: 3
  - Anthropology, 300-400 level: 3
  - Other Social Science Electives: 6

#### Second Semester

**Junior**
- Sociology 312: 3
  - Sociology 394: 3
  - Anthropology, 300-400 level: 3
  - General Elective: 3
  - Other Social Science Electives: 6

**Senior**
- Sociology, 300-400 level: 3
  - Other Social Science Electives: 6
  - General Education Category G: 3

**Electives**
- General Elective: 3

### Sociology and Anthropology: Anthropology, Sociology, Urban Studies Concentrations (B.S.)

#### General Education

(see pages 25-27 for list of approved courses)

**Category A**
- 2 approved courses in written communication in the English language (6 hours)

**Category B**
- 3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

**Category C**
- 2 approved behavioral or social science courses other than anthropology and sociology (6 hours)

**Category D**
- 1 approved physical or natural science course other than anthropology with laboratory (4 hours)

**Category F**
- 1 approved mathematics course (3 hours; approved related courses below will apply)

**Category C**
- 1 approved perspectives course other than anthropology and sociology (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity.

#### Major and related courses

Computer Science 210
One course in written communication above the 100 level Mathematics 135, F136, and F210.
Completion of one of following concentrations—

1. **Anthropology:**
   - 33 hours of sociology and anthropology including Anthropology 152 and 302; 9 hours selected from Anthropology 208 and 210; 211; Sociology 314 and 394 of approved anthropology field and laboratory courses; 3 additional hours of sociology; additional hours of anthropology electives to complete concentration

2. **Sociology:**
   - 33 hours sociology and anthropology including 151, 312, 314, 394; Anthropology 152 or 208; plus 18 hours of sociology/anthropology electives (at least 9 hours at 300-400 level) with 12 of the 18 hours in sociology

3. **Urban studies:**
   - 33 hours sociology and anthropology including Sociology 151, 314, 394; Anthropology 152 or 208; Anthropology 302 or Sociology 312; plus 18 hours of sociology/anthropology electives of which 12 hours must be at 300-400 level (6 of the 18 hours of electives in the major to be selected from Sociology 209, 219, 317, 318, 345, 400, 415, 456r).

18 hours additional from Economics 306, 455; Geography 415; Human Services 301; Political Science C101, 233, 331, 401 r or 421r (when appropriate to urban studies), 461r, 462r, 463, 464, 471r; Psychology 316, 331, 421, 431, 456r.

2.00 average in all anthropology and sociology courses

Minimum of 30 hours of 300 and 400 level courses Electives to complete 128 hours

---

*Sociology 314 and 394 may be taken in lieu of 9 hours of anthropology field and laboratory courses. Anthropology 335 offered in summer school (6 hours).*

### Minors

**Anthropology:** A student may obtain a minor in anthropology by successfully completing Anthropology 152; 9 hours from Anthropology 208, 209, 210 and 211; and 6 hours of anthropology above the 300 level. Total: 18 hours.

**Sociology:** A student may obtain a minor in sociology by successfully completing Sociology 151 plus 15 other hours in sociology, at least 6 of which are above the 300 level. Total: 18 hours.

### Anthropology Courses

**152 Introduction to Anthropology** (3)
Cultural and biological development of human society as interpreted by the anthropologist from the remains of prehistoric life and the culture of contemporary humans. Every semester.

**199r Special Projects (1-4)**
On demand.

**208 Cultural Anthropology** (3)
The comparative study of culture, social organization, economics, government, education, religion, language, and arts in various primitive and present societies; cultural integration and change. Every semester.

**209 Physical Anthropology** (4)
The origins and relationships of extinct and present forms of humankind from the perspective of the modern synthetic theory of evolution. Mechanisms of heredity and fossil evidence of early primate and hominid populations. The nature of human variation and the development of culture in human evolution. Every semester. Lecture 3 hours, laboratory 2 hours.

**210 Anthropological Linguistics** (3)
A first course in the nature of language and the analysis of linguistic structures with special reference to non-Western languages. On demand.

**211 Introduction to Archaeology** (3)
The study of human prehistoric and historic past through the archaeological record. Basic techniques, methods, theoretical approaches, and major conclusions of archaeological investigation. Every semester.

**302 Anthropological Theory** (3)
A systematic survey of the development of major theories in anthropology with particular attention to theories of culture. Spring semester alternate years. Prerequisite: 3 hours of anthropology.

**306 World Prehistory** (3)
Topics of world archaeology, covering the paleolithic in the old and new worlds and the search for the prerequisites of civilization. On demand.

**333 Peoples and Cultures of India** (3)
Social and ethnological study of the peoples and cultures of India. Traditions and modernization analyzed in the light of the contact with the Western cultures. Uniformity and diversity of society in India compared and contrasted with the West. Fall semester alternate years.

**334r American Indians** (3)
Prehistory, ethnography, and contact history of indigenous peoples of the New World. May be repeated for credit when different topics have
been specified as topics for different semesters. On demand.  
Prerequisite: 3 hours of anthropology or approval of instructor.

335 Archaeological Field Methods (3 or 6)  
Theory, method, and techniques of field research in archaeology,  
training and practice in surveying, photography, field recording, and  
other basic skills. On demand. Prerequisite: approval of instructor.

351 Language and Communication (3)  
The nature and evolution of communication, language, and speech. The  
relationship between language, culture, and society. Topics include  
nonverbal communication, animal communication, ethnolinguistics,  
and sociolinguistics. On demand.

356 Archaeological Collections (3)  
Principles of organization, analysis, and interpretation of prehistoric  
and historic archaeological materials. Techniques of preservation and  
presentation. On demand, Lecture 2 hours, laboratory 2 hours.  
Prerequisite: approval of instructor.

36r Communications Laboratory (3)  
Laboratory methods and field techniques of research in human and  
animal communication. Individual or group projects. On demand.  
Prerequisite: approval of instructor.

410 Culture and Personality (3)  
The influence of cultural patterns upon the development of personality;  
materials from simple and complex societies; national and tribal  
character, and relevant theoretical viewpoints. On demand. Prerequisites:  
3 hours of sociology, anthropology, or psychology or approval of  
instructor.

411 Sex Roles and Culture (3)  
Evolutionary and cross-cultural analysis of sex roles in human societies  
with special focus on the relative status of women. On demand.  
Prerequisites: 3 hours of sociology, anthropology, or psychology or approval of  
instructor.

425 Comparative Social Institutions (3)  
The application of the comparative method in the analysis of  
sociocultural systems. Topics specified each semester. On demand.  
Prerequisite: 3 hours of behavioral science or approval of instructor.

495 Departmental Honors (1-3 hours per term, 4 hours for the two  
terms)  
Every semester. See "Departmental Honors," page 31.

497 Research (1-4)  
On demand.

498 Individual Studies (1-4)  
Every semester.

49r Group Studies (1-4)  
On demand.

Sociology Courses

125 Sociology of Social Problems (3)  
Sociological perspectives on selected contemporary social problems  
such as crime, poverty, hunger, racial and sexual discrimination, alcohol  
and drug abuse, the threat of war; examination of theories and research  
on social problems; analysis of possible solutions. Every semester.

151 Principles of Sociological Analysis (3)  
Scientific study of human society and how individuals and groups adjust  
to each other and to their social environment; examination of varying  
research approaches: consideration of basic concepts, theories, and  
principles of explanation used by sociologists. Every semester.

19r Special Projects (1-4)  
Individual or group projects. On demand. Maximum credit 4 hours.

209 Population and Society (3)  
The study of population growth and decline, composition and  
distribution, and the interrelated effects of economics, social structures,  
and environment resources. Special emphasis is placed on problems of  
urbanization and population policies. Fall semester alternate years.

215 The Sociology of the Family (3)  
The study of modern marriage and family institutions from sociological  
and social psychological perspectives; the social factors of mate  
selection, kinship relationships and sexual behavior; evaluations of  
research findings and emerging trends. Every semester.

219 Deviance and Conformity (3)  
A social and social psychological introduction to the nature and  
consequences of "normal" and "deviant" behavior. Theories of  
deviance with particular attention to role theory and labeling theory in  
the areas of crime and mental illness. On demand.

220 Small Group Behavior (3)  
Social relationships and interaction within small groups in various  
contexts; review of major field and laboratory studies on leadership,  
communication, problem-solving, and personal satisfactions; experience  
in techniques of observation, role playing, and sociometric research.  
Spring semester alternate years.

250 Social Statistics (3)  
Basic statistical techniques such as frequency distributions and graphs,  
the normal curve, tests of significance, correlation, simple analysis of  
variance, and applications to socio-cultural data and their interpretation.  
On demand. Prerequisite: approved computer science course or  
approval of instructor.

305 Minorities in American Life (3)  
Character and role of racial, religious, and ethnic minorities in the U.S.;  
the interplay of historical and current sociocultural processes on  
attitudes and behavior for both dominant and minority groups;  
minority-related social problems and their possibilities of solution.  
Spring semester. Prerequisites: 3 hours of behavioral science.

312 History of Social and Cultural Theory (3)  
Scientific theories of social relations and culture from the 19th century to  
the present; the role of theory in an empirical science. Fall semester.  
Prerequisites: 151, or Anthropology 208, or approval of instructor.

314 Research Methods (Sociology or Anthropology Emphasis) (3)  
The nature of the scientific method and research as applied to the  
collection, analysis, and interpretation of social and cultural data. An  
introduction to selected basic techniques in research and the  
preparation of research proposals. Fall semester. Prerequisite: 151, or  
Anthropology 152 or 208, or approval of instructor.

317 Organizational Behavior (3)  
Structure of social relationships in organizational life: common patterns  
development and operation of bureaucratic systems and their effect  
upon personal values and individual behavior applications in modern  
education, industry, government, and institutional life. On demand.  
Prerequisites: 3 hours of behavioral science.

318 Industrial Sociology (3)  
Social organization and process within the formal and informal structure  
of the industrial unit, evolution of stratification systems, the Industrial  
Revolution, bureaucratization and the individual, the implications of  
industrialization and urbanization for human relations in the work  
process. On demand. Prerequisites: 3 hours of behavioral science.

320 Sociology of Law (3)  
Law as a social phenomenon and as a social process. Historical and cross-  
cultural comparison of law, legal institutions, and enforcement of law.  
Special attention given to American law enforcement. On demand.  
Prerequisite: 3 hours of sociology or approval of instructor.

321 Criminology (3)  
The nature of crime, criminal statistics, causal factors, theories and  
procedures in prevention and treatment. Fall semester. Prerequisite: 3  
hours of sociology or approval of instructor.
106—Theatre & Speech

322 Juvenile Delinquency (3)
The nature of juvenile delinquency; factors contributing to delinquency; methods of diagnosis and treatment of delinquent behavior; prevention of delinquency. Spring semester. Prerequisite: 3 hours of sociology or approval of instructor.

323 Sociology of Corrections (3)
Historical and cross-cultural study of adult detention, punishment, and rehabilitation systems. Examination of political and social values as they relate to corrections. On demand. Prerequisite: 3 hours of sociology or approval of instructor.

331 Social Psychology (3)
Every semester. See Psychology 331.

340 Collective Behavior (3)
Analysis of the varieties of collective phenomena such as crowds, social movements, public opinion, fads and fashion; examination of theories and research on the social context of this behavior and the social and psychological processes within such groups; case studies and examples from contemporary life. On demand. Prerequisite: 3 hours of sociology or approval of instructor.

345 Social Classes in America (3)
Theories and forms of social stratification; differentials in prestige, power, and wealth; social opportunities and mobility; values and behavior at various levels of American society. Fall semester. Prerequisite: 3 hours of behavioral science.

360 Sociology of Aging (3)
A basic course in social gerontology. The process of aging and the problems of the aged. Changing values and institutional responses to the aged. Fall semester. Prerequisite: 3 hours of behavioral science.

365 Sociology of Medicine and Health Care (3)
Social and cultural perspectives on health, illness, and the health professions and institutions. Topics will include social epidemiology, health attitudes and behavior, medical folklore, mental health, the socialization of health professionals, the organization of health care, patient-professional relationships, health and medical care in other cultures. Fall semester. Prerequisite: 3 hours of behavioral science.

391 History of Social Thought (3)
Trends in beliefs and values regarding human society, in their interrelationships in ancient cultures, and in Western thought to the 19th century. On demand.

394 Research Seminar (Sociology or Anthropology Emphasis) (3)
The use of social research techniques to report on social and cultural phenomena; data collection and analysis, writing of a research report. Research project required of all students. Spring semester. Prerequisites: 314; Mathematics 210 or Sociology 250 is required for all majors in the sociology concentration under the B.A. degree and for all taking the B.S. degree.

400 Urban Sociology (3)
Analysis of how urban areas grow and are spatially organized. Examination of the cultures, social stratification systems, and modes of governance in contemporary American cities. Emphasis on urban problems. On demand. Prerequisite: 3 hours of behavioral science or approval of instructor.

415 Urban Geography: Urban Land Development and Redevelopment (3)
On demand. See Geography 415

422 Sociology of Religion (3)
Social and cultural interpretations of religious institutions and the relation of religion to the social order; major emphasis upon theory and research in the context of Western Christian civilization. On demand. Prerequisite: 3 hours of behavioral science, philosophy or religion, or approval of instructor.

430 Dynamics of Intergroup Relations (3)
An advanced course in minority relationships focusing on social psychological aspects of prejudice and discrimination; analysis of the effects of strategies or movements aimed at change and unplanned consequences of shifting social, economic, or power relationships. On demand. Prerequisite: 305 or approval of instructor.

431 Advanced Social Psychology (3)
On demand. See Psychology 431.

440 Social and Cultural Change (3)
How cultures develop, mature, and face disruption or decline, stability, and change; special attention to technological change, "cultural lag," and problems of developing nations and peasant societies. On demand. Prerequisite: 3 hours of sociology or anthropology or approval of instructor.

450 Seminar in Socio-Cultural Theory (3)
Directed individual study in selected areas: reports, discussion, and emphasis on insights into major socio-cultural phenomena. On demand. Prerequisites: Anthropology 302 and Sociology 312 or approval of instructor.

459 Symposium on Urban Issues (3)
Participants responsible for conducting an in-depth analysis of some urban issue. Organization of a University-wide symposium to share the results. Participants in the symposium required to submit a paper from their work to be considered for inclusion in the symposium and to help in the implementation of the symposium. On demand. Prerequisite: approval of instructor.

470 Special Studies and Problems (1-3)
Investigation and reporting on specialized topics in research or theory under faculty direction. Primarily for seniors. On demand. Prerequisite: permission of instructor. Maximum credit 6 hours.

495 Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497 Research (1-4)
On demand.

498 Individual Studies (1-4)
Every semester.

499 Group Studies (1-4)
On demand.

Theatre and Speech

Associate Professor Behringer, Head
Associate Professors Lewis, Wiley
Assistant Professors Duffy, Smotherman

Theatre and Speech (B.A.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than theatre and speech: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)
General Education Category B
Theatre and Speech 105
Theatre and Speech 101
2.0 average in all theatre and speech courses
42 hours Theatre and Speech including Theatre and Speech 101, 102, 105,
2 courses outside department may count toward major with approval
1 approved perspectives course (3 hours)
1 approved mathematics course (3 hours)
1 approved physical or natural science course with laboratory (4 hours)
21 hours including Theatre and Speech 101, 105 or 111 or 115, 211
Theatre:
Typical course of study in theatre and speech
Minimum of 30 hours of 300 and 400 level courses
Major and related courses
Art 101
42 hours Theatre and Speech including Theatre and Speech 101, 102, 105, 107
6 hours theatre history: 211, 212
6 hours acting: 227, 327
3 hours of design in the theatre: 333
6 hours of performance and production (under special circumstances, with permission of department head, 2 hours may be taken concurrently)
9 hours approved theatre and speech electives at 300 and 400 level
2 courses outside department may count toward major with approval of department head
2.0 average in all theatre and speech courses
Foreign language through second college year
Electives to complete 128 hours

Typical course of study in theatre and speech (B.A.)

</tbody>
</table>
Introduction to Film (3)
The history and language of motion pictures studied by viewing and analyzing selected film masterpieces. Every semester.

Readers’ Theatre (3)
The study of literature through group performance and the development of skilled verbal and nonverbal expression based on the critical examination of written texts. On demand.

Contemporary Public Speech Communication: Concepts and Cases (3)
Study of rhetorical principles employed in addresses by contemporary leaders concerning significant current questions: practice in the application of rhetorical principles in speeches and oral reports. On demand.

Comedy (3)
Types of comedy, farce, satire, and related forms examined in theoretical studies and representative works. Emphasis on theatrical techniques of communicating the comic vision to the audience. On demand.

History of Costume (3)
Study of wearing apparel, principally in the western world from ancient Egypt to the present with a particular emphasis on clothing as a reflection of the cultural milieu. Spring semester alternate years.

Directing (3)
Close study of the basic elements of play directing: play analysis, director-actor communication, and the uses of improvisation. Each student will direct a short scene and participate in diagnostic criticism. Spring semester. Prerequisites: 211 or 212, 227, and/or permission of instructor.

Advocacy and Debate (3)
A study of contemporary procedures in deliberation, persuasion, and debate utilizing current topics of public interest. Emphasis on the development of individual skills in rational decision-making and advocacy through actual experiences in intercollegiate and parliamentary forms of debate. On demand.

Advanced Acting (3)
Continued development of vocal technique, movement, and character study through improvisation, selfexploration, and textual analysis. Emphasis on scene work drawn from the modern realist repertory. Fall semester. Prerequisite: 227 and permission of instructor.

Scene Design (3)
Introduction to the basic techniques and methods of modern scene design and graphics in interpretation of representative examples of dramatic literature. Spring semester. Prerequisites: 101,105; Art 101; and permission of instructor.

Costume Design (3)
Basic procedures and principles of costume design for representative types and styles of drama. On demand. Prerequisites: 102, 105; Art 101; and permission of instructor.

Performance and Production (1)
Upper division laboratory course in all aspects of theatre performance and production. Projects assigned in departmental productions and workshops. May be repeated for credit. Every semester. Prerequisite: 2 semesters of 200r and permission of department head. Graded by faculty jury.

Theatre for Youth (3)
All phases of producing plays for or by junior audiences examined, including the techniques of creative dramatics. On demand.

Film Topics (3)
Directors, genres, styles, or theories of film studied by viewing and analyzing representative films. On demand.

Departmental Honors (1-3 hours per term, 4 hours for the two terms)

Research (1-4)
On demand.

Individual Studies (1-4)
On demand.

Group Studies (1-4)
On demand.

University Studies
See Interdisciplinary Studies, page 78.

William E. Brock Scholars Program

Professor Fulton, Director
June McEwen, Assistant to the Director
Professors Brodsky (Political Science), Burhenn (Philosophy-Religion), Nymann (Mathematics), Schonblom, (Engineering), Van Horn (Biology)
Associate Professors Cox (Music), Jackson (English), Lewis (Theatre-Speech), Watson (Psychology)

Brock Scholars are those students who have been awarded membership in the University’s four-year honors program. The following University Honors courses are required of and restricted to Brock Scholars.

Humanities I & II (6,6)
Selected authors from the traditional corpus of Western literature with emphasis on historical and intellectual contexts; analysis of specific texts through seminar discussion and written work. Satisfy general education requirement in Category A and Category B. 101 fall/102 spring semester. Limited to Brock Scholars; others only by permission of instructor.

Fine Arts: Music History and Aesthetics (3)
A general review of the aesthetics and history of Western concert music. Fall semester. Limited to Brock Scholars; others only by permission of instructor. Satisfies fine arts requirement in Category B.

Introduction to the Social Sciences (3)
An introduction to the social sciences through intensive study of one of the social sciences; attention to problems of method, concept formation, theory construction, and the ethics of research. Empirical research project required. Fall semester. Limited to Brock Scholars; others only by permission of instructor.

The Social Sciences and Public Policy (3)
A case study of a public policy issue to which social science research is relevant. Appropriate background readings. Empirical research project required. Spring semester. Limited to Brock Scholars; others only by permission of instructor. Prerequisite: 105. Together with 105 satisfies general education requirement for Category C.

Science and Technology (4,4)
Selected topics and experiments in science and technology designed to illustrate the methods, purposes, philosophical foundations, and implications of scientific and technological research. Consideration of societal influences and restraints upon and cultural effects of science and technology. 107 fall/108 spring semester. Satisfies general education requirement in Categories D and G. Seminar and lecture 3 hours, laboratory 2 hours. Prerequisite: admission to the UTC Honors Program.
School of Business Administration

Professor Irvin D. Reid, Dean

The principal objective of the School of Business Administration is to foster an appreciation and understanding of the function of the organization in today's environment, to develop effectively the student's analytical abilities, and to prepare the student to obtain employment in the private, public, and not-for-profit sectors. The school emphasizes breadth in management education necessary for lifelong professional career development. The curricula also provide essential skills for employment opportunities in related career fields. Career preparation is offered in the following areas:

- Accounting
- Economics
- Finance
- General Management
- Industrial Management
- Personnel Management
- Marketing
- Office Management

The school is organized into five departments, Accounting and Finance, Economics, Management, Marketing and Business Law, and Office Administration/Business Education.

It offers four degree programs: Bachelor of Arts with a major in economics; Bachelor of Science with a major in business administration and concentrations in accounting, finance, general management, industrial management, personnel management, marketing, and office management; Bachelor of Science with a major in economics; and Master of Business Administration.

The design of the B.S. degree programs enables the graduate to move directly into the M.B.A. program with advanced status, thereby significantly shortening his or her M.B.A. program requirements.

The Bachelor of Science with a major in business administration is accredited by the American Assembly of Collegiate Schools of Business (AACSB). The MBA program is currently under review for AACSB accreditation.

Accounting and Finance

Professor Fulmer, Head
Professor Hale
Associate Professors Gavin, McLaurin, Willis
Assistant Professors Albin, Alvis, Bertin, Orquia, Pauley, N. Riley, W. Riley

The Department of Accounting and Finance offers concentrations designed to prepare students for professional positions in the profit and nonprofit sectors. The Bachelor of Science degree in business administration may be obtained with concentrations in accounting or finance.

Business Administration (B.S.):
Accounting concentration

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (9 hours)

Category C
2 approved behavioral or social science courses other than economics (6 hours; approved related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category C
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity.

Major and related courses
6 hours selected from Political Science C101, Psychology C101, or Sociology C151
Mathematics 135, F136
Computer Science 210
One course from English 277, 300, 410, or Office Administration 310 (minimum of 8 hours in written communication including required courses in Category A)
37 hours common body of knowledge in the School of Business Administration including: Accounting 201, 202; Economics 101,102; Finance 302; Management 211, 212, 311, 315, 440, 441; Marketing 313, 335

Accounting concentration:
Computer Science 211
21 hours from the School of Business Administration including:
Accounting 303, 304, 305, 307, 401, 405, 408
12 hours: 6-9 hours chosen from Accounting 306,309,404,406,407,409;
3-6 hours chosen from Finance 321, 322, 403; Marketing 336;
Economics 301, 429; Management 356
2.0 average in all accounting courses

A minimum of 54 hours of the 128 total must be taken at the 300-400 level
Electives to complete 128 hours
Maximum of 73 hours total accepted in School of Business Administration courses; i.e., at least 55 hours other than School of Business Administration courses must be completed
Typical course of study in business administration (B.S.): accounting concentration

The program for the first two years in business administration is the same for all concentrations and is designed to do two things: (1) Give the student background in the basic disciplines and areas required to fulfill the general education requirements of the University and (2) prepare a foundation for the advanced courses in business administration to be taken during the junior and senior years.

Finance Courses

281 Real Estate Fundamentals (3)
On demand.

282 Real Estate Law (3)
Acquisition and transfer of property; rights of adjoining owners; mortgages and liens; abstracts of title; recording; drafting of deeds; leases, options, and other legal aspects of property. On demand.

283 Real Estate Appraisal (3)
The fundamentals of appraising various types of real estate; the concept of value; the influence of architecture and construction; depreciation; analysis of city and neighborhood; different approaches to real estate property valuation. On demand.

284 Real Estate Finance (3)
Elements of mortgage finance; source of mortgage funds; construction loans; interest rates; servicing mortgages; V.A., F.H.A., conventional, and other loans. On demand.

301 Personal Finance (3)
Designed to help the individual and family make intelligent, informed decisions on personal financial management. On demand.

302 Essentials of Managerial Finance (3)
Management of funds in business, including procurement, utilization, and disposition of money. Financial aids such as budgeting and break even analysis, financial statement analysis, and capital management. Every semester. Prerequisites: Accounting 202; Economics 101, 102; Management 212; junior standing.

321 Investments (3)
Theory of investment; classification of media; security analysis; investment market mechanisms; securities legislation; institutional aids to the investor, investment timing; formulation of investment programs. Fall semester and summer. Prerequisites: 302; Accounting 202; Economics 101, 102; junior standing.

322 Commercial Banking (3)
A course designed to introduce the student to the decisions facing a commercial banker. Topics covered include banking history, role of money in the economy, the commercial banking system, Federal reserve rules, regulations and monetary management, and special topics such as credit analysis, installment lending, management of a bank’s cash balances, loan policy, and money management services. Spring semester and summer. Prerequisite: 302.

337 Principles of Insurance (3)
Types of insurance, insurance coverage, policy protection, and company organization and regulation. On demand. Prerequisites: Economics 101, 102.

403 Financial Statement Analysis (3)
Techniques of financial statement analysis with special attention paid to the balance sheet and the income statement. Emphasis on current position, profitability, and financial structure of the firm. On demand. Prerequisites: 302, Accounting 202, senior standing, and permission of instructor.

421 Security Analysis (3)
A course designed to introduce the undergraduate to advanced investment analysis and theory. Included in the course will be computer applications and analysis of investment vehicles and strategies. Spring semester. Prerequisites: 321; Computer Science 210.

422 Financial Institutions (3)
Capital markets and institutions; sources and uses of capital funds; impact of changes in flow of funds on the economy. Spring semester. Prerequisite: 302.

423 Financial Management (3)
A case course which affords the undergraduate an opportunity to apply financial principles to actual situations. The course is a continuation of the topics in 302 using the case discussion approach. Fall semester and summer. Prerequisite: 302.

424 Theory of Finance
A lecture/discussion course which teaches the theory behind financial decisions. Topics covered include investments and securities, capital budgeting, risk analysis, and application of operations research to finance. On demand. Prerequisites: 302, 321.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497r Research (1-3)
Every semester.

498r Individual Studies (1-3)
Every semester.

499r Group Studies (1-3)
Every semester.

Economics

Professor Keilany, Head
Professors Armstrong, Giffin, Peterson, Pratt
Associate Professor Rabin
Assistant Professors Garrett, Hutchinson

The economics curriculum is designed to prepare students for a successful career in different sectors of the economy. This is accomplished by offering a B.A. as well as B.S. in economics. The B.A. degree provides flexibility in course offerings and requires study of a foreign language. The B.S. degree, on the other hand, stresses mathematics and analysis.

Economics (B.A.)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than economics (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related courses will apply)

Category C
1 approved perspectives course (3 hours)

Foreign language through second college year

Major
Management 211 and 212 or Mathematics F210
24 hours economics including 101,102, and electives
2.0 average in all economics courses
Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours
Maximum of 73 hours accepted in School of Business Administration
courses with maximum of 42 hours in economics; i.e., at least 55 hours
other than School of Business Administration courses must be com-
pleted

Typical course of study in economics (B.A.)

**Minor**
A student may obtain a minor in economics by taking Economics 101 and
102 plus 12 additional hours of 300 or 400-level economics courses
(minimum of 18 hours).

**Economics Courses**

**101 Principles of Economics: Macroeconomics (3)**
A study of national income and its determination, money and banking,
economic fluctuations, fiscal and monetary policy, economic growth,
and international economics. Every semester.

**102 Principles of Economics: Microeconomics (3)**
A study of the market system, the price system, forms of business
organization, government and business, labor and distribution. Every
semester.

**199r Special Projects (1-3)**
Individual or group projects. On demand. Maximum credit 3 hours.

**301 Money and Banking (3)**
Development and analysis of the American monetary system and
commercial and central banking; special attention to analysis and
evaluation of monetary policies. Every semester. Prerequisites: 101,102.
114—Management

306 Public Finance (3)
Public expenditures and revenues, principles of taxation, public debt, and fiscal policy. On demand. Prerequisites: 101, 102.

317 Labor Economics and the Labor Process (3)
Wage and employment theories, labor law, and history of the labor movement. On demand. Prerequisites: 101, 102.

324 Intermediate Microeconomic Theory (3)
Survey of developments in economic analysis; price determination, including considerable study of demand and cost theory; imperfect competition. On demand. Prerequisites: 101, 102.

325 Intermediate Macroeconomic Theory (3)
Introduction to contemporary theory of income and employment; emphasis on the essential principles and concepts used in the determination of the level of income and employment, the rate of economic growth, and the general price level. Every semester. Prerequisites: 101, 102.

404 International Economics (3)
The classical and modern theories of international trade; international trade accounting; exchange rates; tariffs and other restrictions on trade; recently created agencies and programs to promote international economic relationships; the influence of international economic relationships on world politics. On demand. Prerequisites: 101, 102.

425 Industrial Organization (3)
The structure of industry, business conduct, and economic performance; analysis of antitrust law and government regulation. Every semester. Prerequisites: 101, 102.

426 Comparative Economic Systems (3)
Theoretical and empirical examination of various economic systems with emphasis on current capitalist and socialist economies. Objectives and outcomes of market and planned economies are compared. On demand. Prerequisites: 101, 102.

429 Managerial Economics (3)
The solution of business problems by use of economic theory, accounting, marketing methods, financial techniques, etc. On demand. Prerequisites: 101, 102; Management 212.

444 Economics of Underdeveloped Areas (3)
Factors underlying economic progress of nations and geographic areas; analysis of resources, manufacturing and agricultural productivity, saving and investment, trade, monetary and banking system, and fiscal system. On demand. Prerequisites: 101, 102, or graduate standing.

450 Marxian Political Economy (3)
An introduction to Marxian thought in general and Marxian economic theory in particular; Marxian analysis of theories of value and distribution, including modern radical economics. On demand. Prerequisites: 101, 102.

453 History of Economic Thought (3)
Development of theories of value and distribution, macroeconomics, money and banking, international trade, and business cycles; works of Smith, Malthus, Ricardo, Marx, Jevons, Marshall, Wicksell, Knight, Schumpeter, and Keynes. On demand. Prerequisites: 101, 102.

455 Urban Economics (3)
A study of the metropolitan economy with a problem orientation in areas of intra-metropolitan industry location, urban residential location and travel behavior, the urban ghetto, housing markets, urban transportation, and environmental quality. On demand. Prerequisites: 101, 102.

460 Introduction to Econometrics (3)
Introduction to the use of mathematical models in economic analysis and the statistical verification of those models. On demand. Prerequisites: 101, 102; Management 212; or equivalent.

465 Economics of Regulated Industries (3)

470 Seminar in Current Economic Topics (3)
The application of economic techniques and analytical methods to not less than five current topics, which may vary from semester to semester, selected by the instructor. Designed for senior economics majors. On demand.

480 Philosophy of Enterprise (3)
Course seeks out the philosophical roots and bases of the capitalist order, denotes the derivation of entrepreneurship, private property, limited government and the market system, and weighs economic public policy in terms of cost-benefit criteria. On demand. Prerequisites: 101, 102, or equivalents.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-3)
On demand.

498r Individual Studies (1-3)
On demand.

499r Group Studies (1-3)
On demand.

General Business Administration

Professor Irvin D. Reid, Coordinator

General Business Administration consists of courses and programs which are offered to all students regardless of major or department. These courses are intended to enhance students’ opportunities to understand business and its environment and provide opportunities to participate in a business practicum. General Business Administration is not a degree program. Courses in this category are designated as BUSA for "Business Administration."

General Business Administration Courses

459r Small Business Practicum (3)
Opportunity to integrate and apply specialized disciplinary skills to practical business problems of company-wide scope. Students are assigned as consultants to assist businesses under supervision of a faculty member. Every semester. Prerequisites: Finance 302; Management 311 or permission of the SBI Director; Management 315; Marketing 313. Maximum credit: 6 hours.

Management

Professor Ettkin, Head
Associate Professors Kleiman, Macomber, Sen, White
Assistant Professors DeDee, Dilepan, Parker, Johnson, Raiszadeh

The management curriculum is designed to prepare students for careers in both the public and private sectors as well as graduate studies. Students may choose to concentrate in general management, personnel management, or industrial management.
Typical course of study in business administration (B.S.): general management concentration

The program for the first two years in business administration is the same for all concentrations and is designed to do two things: (1) Give the student background in the basic disciplines and areas required to fulfill the general education requirements of the University and (2) prepare a foundation for the advanced courses in business administration to be taken during the junior and senior years.
116—Management

**Category D**
1 approved physical or natural science course with laboratory (4 hours)

**Category F**
1 approved mathematics course (3 hours; approved related course below will apply)

**Category G**
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**
6 hours, one course being Psychology C101 and the other either Political Science C101 or Sociology C151
Mathematics 135*, F136
Computer Science 210
One course from English 277, 300, 410, or Office Administration 310 (minimum of 8 hours in written communication including required courses in Category A)
37 hours common body of knowledge from the School of Business Administration including: Accounting 201, 202; Economics 101, 102; Finance 302; Management 211, 212, 311, 315, 440, 441; Marketing 313, 335

**Personnel management concentration:**
18 hours consisting of Management 330, 332, 410, 433, 435, 460
9 hours chosen from Management 356, 438, 456; Business Administration 459r (maximum 3 hours); Economics 317 or Business Finance 337
9 hours from Psychology including Psychology 241 and remaining hours from 203, 316, 345, 411
2.0 average in all management courses

A minimum of 54 hours of the total 128 must be taken at the 300-400 level
Electives to complete 128 hours
Maximum of 73 hours total accepted in School of Business Administration courses; i.e., at least 55 hours other than School of Business Administration courses must be completed

*If exempted, student may take Mathematics F136.

Typical course of study in business administration (B.S.): personnel management concentration

- B Management 332
- B Marketing 319
- B Marketing 355

A minimum of 54 hours of the total 128 must be taken at the 300-400 level

*If exempted, student may take Mathematics F136.

**Management Courses**

**103 Introduction to Business (3)**
General characteristics of business enterprise and business terminology. Fall semester, junior and senior majors in business administration will not receive credit for the course.

**211 Statistical Methods for Business I (3)**
Basic concepts of descriptive and inferential statistics including frequency, probability, sampling distributions, estimation theory, and introduction to hypothesis testing. Emphasis on business applications. Every semester. Prerequisite: Mathematics 135.

**212 Statistical Methods for Business II (3)**
Probability and statistical inference with emphasis on decision-making in business. Computer application of statistical analysis. Every semester. Prerequisites: 211 with a grade of C or better; Mathematics 136.

**311 Operations Management (3)**
An introduction to the design, operation, and control of a product or service oriented environment. Major emphasis is placed on the following decision tools and models: forecasting, linear programming, simulation, quality control, inventory control, network analysis, job design, and standards. Every semester. Prerequisites: 212; Economics 101 and 102; junior standing.

**315 Management Concepts, Theory, and Practice (3)**
Inter- and intra-group relations in administration with special emphasis on superior-subordinate relations in a business environment. Comparison of classical concepts of leadership, structure, and development with contemporary research. Every semester. Prerequisite: junior standing.

**330 Concepts in Organizational Behavior (3)**
An examination of theory and research dealing with the behavior of organizations with primary emphasis on individual and group behavior. Topics covered include motivation, communication, group dynamics, leadership, and change. Every semester. Prerequisite: 315.

**332 Personnel Management (3)**
Principles and practices involved in the effective administration of personnel. Every semester. Prerequisite: 315.

**356 Management Science (3)**
Quantitative decision-making techniques under deterministic and stochastic conditions; topics to include decision model building, linear programming, goal programming, assignment problem, transportation problem, network models, queuing, dynamic programming and simulation. Every semester. Prerequisite: 311.

**357 Nonparametric Methods for Business (3)**
An introduction to nonparametric techniques with applications in such areas as marketing research, management science, production, and finance. On demand. Prerequisite: 212.

**410 Industrial Relations (3)**
Union-management relations including the legal framework, the techniques and practices used, and a bargaining simulation. Every semester. Prerequisites: 332; senior standing.

**434 Problems in Personnel Management (3)**
A case course in human relations dealing with problems drawn from actual business experience. Every semester. Prerequisite: 332.

**425 Wage and Salary Administration (3)**
Job evaluation using both quantitative and nonquantitative methods. Control of wages and salaries. Wage incentive principles and systems.
418 Marketing
Actual application of job evaluation techniques. Every semester. Prerequisites: 315, senior standing or permission of instructor.

438 International Management (3)
A case course exploring the differences in managerial techniques involved in operations in foreign cultures. Particular attention given to the constraints imposed as a result of different cultural, educational, legal, and economic systems. Every semester. Prerequisite: 315.

440 Business Policy (3)
An integrating course using cases for management decision-making and management simulation. A culminating educational experience for the senior. Every semester. Prerequisites: 311, 315; Finance 302; Marketing 313; senior standing. May not be used for graduate credit.

441 Senior Seminar (1)
The practices, policies, and administration of business examined by top level executives of a variety of businesses. The course considers a wide variety of topics from the top management viewpoint with a view towards broadening the interest and horizon of the student. Every semester. Course graded on a pass-fail basis. Prerequisite: senior standing.

451 Production Planning and Control (3)
A study of the problems and practices of production planning and control: master production scheduling; material requirements planning; production activity and control; capacity planning and control. Fall semester. Prerequisite: 311 or permission of instructor.

452 Modern Materials Management (3)
A study of the problems and practices of operations and materials management. Topics will include: materials acquisition; classical inventory systems; demand management; aggregate planning; material logistics systems; and current topics in materials management including just-in-time, zero inventories, and group technology. Spring semester. Prerequisite: 311 or permission of instructor.

454 Comparative Industrial System (3)
Observes, discusses, and describes the problems, techniques, and economics of a variety of different types of production organizations. Combines class work with field trips through factories in the area. On demand. Prerequisite: 311 or permission of instructor.

456 Business Forecasting (3)
A basic analysis of the forecasting process and an exposure to the fundamental techniques. A series of business cases to illustrate forecasting in such areas as marketing, production, finance, and general management. Emphasis on forecasting at the firm and industry level. Computer applications for the individual forecasting techniques. Spring semester. Prerequisites: 311, Finance 302, Marketing 313, or permission of instructor.

460 Information Systems (3)
Systems and information concepts; structure of systems in organizations; systems tools; decision making; data base concepts; information systems analysis and design; implementation; decision support systems; societal issues. Fall semester. Prerequisites: 311, Accounting 202, Computer Science 210.

495r Department Honors (1-3 hours per terms, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497 Research (1-3)
Every semester.

498r Individual Studies (1-3)
Every semester.

499r Croup Studies (1-3)
Every semester.

Marketing
Professor Casavant, Head
Professor Reid
Assistant Professors Haynes, Reagan, Williams

The marketing curriculum is designed to prepare students for careers in both the public and private sectors as well as for graduate studies.

Business Administration (B.S.):
Marketing concentration

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (9 hours)

Category C
2 approved behavioral or social science courses other than economics (6 hours; approved related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
6 hours selected from Political Science C101, Psychology C101, or Sociology C151
Mathematics 135, F136
Computer Science 210
One course from English 277, 300, 410, or Office Administration 310 (minimum of 8 hours in written communication including required courses in Category A)
37 hours common body of knowledge from the School of Business Administration including: Accounting 201, 202; Economics 101, 102; Finance 302; Management 211, 212, 311, 315, 440, 441; Marketing 313, 335

Marketing concentration:
15 hours including Marketing 365, either 361 or 362, 450, 461; Economics 425
9 hours chosen from Marketing 318, 319, 361, 362, 363, 364, 415, 417, 430; Economics 429; Management 356
2.0 average in all marketing courses

A minimum of 54 hours of the 128 total must be taken at the 300-400 level
Electives to complete 128 hours
Maximum of 73 hours total accepted in School of Business Administration courses; i.e., at least 55 hours other than School of Business Administration courses must be completed

1 If exempted, student may take Mathematics F136.
2 Either 361 or 362 is required. The course not chosen to meet this requirement may be taken as an elective.
Typical course of study in business administration (B.S.): marketing concentration

The program for the first two years in business administration is the same for all concentrations and is designed to do two things: (1) Give the student background in the basic disciplines and areas required to fulfill the general education requirements of the University and (2) prepare a foundation for the advanced courses in business administration to be taken during the junior and senior years.

3Either Marketing 361 or 362 is required. The course not chosen to meet requirement may be taken as elective.

Marketing Courses

313 Basic Marketing (3)
Principles and methods involved in the movement of goods and services from producers to consumers; strategies the firm may use to take advantage of market opportunities; how the social, political, and economic environment alters these market opportunities. Every semester. Prerequisites: Economics 101, 102; junior standing.

315 International Marketing (3)
Management of the international marketing activities of the firm. Planning, organizing, and implementing international marketing programs for industrial and consumer goods. Emphasis on the influence of environmental differences on marketing decisions in various countries. Spring semester alternate years. Prerequisite: 313.

319 The Logistics of Physical Distribution (3)
The interaction and interdependence of transportation, warehousing, order processing, inventory control, packaging, and plant location in the effective and efficient movement of products and services from product to consumer. Spring semester alternate years. Prerequisite: 313.

335 Legal Environment of Business (3)
American legal institutions and sources of law; ethical considerations of business; an introduction to social and political influences as reflected in government regulation. Every semester.

336 Business Law (3)
Fundamental principles concerning contracts, personal property and bailments, sales, commercial paper, secured transactions, agency and employment, partnerships and corporations, real property. Every semester.

355 Fundamentals of Purchasing (3)
The role of purchasing and materials management in modern business organizations; planning, policies, procedures, and control of purchasing operations; inventories and their control; buying for institutions and government purchasing. Fall semester. Prerequisites: junior standing or permission of instructor.

361 Principles of Selling (3)
Basic principles of selling and their practical application to sales situations. The economic and psychological motivations underlying customer purchases and product performance as they affect sales of industrial and consumer goods and services. Spring semester. Prerequisite: 313.

362 Advertising (3)
The nature of advertising, its role in society and in demand-stimulation. A conceptual foundation is made upon which specialized knowledge can be built. Research, copy, layout, production, budgeting, advertising organization, and the history and economics of advertising are covered. Every semester. Prerequisite: 312.

363 Sales Management (3)
Sales department organization and its relation to other departments; the sales manager: sales planning and forecasting; territories; selection and training of salespeople; sales policies; analysis and control of distribution costs; the organizing, controlling, motivation, and evaluation of the field sales force to accomplish market objectives. Fall semester. Prerequisite: 313.

364 Retailing (3)
Organizing, financing, staffing, and operating retail institutions. Fall semester alternate years. Prerequisites: 313, junior standing.

365 Consumer Behavior (3)
An analysis of consumer motives, attitudes, expectations, buying behavior, market adjustment, and product innovation, including a survey of related explanatory theories. The decision-making process by consumers is evaluated with reference to economic and sociopsychological factors. Every semester. Prerequisites: 313, junior standing.

415 Industrial Marketing (3)
Determination of market opportunity; planning of marketing effort; industrial product pricing; financing; managing the industrial sales force; legal aspects. Spring semester. Prerequisite: 313.

417 Distribution Channels (3)
Distribution channels, formal and informal business organizations which effect the transfer of possession and title of goods and services from producers to users. The development of channels, functional and behavioral dimensions, environmental forces, power, conflict and communication within the channel. Current and future trends in the
Office Administration
Business Education

Professor Ettkin, Acting Head
Associate Professors Nixon, West

The office administration curriculum leading to the Bachelor of Science degree is designed to prepare students for careers as office managers in business. The curriculum provides essential skills for employment opportunities in the concentration of office management.

Office Administration/Business Education

Courses

109 Business Mathematics (3)
Fundamental fractions, percentage, interest, bank discount, insurance, graphs, square root, and other aspects of mathematics important in business control and statistical research. On demand.

121 Keyboarding (3)
Includes learning the keyboard, operating the parts of the machine, writing of different styles of business letters, manuscript copy, and tabulation. Every semester. Class 3 hours, laboratory 2 hours. Terminal speed required is 30 wpm/three minute timing with three errors.

125 Elementary Shorthand (3)
A study of Gregg shorthand theory with emphasis on reading and dictation from the beginning. Every semester. Class 4 hours. Prerequisites: typing speed of 30 net words a minute or corequisite: 121.

199r Special Projects (1-4)
Individual or group projects. Every semester. Maximum credit 4 hours.

220 Microcomputing Applications in Office Administration (3)
Designed to familiarize students with office equipment to include word processing equipment and transcribing machines. Spring semester alternate years. Class 3 hours, laboratory 2 hours. Prerequisite: 121 or one year of high school typewriting.

223 Secretarial Office Typewriting (3)
A thorough review of writing business letters, manuscript copy, tabulation, business reports, legal documents. Emphasis on speed development and production. Spring semester alternate years. Class 3 hours, laboratory 2 hours. Prerequisite: 121 or 1 year of high school typewriting. Terminal speed required is 45 wpm/five minute timing with five errors.

227 Intermediate Shorthand (3)
Dictation and transcription with a review of theory and with a speed of 90 words a minute on new material with 95 percent accuracy required. Every semester. Prerequisites: 121, 125, or 2 years of high school typewriting and shorthand.

228 Transcription (3)
Dictation and transcription with a further review of theory and vocabulary; speed of 100 words a minute on new material with 95 percent accuracy required. Every semester. Prerequisites: 223 and 227.

229 Office Procedures (3)
The role of the office employee in facilitating managerial operations. Considerations include improving human relations, information retrieval systems, handling correspondence, arranging schedules and itineraries, using communication media effectively, and simplification of office tasks. Spring semester alternate years. Prerequisites: 121, 220.

309 Records and Information Management (3)
Study of problems related to the selection of equipment and systems used for information storage and retrieval, including automated and nonautomated filing; microfilming systems; tape processing; forms design; retention and disposal of records; and supervision, standards and work measurement. Spring semester alternate years.

310 Business Communication (3)
An introduction and overview of verbal and nonverbal communication. Principles of writing, grammar, diction, and rhetoric as applied to business communication. Mechanics and psychology of business letters and short reports. Every semester. Prerequisites: English 101, 102 (Formerly Office Administration 219).

390r Office Administration Internship (1-4)
A supervised work experience program designed to strengthen the student's technical competencies and fundamental knowledge in Office Administration. Repeatable up to 4 hours. Every semester. Prerequisite: permission of department head.

400 Office Management (3)
Office management and organization; office controls; forms and layout; management supervision of personnel and service units. Fall semester alternate years. Prerequisite: 310 or permission of instructor.

410 Administrative Communications (3)
Study of business communications including inter-office memos; minutes of meetings; newspaper articles; oral presentations; and report writing, including tabular and graphic presentation of data essential to writing formal business reports. Spring semester alternate years.

450 Office Information Systems (3)
Study of the relationships of the various types of office systems and the application of classroom learning to the problems of analyzing and determining appropriate office systems for various kinds of business. Fall semester alternate years. Prerequisite: 309 or permission of instructor.

460 Seminar: Problems in Office Management (3)
Selected topics from the following: systems analysis, form design, records, mechanization, correspondence, supervision, work simplification, training work measurement. Spring semester alternate years. Prerequisite: 400 or permission of instructor.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)
Every semester. See "Departmental Honors," page 31.

497r Research (1-4)
Every semester.

498r Individual Studies (1-4)
Every semester.

499r Group Studies (1-4)
Every semester.
School of Education

Professor Stinnett, Dean
Associate Professor Whitaker, Assistant Dean
Associate Professor D. Baker, Director of Student Teaching
S. McDonald, Certification Officer

The primary goal of the School of Education is to prepare qualified people to be professional educational leaders in various roles within educational institutions and similar agencies, both public and private.

All teacher certification programs through the master's level are fully accredited by the National Council for Accreditation of Teacher Education and the Tennessee State Department of Education.

Successful completion of all degree requirements of any undergraduate program administered by the School of Education, excluding the recreation specialist, qualifies the graduate for initial certification in Tennessee.

The School of Education is organized into four departmental units for academic programming, communications, and administrative accountability. Each unit has a department head who serves as the official spokesperson and administrative head responsible for all programs, faculty, and activities assigned to that particular department. Since a department may have several programs or activities within its jurisdiction, certain faculty are identified as program leaders of specific program areas. Names of the program leaders may be obtained by contacting the department head responsible for the particular program or the School of Education office.

Curriculum and Instruction
Associate Professor Bartoo, Head
Professors B. Benson, Bibler, W. Butterfield
Associate Professors Hunt, Kingdon, Renneisen, Wofford
Assistant Professors Area, Ellington, Snyder

Educational Administration and Supervision
Associate Professor Whitaker, Head
Professors L. Davis, Hales, C. Hyder, Whittacre
Associate Professor D. Baker

Health, Physical Education and Recreation
Associate Professor Norred, Head
Professors Stinnett, L. Fanning
Associate Professors Ezell, Ford
Assistant Professor W. Norris
Instructors Jadin, Shea, Underwood

Educational Psychology and Special Education
Professor E. Davis, Head
Professors DeVivo, Fowler, G. Helton
Associate Professor T. Miller
Assistant Professors J. Davis, Ligon, Ray, Taylor

Courses of Study
Undergraduate—The School of Education offers approved undergraduate programs leading to the Bachelor of Science degree with a major in education and to eligibility for teacher certification in Tennessee and in those states which grant reciprocity privileges to graduates of institutions accredited by NCATE. Courses of study include:

- Early childhood education
- Elementary education
- Music education
- Special education (noncategorical)
- Secondary education with concentrations in art education (BFA), biology, business, chemistry, earth and space science, economics, English, foreign languages (French, Latin, Spanish), health and physical education, history, mathematics, physics, political science, psychology, and sociology.

In addition to initial certification, the school offers the following certificate endorsement areas:

- Art education; elementary education; early childhood education; music education; special education; secondary education: biology, chemistry, earth and space science, economics, English, foreign language (French, Latin, Spanish), general science, health (K-12), physical education (grades 7-12), history, mathematics, physics, political science, psychology, sociology, social science. Contact the certification officer for details.

Graduate—The School of Education, through the UTC Graduate Division, offers NCATE accredited and Tennessee approved programs which lead to the Master of Education degree (M.Ed.). For further information refer to the UTC Graduate Bulletin and the Office of Graduate Admissions.

Also, any student desiring to pursue doctoral-level study in education or to gain admission to candidacy for the Doctor of Education (Ed.D.) or the Educational Specialist degree (Ed.S.) granted by The University of Tennessee, Knoxville, may complete all degree requirements at the UTC campus. For further information contact the director of the UTK Graduate Education Center located in 105 Hunter Hall.

Admission to Teacher Education Program (TEP)
Applicants who demonstrate evidence of possessing qualifications and characteristics reasonably expected for entry into the teaching profession will be considered for admission to the teacher education program. Selection of qualified students is usually made on the basis of application during the sophomore year, with the exception of a transfer student who is required to complete a semester of study at UTC before the application will be reviewed by the TEP Committee. Applications must be filed no later than the student's completion of the first
Admission to TEP requires the following requirements for official admission to TEP:

1. Filed a formal application signed by a School of Education faculty adviser. Application forms may be obtained from the TEP office.
2. Filed a medical certification record signed by a licensed physician. Form may be obtained from the TEP office.
3. Earned a 2.5 cumulative grade point average and a 2.5 average on all courses taken at UTC. (Must have established a 2.5 minimum overall grade point average on all college-level courses attempted.)
4. Completed the Pre-Professional Skills Test (PPST) (basic skills in writing, reading, and mathematics) and earned at least the minimum score on each section as mandated by the state Board of Education for the particular year in which the battery is taken.
5. Filed in the TEP office results of the speech and hearing test, which will be arranged by the TEP office. The student will be notified by mail of the appointment date, time, and location. A fee is assessed for this service by the Chattanooga Speech and Hearing Center.
6. Completed an interview and received a collective positive recommendation from the TEP interviewing committee. A portfolio must be submitted to the office of student teaching by the student prior to scheduling the interview.
7. Completed a personality inventory administered by the School of Education.
8. Shown evidences of reasonable physical fitness, emotional maturity, high moral character, and a commitment to professional education. Violations of the honor code or student behavior policies as stated within the current LTC Student Handbook may be reviewed by the TEP Committee.

The final responsibility for satisfying each and all of these requirements for official entry in the TEP rests with the student.

The TEP office will notify by letter each applicant and his or her faculty adviser (and department head of the teacher education degree being sought by the applicant) of the action taken by the TEP Committee.

Only two types of action are taken by the TEP Committee on applications submitted: approval or rejection. An applicant who is rejected will be notified of the requirement(s) not fulfilled, and the applicant should take the necessary action as quickly as possible to satisfy the designated requirement(s) for approval.

The teacher education program (TEP) office is located in 212 Hunter Hall.

State Board of Education

Effective July 1985, the Tennessee State Board of Education mandated that all students preparing for a teaching career in Tennessee must pass a standardized test of basic skills (mathematics, reading, and writing), the Pre-Professional Skills Test (PPST), prior to official admission to the teacher education program. UTC will administer this specified battery of tests according to dates established by the State Board of Education. This battery of tests can only be administered on these approved statewide PPST dates. Refer to the TEP office in Hunter Hall for test application forms and administration dates for each year.

UTC is committed to strict adherence to these state Board of Education requirements regarding official admission to TEP. An applicant to TEP may take the PPST an unlimited number of times.

And finally, the state Board of Education requires the National Teacher Examinations (NTE) as a prerequisite for granting the teacher's professional certificate. At this time, only the "Core Battery" section of this examination is required with state approved minimal passing scores for this battery for initial certification; yet, many school systems within Tennessee—as well as other states—require teachers employed by their system also to take the specialty area examinations in those certification endorsement areas for which they are seeking employment. Consequently, students are advised to take both the "core battery" and specialty area sections.

The NTE battery of examinations is given on campus through the UTC Office of Institutional Research and Planning at least two times a year in accordance with the schedule published by the Educational Testing Service of Princeton, New Jersey, for nationwide administration of the test. Information, bulletins, and applications for the NTE are available in the UTC Office of Institutional Research and Planning, 30 Founders Hall.

Admission to Student Teaching

The application for admission to the student teaching semester must be filed with the director of student
teaching (212 Hunter Hall) no later than six months preceding the actual experience. For example, if a student plans to student teach during the spring semester of an academic year, the application must be completed and on file no later than July 1 of the preceding year. For the fall semester of an academic year, the application should be completed and on file no later than the preceding March 1.

Application for student teaching is not necessarily contingent upon official admission to TEP; therefore, a student should apply for student teaching to comply with the required deadline dates. A student, however, will not be permitted actually to student teach until he or she has satisfactorily fulfilled all requirements for admission to the TEP.

Before gaining official approval for admission to the student teaching semester from the School of Education, the student must have fulfilled the following requirements:

1. Gained official admission to the TEP one semester prior to the actual student teaching semester.
2. Completed student teaching application with signature of assigned faculty adviser (in triplicate).
3. Satisfactorily completed appropriate professional education and endorsement area (content) courses.
4. Satisfactorily completed at least 90 percent of course of study in endorsement area(s). If the percentage of course work completed is questionable, director of student teaching and appropriate department head within School of Education will make the decision.
5. Received recommendation of the major departments (for a degree candidate in Secondary Education or K-12 initial certification, the recommendation of the department in which the teaching area concentration is based).
6. Maintained a minimum grade point average of 2.5 on courses completed at UTC, a cumulative 2.5 grade point average on all courses, a 2.5 grade point average in professional education courses with no grade lower than C, a 2.5 grade point average in endorsement area courses, and senior standing.
7. Demonstrated competency in manuscript and cursive handwriting. This requirement applies to all Elementary, Early Childhood, and Special Education majors (assessment of these skills will be completed during EDCI 403).
8. Completed a biographical sketch (in triplicate to be returned with completed application for student teaching to the TEP office).

Final responsibility for insuring that all of these requirements are fulfilled prior to being admitted to student teaching rests with the student.

Student Teaching

The professional semester schedule sequence in which student teaching usually occurs includes these courses:

Elementary Education—EDCI 405, 407, 423
Early Childhood—EDCI 407, 419, 423

All education majors, excluding those concentrating in special education, will student teach for a full semester (16 weeks). Placement of a student will include an inner-city and a suburban/rural school environment divided equally during the semester. In addition to the opportunity for dual locations, the student teacher will be expected to teach on two distinct grade levels when possible. For example, the elementary student teacher will teach in one of grades 1-3 for half of the semester and in one of grades 4-6 during the other half of the semester. Secondary student teachers will be assigned to a junior high or upper middle school, grades 7-9, for one-half semester and to a high school, grades 10-12, for the other half.

When appropriate and educationally feasible, the secondary student teacher may teach a different subject matter concentration for which he or she has been professionally prepared.

Special Education majors are scheduled for EDSP 440, 461, 465 during the first half of the semester and conclude the semester enrolled in EDSP 469.

Student teaching is evaluated on a satisfactory/fail basis. A student not satisfactorily completing student teaching will receive a failing grade and will have the opportunity to repeat the course.

Department heads have the opportunity to recommend placements for a student teacher and the student may request a particular school(s); however, final authority for the student teaching placement and teaching assignment rests with the director of student teaching and dean. As a general rule a student is not located in the school from which he or she recently graduated or under the supervision of a close family relative.

Student Teaching Orientation

General orientation seminars concerning student teaching and the professional education semester are held for all prospective student teachers during the semester immediately preceding the student teaching experiences semester. Each candidate is expected to attend these scheduled conferences. Non-attendance could delay the student teaching semester. Particular dates and locations for these conferences may be learned from reviewing the student teaching bulletin board at the TEP office, 212 Hunter Hall.

Recommendation for Certification

The School of Education will recommend certification for only those students who have successfully completed one or more of the UTC initial certification or endorsement programs approved by the Tennessee State Department of Education. Application for a professional teacher's certificate should be completed during the last week prior to graduation. Application forms may be obtained from the Office of Records, 128 Hooper Hall.

Application for a Tennessee Teacher's Professional Certificate must have been completed within the 5-year period preceding the issuance of the certificate; otherwise, the applicant must have earned 8 semester or 12 quarter hours of resident credit within the last year.
Tennessee state regulations stipulate that the applicant for a professional certificate must be recommended by the designated certifying officer or dean of an approved teacher training institution. To receive this recommendation, the applicant should have fulfilled the following criteria:

1. A cumulative grade point average of 2.5.
2. A 2.5 cumulative grade point average on all UTC coursework.
4. A grade point average of 2.5 in the teaching fields and in professional education courses with no grade less than C in the latter.
5. Official admission to the TEP and fulfillment of all special recommendations set forth by the TEP Committee and specific departmental requirements in the area(s) of concentration (refer to particular departmental program or course of study).
6. Completion of the National Teachers Examinations (SITE) with earned scores no less than the minimum cut-off scores established by the state Board of Education for the particular year in which initial certification is requested (administered by the UTC Office of Institutional Research and Planning—score must be sent to UTC and Office of Certification, Tennessee State Department of Education).

These criteria apply to both undergraduate (B.A. and B.S.) and post-baccalaureate students desiring a certification recommendation from UTC.

The final responsibility for satisfying each and all of these requirements for certification recommendation by UTC rests with the individual applicant.

A person who does not currently hold or has never held a valid professional teacher’s certificate must satisfactorily complete a UTC approved endorsement program to earn the official UTC recommendation for certification. To learn of the particular endorsement requirements, a student should inquire through the appropriate departmental office within the School of Education. Written guidelines for earning UTC approval in the various endorsement areas may be obtained from the respective department head responsible for the certification endorsement area being sought.

Any student who anticipates teaching outside of Tennessee is strongly encouraged to request a checksheet of certification requirements from the state Department of Education, Office of Certification, for the state in which he or she plans to teach. This information should be gained by the student before the end of the sophomore year so that an appropriate course of study might be scheduled. Course and competency requirements to satisfy out-of-state certification standards may be in addition to Tennessee certification requirements and UTC approved degree requirements.

Particular attention should be noted, however, for any student who has never held a valid teacher’s certificate to the fact that graduation alone from a master's degree program at UTC does not guarantee certification. All certification requirements of the particular state awarding the license must be fulfilled also. In some instances a student may satisfy all of the requirements for the certification endorsement by completion of a state approved master's degree program at UTC.

Application for Teacher Certification

An application for all teacher certification, adding a teaching area, and professional school service personnel endorsement may be obtained from the Office of Records, 128 Hooper Hall. The state Department of Education, Office of Teacher Certification, requires that an application for any type of certification finally approved by that office must be initiated through a Tennessee institution with an approved program. This includes in-state and out-of-state applicants for certification.

UTC does not guarantee that satisfactory completion of a program listed in the UTC Bulletin upon initial admission to the University by the student will meet all of the certification requirements at the time the person applies for certification. This means that UTC will recommend only those applicants who have met all of the certification requirements effective at the time of recommendation.

In view of this Tennessee mandate, a student or any other person seeking teacher certification or endorsement recommendation from UTC is strongly encouraged to confer with the appropriate faculty adviser(s) within the School of Education upon entry into the TEP or as soon as possible to gain faculty assistance in planning course schedules and to learn of the requirements effective at that time or at the projected date of applicant's graduation.

A fact sheet to assist an applicant in completing the certification application is available upon request to the Records Office. Applicants are encouraged to follow closely the procedures listed within this fact sheet to insure completion of all information which will be reviewed by the UTC certification officer and then forwarded to the state Department of Education, Office of Teacher Certification. The teacher's professional certificate is valid for 10 years and is renewable.

Clarification of any of these above mentioned requirements should be referred to the appropriate department head and, finally, to the certification officer, if necessary.

Career Education Resource Center

The Career Education Resource Center contains various types of materials for use by students in counseling, practitioners in the field, and teachers who are implementing career education in their curriculum. The center contains career games, sound filmstrips, the complete Information Needed for Occupational Entry system, numerous cassettes, and other pertinent career publications and materials. Materials are geared for grades K-12. The center is located in Hunter Hall and operated under the direction of the Educational Psychology and Special Education Department.

Center for Environmental/Energy Education

In conjunction with TVA, the Department of Curriculum and Instruction provides instruction and academic support services for preservice and inservice teacher
education programs. Instructional resource materials focusing on environmental and energy education along with professional consultants are also available. The center is located in Hunter Hall on campus.

Certification Office
The Certification Office is responsible for processing initial applications and approval of additional endorsements for certification to teach in the state of Tennessee. Students should refer questions concerning certification to the certification officer. This office, located in Hunter Hall, will also provide some assistance in processing certification applications to states other than Tennessee.

Art (B.F.A.): Art Education

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses other than art: one from humanities, one from fine arts, and one from either (3 hours each), plus courses in humanities/ fine arts to total 12 hours in three fields other than history and art

Category C
2 approved behavioral or social science courses (6 hours plus one course to total 9 hours behavioral or social science in two fields other than education; for certification purposes, 3 of the hours may be in history

Category D
2 natural science courses to total 8 hours in natural science (one course must be approved laboratory science)

Category F
Mathematics F120

Category G
1 approved perspectives course (3 hours)

1 additional course outside teaching field from communications, humanities, mathematics, natural or behavioral sciences

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
51 hours Art including 101, 103, 105, 106; 205r or 206r, 207, 208, 227, 305r, 305r, 322, 323, 333, 343, 490r; 6 hours from 211, 212, 431, 432; 3 hours from 213, 414 Participation in senior art show
33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 433r, 437, 438; Special Education 333 For graduation: 2.0 average in art and 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in art (B.F.A.): art education

| Early Childhood Education (B.S.) |

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours; approved courses below will apply)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each; approved related courses below will apply)

Category C
2 approved behavioral or social science courses (6 hours; approved course below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours; approved course below will apply)

Category F
Mathematics F115

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity
Major and related courses
Note: Courses prefixed by letters satisfy the corresponding general education categories above even though for teacher certification purposes they are recognized by the state Department of Education in different areas. The total hours specified in each area are the state’s minimum requirements. In several areas UTC’s requirements exceed those of the state.

Written and oral communication: total of 12 hours required including 6 hours of English A121, A122
English 228

One course from Theatre and Speech 107,108,109,115

Humanities: total of 12 hours required including 6 hours in English, American, or World Literature
Art 222 and 223

Music 110 or Bill and 321

Behavioral and social sciences (not necessarily corresponding to UTC’s general education Category C): 12 hours required including Human Services C101
One approved Category C course
One course from Geography 101, C104, or 209
6 hours of History B203 and B204

Natural science: 12 hours with laboratory required including 4 hours of biology including Biology D121
4 hours from physics, chemistry, geology, general science
4 hours of any laboratory science (may include Environmental Studies D150)

Mathematics: 6 hours required including Mathematics F115, 116
Health and physical education: 10 hours required including Health courses: HPER 154 and HPER 302

Physical education courses (6 hours required) including: HPER 224 and HPER 330 plus a minimum of two lifetime activities (may include HPER 021)

Professional education: 43 hours required from the School of Education including Curriculum and Instruction 200, 201, 203,206,320,401,402, 403, 404, 407, 410, 419, 423, and Special Education 332

For graduation: 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than Cin the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in early childhood education (B.S.)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses

*NOTE:* The state of Tennessee has adopted new certification requirements in Music Education that will become effective in 1988. These requirements may necessitate a change in the distribution of music coursework listed below.

20 hours applied music including: ensemble participation required each semester of residence, with the exception of student teaching semester, minimum 8 hours credit; 8 semesters (8 hours) primary instrumental or vocal study or 6 hours primary and 2 hours secondary; Music 131, 132 plus 141, 142 for piano proficiency

One of the following concentrations—

1. **Instrumental:** Music 221, 3 hours of 223r, 3 hours of 224r; 2 hours of 225r, 226, 307 or 326, 325, 327, 328

2. **Vocal:** 133, 134, 221, 222; 307, 309, 310, 333; 2 hours applied piano study in addition to piano proficiency study

33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 432, 436r, 437, 439; Special Education 333; Music 321

For graduation: 2.0 average in music and 2.0 average in School of Education courses

For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

2 approved behavioral or social science courses (6 hours) plus one course to total 9 hours behavioral or social sciences in two fields other than education; for certification purposes, 3 of the hours may be in history

**Category D**

1 approved physical or natural science course other than biology with laboratory (4 hours; approved related courses below will apply)

**Category F**

1 approved mathematics course (3 hours; approved related courses below will apply)

**Category C**

1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**

| Mathematics 135, F136 or F145, F150; Recommended: F145, F150 for prospective graduate students |
| 16 hours chemistry including D121, 122, 351, and 352 |
| Physics D103, 104 or Geology D111, 112 |
| Recommended: Computer Science 118 or 210 |
| 26 hours of biology including 121, 122; 8 hours at the 300 level or above, at least 3 hours must be a single course at the 400 level, and one course from each of the following areas—Organismic biology: 207, 311, 312, 313, 342, 352 Physics: 208 and 209, 304, 328, 423, 463 Population interaction: 306, 416, 450 Genetics and development: 303, 315, 325, 425 |
| 33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438; Special Education 333 |
| For graduation: 2.0 average in biology and 2.0average in School of Education courses |
| For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter |
| Minimum of 30 hours of 300 and 400 level courses Electives to complete 128 hours |

**Typical courses of study in secondary education (B.S.): biology concentration**

Secondary Education (B.S.): Business Concentration

General Education (see pages 25-27 for list of approved courses)

**Category A**
2 approved courses in written communication in the English language (6 hours)

**Category B**
3 approved courses: one from humanities, one from fine arts and one from either (3 hours each), plus courses to total 12 hours humanities/ fine arts in three fields other than history

**Category C**
2 approved behavioral or social science courses (6 hours) plus one course to total 9 hours behavioral or social sciences in two fields other than education (approved related courses below may apply); for certification purposes, 3 of the hours may be in history

**Category D**
2 natural science courses to total 8 hours in natural sciences (one course must be approved laboratory science)

**Category F**
Mathematics F120

**Category C**
1 approved perspectives course (3 hours)

1 additional course outside teaching field from communication, humanities, mathematics, natural or behavioral sciences

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
NOTE: The state of Tennessee has adopted new certification requirements in Business Education that will become effective in 1988. These requirements may necessitate a change in the distribution of business coursework required below. This distribution will also permit no more than 32 hours of coursework from the School of Business Administration (excluding Economics).

Home Economics 328
Economics C101, C102
Business: Management 103; Business: Marketing 335; Business: Accounting 201, 202
Office Administration 109, 121, 223, 310
One of the following areas:
1. Office Administration 125, 220, 227, 228, 229
2. Two additional accounting courses for minimum of 10 hours in accounting. Marketing 336, 3 hours economics elective (hours in economics must total 12 for endorsement in this area)
33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438; Special Education 333
For graduation: 2.0 average in teaching fields and 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in secondary education (B.S.): Business concentration

Secondary Education (B.S.): Chemistry Concentration

General Education (see pages 25-27 for list of approved courses)

**Category A**
2 approved courses in written communication in the English language (6 hours)

**Category B**
3 approved courses: one from humanities, one from fine arts, and one
from either (3 hours each), plus courses to total 12 hours humanities/ fine arts in three fields other than history

Category C
2 approved behavioral or social science courses (6 hours) plus one course to total 9 hours behavioral or social sciences in two fields other than education; for certification purposes, 3 of the hours may be in history

Category D
1 approved physical or natural science course other than chemistry with laboratory (4 hours; approved related course below will apply)

Category F
1 approved mathematics course (3 hours; approved related courses below will apply)

Category C
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
NOTE: The state of Tennessee has adopted new certification requirements in Science Education that will become effective in 1988. These requirements may necessitate a change in the distribution of chemistry coursework required below.

Mathematics F145, F150, 160
8 hours sequence in biology or geology (must have 8 hours biology for general science certification)
8 hours physics: D103, 104
24 hours chemistry including 121, 122, 341, 351, 352, 371
Recommended electives: Computer Science 121 or 210;
Chemistry 443, 466
33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438; Special Education 333
For graduation: 2.0 average in chemistry and 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

Typical course of study in secondary education (B.S.): chemistry concentration

1 approved physical or natural science course other than geology with laboratory (4 hours; approved related courses below may apply)

Category F
1 approved mathematics course (3 hours; approved related courses below will apply)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
NOTE: The state of Tennessee has adopted new certification requirements in science education that will become effective in 1988. These requirements may necessitate a change in the distribution of earth and space sciences coursework required below.

6-8 hours mathematics from 135, F136 or F145, F150
16 hours biology, physics, or chemistry with at least two areas represented (at least 6 hours biology required for general science endorsement)

4 hours from Astronomy 101 or D102
12 hours Geology including 111 and 225
12 hours Geography 101, 206, 221, 407
Recommended Geology electives: 112, 303, 321, 341
Recommended elective: Computer Science 121 or 210
33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438 Special Education 333
For graduation: 2.0 average in teaching fields and 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours
Typical course of study in secondary education (B.S.): earth and space sciences concentration

- Mathematics F120

Category C
- 1 approved perspectives course other than history (3 hours)
- 1 additional course outside teaching field from communications, humanities, mathematics, natural or behavioral sciences

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**

NOTE: The state of Tennessee has adopted new certification requirements in Social Studies Education that will become effective in 1988. These requirements may necessitate a change in the distribution of history coursework required below.

33 hours history including 6 hours History 101, 102; 6 hours American History; History 301

No more than one-half of the history courses at the 100-200 level

33 hours from the School of Education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 436r, 437, 438; Special Education 333

For graduation: 2.0 average in history and 2.0 average in School of Education courses

For certification: 2.5 average overall, 2.5 average in teaching field, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

- Students seeking teacher certification in Tennessee in the area of social studies must complete 6 semester hours in American history, 8 semester hours in European or world history, and 6 semester hours each in four of the following fields: economics, geography, political science, sociology, and psychology (must include Psychology 101 and 331 for psychology endorsement).

Typical course of study in secondary education (B.S.): history concentration

First Semester
- **Freshman**
  - General Education Category A 3
  - Mathematics F120 3
  - Physical Education 021 1
  - History 101 3
  - Science Elective, Category D 4
  - Humanities/Fine Arts Elective 3
  - Perspectives Elective 3
  - History 300-400 Elective 3
- **Sophomore**
  - American History 3
  - ED Curr. & Instr. 201 3
  - ED Curr. & Instr. 200 1
  - Social Science Elective 3
  - Humanities/Fine Arts Elective 3
  - Perspectives Elective 3
  - History 301 3
- **Junior**
  - **Apply for student teaching**
  - ED Curr. & Instr. 321 3
  - History 300-400 Elective 3
  - History 300-400 Electives 10
  - History 300-400 Elective 3

Second Semester
- **Freshman**
  - General Education Category A 3
  - Physical Education Activity 1
  - History 102 3
  - Humanities/Fine Arts Elective 3
- **Sophomore**
  - Apply for admission to TEP
  - American History 3
  - ED Curr. & Instr. 204 3
  - ED Curr. & Instr. 205 1
  - Social Science Elective 3
  - Behavioral/Social Science Elective 3
  - Humanities/Fine Arts Elective 3
- **Junior**
  - History 300-400 Elective 3
  - History 300-400 Electives 10

Curriculum and Instruction Courses

100 Education, Self, and Society (3)
Selected material from cultural, psychological, and social foundations of education related to contemporary issues and to the student's own educational experiences, goals, aspirations. On demand.

199r Special Projects (1-4)
Individual projects and field components. On demand. Maximum credit 4 hours. Prerequisite: transfer student and approval of School of Education dean.

200 Investigations of the School in Society (1)
Observations and simulations involving the school as a social institution and the role of the teacher in that institution. At least 15 hours of experiences at school sites required. Every semester. Corequisite: 201.

201 Education in the United States (3)

202 Human Growth and Development: Pre-School-Primary (3)
Child development focusing on study of child, prenatal through six years, with limited attention to elementary age child. Field component required. On demand. Credit not allowed in Curriculum and Instruction 202 and Psychology 221.

203 Human Growth and Development—Child (3)
Child development factors influencing growth; characteristics, influence of concepts on the educational process. Field component required. Every semester. Credit not allowed in Curriculum and Instruction 203 and Psychology 221. Corequisite: 206.

204 Human Growth and Development: Adolescent (3)
Adolescent development factors influencing growth; characteristics, influence of concepts on the educational process. Field component required. Every semester. Credit not allowed in both Curriculum and Instruction 204 and Psychology 222. Corequisite: 205.

205 Investigations of the Adolescent in the Classroom (1)
Structured observation and experience in the secondary school classroom. Case studies of adolescents and analyses of classroom practice will be completed by the student. A minimum of 15 hours of field work is expected with the balance devoted to on-campus seminars. Every semester. Corequisite: 204.

206 Investigations of the Child in the Classroom (1)
Laboratory course designed to provide Early Childhood/Elementary Education students with a cross-section of generic educational experiences that will be applied in subsequent course work in their teacher education programs. Stresses teacher aide work in an elementary (K-6) classroom under the supervision of a master teacher. Every semester. Corequisite: 203.

207 Educational Psychology (3)
Theories of learning and instruction applied to the classroom; classroom as psychological environment; cognitive processes and motivation; use of tests and measures; approach to guidance. Field component required. On demand.

215r Workshop and Seminar (2-4)
Current topics in education. Special programs and in-service courses. On demand. Prerequisite: approval of department head.

310 Elementary School Curriculum (3)
The curriculum for grades one through six; the impact of technological and social change on curriculum planning and school organization. On demand.

320 The Teaching of Reading in the Elementary School (3)
Survey of methods, strategies, diagnostic-prescriptive procedures, and materials for teaching reading. Field component required. Every semester.

321 The Teaching of Reading in the Secondary School (3)
Integrating reading skills and teaching strategies with the teaching of content area subjects. Every semester. Required of all secondary education majors.

401 Teaching Social Studies in Elementary and Middle School (3)
Planning, teaching, and evaluation of social studies in the classroom; in-depth instruction in lesson planning strategies. Every semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.

402 Teaching Science in Elementary and Middle School (3)
The application of the structure of science and the concepts, phenomena, and processes of science in the context of the elementary school curricula. Includes instructional use of educational media including the microcomputer. Every semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.

403 Teaching Language Arts in the Elementary and Middle School (3)
Designed to help develop an understanding of the basic concepts of language. Special consideration given to how language arts (speaking, listening, writing) are learned, diagnosed, taught, and evaluated. The interrelationships of these skills stressed to better utilize these kinds of activities and materials in teaching children to think clearly, creatively, and to communicate effectively. Every semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.
Courses

404 Teaching Mathematics in the Elementary and Middle School (3)
Designed to provide students with effective methods and materials for the teaching of mathematics in grades K-8. Special emphasis will be placed on the use of the micro-computer and calculator for teaching mathematics and in diagnostic and remedial procedures. Every semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.

405 Observation and Student Teaching in Elementary Schools (9)
Supervised teaching in two school environments. Placements will insure experience at two different grade levels, as well as inner city and suburban or rural schools. Every semester. Prerequisites: 320, 401, 402, 403, 404 and admission to teacher education program; notification of intent to engage in student teaching six months prior to registration in 405. May not be used for graduate credit.

407 Classroom Management in Elementary Schools (2)
Techniques and strategies for creating a classroom environment which promotes learning. Behavioral management is emphasized through the development and application of approaches to individual behavioral analysis and peer control. Every semester. Corequisite: 405 or 419.

410 Materials and Methods in Early Childhood Education (3)
Study of the objectives, materials, methods, pupil activities, and evaluation of preschool education. Field component required. Spring semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.

419 Observation and Student Teaching in Kindergarten and Elementary Grades (9)
Field placement in both the kindergarten and elementary grades in the same semester. Schedules must permit full time involvement three days per week and half-day participation two days with at least one-third of the time devoted to responsible participation and teaching. Every semester. Prerequisites: 320, 401, 402, 403, 404, 410; admission to teacher education program; notification of intent to student teach six months prior to registration in 419. May not be used for graduate credit.

422 Teaching Reading in the Intermediate Grades and the Middle School (3)
Teaching-learning strategies to deal with content and process of reading; emphasis on vocabulary development, comprehension strategies, basic study skills, reading in content areas. Fall semester. Prerequisite: admission to teacher education program.

423 Diagnostic and Prescriptive Teaching of Reading (3)
Field-based, classroom diagnostic-prescriptive teaching; in-depth study of selected assessment instruments, instructional strategies, materials, and management procedures. Every semester. Prerequisites: 320 or equivalent, or permission of instructor; admission to teacher education program. May not be used for graduate credit.

431 Teaching Strategies and Materials in the Disciplines (2)
Curricular and media developments appropriate for the respective discipline. Must be taken prior to student teaching. Fall semester. Prerequisites: 204, 205, 200, 201; application approved to the teacher education program. Corequisite: 433. May not be used for graduate credit.

432 Teaching Strategies and Evaluation in Secondary School Music (3)
Theories and practices in secondary school music; attention to the exceptional student; curricular developments in music education; evaluation procedures appropriate to music education. Fall semester. Prerequisite: admission to teacher education program. May not be used for graduate credit.

433 Designing Instruction and Evaluation in the Secondary Classroom (4)
Formulating and evaluating appropriate affective and cognitive objectives. Lesson planning and a wide range of teaching strategies will be examined. Each student will be required to demonstrate proficiency in a variety of component teaching skills via the microteaching laboratory and a self-developed teaching unit. Every semester. Prerequisite: admission to teacher education program. Corequisite: 431.

436r Topics in Secondary Curriculum (1-2)
A seminar involving both student teachers and their cooperating teachers. Topics will deal with contemporary curricular problems of participants. Spring semester. Prerequisite: Undergraduate students must be admitted to teacher education program. Corequisite: 438. Not required for HPER majors.

437 Classroom Management in Secondary Schools (2)
Techniques and strategies for creating a classroom environment which promotes learning. Behavioral management is emphasized through the development and applications of approaches to individual behavioral analysis and peer control. Spring semester. Prerequisite: admission to teacher education program. Corequisite: 438.

438 Observation and Student Teaching in Secondary School (9)
Supervised teaching in two school environments. Placement will insure experience in inner city and suburban or rural schools and junior and senior high schools where possible. Spring semester. Prerequisites: 204, 205, 201, 200, 321, 431, 433; Special Education 333; admission to teacher education program. Corequisites: 436r, 437. May not be used for graduate credit.

439 Observation and Student Teaching in School Music (9)
Placement will be made in grades 1-6 for one-half the semester and 7-12 for one-half the semester. Spring semester. Prerequisites: 432, Music 321; admission to teacher education program. Corequisites: 439r, 437.

440 Teaching Media (3)
The selection, use, and evaluation of technological innovations in audiovisual media; emphasis on laboratory experiences in communication media. On demand.

441 Educational Tests and Measurements (3)
Measurement of human abilities and instructional outcomes; survey of elementary statistical concepts; construction of valid and reliable tests and evaluative instruments. On demand.

442 Teaching Social Science Through Science Fiction (3)
Explores uses of science fiction in teaching social issues and the future. Emphasis on creativity and integration with traditional content. On demand.

443 Teaching Internship (9)
Undergraduate credit only. For the temporarily certified employed teacher. Provides close supervision in planning, implementation, and evaluation. Tailored to fit specific school setting. On demand. Prerequisite: one year full-time teaching in certifiable area; approval of School of Education dean.

490r Workshop and Seminar (2-4)
Special problems and discussion of current topics in education. On demand. Prerequisite: senior or graduate standing.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand. Prerequisites: approval of the School of Education dean.

498r Individual Studies (1-4)
On demand. Prerequisite: approval of department head.

499r Group Studies (1-4)
On demand. Prerequisite: approval of department head.

Educational Psychology and Special Education Courses

100 Special Education Program Observation and Seminar (2)
This course provides an experiential opportunity to investigate and analyze the various placement options in special education. A structured seminar is required to discuss the planned observations. A minimum of 20 hours of observation is required. Fall semester.
101 Career and Life Planning (3)
Focus is on helping the individual make career and life plans. A series of techniques (role playing, psychodrama, sociodrama, value clarification, and decision making) will be utilized to facilitate each student examining his or her interrelated value systems associated with education, work, leisure, and self expression. Every semester.

195r Special Projects (1-4)
Individual projects and field components; maximum credit 4 hours. Every semester. Prerequisites: transfer student and approval of School of Education dean.

215r Workshop and Seminar (2-4)
Current topics in education. Special programs and in-service courses. On demand.

250 Introduction to Special Education (3)
A survey of special education with emphasis placed upon consideration of the history of special education; federal involvement and leaderships; and the global characteristics of the target population. Fall semester. Special education majors only.

255 Observation and Seminar Concerning Handicapping Conditions (2)
This course provides an experiential approach to understanding specific handicapping conditions, and will consist of 20 hours of observation and interaction with specific handicapped children. This course requires attendance in a structured seminar. Spring semester.

320 Education Exceptionalities (3)
A study of the psycho-social-educational treatment systems used with educational exceptionalities. Spring semester. Prerequisite: 250.

330 Academic and Behavioral Evaluation (3)
A study of the basic principles and techniques of educational evaluation in special education used by the classroom/resource teacher. Fall semester. Prerequisite: 250 or 332.

332 Exceptional Students in the Elementary School (3)
A survey of exceptional children and the philosophy of mainstreaming, adaptation techniques, curriculum, materials, resources, referrals, evaluation, and the teacher/resource-teacher relationship. Every semester. Prerequisite: admission to teacher education program.

333 Exceptional Student in the Regular Secondary Classroom (3)
An overview of handicapping conditions and educational and therapeutic amelioration for secondary school students. An emphasis upon the techniques by and requirements of the secondary school teacher in meeting the legal, educational, and moral obligations to the exceptional student. Every semester.

350 Characteristics and Techniques for the Moderately Handicapped Student (3)
The in-depth study of the characteristics and needs of moderately handicapped students includes the various academic and behavioral interventions utilized in resource settings and other placements. Fall semester.

401 Introduction to Counseling (3)
A basic course designed to provide an orientation to the philosophy, theories, and techniques of individual and group counseling to undergraduate students who are seeking foundational understandings for future courses in the functions of counseling in modern society. On demand.

415 The Adolescent Exceptional Student (3)
An examination of the unique needs and particular issues which are specific to adolescent exceptional students. The course emphasizes approaches and methodology concerning corrective and compensatory instruction. Spring semester.

440 Classroom Management in Special Education (3)
An examination of the adaptation of classroom management techniques in both classroom as well as individual tutorial situations. Fall semester. Prerequisites: 250 and admission to teacher education program.

453 Speech Disabilities and Language Development (3)
Recognition and understanding of language development and speech disabilities. Basic diagnosis, remediation, and speech improvement activities incorporated. Fall semester. Prerequisite: admission to teacher education program.

460, 461 Clinical Teaching (3,3)
Examination and implementation of the principles of clinical teaching and the individualizing of instruction. Includes the use of formal and informal assessment results in planning educational strategy. 460 fall/461 spring semester. 460 prerequisites: 320, 330; 467 must be preceded by 460. 461 corequisite: 465; admission to teacher education program.

465 Special Education Practicum (3)
This course encompasses a practicum experience for special education students with opportunity for supervised participation in public school, private school, or institutional special education programs. The student will register for this course concurrently with 461. Spring semester. Prerequisite: 460.

469 Observation and Student Teaching in Special Education (6)
Applied competencies that have been developed through preceding experiences to the actual processes of teaching and guiding children and youth. Student schedule must permit contact with the same classroom situation full time for a minimum of five days per week for at least one half of the semester. Spring semester. Prerequisite: 465.

483 Teaching Internship (9)
Undergraduate credit only. For the temporarily certified employed teacher. Provides close supervision in planning, implementation, and evaluation. Tailored to fit specific school setting. On demand. Prerequisite: 1 year full-time teaching in certifiable area; approval of School of Education dean.

486 Gifted Education in the Resource Room (3)
This course examines the social, emotional, and intellectual characteristics of the gifted/talented child, and focuses upon the appropriate teaching/learning requirements in resource and regular classrooms. Special attention will be given to program models, curriculum development, and teaching strategies. Fall semester.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand. Prerequisite: approval of the department head.

498r Individual Studies (1-4)
On demand. Prerequisite: approval of the department head.

499r Group Studies (1-4)
On demand. Prerequisite: approval of department head.
Health, Physical Education & Recreation (HPER)

Professor Norred, Head
Professors Stinnett, L. Fanning
Associate Professors Ezell, Ford
Assistant Professor Norris
Instructors Shea, Underwood
Instructor Jadin, Director of Intramural Sports

Programs and activities within the scope of the Health, Physical Education, and Recreation Department are administered through the School of Education.

A major thrust of HPER is the provision of two distinct academic career program tracks:

1. Secondary Education: Health and Physical Education concentration
2. Secondary Education: Recreation Specialist concentration (nonteaching program)

In addition, HPER offers a diversified service program of physical recreation activities primarily for the undergraduate student. Activity courses from this program may be used to meet the University requirement of 2 semester hours.

Furthermore, HPER provides a well-rounded seasonal intramural activities program and general recreation for the University community.

Secondary Education: Health and Physical Education Concentration

This career program is for any student who desires certification in both health instruction (K-12) and secondary physical education (7-12). The curriculum focuses on professional career development in both health and physical education, yet permits a student to gain cultural breadth through completing general educational components which comprise at least one-third of the total number of hours in the program.

Since graduates of this specialization are often employed in the capacity of teacher-coach, a partial segment of the curriculum is devoted to content and laboratory courses designed to educate the student in becoming an effective coach for athletic and intramural sports.

Graduate concentrations in either health education or physical education are possible while earning the Master of Education degree in secondary education. Refer to the Graduate Bulletin for information concerning this program.

Admission to Teacher Education Program (TEP) for Health and Physical Education

In addition to meeting criteria for admittance to TEP, a student desiring certification in health and physical education will be expected to meet these criteria:

1. Have a minimum grade point average of 2.5 in professional health, physical education and recreation courses.
2. Successfully complete six hours from professional activity courses and nine hours from theory courses within the Health, Physical Education, and Recreation Department.
3. Successfully complete an interview with his or her TEP department committee.

Any student enrolled within the teacher certification curriculum is expected to maintain and demonstrate standards of ethics reasonably attributed to an educator who holds professional teacher certification.

Further, any student who plans to teach outside of Tennessee is strongly urged to check certification requirements with the appropriate state department of education before the end of the sophomore year in order to plan his or her program appropriately.

Secondary Education (B.S.): Health and Physical Education Concentration

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each), plus courses to total 12 hours humanities/fine arts in three fields other than history

Category C
2 approved behavioral or social science courses including Sociology C215 (6 hours), plus one course to total 9 hours behavioral or social sciences; for certification purposes, 3 of the hours may be in history

Category D
2 approved natural science courses including Biology D121, 122 to total 8 hours in natural sciences

Category F
Mathematics F120

Category C
1 approved perspectives course (3 hours)
1 additional course outside teaching field from communications, humanities, mathematics, natural or behavioral sciences (2 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
21 hours in Health: Health Education 100, 154, 302, 303, 317, 456, plus approved electives such as Health Education 320, 450, 451, 452, 455; Biology 191, 208 and 209; Home Economics 105 (completion of these 21 semester hours will grant endorsement in health instruction, kindergarten through grade 12)
34 hours in physical education including Physical Education 201, 318, 332, 340, 401, 413 and a minimum of 12 hours in professional activities as follows:
6 hours from Physical Education 222, 224 or 225, 228, 235
4 hours from Physical Education 211, 231, 232, 233, 237
2 hours from Physical Education 212, 214, 234
28 hours education including Curriculum and Instruction 200, 201, 204, 205, 321, 431, 433, 437, 438
For graduation: 2.4 average in health and physical education and 2.0 average in School of Education courses
For certification: 2.5 average overall, 2.5 average in teaching fields, and 2.5 average in education courses with no grade less than C in the latter

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours
Typical course of study in secondary education (B.S.): health and physical education concentration

Secondary Education: Recreation Specialist Concentration (nonteaching program)

The recreation specialist program is a uniquely structured track for the student with career ambitions for being employed by or serving voluntarily with an agency, public or private, whose functions include the provision of recreational type services and activities. While there are a few courses common to both the teacher certification and recreation specialist tracks, the focus of the major courses in the recreation component of this program is directed toward the practical applications of theories and strategies learned in professional recreation courses.

To reinforce this intent a student specializing in recreation is expected to engage in several different types of field assignments and experiences.

Completion of this program will not satisfy teacher certification requirements for health and physical education endorsement.

Internship Admittance
The internship practicums in recreation are usually scheduled during the senior year. Normally, a student may not gain official approval for enrollment in either internship HPER 479 or 480 prior to completing at least 12 semester hours of course work within HPER at UTC. Approval of program leader and HPER department head required.

Secondary Education (B.S.): Recreation Specialist Concentration (nonteaching program)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each, total 9 hours)

Category C
2 approved behavioral or social science courses including Sociology C151 (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours): Biology D121

Category F
1 approved mathematics course (3 hours)

Category G
1 approved perspectives course (3 hours)

HPER 021 plus one additional semester physical education activity

Major and related courses
56 hours of health, physical education, recreation courses
31 hours recreation component to include: HPER 200, 202, 220, 304, 305, 325, 470, 479, 480
9 hours health component to include: HPER 100, 154, 317
16 hours physical education component to include: HPER 405, 436; 10 hours of professional activity courses with HPER 224 required
8 hours secondary education courses to include: Curriculum and Instruction 200, 201, 204, 205
6 hours related courses selected from: Art 323, 324; Computer Science 210; Political Science 233; Sociology 305; Theatre and Speech 109
2.0 average in recreation component of major courses

Minimum of 30 hours of 300 and 400 level courses
Electives to be selected by student and assigned academic adviser to complete 128 hours
### Recreation Minor

Total of 24 hours including: 6 hours of health to include HPER 100,154; 6 hours in three courses from HPER 202,220, 224,228, 235, 237; 12 hours in four courses from HPER 200, 304, 305, 325, 470.

400 Current Topics and Problems in Physical Education (3)
Exploration of current topics and problems in physical education significant to teachers, coaches, and administrators in schools and agencies providing services in physical education or related fields. Summer. Prerequisites: senior level and approval of instructor; or graduate standing.

401 Tests and Measurements in Health and Physical Education (3)
Assessment of motor traits, organic development, neuromuscular development, sports knowledge, and attitudes related to health and physical education; basic statistics essential to measurement theory. Fall semester. Prerequisites: equivalent of HPER 201, 332; Mathematics 120; senior level and approval of instructor; or graduate standing.

402 Philosophical Foundations of Physical Education and Sport (3)
Identification and implications of several philosophical approaches to play, games, dance, sport, physical education, recreation, and athletics. On demand. Prerequisite: senior level or graduate standing.

404 Dynamics of Motor Learning (3)
Psychological aspects of learning, experimental growth, and development as affected by human movement patterns, perceptual mechanisms, and cognitive processes. On demand. Prerequisite: 317 or senior level; or graduate standing.

405 Administration of Interscholastic Athletics and Intramurals (3)
Conceptual development of sound programs; common problems, responsibilities, and personnel relationships involving school and community related to athletics and intramurals. Spring semester. Prerequisite: equivalent of 304 or 332; approval of instructor; or graduate standing.

407 Psychologic and Sociologic Concepts Applied to Physical Education and Sport (3)
Emphasis upon physical education and sport as a socio-cultural psycho-cultural force; psychological-sociologic concepts applied to physical education, recreation, sports. Fall semester. Prerequisite: 317 or senior level; or graduate standing.

408 Seminar, Current Advances in Bio-Kinetics (3)
Current advances in kinesiologic and physiologic principles of physical education, athletic coaching, and sport. On demand. Prerequisite: equivalent of 317 or 318; approval of instructor; or graduate standing.

436 Physical Education for the Exceptional Student (3)
Lecture, demonstration, and practical experiences in the study of exercise and sport phases for the exceptional student. Every semester. Prerequisite: equivalent of 302 and junior level; or graduate standing.

490r Workshop and Seminar (2-4)
Special problems; in-service education for specific groups; research in professional literature and evaluation measures to topics studied. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
Every semester. Prerequisite: approval of HPER department head.

498r Individual Studies (1-4)
Every semester. Prerequisite: approval of HPER department head.

499r Group Studies (1-4)
Every semester. Prerequisite: approval of HPER department head.

HPER: Professional Activities Courses

The professional activities component consists of those courses which by nature are physical education/coaching techniques. Courses of this type are designed primarily for that student planning to become a teacher-coach or recreation specialist. A student scheduling a course within this component may expect the final grade to reflect his or her achievement in cognitive acquisitions, affective learnings, and psychomotor skills. Minimal competency levels may be established according to the professional discretion of the respective instructor and each student will be responsible for demonstrating at least these minimal standards before receiving a passing mark.

211 Softball and Volleyball (2)
Histories, basic skills, strategies, psychologies, contemporary offenses, and defenses basic to coaching and teaching of volleyball and softball. Fall semester. Prerequisite: HPER major or approval of instructor.

212 Conditioning Track and Field (2)
Histories, basic skills, strategies, psychologies, training systems basic to the coaching and teaching of conditioning and track and field. Field experience, Spring semester alternate years. Prerequisite: HPER major or approval of instructor.

214 Modern Dance and Exercise (2)
Histories, artistic executions, and expressions, integrations of ballet and modern dance techniques for communication and creative exercises. Fall semester alternate years. Prerequisite: HPER major or approval of instructor.

222 Archery and Badminton (2)
Histories, basic skills, strategies, contemporary teaching techniques, skills application for recreational and competitive usage appropriate to each sport. Spring semester alternate years. Prerequisite: HPER major or approval of instructor.

224 Movement Exploration and Rhythmic Sequences (2)
Skill development and teaching procedures in movement education, fundamental and contemporary movement patterns. Every semester. Prerequisite: HPER major or approval of instructor.

232 Baseball (2)
Histories, basic skills, strategies, psychologies, contemporary offenses, and defenses basic to the coaching and teaching of baseball. Field experience. On demand. Prerequisite: HPER major or approval of instructor.

233 Basketball (2)
Histories, basic skills, strategies, psychologies, contemporary offenses, and defenses basic to the coaching and teaching of basketball. Field experience. On demand. Prerequisite: HPER major or approval of instructor.

234 Wrestling, Weightlifting (2)
Histories, basic skills, strategies, psychologies, training systems basic to the coaching and teaching of wrestling and weightlifting. Spring semester alternate years. Prerequisite: HPER major or approval of instructor.

235 Golf and Tennis (2)
Histories, basic skills, strategies, contemporary teaching techniques, skill
Recreational Specialist Courses

199r Special Projects (1-4)
Individual or group projects. Every semester. Maximum credit 4 hours. Prerequisite: approval of HPER department head.

200 Introduction to Recreation (3)
Comprehensive survey of recreational implications for the American way of life; philosophic and historic foundations, career opportunities and responsibilities. Fall semester.

202 Camping and Outdoor Education (2)
Administration and program development; skill development and practical laboratory experience. Field component. Fall semester alternate years.

220 Recreational Skills (2)
Skills relating to a variety of recreational activities and programs. Spring semester alternate years.

227 Skill Concentration (2)
Proficiencies in sports skills essential for the professional physical educator and recreation leader. On demand. Prerequisite: for HPER major only. Class hours to be arranged.

304 Organization and Administration of Recreation (3)
Survey of types of programs, their objectives, content and methods, facilities, budgeting, public relations, personnel management, and policy development. Spring semester.

305 Therapeutic Recreation (3)
Development of programs for physically or mentally ill or convalescent patients: handicapped, retarded, elderly, and other special population groups. Fall semester alternate years.

325 Recreation Leadership and Programming (3)
To develop competencies needed for effective recreation leadership and recreation programming techniques for use in a variety of recreational settings. Spring semester alternate years.

335r Officiating Sports (1)
Rules, interpretations, fundamentals, techniques, and mechanics of officiating seasonal sports. On demand. Prerequisite: HPER major or approval of instructor.

470 Current Topics and Issues in Recreation (3)
Survey of problems and concerns facing recreation leadership: management, facilities development, environmental impact and special population groups. Spring semester alternate years. Prerequisite: above junior level.

479, 480 Internship in Recreation Leadership (6,6)
Supervised internship in leadership and administrative positions; full time contact, minimum eight weeks, concurrent integrative seminars. Every semester. Prerequisite: approval of program leader and HPER department head.

499r Group Studies (1-4)
Every semester. Prerequisite: approval of program leader and HPER department head.

498r Individual Studies (1-4)
Every semester. Prerequisite: approval of program leader and HPER department head.

499r Individual Studies (1-4)
Every semester. Prerequisite: approval of program leader and HPER department head.

HPER: Service Program

Physical Recreational Activities
Courses within the service program hold contemporary attractiveness as "lifetime" activities and should appeal to the educated adult for maintaining a healthful and wholesome lifestyle.

Every undergraduate student will be expected to satisfactorily complete a minimum of two physical/recreational activities, one of which must be 021.

Participants enrolled in courses within the service program wear a specific type of uniform or the appropriate clothing and footwear prescribed by the respective instructor. Uniforms may be purchased from the bookstore on campus.

HPER Service Program Courses
The second digit in the service course number indicates the level of skill required for the course. The 2 indicates elementary level while the 3 indicates intermediate or advanced level. Students will be screened during the initial phase of the course to ascertain the course level in which they should participate. Upon learning of that recommended level, each student will be expected to adjust his or her schedule accordingly in order to derive the greatest participatory benefits from the course.

021 Concepts and Application in Physical Education (1)
Acquaints students with concepts, understandings, and physiological values of physical activity as applied to optimal living. Laboratory in motor skills required. Every semester.

022 or 032 Recreational Activities (1)
Archery, backpacking, badminton, bicycling, bowling, camping, fencing, golf, gymnastics, handball, ice skating, racquetball, riflery, water skiing, sculling, tennis, sailing, weight training, and physical conditioning. Every semester.

023 or 033 Team Sports (1)
Basketball, volleyball, softball; speedball, soccer, flag football. On demand.

024 or 034 Swimming (1)
Beginning swimming; intermediate swimming, scuba diving, advanced lifesaving, water safety Instructor I and II certification. Every semester. Prerequisite: proficiency test to determine skill.

025 or 035 Body Mechanics (1)
Individualized program for students with disabilities who are unable to participate in regular activity classes. Every semester. Prerequisite: referral by physician and HPER department head approval.

026 or 036 Dance (1)
Aerobic, ballet, folk and square, modern, and contemporary jazz. Every semester.

039 Varsity Sports (1)
Basketball, baseball, football, golf, tennis, volleyball, cross country/track and field, soccer, fencing, wrestling, cheerleading, riflery. Every semester. Prerequisite: approval of head coach of respective varsity sport. Course graded on satisfactory/no credit basis and does not meet HPER requirements for graduation. Maximum of 8 hours credit may be applied toward the 128 hours required for graduation.
The B.S. Engineering program is accredited by the Engineering Accreditation Commission/Accreditation Board for Engineering and Technology, the national accrediting agency for engineering programs.

**Transfer Credit**

Credits received by transfer for required engineering courses in either engineering or engineering management programs must be a grade of C or better. Although equivalents will be awarded for D grades, students must retake the courses.

**Bachelor of Science in Engineering (B.S.E.) Program**

The engineering curriculum provides a four year program with emphasis on the fundamentals of engineering design and analysis, mathematics, science, and communications. Considerable attention is also given to supporting curricular content in the areas of humanities and social sciences.

The engineering design experiences begin with freshman team design projects and are continued throughout the curriculum. Particular attention is given to the integration of various engineering fundamentals and principles along with economic aspects of engineering design.

During the junior year a course is presented which develops engineering design as a decision-making process with objectives, constraints, and models. Appropriate optimization techniques are also introduced. Following this course, all students take an engineering design course in a specific area during their senior year which provides for the application of engineering design techniques to specific problems in their particular area of interest. The design experiences are culminated by a comprehensive year-long team design project during the senior year. This experience involves an interdisciplinary approach to the design of a major product or system. Techniques of engineering and management are emphasized throughout the course.

Since engineering functions are increasingly dependent upon computers, the study of the computer and its utilization is integrated throughout the curriculum. The study of the computer begins with a course in engineering computations taken during the freshman year. A computer application and numerical methods course follows during the sophomore year. Together, these courses provide the background for the use of the computer throughout the remainder of the engineering program.

Laboratories are an integral part of the engineering programs. They develop an understanding of engineering instrumentation, experimental techniques, fundamental principles, and communicational skills. Consequently, laboratory courses are provided in each of the four years of study toward the engineering degree.

---

**Engineering (B.S.E.)**

**General Education** (see pages 25-27 for list of approved courses)

**Category A**

2 approved courses in written communication in the English language (6 hours)
Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours; approved related course below will apply)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category C
1 approved perspectives course other than engineering (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
Major and related courses vary depending upon the specialization (see below); however, all B.S. Engineering courses will require at least:

Mathematics F150, 160, 250, 260
Chemistry D121 (counts as Category D)
Physics 231
Engineering Core (49 to 59 hours)
Specialty Courses: 24 hours minimum (including senior design)
Electives depend on program selected.
Minimum degree requirements: 137 hours (147 for Co-op graduates)
2.0 average in all engineering courses
Minimum of 30 hours of 300 and 400 level courses

Specializations
In general, all engineering students take a common core of courses during their first three years. Specialization courses are taken during the fourth year. The requirements are—

Chemical Engineering
Special requirements of this program dictate accurate advising regarding prerequisite courses, etc., as early as the freshman year.

General Education requirements (see above)

Major and related courses
Mathematics F150, 160, 250, 260
Chemistry D121 (counts as category D), 122, 351, 352, 371, 372
Physics 231
Specialty Engineering Courses: 24 hours including 405, 430, 431, 432, 434, 490* (8 hours)
2.0 average in all engineering courses
Total hours: 143 (153 for co-op graduates)

*For qualified students. Engineering 495 (Honors) may be substituted for 4 of the 8 hours required in Engineering 490.

Electrical Engineering
(Two tracks: Instrumentation and Control or Power)

General Education requirements (see above)

Major and related courses
Mathematics F150, 160, 250, 260
Chemistry D121
Physics 231, 232
Specialty Engineering Courses (Instrumentation and Control): 25 hours including 470, 473, 475, 477, 478, 490* (8 hours)
Specialty Engineering Courses (Power): 25 hours including 470, 471, 472, 473, 475, 490* (8 hours)
2.0 average in all engineering courses
Total hours: 138 (148 for co-op graduates)

*For qualified students. Engineering 495 (Honors) may be substituted for 4 of the 8 hours required in Engineering 490.

Industrial Engineering

General Education requirements (see above)

Major and related courses
Mathematics F150, 160, 250, 260
Chemistry D121
Physics 231, 232
Specialty Engineering Courses: 24 hours including 450, 452, 454, 457, 490* (8 hours), plus approved elective
2.0 average in all engineering courses
Total hours: 137 (147 for co-op graduates)

*For qualified students. Engineering 495 (Honors) may be substituted for 4 of the 8 hours required in Engineering 490.

Mechanical Engineering
(Two tracks: Mechanics or Thermal Science)

General Education requirements (see above)

Major and related courses
Mathematics F150, 160, 250, 260
Chemistry D121
Physics 231, 232
Specialty Engineering Courses (Mechanics): 25 hours including 405, 406, 442, 444 or 445, 446 or 468, 490* (8 hours), plus approved elective.
Specialty Engineering Courses (Thermal Science): 25 hours including 405, 406, 431, 436, 490* (8 hours), plus approved electives.
2.0 average in all engineering courses
Total hours: 138 (148 for co-op graduates)

*For qualified students. Engineering 495 (Honors) may be substituted for 4 of the 8 hours required in Engineering 490.

Civil Engineering (Structural)

General Education requirements (see above)

Major and related courses
Mathematics F150, 160, 250, 260
Chemistry D121
Physics 231, 232
Specialty Engineering Courses: 25 hours including 452, 460, 462, 465, 468, 490* (8 hours)
2.0 average in all engineering courses
Total hours: 138 (148 for co-op graduates)
## Typical courses of study in engineering (B.S.E.)

In general all engineering students take a common core of courses during their first three years and then take courses in their area of specialization during their fourth year. The typical first three years for all students are listed below, followed by the typical fourth year for students in each of the areas of specialization.

Career Preparation for Other Fields

By carefully selecting electives, students may prepare to pursue careers outside engineering. For example, a student may desire to study medicine, law, business, or a number of other disciplines. Such plans usually require additional coursework beyond that required for the engineering degree. However, engineering study is considered to be excellent preparation for such careers.

For guidance and assistance concerning any special program, the student should contact one of the directors or the dean of the School of Engineering in order that an appropriate course of study can be developed.

Engineering Management Program

Professor Evans, Coordinator

The engineering management program is an interdisciplinary program leading to a Bachelor of Science (B.S.) degree.

The purpose of the program is to provide an opportunity for students to develop quantitative and qualitative skills in areas which bridge the gap between engineering and business programs. This preparation qualifies the graduate for broad-based assignments in industry and government as well as providing a solid background for advanced study. The management title does not imply that graduates will automatically manage engineers or other professionals. It does suggest that the program of study is useful in developing skills and techniques appropriate to those who are either in management positions or who expect to be in management positions in the future.

Engineering Management (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral science courses (6 hours; approved related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours; approved related course below will apply)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category C
1 approved perspectives course other than engineering (3 hours)

Cooperative Engineering Program

B. Hull, Coordinator

In addition to the basic four-year program a five-year optional cooperative program is available. In this program students alternate between a term in school and a term in industry. Typical students will receive their baccalaureate degrees after five years and will obtain approximately 20 months of industrial work experience. This program is designed to: (1) provide practical experience which relates academic studies to industry requirements, (2) give the student a better understanding of human relations in industry, and (3) assist the student financially. The financial benefits to the student are usually adequate to cover most of the student's college expenses while obtaining the B.S.E. degree.

This program is open to any UTC engineering student who is in good academic standing, whose class work and school activities indicate that he or she is dependable and capable, and who is acceptable to a cooperating company. In general, a student is admitted to this program at the end of the freshman year.

More specific information concerning the program is given in the following:

(1) Scholastic requirements—A student must have at least a 2.5 cumulative grade point average (out of 4.0) to be enrolled in the program. Further, the student must maintain a 2.25 cumulative grade point average to remain in the program. If the student fails to attain at least a 2.0 average in any semester while participating in the program, the student will be terminated from the program.

In general it is expected that co-op students will maintain a grade point average considerably above the 2.25 minimum.

(2) Registration—Co-op students are required to register each term (including each term in industry) as a co-op student. A nominal fee will be assessed the student for registration during the work term.

(3) Cooperative Seminar—A co-op student is expected to register and participate in Engineering 390r (Cooperative Seminar) during the term in school immediately following a work assignment. This seminar is especially designed to provide for discussing and reporting on projects conducted as a part of the cooperative work assignment.

(4) Reports—Student participants and employers are requested to file a brief statement with UTC concerning the student's work at the end of each work term.

(5) Work Schedule—Co-op students are expected to attend school full-time during their first year and last year in the program. They will alternate each term (between school and work) during the three years between their first and last year in the program. (A term is considered to be either first semester, second semester, or summer term.) Typical co-op schedules follow the list of engineering courses. Note that a work term precedes each registration for Engineering 390r.

(6) Co-op Graduate—A co-op student will be certified as a co-op graduate on his or her permanent record if upon graduation he or she has completed at least 75 weeks of co-op work experience.

Degree Requirements

A B.S.E. cooperative engineering student graduate completes all degree requirements of the B.S.E. graduate listed above, plus fourteen additional hours in Engineering 390r, Cooperative Seminar. Four of these Engineering 390r hours replace one semester of Engineering 490r, Senior Design Experience.

Engineering Courses

001-007 Cooperative Work Experience (0)
Consecutive cooperative engineering work terms as a part of the cooperative engineering program. Student participation in off-campus work terms in industry (work term defined as either first semester, second semester, or a three month summer term in industry). Every semester.

102 Engineering Graphic Communication (3) CORE
Multiview projection, sectional views, auxiliary views. Construction of graphs, descriptive geometry, including points, lines, and planes in auxiliary views. Every semester. Corequisite: Mathematics 145 or equivalent.

103, 104 Basic Engineering Science (4,4) CORE
First semester: introduction to basic concepts of engineering. Physical quantities, units, dimensions, vectors; formulation of engineering problems. Fundamentals of mechanics with emphasis on statics; equilibrium conditions, free-body diagrams, center of mass, friction, kinematics of particle, work and energy. Second semester: fundamentals of first law of thermodynamics, basic heat transfer, elements of fluid mechanics, applications. Laboratory: a team design experience. Every semester, Lecture 3 hours, laboratory 3 hours. Corequisites: 770, 777; Mathematics 750, 760.

110, 111 Seminar (1, 0) CORE
Professional, ethical, and technical aspects of engineering. Fall semester, 110; spring semester, 111. Both semesters required except for junior or senior transfer students. Course graded on a satisfactory/no-credit basis. Normally taken as corequisite with 103 and 104.

124 Introduction to Engineering Computations (3) CORE
Flow diagram representation of processes. Construction of computational algorithms for computer solution. Experience in solution of typical engineering problems in BASIC and in FORTRAN by digital computer. Introduction to the use of plotters and graphics terminals. Every semester. Prerequisite: Mathematics 145 or equivalent.

199r Special Introductory Topics in Engineering (1-4)
Introductory treatment of a fundamental area in engineering, varying from term to term. On demand. Prerequisite: approval of instructor and dean.

200 Structures in Architecture (3)
The history, esthetics, functional beauty, and behavior of architectural structures will be presented along with the economic, environmental, social, political, and scientific factors which were effected and affected by them. On demand. Prerequisite: high school algebra and geometry.

211 Pollution Controls (3)
The emergence and solution of pollution problems. Discussion of fundamental ideas and policies contributing to pollution problems. Pollution is examined from industrial, political, and social perspectives. Included are role-playing experiences designed to illustrate the effects of various policies on the quality of life in a simulated community. Fall semester. Prerequisite: sophomore standing.
152—Engineering

225 Engineering Computations and Numerical Techniques (3) CORE
Application of the FORTRAN programming language to the solution of representative engineering problems by the digital computer. Experience in program design, implementation, and documentation. Applications of numerical techniques to integration, solution of sets of equations, differential equations, and optimization. Fall semester and summer. Prerequisite: Engineering 124. Corequisite: Mathematics 250.

246 Mechanics (4) CORE
Review of statics, vectors, plane moments of inertia and truss analysis. Stress-strain concepts and relations. Bending, shear, and torsion. Euler column theories. Particle kinematics. Introduction to material and structural testing techniques, subsequent team design projects with experimental verification in laboratory. Every semester. Lecture 3 hours, laboratory 3 hours. Prerequisites: 102, 104. Corequisite: Mathematics 250.

248 Dynamics (3) CORE

272 Electronic Circuits I (4) CORE

303 Thermodynamics (4) CORE
Classical thermodynamics with emphasis on first and second laws of thermodynamics. Property relationships, chemical equilibrium, and cycle analysis. Fall semester and summer. Prerequisites: 104, Mathematics 250.

307 Fluid Mechanics (4) CORE
Fluid statics and kinematics; fluid dynamics including Bernoulli, continuity and momentum equations; fluid measurements; viscosity; compressible and incompressible flow; laminar and turbulent flow; flow in pipes and open channels; model studies; lift and drag. Laboratory: pressure measurements; quantity measurements; property measurements; energy losses; wind tunnel studies; shock waves; open channel flow; pumps and turbines; pipe flow. Every semester, lecture 3 hours, laboratory 3 hours. Prerequisites: 303, Mathematics 260.

322 Probability and Statistics for Engineering (3) CORE

325 Signals and Systems (4) CORE

340 Engineering Materials Science (3) CORE
Study of the science of solid materials, including metals, ceramics, plastics, and semiconductors. Nature and fundamental characteristics stressed. Atomic and macroscopic perspectives. Fall semester and summer. Prerequisites: Chemistry 121, Physics 231.

372 Electronic Circuits II (4) CORE
Digital and signal processing, analog electronics, digital circuits and introduction to power and electromechanical energy conversion. Digital signals, flip-flops. Semiconductors, transistor amplifiers, digital circuits. Electric power, magnetic circuits, polyphase distribution, electric machines. Laboratory examines behavior of solid state devices, digital electronics and electromagnetic energy conversion. Fall semester. Lecture 3 hours, laboratory 3 hours. Prerequisites: 272, Physics 232.

373 Automatic Control Systems Analysis and Design (3) CORE

375 Electromagnetic Fields and Waves (3)
Elementary fields and waves, static electric and magnetic fields; potential and vector fields; Gauss’s Law; Ampere’s Law; line integrals; vector calculus methods; Bio-Savart Law; time varying electric and magnetic fields; Maxwell’s equations. Fall semester. Prerequisites: 372; Physics 232; Mathematics 250, 260. (Formerly 475.)

379 Dynamic Systems Laboratory (1) CORE
Laboratory exercises in the simulation of dynamic systems and the design of automatic controls. Includes use of analog computers and CSMP for simulation and design confirmation. Spring semester. Laboratory 3 hours. Corequisite: 373.

380 Introduction to Engineering Design (3) CORE
Introduction to the design process in engineering. Problem definition and concept generation. Characterization of design as a decision process with objectives, constraints, a model, and an appropriate optimization technique. Computer application. Economic and managerial considerations. Spring semester. Prerequisites: completion of 36 hours in Engineering CORE, including 225.

390 Cooperative Seminar (2-4)
Seminar for developing, discussing, and reporting projects carried on as a portion of the cooperative work assignment. Written and oral report required. Every semester. Maximum of 15 cumulative hours. Course graded on satisfactory/no-credit basis.

405 Heat and Mass Transfer (4)
Fundamental principles of heat, mass, and momentum transfer; application to macroscopic systems. Special emphasis on heat transfer by conduction and convection; analogy between heat and mass transfer. Fall semester. Prerequisite: 307.

406 Thermal Science Laboratory (1)
Laboratory experiments performed involving heat conduction, convection, radiation, and thermal devices such as internal combustion engines, heat pumps, and heat exchangers. Fall semester. Laboratory 3 hours. Prerequisite: 307. Corequisite: 405.

410, 411 Seminar (1, 0) CORE
Professional, ethical, and technical aspects of engineering. Fall semester, 410; spring semester, 411. Both seminars required. Course graded on a satisfactory/no-credit basis. Normally taken as corequisite with 490r.

430 Thermal System Design (3)
Application of systems design techniques to the design to thermal processes. Discussion of case studies including heat exchanger networks, mechanical refrigeration, absorption refrigeration, steam generation, and chemical processes. Individual or group design problems. Spring semester. Prerequisites: 307, 380, 405, 431.

431 Chemical Process Principles (3)
Quantitative relations of chemical reactions and physico-chemical processes. Calculations based on gases, vapors, humidity, and process material balances. Study of industrial processes involving thermophysics, thermochemistry, heat, and economic balances. Fall semester. Prerequisite: 303.

432 Chemical Operations (3)
Fundamental variables of chemical operations; generalized treatment of mass-transfer operations including separation processes. Multi-component phase equilibria. Application of fundamental principles of chemical operations for systems with simultaneous heat, mass, and momentum transfer. Spring semester. Prerequisite: 431.

434 Chemical Kinetics and Reactor Design (3)
Concepts of chemical kinetics applied to reactor design. Effects of
temperature, pressure, concentration, and catalysis on rates of chemical reactions. Design of batch, backmix, tubular, and fluidized bed reactors. Spring semester. Prerequisite: Chemistry 372.

436 Thermal Component Design (3)
Design of individual components of thermal systems. Economic tradeoffs in sizing, choice of materials, number of passes, and other design criteria. Examples of heat exchangers, refrigerators, steam cycle components, and modern, innovative concepts. Spring semester. Prerequisites: 307, 380, 405, 431.

438 Advanced Fluid Dynamics (4)
Equations of continuity, momentum, and energy in three-dimensional vector formulation. Reduction to two- and one-dimensional flows for cases of engineering interest. Applications to students' areas of specialty. Laboratory work included. Spring semester. Prerequisite: 307.

439 Internal Combustion Engines (4)
Thermochemical phenomena in internal combustion engines. Topics include testing techniques, combustion, detonation, carburetion, equilibrium, and disassociation. Ideal and real fluid behavior in analysis of internal combustion engines. Experimental verification in the laboratory. Spring semester, lecture 3 hours; laboratory 3 hours. Prerequisites: 303, 307, 405.

442 Machine Design (3)

444 Applied Elasticity (3)

445 Mechanical Vibrations (3)
Free and forced vibrations of damped and undamped systems; single and multiple degrees of freedom utilizing lumped parameter analysis. Matrix rotation: sweeping and rotation techniques. Spring semester. Prerequisites: 248; Mathematics 250, 260.

446 Advanced Mechanics of Materials (3)
Statically indeterminate structures: introduction to theory of elasticity; special topics in mechanics of materials. Spring semester. Prerequisites: 246; Mathematics 250, 260.

450 Industrial Engineering Design (3)
Design of operations, facilities, and project controls. Topics include process organization, materials handling, information handling, scheduling, and resource allocation. Case studies. Spring semester. Prerequisite: 380.

452 Engineering Economy (3)
Economic decisionmaking for engineering systems. Choice of alternatives by equivalent annual cost, rate-of-return, present worth, and benefit-cost methods. Tax influences, statistical decision-making, replacement policy. Fall semester. Prerequisites: 380 or consent of instructor; Mathematics 136 or 160.

453 Value Engineering (3)
Application of value engineering techniques through an organized approach which consists of the following phases: information, speculation, analysis, planning, and execution; reporting and implementation. Primarily elective for B.S. in engineering management. On demand.

454 Work Measurement and Design (4)
Techniques for analysis and improvement of work methods; principles of motion economy, process charts, development of standard data from work sampling; predetermined time systems, performance rating, and wage incentive systems. Fall semester. Lecture 4 hours; laboratory work included.

455 Industrial Safety Engineering (3)
History, accident cost analysis, methods, and techniques developed for reducing and preventing accidents in industry, motivating safety, plant inspection, guarding of equipment, health hazards and their control, accident records and reports, employee selection, placement and counseling. Primarily elective for B.S. in engineering management. On demand.

456 Computer Integrated Manufacturing Systems (3)
Basic concepts of modern manufacturing and related control systems. Techniques include flow-line production, numerical control, industrial robots, CAM, group technology, and flexible manufacturing systems. Design applications. On demand. Lecture 3 hours; laboratory work included. Prerequisites: 225, 322, Mathematics 160 or equivalent. (Formerly Engineering 385).

457 Quality Control (3)
Detailed study of theory and methods for the design and analysis of quality systems. Product specifications, process control, acceptance inspection, other means of assurance. Spring semester, lecture 3 hours; laboratory work included. Prerequisite: 322 or Management 211.

458 Industrial Plant Layout (3)
Types and techniques of plant layout; process flow charts in routing operations. Design and selection of equipment, materials handling, and plant service facilities. Each student develops a scaled layout of equipment and services of a specific product as a major project. On demand.

460 Structural Engineering Analysis and Design (3)
Analysis and design of framed structures due to moving and fixed loads; influence lines; deflections of beams and trusses. Analysis of statically indeterminate beams, trusses, bents, and frames. Fall semester. Prerequisites: 246; Mathematics 250, 260. Corequisite: 380.

462 Soil Mechanics, Foundations and Substructures (4)
Physical properties of soils, foundation explorations, and principles of design of dry and subaqueous foundations. Fall semester. Lecture 4 hours, laboratory experience included. Prerequisites: 246, 307.

465 Structural Engineering Design (4)

468 Elementary Structural Matrix Methods (3)
Review of matrix algebra and vectors, development of member stiffness and flexibility matrices. Spring semester. Prerequisite: 444 or 445 or 460.

470 Microprocessors and Digital Logic (3)
Design of sequential electric circuits. Circuit minimization, cubic representation, and Quine-McClusky algorithm. Circuit equivalence, synchronous circuits, and memory circuits. Applications of the microprocessor to realization of logic circuits. Fall semester, lecture 2 hours, laboratory 3 hours. Prerequisite: 372.

471 Electrical Machinery (4)
Magnetic circuits and transformers. Rotating electrical machinery; D.C. machines, synchronous machines, induction motors. Speed control and transient behavior. Fall semester, lecture 3 hours, laboratory 3 hours. Prerequisite: 373. Corequisite: 375.

472 Electrical Energy Systems (4)
Power systems component modeling; transmission lines, machines, transformers. Load flow analysis, system dispatching and control. Fault analysis, symmetrical components, system protection. Transient stability. Spring semester. Prerequisite: 471.

473 Communication Systems (3)
Definitions and basic concepts of analog and digital modulation techniques. Fourier and LaPlace transform techniques used to study transmission of signals through linear filters and time-bandwidth relationships. Amplitude, frequency, and pulse modulation techniques described and analyzed. Periodic sampling and the Nyquist sampling criterion. Spring semester. Lecture 2 hours, laboratory 3 hours. Prerequisites: 322, 325.
Electronic Instrumentation (4)
Intended for seniors or beginning graduates anticipating need for developing instrumentation systems. Primary emphasis on instrumentation systems to gather design data and to verify performance. Design and specification of instrumentation systems to acquire and condition large quantities of data from a multiplicity of sensors. Fall semester. Prerequisite: 372 or 373 or equivalent.

Sampled Data and Nonlinear Control Systems (4)
Intended for seniors or beginning graduates desiring to pursue automatic control technology beyond that offered in the core curriculum. Traditional and new techniques for analysis and design of nonlinear and sampled data control systems. Spring semester. Prerequisite: 373 or equivalent.

Senior Design Experience (4)
A group design project. Solution to an engineering problem; oral and written presentation of progress and final results. To be registered twice for a total of 8 hours. Every semester. Prerequisites: 380, completion of all lower division engineering courses, and senior standing. Corequisites: 410 with first semester, 411 with second semester. Corequisite in second semester, one of the following: 430, 436, 442, 450, 465 or 470.

Special Topics in Engineering (1-4)
Advanced treatment of a specialized area in engineering, varying from term to term. On demand. Prerequisite: approval of instructor and dean.

Departmental Honors (1-3 hours per term, 4 hours for the two terms)

Computer Science

Professor Thompson, Head
Professors Bykat, C. Smullen
Associate Professor S. Smullen
Assistant Professors Baskerville, Day, Del Valle, Harston,
Janet Smith, Jerry Smith
Instructor Lewis

The Computer Science Department offers a B.S. degree in computer science. Majors take a 36-hour sequence of computer science core courses and take additional courses in an area of concentration. The concentration of study augments the core courses and is a specialization in which the student can apply his or her knowledge of computers. Four concentrations are available: information systems, scientific applications, systems architecture, and topical.

**General Education** (see pages 25-27 for list of approved courses)

**Category A**
2 approved courses in written communication in the English language (6 hours)

**Category B**
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

**Category C**
2 approved behavioral or social science courses (6 hours)

**Category D**
1 approved physical or natural science course with laboratory (4 hours)

**Category F**
1 approved mathematics course (3 hours; approved related course below will apply)

**Category C**
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**
Computer Science core courses: Computer Science 121, 122, 201, 251, 252, 301, 312, 320, 335, 350, 460, 490
6 hours of upper division (300 or 400 level) computer science electives
Computer Science 340 may not be used as an upper division elective. English 277 or 278

Additional course requirements for each concentration are:

1. **Information Systems**
   Mathematics F150, 160, 303, 307; Accounting 201, 202, 305; Management 311, 356; Computer Science 280
   Economics C101 and C102

2. **Scientific Applications**
   Mathematics F150, 160, 250, 260, 303, 308 and one of the following: 412, 414, 418, 428, 445 or 460; either Engineering 322, or Mathematics 407 and Mathematics 408; two of the following sequences: Biology D121 and 122 or Geology D111 and 112, Chemistry D121 and 122, Physics D103 and 104 or 230 and 231

3. **Systems Architecture**
   Mathematics F150, 160, 250, 260, 303; Physics 230, 231; Engineering 272,372; either Engineering 322, or Mathematics 407 and Mathematics 408

4. **Topical**
   At least 8 hours of mathematics beginning with Mathematics F150 and including Math 303; 6 hours of statistics; 15 hours of approved courses in an area chosen by the student with the advice and consent of a standing committee made up of faculty in computer science and faculty in the chosen area. Enrollment in this program is limited to students who have demonstrated exceptional ability or accomplishment. Programs developed under this option must be substantially different from the other listed concentrations. The approved program should be filed with the Records Office no later than the first semester of the student’s junior year and cannot be changed without the written approval of the student’s standing committee.

All majors must attain a minimum grade of C in all computer science core courses as a condition for graduation.

2.0 average required in all computer science courses excluding 123, 210, 211, and 340

Minimum of 30 hours of 300 and 400 level courses
Electives to complete 128 hours

**Typical courses of study in computer science (B.S.)**

Computer Science—157

117 Computer Programming with BASIC (3)
An introduction to the concepts and techniques of computer science. Emphasis is placed on the design and implementation of efficient algorithms using the BASIC language. On demand. Prerequisites: Mathematics 135 or 145; credit not allowed after Computer Science 210 or Engineering 124.

118 Computer Programming with FORTRAN (3)
An introduction to the concepts and techniques of computer science. Emphasis is placed on the design and implementation of efficient algorithms using the FORTRAN language. Every semester. Prerequisite: Mathematics 135 or 145.

121 Computer Programming I (3)
An introduction to digital computing techniques using PL/I. Algorithms, flowcharting, programming, and documentation of numerical and non-numerical problems. Introduction to computer science terminology and concepts such as computer hardware and computer application areas. Every semester. Pre- or corequisite: Mathematics 150.

122 Computer Programming II (3)
Continued development of programming style using structures and top down design. Debugging and testing of large programs. Emphasis on algorithm development. List processing. Recursion. Comparison of compilation techniques. Every semester. Prerequisite: 121 with a grade of C or better; pre- or corequisite: Mathematics 160.

123 Introduction to Data Processing (3)
General overview of electronic data processing. Topics include methodology, terminology, systems and procedures, file organization, peripheral equipment, and central processing unit components. On demand.

150 PL/I Programming (1)
An introduction to the PL/I language. Intended for students who have completed an introductory course in computer programming with a language other than PL/I. On demand. Prerequisite: at least 3 credit hours of computer programming with a grade of C or better. Prerequisite or corequisite: Mathematics 150.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.
158—Computer Science

201 Assembly Language Programming (3)
Computer structures; introduction to machine language, symbolic coding, and assembly systems; macros; program segmentation and linkage; file organization; operating systems introduction. Every semester. Prerequisite: 122 with a grade of C or better.

210 Computer Information Systems I (3)
Survey of computer applications. Introduction to the use of computer hardware and software information systems. Fundamentals of systems analysis and design. Use of BASIC to solve problems from business and other disciplines. (Formerly Computer Science 100). Every semester. Prerequisite: 3 credit hours of college mathematics.

211 Computer Information Systems II (3)
A study of the analysis, design, and implementation of business computer systems; system life cycle models; methods and techniques for systems development; an introduction to information retrieval and file and data base management systems; advanced topics in the BASIC language. (Formerly Computer Science 101). Every semester. Prerequisites: 210, Accounting 201.

231 Computer Problems in the Sciences (3)
Computer algorithms, and the complete preparation and solution of selected mathematics and science problems. Solutions of equations; interpolation and approximations; sequences and series; numerical differentiation and integration; numerical solution of initial value problems in differential equations. On demand. Pre- or corequisite: Mathematics 250.

251 Command and Job Control Languages (3)
Introduction to operating systems. The compile, link edit, and execute process. IBM job control language. Interactive command languages. Cataloged procedures. Load modules and libraries. Linking object modules. Principally, a study of the IBM environment with comparisons to and limited discussion of other mainframe and small computer operating systems. Every semester. Prerequisite: 122 or 280 with grade of C or better.

252 Introduction to Computer Organization (3)
Basic digital logic design, coding, number representation and arithmetic, mechanics of information transfer and control within a digital computer system. Every semester. Prerequisite: 201 with a grade of C or better.

280 Accelerated COBOL (3)
A study of standard and advanced methods of computer programming in business applications; emphasis on the organization and processing of direct access storage device files using COBOL. Every semester. Prerequisite: 122 or 211 with grade of C or better.

301 Systems Programming (3)
Structure and design of programs whose inputs are programs. Assemblers, interpreters, compilers, generators, input/output control systems, supervisors. Formal programming languages, syntactic descriptions, symbolic functions and manipulations. Fall semester and summer. Prerequisite: 312 with grade of C or better.

312 Data Structures (3)
Description of data bases and structures; concepts of records, files, trees and lists; sorting, searching, and merging of information files; referencing and cross-referencing files. Every semester. Prerequisites: 201, 251, and Mathematics 303 with grades of C or better.

320 Operating Systems (3)
Familiarization with the major concepts of operating system principles; procedure activation, storage allocation, system structure, performance evaluation, memory management, process management, security, and recovery procedures. Fall semester and summer. Prerequisite: 252 and 312 with grades of C or better.

335 File Processing (3)
A study of disk and tape file organizations. Creation of sequential, direct, and indexed sequential files. Hashing techniques and address overflow. Primary and secondary key usage. Inverted and linked list files. Binary trees, B-trees, B*-trees, and AVL trees. Spring semester. Prerequisite: 312 with grade of C or better.

340 Computer Analysis of Social Science Data (3)
The analysis of data from the social sciences using widely distributed statistical packages such as SPSS. Topics include data types, data files, manipulation, use of computers for description of univariate data, exploration of bivariate and multivariate relationships," hypothesis construction and testing," data sets drawn from sociology, anthropology, economics, political science and psychology. Fall semester. May not be used as 300-level elective for computer science majors. Prerequisite: introductory statistics course.

350 Software Engineering I (3)
A study of systems analysis and design aspects of software engineering to include information systems and the systems analyst; tools and techniques of systems analysis, and the life cycle concept of system development. Every semester. Prerequisites: 122 or 280; English 277 or 278; with grades of C or better.

410 Programming Language Structures (3)
The study of a major computer language with a structure different from FORTRAN or PL/I, or a study of advanced features such as extensibility, concurrency, or multitasking. Spring semester. Prerequisites: 312 and 320 with grades of C or better.

420 Computer Graphics—Applications and Algorithms (3)
Computer graphics systems, system software, data structures for graphics devices and display processors, representational algorithms and packaged graphics software. Fall semester. Prerequisite: 312 with grade of C or better.

430 Topics in Simulations (3)
Digital simulation. A study of simulation languages and simulation techniques for solving many types of research problems from management, engineering, and science; simulation of large systems, design of simulation experiments for optimizations; applications using simulation languages such as GPSS and GAS; comparison of simulation languages. Spring semester. Prerequisites: 312 with grade of C or better and an approved sequence in statistics.

435 Data Base Information Systems (3)
Concepts and methods in the definition and management of large integrated data bases for organizational information systems; functions and objectives of existing file and data management systems; analysis of proposals for new data management software; data base design; data base administration and security. Fall semester. Prerequisite: 335 with grade of C or better.

445 Automata, Complexity, and Computability (3)
An introduction to the classical and contemporary theory of computation including automata, formal languages, Turing machines, recursive functions, computability and uncomputability, complexity, and the classes of P and NP. On demand. Prerequisites: 121 with grade of C or better and Mathematics 303.

450 Software Engineering II (3)
A study of software development including the philosophy and techniques of software engineering and emphasizing analytical techniques useful to software designers. The course will include numerous programming assignments that will emphasize the areas of the design process; top-down, bottom-up, and structured programming approaches; different levels of test thoroughness; test approaches; test models; software reliability; and management techniques. Spring semester. Prerequisites: 301 and 350 with grades of C or better.

460 Computer Architecture (3)
Computer organizations and structures; data processing systems; basic digital circuits; data representation, digital storage and accessing; control functions; input/output facilities; systems organizations. Multiprogramming, multiprocessing, time sharing and real time systems. Spring semester and summer. Prerequisite: 320 with grade of C or better.

490 Senior Design Project (3)
A group design effort which will concentrate on developing a major hardware or software project. Oral and written presentations of progress and final results required. Every semester. Prerequisites: 320, 350 with grades of C or better, and senior standing.
School of Human Services

Professor Walker, Acting Dean

The School of Human Services offers four distinct programs leading to baccalaureate degrees. These programs are criminal justice, home economics, human services, and social work. In addition to the undergraduate degrees, a Master of Science in Criminal Justice degree is offered.

Each degree is designed to prepare professional personnel to work in a variety of settings related to meeting human needs. The faculty and philosophy of the division emphasize the interdisciplinary relationships of the various fields of knowledge and practice.

The Military Science Department and the Special Services/Upward Bound Program are also administered through the School of Human Services.

Criminal Justice

Associate Professor R. Thompson, Head
Professors Fjeld, Venters
Assistant Professors K. Bush, Catale, W. Hall

The baccalaureate degree in criminal justice is designed to prepare professionally competent individuals for positions within the criminal justice system. Specializations in corrections, crime control, juvenile justice, law and the courts, and law enforcement are available.

Criminal Justice (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours)

Category C
1 approved perspectives course (3 hours)
160—Criminal Justice

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**

Criminal Justice 410 or Psychology 308 or Sociology 321

Human Services 405

24 hours criminal justice including 101,112,113 through Cleveland State Community College, plus UTC courses 301, 303, 450, 470 and 471

One of the following concentrations—

1. **Corrections:**
   - 21 hours from CSCC Criminal Justice Program 120; UTC Criminal Justice 312, 313, 314, 315, 320, 322, 330, 400, 403, 430, 465; Computer Science 210; Sociology 322, 323

2. **Crime control:**
   - 21 hours from CSCC Criminal Justice Program 104,105,130,140; UTC Criminal Justice 322,400,402,440,465; Sociology 320; Human Services 301; Social Work 305; Political Science 323

3. **Juvenile justice:**
   - 21 hours from CSCC Criminal Justice Program 212; UTC Criminal Justice 312, 313, 314, 315, 320, 322, 330, 350, 403, 406, 430, 465; Psychology 221, 222; Sociology 322; Social Work 305; Computer Science 210; Home Economics 301

4. **Law and the courts:**
   - 21 hours from CSCC Criminal Justice Program 102; UTC Criminal Justice 320,400,403,405,406,408,430; English 360,370; Sociology 320, Political Science 322, 323; Business Marketing 336; Environmental Studies 410; Philosophy 211, 230; CSCC Law* 101, 102, 103, 104,105

5. **Law enforcement:**
   - 21 hours from CSCC Criminal Justice Program 102; UTC Criminal Justice 300,310,320,322,400,402,403,405,408,430,465; Political Science 323; Sociology 320

2.0 average in all Criminal Justice and Criminal Justice Program (CSCC) courses

Minimum of 30 hours of 300 and 400 level courses electives to complete 128 hours

*CSCC paralegal courses may not be taken during the last 60 hours.

</thead>
<tbody>
<tr>
<td>190r Special Projects (1-4)</td>
<td>Individual or group projects. On demand. <strong>Maximum credit 4 hours.</strong></td>
</tr>
<tr>
<td>200 The Criminal and Society (3)</td>
<td>Historical and contemporary perspectives on the interaction between the criminal and society. Focus on the citizen's role as crime preventor, victim, and supporter of criminal activities. Every semester.</td>
</tr>
<tr>
<td>201 Violence in America (3)</td>
<td>An historical investigation into violence in America and the evolutionary response of criminal justice agencies. Every semester.</td>
</tr>
<tr>
<td>300 Psychology of Law Enforcement (3)</td>
<td>Psychology as applied to processes of communication among police and those individuals and groups with which they come in contact. On demand.</td>
</tr>
<tr>
<td>301 Information Systems in Criminal and Juvenile Justice (3)</td>
<td>An introduction to information management tools and processes of accountability as they relate to the two systems of justice. Every semester.</td>
</tr>
<tr>
<td>303 Comparative Criminal and Juvenile Justice Systems (3)</td>
<td>An examination of these two systems of justice as they function in other countries. Every semester.</td>
</tr>
<tr>
<td>310 Law Enforcement in Criminal and Juvenile Justice (3)</td>
<td>An examination of specific law enforcement problems as they relate to criminal justice and juvenile justice. Every semester.</td>
</tr>
<tr>
<td>312 Correctional Perspectives in Criminal and Juvenile Justice (3)</td>
<td>The development of priorities, goals, and standards for the correctional field. Fall semester.</td>
</tr>
<tr>
<td>313 The Volunteer in Criminal and Juvenile Justice (3)</td>
<td>An examination of the role of the citizen volunteer in the two systems of justice. Spring semester.</td>
</tr>
</tbody>
</table>
314 Correctional Casework (3)
The application of counseling and interviewing techniques and theory to the correctional client. Spring semester.

315 Prisoner’s Rights (3)
Examination of the regulation of individual and collective behavior and the rationale for such restrictions during a period of confinement in a penal or mental institution. On demand.

316 Blacks and Criminal Justice (3)
Discussion of the black offender and the black criminal justice professional from the black perspective. On demand.

320 Advanced Administration in Criminal and Juvenile Justice (3)
Theory and practice of the administration of criminal justice system components. Every semester. Prerequisite: CJP* 105 or approval of instructor.

322 Criminal Justice Planning (3)
An examination of the role of a criminal justice planning agency in a local, state, or federal system; and contemporary sources of funds for program planning, implementing, and evaluating. On demand. Prerequisite: 301 or approval of instructor.

325 Street Law (3)
An examination of criminal and civil law to emphasize the full range of the legal system and its application to everyday life. Elective credit; not applicable toward major. Every semester.

330 Probation and Parole (3)
An examination of the theory and practice of probation and parole with juvenile and adult offenders. Fall semester.

350 Juvenile Institutional Services (3)
An historical perspective of the evolution of juvenile institutions and their present day applicability and use. Spring semester.

400 Constitutional Law (3)
An examination of the leading constitutional principles pertaining to modern criminal procedure. Fall semester.

402 Organized Crime (3)
The effect of organized crime on the community, the government, legal systems, and the individual; and methods of combating organized crime. Every semester.

403 Management Concepts in Criminal Justice (3)
Theories of criminal justice management, motivation, communication, planning, and decision making. On demand. Prerequisites: CJP* 105 and 320, or approval of instructor.

405 Advanced Criminal Law (3)
Common and statutory law of crimes including national developments and trends, inchoate offenses, and defenses to crime. Fall semester. Prerequisite: CJP* 117 or approval of instructor.

406 Advanced Juvenile Law (3)
Statutory and case analysis of judicial decisions, substantive juvenile law and procedures significant to practices of various agencies in juvenile justice. On demand. Prerequisite: CJP* 212 or approval of instructor.

408 Advanced Criminal Procedure (3)
Examination of the major legal and constitutional protections of the accused from initiation of investigation through post-conviction relief. Spring semester. Prerequisite: CJP* 113 or approval of instructor.

410 Theories of Criminal and Delinquent Behavior (3)
An analysis of theory and research on epidemiology and etiology of crime. Fall semester.

411 Criminal Justice Research Methodology (3)
Examination of the contemporary philosophy and techniques of inquiry in the criminal justice field. Elective credit; not applicable toward major. Every semester.

420 Administrative Advocacy (3)
Examination of a case for presentation to an administrative law court; review of record, legal research, preparation of a brief, and presentation of oral argument. Spring semester. Prerequisite: 301.

422 Advanced Planning and Evaluation in Criminal and Juvenile Justice (3)
Application of scientific methodology and analysis to problem solving. A research project will be designed and evaluated. On demand. Prerequisite: 322 or approval of instructor.

430 Philosophical and Ethical Issues in Criminal Justice (3)
An investigation into the implications for criminal justice theory and practice of selected philosophical positions and perspectives. Fall semester. Prerequisite: at least one course at the 200 level or above in either philosophy or religion, or approval of instructor.

440 Science and Technology in Criminal Justice (3)
An exploration of the ways in which science and technology have influenced (and failed to influence) the practices, procedures, and problems of the criminal justice system. On demand. Prerequisite: completion of Category D requirements or approval of the instructor.

450 Integrative Criminal Justice Systems Seminar (3)
Discussion of selected system-wide problems and topics in criminal justice. Research and oral presentation by the student. Every semester. Prerequisites: senior standing, criminal justice major, methodology course.

465 Crisis Intervention (3)
Study of the theoretical bases for accurately assessing crisis situations and a guided practicum in techniques of crisis intervention. Every semester.

470, 471 Internship in Criminal or Juvenile Justice (3,6)
Supervised internship in a criminal justice agency. Admission to 470 or 471 requires written application filed with the internship coordinator no later than three months prior to the semester in which the student plans to enroll in Criminal Justice 470 or 471; personal interview with the internship coordinator; and a 2.00 grade point average, both overall and in criminal justice. Every semester. Prerequisite: criminal justice major, junior standing, and approval of instructor. Courses may be taken concurrently or consecutively.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Consortium Courses
UTC has entered into a criminal justice consortium agreement with Cleveland State Community College. Under this agreement, all required criminal justice courses at the freshman and sophomore levels—CJP 101, 112, and 113—are taught by Cleveland State, and all courses at the junior and senior levels are taught by UTC. For the convenience of UTC students, Cleveland State Community College offers on the UTC campus these required courses listed below, and they are accepted as transit credit. Questions concerning advisement and registration for Cleveland State courses should be directed to Dr. Roger D. Thompson, Head, UTC Criminal Justice Department.

CJP 101 Overview of Criminal Justice Systems (3 quarter hours)
A comprehensive look at criminal justice and the agencies involved in its administration including correctional, court, law enforcement, and juvenile probation. 1 hour per week.
162—Home Economics

CJP 112 Criminal Law (3 quarter hours)
Substantive aspects of criminal law, including general principles applicable to all criminal conduct and specific analysis of particular crimes. 3 hours per week.

CJP 113 Criminal Procedures (3 quarter hours)
Arrest; search warrants; probable cause; search incident to arrest; consent searches; search and seizure of vehicles without a warrant; confessions and interrogations; pretrial identification; criminal investigation; criminal court procedure; evidence for the law enforcement officer; testifying in court. 3 hours per week.

*CJP—Cleveland State criminal justice consortium courses.

Home Economics

Associate Professor Cochran, Head
Associate Professor Temple, Tanner
Assistant Professors E. Smith, Martin
Instructor Rhodes

The Department of Home Economics offers two concentrations:

Home Economics: General
Child and Family Development
Foods and Nutrition
Management and Consumer Science

Home Economics: Business
Fashion Merchandising
Interior Design
Food Systems Administration
Consumer Affairs

In addition to the faculty listed above, the department is supported by adjunct faculty members who are employed in professional fields associated with home economics specialties.

Admission to Home Economics 405: Practicum requires a written application filed with the specialty faculty adviser no later than three months prior to the semester in which the student plans to register for the course.

Home Economics: General (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses other than home economics (6 hours; approved related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category G
1 approved perspectives course other than home economics (3 hours; approved related course below will apply)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses

Economics C101, C102
Sociology C151
Psychology C101, 311
Chemistry 111
Mathematics F210
Anthropology G208

One of the following specialties—

1. Child and Family Development:
39 hours Home Economics including 101,105, 202, 304, 340, 350, 402 and 21 hours from 205, 300, 301, 306, 328, 332, 440, 441, 445
15 hours from Education: Counseling 401; Health, Physical Education, and Recreation 154, 302; Psychology 221; Social Work 315, 411

2. Foods and Nutrition:
39 hours Home Economics including 101,105, 202, 304, 340, 350, 402 and 21 hours from 206, 207, 305, 330, 331, 332, 401, 431
15 hours from Biology 208, 209, 210; Chemistry 122, 351, 352, 466

3. Management and Consumer Science:
39 hours Home Economics including 101,105, 202, 304, 340, 350, 402 and 21 hours from 104, 201, 206, 207, 301, 302, 303, 306, 311, 312, 328, 331, 332, 412
15 hours from Communication 101,110,260,340,345; Human Services 301, 405; Social Work 432, 450

2.0 average in all home economics courses

Minimum of 30 hours of 300 and 400 level courses

Electives to complete 128 hours

Typical course of study in home economics (B.S.): general

Home Economics Courses

101 Design Fundamentals (3)
A study of design as related to the individual and his or her environment. Review of the basic theories regarding principles and elements of design with emphasis on using design to solve utilitarian as well as aesthetic problems. Every semester.

104 Clothing Construction (3)
Proficiency based techniques and principles of garment construction. On demand. Lecture 2 hours, laboratory 2 hours.

105 Nutrition (3)
An introduction to nutrition with an integrated emphasis on the scientific, psychological, sociological, and economic aspects of nutrition. Impact of optimal nutrition on human development. Application of knowledge to the home and school situation. Every semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

201 Consumer Textiles (3)
Modern fibers, yarns, fabrics, and finishes for apparel and home furnishings. Trade practices and consumer problems. Spring semester and summer.

202 Orientation to the Home Economics Profession (1)
Introduction to home economics as an area of study focusing on basic concepts that form the foundation of the discipline. History, philosophy, and career options in home economics. Fall semester.
164—Home Economics

205 Family Relations: Preparation for Marriage (3)
A functional approach to understanding cultural and social influences on dating, love, mate selection, sex, and early marriage in America. Every semester.

206 Food Science (3)
Basic scientific concepts related to the selection, care, and preparation of foods; emphasis on chemical and physical properties and their interaction with environmental variables. Fall semester. Lecture 2 hours, laboratory 2 hours. Pre- or corequisites: Chemistry 121, 122.

207 Food Management and Marketing (3)
Nature of the American food market, marketing procedures, resource management, regulations in the food industry, consumer food technology, cultural and regional influences in food preference, menu development, and styles of service. Spring semester.

220 Interior Space Design (3)
Analysis of space needs for people. Techniques of analyzing floor plans. Drawing skills, symbols, and terminology used in interior design. Fall semester. Lecture 1 hour, laboratory 4 hours.

221 Interior Design Drafting (3)
A basic interior design drafting course. Includes symbols and techniques necessary to draw and understand a set of architectural plans. Spring semester. Lecture 1 hour, studio 4 hours. Prerequisite 220.

222 Color Systems (3)
Experimentation in color systems and their use in interior design. Analysis of psychological impact of color systems on people. Correlation of color scheme to total room design. Development of skills for various media and tools used in color planning. Fall semester, Lecture 1 hour, laboratory 4 hours. Prerequisite: 101.

270 Introduction to Restaurant Management (3)
Profile of the food service-for-profit industry. Management theories and techniques for restaurants. Trends in tourism. Emphasis on sales planning, promotions, regulations, special problems in recordkeeping, human relations, and legal aspects of the industry. Spring semester.

300 Child Development Lab (1)
Supervised observation in community agencies within appropriate age levels. On demand. Corequisite: 301.

301 Child Development (3)
Growth and development of infants and pre-school children within the familial setting. Review of current research relating to child rearing. Emphasis on parenthood and parenting skills. Directed experience in observation and participation in approved nursery and day care centers. On demand. Lecture 2 hours, laboratory 2 hours. Prerequisites: lower level child study course from psychology or the School of Education.

302 Clothing Construction (3)
A comprehensive study of clothing construction for educators and consumer consultants with emphasis on challenging problems in the use of modern fabrics, intricate design details, fitting, and pattern alterations. On demand. Lecture 2 hours, laboratory 2 hours. Prerequisites: 101, 104.

303 Interior Furnishings (3)
Study of design characteristics of historical furniture and interiors including the dominant, socio-economic influences on design development. An overview of the selection and use of interior furnishings. Fall semester.

304 Management for Effective Living (3)
The management process as applied to the home and personal environment. Use and development of human and material resources in relation to values and goals. Emphasis on time management, money management, and financial security. Every semester.

305 Advanced Nutrition (3)
Food nutrients in physiological and biochemical processes of the body. Emphasis on their relationship to health and human development. Fall semester. Prerequisites: 105 or equivalent; Chemistry 121, 122 or equivalent.

306 Housing and Energy Management (3)
Contemporary trends in housing. Basics of the selection and operation of household equipment. Emphasis on energy conscious life styles and optimum use of space. Fall semester.

311 Fashion Marketing (3)
An analysis of the world of fashion from designer to consumer; fashion trends, cycles, and retail distribution of fashion goods. Fall semester.

312 Fashion Fundamentals (3)
History of fashion from Egyptian period to the present. Includes aesthetic, economic, social, and psychological factors influencing fashion. Analysis of fashion fundamentals and trends with implications for fashion merchandising. Spring semester.

313 Merchandising (3)
Principles and practices of merchandising in relation to the retailing of apparel and textile products. Problem solving approach with the consumer as a major consideration in planning merchandise assortment, presentation, and promotion. Spring semester.

314 Fashion Sketching (3)
A study of sketching techniques used by fashion professionals. Includes proportion, movement, sketching garments, rendering fabrics, analysis of current fashion illustrations, and designing an illustration. Fall semester. Prerequisite: 101 or equivalent.

315 Elements of Interior Design (3)
Components of the interior basic to the art of interior design: wall treatments, floor coverings, window treatment, lighting, accessories, fabric selections, furniture arrangements. Design principles in putting the elements together. Patios and outdoor living furnishings. Energy conservation. Spring semester. Prerequisites: 101, 220, 222, or equivalent.

326 Interior Design Renderings/Presentations (3)
Advanced projects using creative design techniques in a variety of media as a means of visual communication and precise delineation. Fall semester. Lecture 1 hour, laboratory 4 hours. Prerequisites: 220, 221, 222, 315, or equivalent.

328 The Consumer and the Market (3)

330 Experimental Food Science (3)
Chemical and physical factors affecting food preparation, including experimental methods and individual experimentation in selected food problems. Spring semester alternate years. Lecture 1 hour, laboratory 4 hours. Prerequisites: 206, Chemistry 122, Biology 210.

331 Food & Nutrition: Issues and Policies (3)
Issues and policies of food and nutrition focusing on local, regional, national, and international concerns in relation to population, special group problems, cultural, and economic factors. Food safety issues. On demand.

332 Life Cycle Nutrition (3)
Application of the principles of nutrition in dietary management for meeting the physiological, psychological, and social needs of individuals and groups throughout the life cycle. Focus on the postulated nutrient requirements in various environments and economic levels. Spring semester. Prerequisite: 105 or knowledge of basic principles of nutrition.

340 Family Relations: Family Interaction (3)
Family relationships and alliances at each stage of the family life cycle. The family as a small group: role, status, and power interactions of spouses, siblings, and generations. Crisis and adjustments. Every semester.
350 Communication in Family and Consumer Services (3)
Responsibilities, ethics, and techniques for the professional in presenting information and materials to the public through radio, newspaper, television, and live performances. General areas of public relations. Every semester.

370 Fashion Advertising and Promotion (3)
Principles of sales promotion and analysis of the activities utilized by retail and wholesale firms to influence the sale of merchandise. Includes advertising, display, special events, publicity, fashion shows, and personal selling. Fall semester. Prerequisite: 312, 313 or equivalent.

390 Images of Western Living (3)
Perspectives of the near environment of Western people using a study of styles of architecture, furniture, fashion, and food patterns of selected historic periods. Exploration of the combination of economics, geographic, social, and cultural patterns which influenced or dictated their development. On demand.

401 Diet Therapy (3)
Application of diet designed for the prevention and treatment of diseases which are influenced by food intake. On demand. Prerequisite: 305.

402 Seminar (2)
Professional procedures in consumer and family related professions including trends, developments, challenges, opportunities, ethics, and business procedures. Every semester. Prerequisite: approval of the department.

403 Contemporary Furnishings (3)
A study of the characteristics of furnishings and interiors of the late nineteenth century and the twentieth century. Includes furniture designers, interior designers, design movements, and the effects of the Industrial Revolution and the consequent use of machinery in the production of furniture. Spring semester.

405 Home Economics Practicum (3)
Directed field experience in a selected professional area of home economics, including a weekly seminar and faculty supervision within an approved institution, agency, or business establishment in the Chattanooga area. Every semester. Prerequisite: senior status in home economics and approval of department.

412 Historic Textiles (3)
The development of textiles from ancient times to the twentieth century with emphasis upon fiber, color application, fabric construction, and design motifs particular to select countries or cultures. Includes conservation and display techniques appropriate for historic textiles. Spring semester.

413 Fashion and Retail Buying (3)
Principles of fashion buying, merchandise planning and inventory control. Includes procedures for calculating open to buy, stock turn, stock-sales ratio, and pricing formulas and techniques. Fall semester. Prerequisite: 313.

422 Interior Design Synthesis (3)
Development of creative ideas for the total room concept. Problems and projects to integrate the interior elements to achieve predetermined goals and effects for inhabitants: furniture layouts, simple perspective, furniture, accessory, and color selection. Projection of the psychological response of inhabitants to the total design. Spring semester. Lecture 1 hour, laboratory 4 hours. Prerequisites: 220, 222, 303 and 315 or equivalent, 326.

430 Food System Administration I (3)
Management, organization, and administration of food service in institutions. Fall semester.

431 Quantity Food Service (3)
Principles, methods, and techniques in planning, purchasing, production, and service of food in quantity; selection and use of equipment; and quality standards. Laboratory experiences in approved local institutions. Fall semester. Prerequisite: 430.

432 Food System Administration II (3)
A continuation of 430 with emphasis on production, manpower, facility, and financial planning in food service systems. Spring semester. Prerequisites: 430, 431.

440 Infant Development (3)
Explores the developmental needs which characterize the infant period. Reviews the research extant on infants in groups, and examines the interrelationships among various aspects of infant development in families and group care settings. Fall semester. Corequisite: 441.

441 Infant Day Care Practicum (1)
Supervised observation and participation in group care settings for children under Xh years. Fall semester. Corequisite: 440.

445 Parenting (3)
A study of the family system as it assumes the child rearing function and parents the developing child throughout the stages of the family life cycle. Special attention is given to parenting under "special" circumstances; i.e. divorced and single parents, stepparents, dual career parents, handicapped children, and others. Attention is given to interaction pattern research, the development of skills, and the reciprocal nature of parent/child relationships. Spring semester.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

498r Individual Studies (1-4)
On demand.

499r Group Studies (1-4)
On demand.

Human Services

Professor Printz, Head and Director of Field Placement
Assistant Professors R. Anderson, Osmus
Visiting Professor A. Baras

The human services programs are intended as basic preparation for entry level supervisory and managerial positions in public and private organizations which provide a broad spectrum of human and community services.

All students wishing to graduate with a major in human services must fulfill a writing requirement before they may be admitted to Human Services 470-471. The department’s writing requirement consists of several examples of previous assignments to be gathered in a portfolio and submitted to the departmental faculty for evaluation. Specific contents will be determined by a faculty adviser.

Human Services: Management (B.S.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)
Human Services: Allied Health Management (B.S.)

**General Education (see pages 25-27 for list of approved courses)**

**Category A**
2 approved courses in written communication in the English language (6 hours)

**Category B**
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each)

**Category C**
2 approved behavioral or social science courses other than human services (6 hours; approved related course below will apply)

**Category D**
1 approved physical or natural science course with laboratory (4 hours)

**Category E**
1 approved perspectives course other than human services (3 hours)

**Category F**
1 approved mathematics course (3 hours; approved related course below will apply)

**Category G**
1 approved perspectives course other than human services (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

**Major and related courses**

- Psychology C101 and Psychology 221 or 222
- 9 hours from one of the following cognate areas: economics, political science, psychology (above courses not applicable), sociology/anthropology (Behavioral science courses used for general education purposes may not satisfy this requirement, but behavioral science courses listed below may count)
- 3 hours from the following: Management 315 (required)
- 6 hours from the following: Management 330, 332; Sociology 317; Political Science 223
- 3 hours of research or statistics from Mathematics F210; Sociology 314; or equivalent approved course
- 21 hours human services including 101, 202, 310, 330, 405, 440, 450
- 9 hours practicum from Human Services 470 and 471 or 472, 474, and 471;
- Political Science 471r
- Completion of successful writing portfolio (see adviser)
- 2.0 average in all human services courses and Business Management 315

**Minimum of 30 hours of 300 and 400 level courses**

**Electives to complete 128 hours**

---

**Typical course of study in human services (B.S.): management**

**Human Services Courses**

**100 Principles of Effective Study (3)**
The study and development of reading and study skills that are required for college level study. Every semester. **Prerequisite:** approval of the instructor.

**101 Human Perspectives (3)**
A multidisciplinary introduction to behavioral science findings which examines the interaction between social systems and human development. Assumptions concerning Americans, the systems in which they live, and the resulting impact on social policy decisions are explored. Every semester.

**199r Special Projects (1-4)**
Individual or group projects. Every semester. **Prerequisite:** approval of the coordinator of human services. Maximum credit 4 hours.

**202 Human Services Organizations in Urban Society (3)**
A study of aspects of the human services system that have evolved as a response to the characteristics of urban society, and the organizations which function as components of the system. (Formerly 102.) Spring semester.
300 Perspectives on Work and Professions (3)
A multidisciplinary examination of the social, ethical, political, and psychological environment of work and the professions. Emphasis on the historical development of the meaning and effect of work on the organization and development of various work structures and processes. Every semester.

301 Social Policy and Social Change (3)
A cross-disciplinary examination of basic theories of social change. Analysis of social indicators as determinants of social policy for effecting social reform in the United States. Fall semester.

330 Program Planning and Evaluation (3)
Models of program planning and evaluation; emphasis on knowledge leading to basic competence in design and monitoring of human services programs. Spring semester.

405 Interpersonal Skills Laboratory (3)
A supervised laboratory experience designed to enhance the student’s development of communication skills, interpersonal functioning, and the understanding of group processes. Every semester. Prerequisites: 6 hours of behavioral science.

440 Human Services Supervision (3)
Concepts and techniques appropriate to supervision in human services and governmental agencies and organizations. Fall semester. Prerequisite: Management 315 plus one of the following: Management 330, 332; Sociology 317; Political Science 223; or approval of instructor.

450 Seminar in Human Services Administration (3)
Administrative procedure, processes, planning, and decision-making in human services and governmental settings. Spring semester. Prerequisite: 440 or approval of instructor.

470 Full-time Field Instruction (7)
Supervised internship in a human services setting related to a student’s academic and career goals. Admission must be obtained from the director of field placement at least 90 days prior to enrollment in the course. In addition, Human Services: Management majors must present evidence of a minimum 2.0 overall grade point average, fulfillment of writing requirement, and completion of Human Services 440 before enrolling in Human Services 470. Spring semester. Prerequisites: 440, approval of the coordinator of field placement, and senior standing; pass writing requirement. Corequisite: 471r (2 hours). Graded on a satisfactory/no credit basis. Maximum 7 hours total in field placement.

471r Field Seminar (1-2)
Concurrent integrative seminar emphasizing issues common to field experience setting. Spring semester. Two hours maximum. Prerequisite: Pass writing requirement. Corequisite: Human Services 470, 472, or 474.

472, 474 Part-time Field Instruction (4) (3)
Spring semester. See Human Services 470 description. Corequisite: Human Services 471r (1 hour). Maximum 7 hours total in field placement.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
Every semester.

498r Individual Studies (1-4)
Every semester.

499r Group Studies (1-4)
On demand.

Military Science

Reserve Officers Training Corps (ROTC)
Professor Seiler, Head
Assistant Professors: Bell, Pike, Rodell, Rogers, Sherman
Staff: Garland, Polk, Wicker

The primary objective of the Army Officer Education Program at UTC is to develop and commission men and women who have the qualification and potential for service as officers in the United States Army, the Army National Guard, or the Army Reserve.

Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. Through study and application of the principles of leadership and management, the military science student develops self-confidence, self-discipline, and other desirable qualities that will contribute to success in any career. The advanced course offers the opportunity for a commission as a second lieutenant in the U.S. Army, the Army National Guard, or the Army Reserve. Advanced course students receive a $100/month subsistence allowance up to 20 months (total $2,000).

Scholarships
See under the financial aid section of the Bulletin.

Books and Uniforms
All books, uniforms, and materials needed for participation in the military science program are furnished at no cost to the student.

Education Delays
Newly commissioned officers may delay their entry on active duty in order to pursue graduate studies in a recognized field of study.

Four-Year Program
The four-year program consists of a basic course and an advanced course. Each course normally requires four academic semesters to complete. With approval of the professor of military science, the basic course can be completed in two academic semesters.

Basic Course
The basic course consists of Military Science I (freshman year) and Military Science II (sophomore year). During this course, the student examines Army organization and management with emphasis on the development of basic leadership skills. Leadership fundamentals learned in this course contribute to continued studies in the advanced course. Course completion requires both class and leadership laboratory attendance. Leadership laboratory consists of activities designed to develop basic leadership skills.
Advanced Course

The advanced course consists of Military Science III (junior year) and Military Science IV (senior year). Three hours in class, three hours of physical training (PT), and a leadership laboratory are required each week. In leadership laboratory, the student develops intellectual insights through frequent seminars.

Two-Year Program

The two-year program consists of the last two years (the advanced course) of the regular four-year program. The program is open to selected students who have two years of academic study remaining at UTC or any other accredited institution. Applications are accepted from December to April. Selectees must have either completed three years of junior ROTC, have the required amount of prior military service, or completed the six-week ROTC basic camp. Applicants must meet the same enrollment criteria as those students who enter the advanced course after completing the regular basic course.

Six-Week ROTC Basic Camp

ROTC basic camp is a six-week training course conducted at Fort Knox, Kentucky, during the summer vacation period. Cadets earn over $600.00 plus room and board. In addition, participants may compete for two-year, full tuition college scholarships. Successful completion of the camp qualifies the cadet for entry into the advanced program. No service obligation is incurred for attendance.

Requirements for Enrollment

The general requirements for enrollment in the basic course program are:
1. Be a citizen of the United States and of good moral character.
2. Be not less than 17 years of age or have parental consent.
3. Be physically and medically qualified.
4. Be enrolled as a full-time student at UTC or accredited, cross-enrolled institution in the Chattanooga area.
5. Execute a loyalty oath and not be a conscientious objector.
6. Meet scholastic screening requirements.
7. Be selected for enrollment by the department head.

Obligations

A student incurs no obligation to the military by participating in freshman or sophomore military science courses. The courses offer a cadet the opportunity to evaluate the prospect of military science and also to qualify for the advanced program beginning the junior year. When a cadet enters the advanced program, he or she is obligated to accept a commission as a second lieutenant in the United States Army Reserve (USAR) upon graduation.

In addition, participants may compete for two-year, full tuition college scholarships. Successful completion of the camp qualifies the cadet for entry into the advanced program. No service obligation is incurred for attendance.

Military Science Courses

101 Fundamentals of Military Science I (3)
Organization, missions, and functions of the Army; ROTC orientation; historical development of the Army; introduction to management of military resources; practical experience in rappelling, orienteering, and rifle training. Fall semester. Prerequisite: academic juniors; seniors require prior approval of department head.

102 Fundamentals of Military Science II (3)
A study of the role of the Army in the nation's defense; an introduction to the U.S. counterpart, the Russian soldier; practical experience at the advanced level in marksmanship, rappelling, and drill and ceremony. Spring semester. Prerequisite: Russian language proficiency plus 1 year of Russian language. Falls semester. Senior/junior. Prerequisite: academic juniors; seniors require prior approval of department head.

201 American Military Profile and the Professional Soldier (3)
A comprehensive look at today's Army and the role of the Army officer as developed through a study of the American military institutions, policies, activities, and traditions. Fall semester. Prerequisite: academic juniors; seniors require prior approval of department head.

202 Military Management and Leadership Skills (3)
Analytical leadership skills and management techniques. Emphasizing problem-solving, directional bearing oriented toward the development of proficiency in advanced map reading, and fundamentals of survival. Spring semester. Prerequisite: academic juniors; seniors require prior approval of department head.

300 ROTC Basic Camp (4)
Six weeks of training at Ft. Knox, Kentucky. Travel pay and salary stipend provided through the Military Science Department. The student is not obligated to any military service. Camp graduates are eligible to attend
Social Work

Associate Professor D. Williams, Acting Head
Associate Professor T. Brown
Assistant Professor C. Berz

Admission Policies

Enrollment in the social work program is limited to one hundred majors; application alone will not insure admission. Students pursue the Bachelor of Social Work degree. Students wishing to enter the social work program should designate presocial work as their major. Once this declaration has been made the student will be assigned to social work faculty for advisement. Presocial work majors are required to fulfill the following for admission to the social work program:

1. Earn a 2.0 cumulative grade point average in 45 semester hours which include the following prerequisite courses:
   - Biology 208, 209
   - Sociology 151 or Human Services 101
   - Psychology 101
   - Political Science 101
   - Economics 101
   - Anthropology 208
   - Social Work 150
   - Social Work 204
   - Social Work 205
2. Earn a minimum 2.6 grade point average in Social Work 150, 204, and 205.
3. Make candidacy known 60 days prior to the semester for which admission is sought by filing formal application.
   a. Obtain and complete application form from the office of the head of the Social Work Department.
   b. Submit written self-assessment,
   c. Write autobiography.
   d. Indicate subscription to the Social Work Code of Ethics.
4. Complete personal interview with a social work faculty member.
5. The Social Work Admissions and Continuation Committee (SWACC) reviews application and makes recommendations. The decision of the SWACC will be given to the applicants in writing. Those applicants granted admission will be assigned an academic adviser.
6. Upon acceptance in the department and completion of Social Work 300 students will file for field placement. All field placement assignments are made by the director of field instruction.

In the event that more qualified students submit applications than there are vacancies, the Social Work Admissions and Continuation Committee reserves the right to apply additional screening procedures.

Continuation Standards

The committee will review cases involving the academic, emotional, ethical, and professional fitness of social work students and will make recommendations regarding continuation in the department.

When majors complete the necessary requisites and present a grade point average of 2.5 in the major, they should submit written application to the SWACC for admission to the Advanced Social Work Methods course (Social Work 404) and Field Instruction II (Social Work 470). The application for both courses should be filed at least 90 days prior to the beginning of the semester in which these courses will be taken.

The student will be notified in writing of the SWACC’s recommendations. All recommendations of the SWACC are subject to review by the head of the Social Work Department, who may grant exceptions when deemed desirable or necessary. A grade point average of 2.5 in the complete major will be required for graduation.

Social Work (B.S.W.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses: one from humanities, one from fine arts, and one from either (3 hours each; approved related course below will apply)

Category C
2 approved behavioral or social science courses other than social work (6 hours; approved related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category G
1 approved perspectives course other than social work (3 hours; approved related course below will apply)

Health and Physical Education 021 plus one additional semester physical education activity
Major and related courses

170—Social Work

Major and related courses

46 hours social work core including 150, 204, 205, 300, 301, 304, 305, 370, 371, 400, 404, 405, 470, 471

43 hours cognate courses including Psychology C101 and one additional 3 hour course in psychology, Sociology C151 or Human Services C101, Anthropology C208, English 277 or 279 or 300, Home Economics 328, Biology 208 and 209, Sociology 305, Psychology 308, Theatre and Speech 309, Philosophy B221 or 322 or B425, Mathematics F210, Political Science C101, and Economics C101

A minimum of 3 hours of 300 and 400 level courses Electives to complete 128 hours.

Typical course of study in social work (B.S.)

Any required cognate course that meets general education requirements may be used to fulfill both the major requirements and general education requirements.

Minor

Social Work Courses for the Aged:

19 hours of Social Work courses including 150, 160, 205, 431, 432, 434. Social Work majors may not elect this minor.

Social Work Courses

100 Volunteerism and Civic Responsibility (2)

102 Volunteer Community Experience (1-2)

150 Introduction to the Field of Social Welfare (4)

An introduction to the field and orientation to selected social welfare professions. An examination of the history and recent trends in social work and related fields. A minimum of 45 hours of observation and supervised volunteer service in appropriate settings required. Every semester.

160 Sign Language with the Deaf (3)

A beginning analysis of the effect of deafness on communication and introduction of sign language for communication with the deaf. Every semester.

199r Special Topics (1-4)

Individual or group projects. On demand. Prerequisite: approval of department head. Maximum credit 4 hours.

204 Explorations in Human Relations (3)

A systematic examination and analysis of social and psychological phenomena occurring in human transactions. Development of essential knowledge of affective behaviors, relations with others, and the dynamics of communication processes. Every semester.

205 Social Welfare Policy and Delivery System (3)

Survey of social welfare delivery systems with emphasis on policy description, formation, and analysis. Attention given to historical development and present structure. Every semester. Prerequisite: 150. Credit not allowed in both Human Services 303 and Social Work 205.

206 Referral Services (3)

A study of the referral process with emphasis on the development, analysis, and utilization of informational and resource systems. On demand.

210 Comparative Studies in Minority Family Life (3)

A systematic examination of variations in the family through a comparative analysis of select racial and ethnic minority families. Every semester.

211 Social Functioning of the Black Family (3)

An examination of the black family as a social system and the impact of the larger society upon that system. Prevailing myths, distortions, and generalizations about the black family will be explored. On demand.

250 Charity in Western Civilization (3)

An historical examination of the structure and philosophy of man’s response to the needy in Western civilization. Every semester.

300 Basic Skills for Social Work Practice (4)

Fundamental skills and theory for practice in the field of social work. Emphasis upon communication skills, informational systems, organizational structure, policy, and their impact upon role execution. Every semester. Not open to pre-social work students.

301 Human Behavior—Environmental Systems (3)

Examination of the various levels of human growth, development, and behavior with a focus on environmental systems. Every semester. Prerequisites: Anthropology 208, Psychology 101, Biology 208 and 209. Not open to pre-social work students.

304 Introduction to Social Work Methods (3)

An introduction to the methods, procedures, value orientations, and functions common to social work practice. Consideration of the relationship of such methods and procedures to crises in social functioning and human development. Fall semester. Prerequisites: 204, 205, 300. Corequisites: 370, 371.

305 Legal Issues in Social Work (3)

Identification and analysis of common legal issues and problems encountered by the professional social worker. Fall semester. Prerequisite: English 277 or 279 (or former 200) or 300.
315 Child Welfare Services and Policies (3)
An examination of contemporary issues and questions in the field of child welfare with emphasis upon child abuse and neglect (both institutional and parental), child care, health, adoptions, and services to the unwed parent and the out-of-wedlock child. On demand.

320 Introduction to Social Group Work Practice (3)
An introduction to theoretical frameworks for using social groups as mediums to bring about individual and group social treatment; identification and examination of group development and processes with specific reference to principles for social group work practice. On demand.

370 Field Instruction I (4-6)
An opportunity for application and integration of method theory through supervised experiential learning in a social agency or setting. A minimum of 12 hours per week in such setting and a 1-hour integrative seminar required. Fall semester. Prerequisites: 204, 205, 300. Corequisites: 304, 371.

371 Field Seminar I (2)
An integrative seminar emphasizing issues common to social work theory, methods, and field experience. Fall semester. Prerequisites: 204, 205, 300. Corequisites: 304, 370.

400 Social Welfare Policy Research (3)
An examination of the role of research in social policy; its functions in identifying needs, describing and evaluating programs, analyzing processes, and predicting results. A major project integrating course concepts and content with field experience required. Spring semester. Prerequisite: 205, Mathematics 210. Corequisites: 404, 470, 471.

401 Introduction to Social Work Practice in the Health Field (3)
Designed to introduce the student to the health care system. Focus will be upon the effect this system has for social work. On demand. Prerequisite: 301; other students admitted by written permission of instructor.

404 Advanced Social Work Methods (3)
Additional opportunities for students to refine and extend their skill in social work intervention. Examination of theories of intervention and implications for practice. Attention given to practice in selected specialized settings. Spring semester. Prerequisites: 300, 301, 304, 370, 371; Mathematics 210. Corequisites: 400, 470, 471.

406 Social Values and Ethics in Social Work Practice (3)
An in-depth study of the consequences of prejudice for social work practice with the disadvantaged, minorities, and culturally different. Not open to pre-social work students. Fall semester.

411 Social Work and Family Dysfunction (3)
An examination of problems experienced by dysfunctioning families in contemporary American society and the role of social work in relation to these problems. Specific areas of concentration will include emotional and physical abuse (both child and adult), child neglect, divorce, changing values relating to sex roles and patterns of heterosexual and homosexual relationships. On demand.

415 Child Abuse (3)
An examination of dynamics in abusing families with emphasis on causal models. Analysis of the child welfare system, public agencies, the courts, and role of law enforcement. Developmental delays and deviations in personality resulting from abuse will be evaluated from a psychiatric perspective. Discussion of model systems for emergency intervention and treatment. On demand.

420 The Social Welfare System: Its Impact Upon Women (3)
A critical analysis of the social welfare system's impact upon women; analysis of their roles as consumers and providers of social welfare services. On demand.

421 Crisis Counseling: Women (3)
Designed to introduce the student to crisis counseling. Focus will be on the special crises that occur in women's lives. On demand.
School of Nursing

Professor Haase, Dean
Professor M. Jackson
Associate Professors Andersen, Charles
Assistant Professors Anderson, Butterfield, Ch'ien, Chitty, DeBarge, Lemaire, Norwood, M. Trimpey

Prenursing students must meet the same admission requirements as all other applicants to the University. Two units of high school algebra, geometry, and two units of laboratory science, preferably biology and chemistry, are desirable.

Enrollment in the nursing major is limited. Admission to the University does not insure acceptance into the nursing major. Academic advising for all students declaring prenursing or nursing majors must be done by a member of the nursing faculty. Students desiring admission or readmission to the nursing major must submit written application on forms available from the faculty in the School of Nursing. Candidates for Nursing 205 must make formal application by March 15 of the year preceding the January enrollment. Readmission or transfer students should submit written application three months prior to the desired enrollment date.

Admission to the Nursing Major
The committee for admissions has the responsibility for selecting those students to be admitted or readmitted to the nursing major. A limited number of students will be admitted to the first nursing course. Candidates will be considered for admission conditional to meeting the following requirements:

1. Completion of 45 semester hours including the following prerequisite courses with no grade lower than a C and a minimum grade point average of 2.5 on a 4.0 point scale at UTC.
   - Chemistry 121, 122
   - Biology 191, 208, 209, 210
   - Sociology 151 or 215
   - English 121, 122
   - Psychology 101, 221
   Students who have credit for chemistry, microbiology, or physiology which was received 10 years prior to admission to the nursing major must either repeat or test out of these courses.
2. Personal interview with a member of the nursing faculty.
3. Physical and emotional characteristics appropriate for nursing practice.
4. Science competency—the nursing major includes a strong biophysical science component; therefore, individuals who have repeated any science course will be considered on a selected basis.

The faculty in the School of Nursing reserve the right to make exceptions to the admission requirements. Written requests for exceptions to admission requirements, supported by evidence of extenuating circumstances, will be considered by the committee for admissions after an official application for admission has been filed.

Preference will be given to applicants with a composite ACT score of 18 or higher who have completed their prerequisite courses at UTC. Students with a lower ACT score may be required to take certain additional courses and/or diagnostic testing as prescribed by the dean of the School of Nursing.

Candidates will receive written notice of the committee’s decision by May 30 of each year. Individuals who are not accepted for a given class and who desire to be considered for the next class must submit another formal application form for admission.

Acceptance of transfer and substitute credits to meet requirements of the curriculum will be determined by the school faculty. Transfer students must meet the same standards as other students in the program.

In addition to regular education costs, nursing students must meet the following expenses: uniforms, standardized test fees, yearly liability insurance, and transportation (clinical experience in nursing is obtained in a variety of health care settings in local and outlying areas. Students are individually responsible for transportation to these agencies).

Upon successful completion of the baccalaureate program in nursing, graduates will be eligible to write the National Council of State Boards of Nursing Licensure Examination. Persons previously convicted of a felony may not be permitted to write the exam.

Continuation Standards
In view of the nature of nursing and the fact that maintenance and quality of human life may be adversely affected by individuals providing nursing care, the following standards have been adopted and are applied by the nursing faculty.

1. To progress in nursing, students are required to: a) make a minimum grade of C in all nursing and required courses (exclusive of electives); b) maintain a cumulative grade point average of 2.0; and c) maintain an active liability insurance policy.
2. A student who transfers into the nursing program at UTC will be required to repeat any nursing or other required courses which are not considered comparable to the UTC curriculum or in which the grade earned is lower than a C.
3. Students may be allowed to repeat only one nursing course one time at the discretion of the committee for admissions and/or the dean of the School of Nursing. Any student who is enrolled in a course beyond the midterm point and who then withdraws will be considered to have taken the course and must apply for readmission.
4. To insure preparation of a safe practitioner, any student who fails to make satisfactory progress in the clinical portion of a nursing course will not be permitted to continue in the clinical area.

5. Students are evaluated in a specific time sequence in all clinical courses. Students will participate in this procedure which includes a written self evaluation.

6. In determining the final grade in a clinical nursing course, both the theory and the clinical components will be evaluated on the basis of previously written criteria developed for each course.

7. Students must acquaint themselves with and meet fully the University standards entitled "Maintenance of Ethical and Professional Standards of the Nursing Profession." These standards are published in the UTC Student Handbook.

If in the judgment of an instructor there is reason to question the emotional or physical condition of a student or the safety or quality of nursing care provided, the instructor has the right and obligation to exclude the student from the clinical area. The incidental or reason underlying such an action shall be brought to the attention of the nursing faculty on or before the next class day. The student will receive written notification of the faculty's recommendation. Should the decision be unacceptable to the student, he or she may appeal to the dean, and thereafter in accordance with the University policy.

Nursing (B.S.N.)

General Education (see pages 25-27 for list of approved courses)

Category A
2 approved courses in written communication in the English language (6 hours)

Category B
3 approved courses, one from humanities, one from fine arts, and one from either (3 hours each)

Category C
2 approved behavioral or social science courses (6 hours; related courses below will apply)

Category D
1 approved physical or natural science course with laboratory (4 hours; approved course below will apply)

Category F
1 approved mathematics course (3 hours; approved related course below will apply)

Category G
1 approved perspectives course (3 hours)

Health and Physical Education 021 plus one additional semester physical education activity

Major and related courses
2.5 average required for admission to the nursing major with no grade lower than C in any required prerequisite course
12 hours behavioral sciences including: Psychology C101, 221, 223; Sociology C151 or C215
23 hours mathematics, natural, or applied science courses including: Biology 191, 208, 209, 210; Chemistry D121, 122; Mathematics F210
Home Economics 105 or 305
Nursing 100, 204, 205, 314, 315, 316, 317, 318, 319, 320, 321, 414, 415, 416, 417, 418, 419, 420, 421

128 credit hours required for graduation

Curriculum revision is in process: Some change in sequence, hours, and GPA may occur. Revised and approved November 1983.

*Cumulative GPA of 2.5 is required for admission to Nursing 205.

Nursing Courses

100 Introduction to Nursing (3)
Theoretical introduction to concepts used in nursing practice. Required for pre-nursing students. Every semester.

199r Special Projects (1-4)
Individual or group projects. On demand. Maximum credit 4 hours.

204 Concepts of Health Awareness (3)
A bio-social approach to health awareness and a positive life-style. Required for pre-nursing students. Every semester.
174—Nursing

205 Nursing Process (3)
Introduction to basic nursing practice skills and abilities based on needs in health and illness. Spring semester. Prerequisite: admission to nursing major. Corequisite: Psychology 223.

300 Pharmacology (3)
An overview of pharmacology including drug classifications, action, use, and nursing implications and drug interactions. Legislation pertinent to drug control included. On demand.

314 Psychosocial Nursing Concepts (3)
Interpersonal, behavioral, and communication theories related to clients experiencing psychosocial difficulties. Every semester. Prerequisite: 205. Corequisite: 315.

315 Psychosocial Nursing Care (4)
Application of interpersonal, behavioral, and communication theories and concepts to clients experiencing psychosocial difficulties. Every semester. Laboratory: 12 clock hours. Prerequisite: 205. Corequisite: 314.

316 Pathophysiology (3)
Study of the causes of disease and the structural and functional alterations that occur in the illness process. Every semester. Prerequisite: 205 or permission of dean.

317 Physical Assessment (3)
Physical examination and health history presented in the context of nursing practice. Every semester. Prerequisite: 205 or permission of dean.

318 Adult Nursing Concepts I (3)
Concepts necessary to provide acute secondary care interventions for individual adult clients with problems relating to fluids, food, elimination, and safety and security. Every semester. Prerequisite: 205. Corequisites: 319, 320. Pre- or Corequisites: 316, 317.

319 Adult Nursing Concepts II (3)
Concepts necessary to provide acute secondary care interventions for individual adults with problems related to basic needs for oxygen, sensory-motor, and reproductive functions. Every semester. Prerequisite: 205. Corequisites: 318, 320. Pre- or Corequisites: 316, 317.

320 Adult Nursing Care (4)
Application of concepts of acute secondary care for individual adult clients with problems relating to food, fluid elimination, safety and security, oxygen, sensory motor, and reproductive functions. Every semester. Laboratory: 12 hours. Prerequisite: 205. Corequisites 318, 319.

321 Nursing Research (3)
Beginning knowledge and techniques in nursing research. Every semester. Prerequisites: 205 or permission of dean; Mathematics 210.

418 Family Nursing Concepts I (3)
Study of the assessment and care of families during the childbearing cycle. Every semester. Prerequisites: completion of 300-level nursing courses. Corequisites: 419, 420.

419 Family Nursing Concepts II (3)
Study of health problems that affect children and their families. Every semester. Prerequisites: completion of 300-level nursing courses. Corequisites: 418, 419.

420 Family Nursing Care (4)
Application of concepts of family nursing. Every semester. Laboratory: 12 hours. Prerequisites: completion of 300-level nursing courses. Corequisites: 418, 419.

421 Leadership in Nursing (3)
Concepts related to administration and supervision in the delivery of health care services. Fall semester. Prerequisites: completion of 300-level nursing courses.

422 Theories in Nursing (3)
Introduction to theory development as a basis for nursing practice and research. On demand. Prerequisites: completion of 300-level nursing courses or permission of dean.

470 Oncology Nursing (3)
In-depth study of the status of cancer as a major health problem. Treatment modalities used for intervention and interruption of the neoplastic process are studied, emphasis on utilizing the nursing process in treating oncology patients. On demand.

495r Departmental Honors (1-3 hours per term, 4 hours for the two terms)

497r Research (1-4)
On demand.

499r Group Studies (1-4)
On demand.
Other Educational and Public Service Units

Academic Computing Services
Lloyd Davis, Director

The computing facilities available on the UTC campus include two Hewlett-Packard 3000 computers, both used solely for instruction and research. There are currently seven computer terminal clusters supporting over 80 video, hard copy, and graphic terminals. The clusters are located in the major classroom complexes and in the library for easy student access. Additionally, UTC is a remote job entry station of the University of Tennessee Computer Center network. Available is an IBM 370/3081-D. Turnaround averages less than one minute.

UTC's Office of Academic Computing is a major strength for the support and effectiveness of computing at UTC. Academic Computing deals only with instruction and research. UTC particularly espouses the enrichment of the curriculum with computer related experiences. To that end a continual and diligent search is made to secure quality educational software that is relevant to UTC's academic programs.

Cadek Conservatory of Music
Peter E. Gerschefski, Director

Functioning as an auxiliary of the Cadek Department of Music, the Cadek Conservatory has as its goal the education of music students of all ages who are not enrolled at the University level. The conservatory offers applied music courses in virtually all instruments and voice in a curriculum which includes theory, chamber music, and other ensemble activity. This comprehensive curriculum has special courses for young children including Suzuki flute, harp, violin, and piano, Kinder-Keyboard and Music and Movement. There is also a course of study designed to give strong precollege preparation to the student intending to pursue a major in music in college.

The conservatory is an accredited institutional member of the National Association of Schools of Music. The faculty ranges from full-time conservatory teachers to public school music teachers who serve part-time. The faculty includes many University music faculty and other prominent performing musicians as well.

For further information, please consult the Cadek Conservatory of Music Bulletin, or call 755-4624.

Center of Excellence for Computer Applications
Lloyd Davis, Director

In 1984, UTC instituted a Center of Excellence for Computer Applications (CECA). This interdisciplinary center draws upon faculty and staff from areas such as engineering, computer science, business, education, sciences, mathematics, and academic computing. The center focuses on a broad spectrum of computer applications of particular use to the Chattanooga region. The applications include large scale power distribution systems, Computer Aided Design (CAD) and Manufacturing (CAM), engineering modeling, graphics, software engineering, operations research, spread sheet analysis, and educational technology systems.

New equipment purchased for CECA includes an IBM 4381 system located in Grote 124. Grote 219 has been developed as a dedicated cluster and is equipped with fifty-five terminals.

This center is to be a major regional resource for Southeastern Tennessee. The emphasis of software development and applications, engineering design via computers, and support for K-12 use of microcomputers is unique in Tennessee and the Southeast.

Center for Economic Education
William H. Peterson, Director
Lucien Ellington, Assistant Director

As an educational facility of UTC, the Probasco Chair of Free Enterprise and its associated Center for Economic Education design and implement research projects and educational programs to educate UTC students, secondary and elementary school teachers, and the general public, including the clergy, media, employees, and business executives, about basic economic principles and the unique features of the free enterprise system.

Division of Continuing Education
Jerry Weeks, Dean

The Continuing Education Division develops, coordinates, and supervises continuing education and public service programs offered by The University of Tennessee at Chattanooga.

Evening College

The Division of Continuing Education works with the academic deans, directors, and department heads of the faculty.
University to provide a balanced schedule of credit course offerings to meet the needs of individuals who wish to complete degree programs through evening study. The division publishes a catalog each semester listing all evening credit courses offered on campus as well as off campus.

The Continuing Education Office is open from 8 A.M. to 5 P.M. Monday through Friday. Persons requiring assistance or in need of the evening study catalog may come to the office or call during these hours.

Off-campus Credit Courses

Off-campus UTC credit courses have been offered at numerous locations including Cleveland and downtown Chattanooga. Persons interested in having UTC credit courses taught at an off-campus location should contact the Division of Continuing Education for further information.

Individualized Education Program

The Individualized Education Program was launched as an official unit of The University of Tennessee at Chattanooga in August 1972. The primary purpose of the program is to make the University more accessible to adults who wish to enter or return to college. Specific objectives of the Individualized Education Program are 1) to inform adults in the community about the educational opportunities available at The University of Tennessee at Chattanooga; 2) to assist adults in making the transition into college life; and 3) to coordinate the process of awarding academic elective credit to adults for their previous work and training experience.

The University, however, is under no obligation to award academic elective credits. Each application will be evaluated on its individual merit and the faculty may awarded credit accordingly.

Adults are encouraged to contact the Division of Continuing Education for orientation and assistance related to admission procedures, registration, and academic requirements if they are considering entering or returning to the University.

Noncredit Courses

Noncredit courses dealing with a wide variety of topics and interests are offered through the Division of Continuing Education and are open to the general public. These noncredit courses are divided into three major categories: professional development, arts and sciences, and personal interest. Programs on management development, music, art, literature, foreign languages, recreation, engineering, real estate, home economics, and consumer education are offered throughout the year. Noncredit course formats range from one-day workshops or seminars to 46-week courses conducted during the day or evening at a variety of campus and off-campus locations.

Subject to the approval of the Continuing Education Council, participation in many noncredit courses is recognized by the awarding of individual Continuing Education Units (CEUs). One CEU corresponds to ten hours of participation in an approved program and is particularly valuable to persons desiring professional development and in-service training. Individual transcripts recording CEUs are maintained in the UTC Division of Continuing Education.

The professional staff of the Division of Continuing Education welcomes suggestions for new and different noncredit courses. Special emphasis is placed on designing programs that meet the expressed needs of the greater Chattanooga area population and on delivering these courses at times and locations most convenient for those who indicate an interest.

Conferences and Institutes

As part of the division's community service and professional development activities, the staff provides assistance to business, industry, government, social service agencies, and professional organizations for the purpose of developing and coordinating conferences and institutes which focus on topics of concern to the particular group. Groups as small as ten or those numbering four hundred or more can be accommodated in the University's varied facilities. If requested, CEUs (as discussed above) may be awarded to conference or institute participants.

In-plant Service

The Division of Continuing Education draws on the wide and diverse resources of UTC's professional faculty to offer both credit and noncredit programs to business, industry, and government in Chattanooga and the surrounding areas. Most of these programs are tailored to the specific needs of the sponsoring company and are carried out in the company's facilities. The division also assists in making arrangements for faculty members to act as consultants whose task is to define problem areas and design courses which respond to particular technical or training needs.

Senior Citizens and Disabled Persons

Free Audit Program

Persons who are over 60 years of age or totally disabled may audit courses at The University of Tennessee at Chattanooga without charge in any class where there is space available beyond that needed for students who pay fees. Some courses which have special prerequisites or conditions are not available under this option. In addition, persons who are over 65 or totally disabled may, if admitted, enroll in credit courses for a fee of $7.50 per semester hour to a maximum of $75 per semester. The Division of Continuing Education assists the senior citizen or disabled individual by providing orientation to the campus, completing admission forms, and registering the individual for the course(s) selected. Persons interested in participating should contact the Division of Continuing Education rather than applying for admission at the UTC Admissions Office.

FACE Program for Life Transitions

The FACE Program is designed to assist individuals in adjusting to the diverse transitions which periodically occur in their lives; i.e., family, adult, career, educational, thus the name FACE. Toward this end the staff works not only with individuals but with groups and area employers to provide counseling services, workshops, and training programs related to personal development, career assessment, pre-employment training, and educational opportunities.
Cooperative Education

The cooperative education program at UTC offers undergraduate students a high quality education in addition to the opportunity to undertake obligations and responsibilities of professional employment. This program is designed to 1) provide practical experience which relates academic studies to industry and business requirements, 2) give the student a better understanding of human relations in industry, 3) assist the student financially, and 4) provide business and industry with employees motivated by career incentive.

The program is offered in the curricula of the Schools of Business, Education, Engineering, Human Services and the College of Arts and Sciences. A student must have completed the freshman year to be eligible for admission to the co-op program. Co-op students are expected to attend school full time during their first and last year in their academic program. They will alternate a semester of work and a semester of school during the three years between their first and last year in the program. Another option is parallel periods of work and study during the same semester.

Media Services

Media Services is the special video production unit of UTC. Media Services was created to provide broadcast quality video productions for UTC and for other educational and nonprofit organizations in the Chattanooga area and throughout the Southeast. It features high quality video equipment, an experienced staff, and a mobile production van.

WUTC

WUTC is a 50,000 watt public radio station. The station currently originates many programs from its Cadek Hall studios. Included are local public affairs, musical, and news-related programming.

WUTC, FM 88.1, provides a 24-hour-a-day broadcasting service. It is an affiliate of the National Public Radio Network and of the American Public Radio Network.

Other Services

Additional services provided by the Division of Continuing Education include 1) furthering public awareness of University activities through the UTC radio program “On Campus”; 2) representing The University of Tennessee Statewide Division of Continuing Education in providing correspondence, radio, and television instruction; 3) arranging for courses offered by other UT campuses to be taught at UTC; 4) providing faculty and facilities for programs conducted by The University of Tennessee’s Institute for Public Service; 5) participating in the U.S. Army Project Ahead Program; and 6) coordinating the Listener’s Program whereby individuals considering Tennessee’s Institute for Public Service; 5) participating in the U.S. Army Project Ahead Program; and 6) coordinating the Listener’s Program whereby individuals considering entering or returning to the University may listen in.

Adult Services Center

Helen Arthur, Coordinator

The Adult Services Center, located on the first floor of the University Center, is open from 12 P.M.-8 P.M. Monday through Thursday, 12 P.M.-5 P.M. Friday, and 9 A.M.-12 P.M. Saturday for the convenience of students who work full time. The center provides individualized advisement, registration, fee collection, and other University services for adult part-time students. Workshops and seminars related to educational opportunities and transitions are conducted regularly for individuals currently enrolled or individuals who are interested in either entering or returning to college.

Tutoring, through Special Services, is available in the Adult Services Center in the evenings and on Saturdays during the spring and fall terms.

Division of Special Services/Upward Bound

Paul Beasley, Director

The Division of Special Services, located in 212 Race Hall, provides free academic support services to all UTC students. Specific services include:

Principles of Effective Study—A three-hour study skills class, HSRV 100, is offered each semester. The course covers techniques for effective study and goal setting. As an integral part of this course, the Study Skills Lab staff diagnoses and prescribes an individualized, self-paced reading improvement program. All enrollees must have the prior approval of the Special Services staff.

Writing Skills—Small group and individual tutoring sessions in grammar and composition are offered, with particular emphasis on teaching students the skills of revising and editing their own papers.

Reading Improvement—Lab classes assist students in improving reading strategies and rate, vocabulary usage, and spelling ability.

Tutoring—Graduate and undergraduate students with at least a 3.0 GPA provide individual tutoring in academic subjects on the freshman and sophomore levels.

Special Workshops—A schedule of study skills workshops for students on academic probation is offered each semester. In addition, reading and writing workshops are offered to students who wish to prepare for graduate school enrollment.

Upward Bound is a college preparatory program which provides eligible high school students with academic and cultural activities that improve their chances of entering and successfully completing postsecondary education. Students are recommended by their high school guidance counselors and are then selected by the Upward Bound staff. Upward Bound offices are located in 213 Race Hall.
Library

Joseph Jackson, Dean

The University library’s holdings include approximately 1,000,000 pieces of material, of which more than 330,000 are books and periodicals. The combined resources of the University Library, the Chattanooga Hamilton County Bicentennial Library, and other local libraries make more than 1.4 million volumes available to University students. Annually, the University Library subscribes to approximately 3,000 periodicals. In addition, students, staff, and faculty may use the collections and services of all libraries of The University of Tennessee system.

The general collections for support of the graduate programs are augmented by a variety of special collections which are also housed in the main library. Audiovisual equipment and materials, including video cassettes, microforms, films, and curriculum resources, are also located in the library.

Library Fines

Books borrowed from the library’s regular collections are subject to an overdue fine of 20 cents per day up to a limit of $5 for each book. For lost books borrowers are assessed the replacement cost for each book, which includes the list purchase price of the book plus a processing charge of $15.

Reserve items are subject to an overdue fine of 25 cents per hour up to a limit of $5 for each item.

If fines for overdue books and charges for lost books are not paid as required, the borrowers will be blocked from use of the library and not permitted by the business office and registrar (on this or other campuses of the University) either to register or to receive course credits and transcripts until the outstanding obligations are fully cleared.

Youth Educational Assessment & Research Center

Janice Davis, Coordinator

The Youth Educational Assessment & Research Center (YEAR) is located on the fourth floor in Hunter Hall. This center was established primarily to serve as a teaching/learning laboratory for School of Education preservice and graduate teacher education programs. Additionally, the center provides the campus with a demonstration model for experiencing training in the multidisciplinary approach to psycho-educational observation, assessment, and program planning for youth.

While the center serves the various teacher preparation programs, youths within the Chattanooga metropolitan area are accepted as clients upon application by their parents, legal guardians, or school system. For additional information concerning the services provided by the YEAR Center, please contact the coordinator of the center or make an appointment for a conference by calling 755-4175 or 755-4368.
Faculty Emeriti

George Warren Averitte (1953)  Professor Emeritus of Health and Physical Education
B.S., University of Alabama, 1940; M.A., University of Mississippi, 1950; Ed.D., Columbia University, 1953.

Albert Bowman (1962)  Professor Emeritus of History

Glenn LeRoy Bushey (1962)  Professor Emeritus of Education
B.S., Shippensburg State College; M.A., Columbia University; Ed.D., Temple University.

Reuben W. Holland (1946)  Professor Emeritus of French
A.B., 1929, M.A., Emory University.

George Coleman Connor (1959)  Cuvely Professorship

Arthur J.D. Cook (1968)  Professor Emeritus of Management

Elizabeth Landress Dalton (1964)  Professor Emerita of Education

Doris Doe (1956)  Professor Emerita of Voice
Studied with Frank La Forge, Michael Raucheisen and Johannes Heidenriech (Berlin), and Artur Bodanzky.

Thomas Edwin Geraghty (1960)  Professor Emeritus of Art

Gail Shipman Hammond (1946)  Professor Emerita of Art
B.A.E., 1943, M.A.E., 1945, Art Institute of Chicago.

Reuben W. Holland (1946)  Professor Emeritus of French
A.B., 1929, M.A., 1931, Emory University.

Karel Hujer (1946)  Cuvely Professor Emeritus of Physics and Astronomy
D.Sc, University of Prague, 1932.

Norbert Koch (1947)  Professor Emeritus of Engineering
B.Ed., Wisconsin State University, 1937; M.S., The University of Tennessee, Knoxville, 1940; Ed.D., University of Missouri, 1951.

Edwin Samuel Lindsay (1924)  Cuvely Professor Emeritus of English
A.B., 1919, A.M., 1921, Ph.D., 1923, University of North Carolina.

James Weston Livingood (1937)  Cuvely Professor Emeritus of History
B.S., Gettysburg College, 1932; M.A., 1934, Ph.D., 1937, Princeton University.

Myron Stanley McCoy (1948)  Guerry Professor Emeritus of Physics
A.B., University of Georgia, 1932; M.A., University of North Carolina, 1934; Ph.D., Ohio State University, 1937.

Robert C. Mildram (1964)  Professor Emeritus of Philosophy and Religion
Ph.B., University of Vermont, 1935; B.D., Andover-Newton Theological School, 1938; M.A., 1943, Ph.D., 1949, Yale University.

Paul L. Palmer (1925)  Cuvely Professor Emeritus of Education and Psychology
A.B., 1921, A.M., 1922, Northwestern University.

Sarah Phillips (1943)  Professor Emerita of Office Administration
A.B., Western Kentucky State College, 1930; M.A., Columbia University, 1938.

Arthur Pietner (1937)  Juilliard Professor Emeritus of Music
Mus. Bac, 1942, Mus. Doc, 1951, University of Toronto; State Conservatory of Music; Wurzburg, Germany, 1919-1923; Fellowship Juilliard Graduate School of Music, 1932-1936.

Dorothy Hackett Ward (1938)  Guerry Professor Emerita of Theatre and Speech
A.B., University of Chattanooga, 1928; Speech Diploma, Cadak Conservatory, 1932; M.F.A., Yale University, 1946.

Art

George Ayers Cress (1951)  Cuvely Professor

Stephen S. LeWinter (1975)  Assistant Professor

Anne Lindsey (1978)  Associate Professor

Maggie M. McMahon (1985)  Visiting Assistant Professor

Allison H. Sauls (1985)  Visiting Assistant Professor

Robert Bruce Wallace (1978)  Associate Professor
A.B., University of Chattanooga, 1954; M.F.A., Florida State University, 1969.

E. Alan White (1972)  Associate Professor

Biology

Ross M. Durham (1971)  Associate Professor
B.S., 1962, Ph.D., 1968, University of California, Los Angeles.

Maurice E. Edwards (1971)  Associate Professor

John Richardson Freeman (1959)  Professor

Richard Edwin Garth (1969)  Professor

Charles Henry Nelson (1969)  Professor

Gene S. Van Horn (1971)  Professor
A.B., Humboldt State College, 1963; Ph.D., University of California, Berkeley, 1970.

Nicholas Gene Vredevel (1964)  Professor
A.B., Calvin College, 1951; M.S., 1955, Ph.D., 1965, Michigan State University.

Barbara Ann Walton (1970)  Associate Professor

Adjunct Biology

Barbara Albert (1982)  Professor
B.S., Tennessee Technological University, 1968; M.T., Holston Valley Community Hospital, 1968.
Linda T. Collins (1983)  

Philip N. Harper (1983)  

Barbara Rowencak (1982)  

Chemistry

Gregory J. Grant (1980)  
Associate Professor  
B.S., 1974, Ph.D., 1980, Georgia Institute of Technology.

Benjamin Harrison Gross (1964)  
Guerry Professor, Department Head  
B.S., University of Chattanooga, 1952; M.S., 1954, Ph.D., 1956, The University of Tennessee, Knoxville.

Henry Douglas Kutz (1978)  
Associate Professor  
B.S., Union College, 1968; Ph.D., University of Notre Dame, 1973.

John August Lynch (1975)  
Associate Professor  
B.S., St. Peter’s College, 1970; Ph.D. Pennsylvania State University, 1976.

Robert Lewis McNeely (1969)  
Professor  

Robert C. Mebane (1983)  
Assistant Professor  
A.B., Pfeiffer College, 1972; Ph.D Duke University, 1981.

Gail M. Meyer (1982)  
Assistant Professor  
B.A., The University of Tennessee at Chattanooga, 1974; M.S., University of Minnesota, 1976.

Thomas R. Rybolt (1981)  
Assistant Professor  
B.S., Furman University, 1976; M.S., 1979, Ph.D., 1981, Georgia Institute of Technology.

Thomas G. Waddell (1971)  
Alumni Distinguished Service Professor  
B.S., University of Wisconsin, Madison, 1966; Ph.D., University of California, Los Angeles, 1969.

Adjunct Chemistry

Thomas A. Orofino (1984)  
B.S., Kent State University, 1952; Ph.D., Cornell University, 1956.

Communication

Robert W. Dardenne (1985)  
Assistant Professor  

Cynthia De Riemer (1976)  
Assistant Professor  
B.A., St. Mary’s University, 1971; M.Ed., The University of Tennessee at Chattanooga, 1978.

Peter K. Pringle (1981)  
Assistant Professor, Department Head  
B.A. (Hons.), University of London, 1963; M.A., University of Florida, 1966; Ph.D., Ohio University, 1969

S. Kittrell Rushing (1982)  
Assistant Professor  
B.S., 1971, M.A., 1976, Memphis State University; Ph.D., University of Mississippi, 1982.

English

Craig Wallace Barrow (1970)  
Professor  

Frances K. Bender (1970)  
Assistant Professor  

Robert C. Fulton III (1970)  
Professor, Honors Director, Humanities Coordinator  

Arlie E. Herron (1961)  
Professor  
B.S., University of Alabama, 1950; M.A., University of Georgia, 1959.

Richard P. Jackson (1976)  
UC Foundation Associate Professor  

Visiting Associate Professor  
B.A., Miami University of Ohio, 1974; M.A., 1976, Ph.D., 1979, University of Maryland.

Robert J. McNutt (1985)  
Visiting Instructor  

Eileen M. Meagher (1980)  
Associate Professor, Composition Director  

Kent Nelson (1985)  
Visiting Assistant Professor  

Bruce W. Pitt (1985)  
Visiting Instructor  

Paul Ramsey (1966)  
Guerry Professor, Poet-in-Residence  

Michael Reynard Richards (1961)  
Professor  

Robert Reed Sanderlin (1969)  
Professor, Head Coach  

Edgar McDowell Shawen (1970)  
Associate Professor  
B.A., University of Virginia, 1966; M.Phil., 1969, Ph.D., 1972, Yale University.

John Douglas Tinkler (1967)  
Professor  

John Eccles Trimpey (1979)  
Professor, Dean, College of Arts and Sciences  
B.A., Ball State University, 1964; M.A., University of Arkansas, 1966; Ph.D., Ohio University, 1968.

Jeannette M. Vallier (1970)  
Visiting Instructor  

Robert Jean Vallier (1970)  
Associate Professor  

Roberta S. Ward (1979)  
Visiting Instructor  

Thomas Clayton Ware  (1967)  
Professor, Department Head  

Sally Burton Young (1982)  
Associate Professor  

Adjunct English

Carolyn P. Adcock (1980)  
Robert Allen Stanley (1984) Assistant Professor, French and German

Felicia Sturze (1977) Associate Professor, French and German

Lewis A.M. Sumberg (1972) University Professor

Geosciences

David L. Anderson (1977) Associate Professor, Geosciences and Environmental Studies

Richard E. Bergendab (1968) Professor, Geology
A.B., Lafayette College, 1948; M.S. Lehigh University, 1950; Ph.D., Pennsylvania State University, 1964.

Habte Giorgis Churnet (1980) Associate Professor, Geology
A.B., Haile Selassie University, 1969; M.S., Leeds University; Ph.D., The University of Tennessee, Knoxville, 1979.

Robert Gary Litchford (1965) Associate Professor, Environmental Studies and Biology
B.S., Georgia Southern College, 1960; Ph.D., Rice University, 1965.

Patricia Ann Bytnar Perfetti (1969) Professor and Department Head, Environmental Studies and Biology

Robert Lake Wilson (1955) Professor, Geography and Geology
A.B., Wheaton College, 1948; M.S., State University of Iowa, 1950; Ph.D., The University of Tennessee, Knoxville, 1967.

History

Tyler Deierholf (1963) Associate Professor

Jane Worth Harbaugh (1957) Professor
A.B., 1964, M.A., 1965, Purdue University; Ph.D., Louisiana State University.

H. Larry Ingle (1967) Professor

Russell J. Linnemann (1970) Professor
A.B., Grinnell College, 1961; Ph.D., University of Wisconsin, 1967.

Ronald Ours Moore (1960) Associate Professor, Department Head
A.B., College of William and Mary, 1950; M.A., Harvard University, 1951; Ph.D., University of Virginia, 1960.

Richard B. Rice (1981) Associate Professor

James M. Russell (1970) Associate Professor

William J. Wright (1969) Professor
A.B., 1964, M.A., 1965, Stetson University; Ph.D., Ohio State University, 1969.
### Mathematics

- **Mayme Kay Banasiak** (1985)  
  Mathematics Learning Center Coordinator  
  B.S., North Carolina State University, 1972.

- **Linda R. Bennett** (1984)  
  Instructor  

- **James Stanley Byrd** (1980)  
  Assistant Professor  
  B.S., 1973, M.S., 1974, Mississippi State University; Ph.D., Florida State University, 1985.

- **Betsy Darken** (1979)  
  Assistant Professor  
  B.A., Kirkland College, 1972; M.A., University of Michigan, 1974; Ph.D., 1984, The University of Tennessee, Knoxville.

  Professor  

- **Marcia K. Fitzmaurice** (1983)  
  Instructor  
  B.A., St. Louis University, 1971 M.A.T., Emory University, 1976.

- **Kay L. Griswold** (1983)  
  Instructor  

- **Joseph W. Hatcher** (1969)  
  Associate Professor  

- **John W. Jayne** (1969)  
  Professor  
  B.A., 1951, M.A., 1956, Vanderbilt University; Ph.D., Georgia Institute of Technology, 1966.

- **Ross P. Kindermann** (1985)  
  Associate Professor  

- **Stephen W. Kuhn** (1961)  
  A.B., University of Albuquerque, 1967; Ph.D., Florida State University, 1962.

- **DeWayne S. Nymann** (1970)  
  Professor  
  B.A., University of Northern Iowa, 1957; M.A., 1959, Ph.D., 1964, University of Kansas.

- **Edward Ralph Rozema** (1973)  
  Associate Professor  
  A.B., Calvin College, 1967; M.S., 1969, Ph.D., 1972, Purdue University.

- **Eugene P. Schlereth** (1978)  
  Associate Professor  
  B.S., Marquette University, 1970; M.S., Southern Illinois University, 1974; M.S., 1976, D.Sc. 1979, Washington University (St. Louis).

- **Ronald L. Smith** (1980)  
  Associate Professor  
  B.S., Auburn University, 1969; M.S., University of California, Riverside, 1970; M.S., 1976, Ph.D., 1976, Auburn University.

- **Sherri L. Urcavich** (1980)  
  Mathematics Learning Center Coordinator  

- **Voreata S. Waddell** (1979)  
  Instructor  

  Assistant Professor  
  B.S.Ed., Indiana University of Pennsylvania, 1963; M.N.S., Math University of Oklahoma, 1970

### Adjunct Mathematics

- **Billy Lester Abel** (1977)  
  Mathematics Learning Center Coordinator  
  B.S., Nicholls State University, 1971; M.Ed., the University of Tennessee at Chattanooga, 1977.

- **Dorothy Grega Beach** (1984)  
  B.S., The University of Tennessee, Knoxville, 1959; M.S., The University of Tennessee at Chattanooga, 1969.

- **Nancy G. Caldwell** (1980)  
  B.A., Middle Tennessee State University, 1974; M.Ed., The University of Tennessee at Chattanooga, 1980.

- **William P. Carrell** (1984)  

- **Sheila D. Jones** (1984)  
  Mathematics Learning Center Coordinator  
  B.S., The University of Tennessee at Chattanooga, 1983.

- **Gail L. Nevins** (1979)  

- **Leonidas Smith** (1956)  
  B.A., University of Chattanooga, 1942.

- **Dennis Ronald Stewart** (1985)  
  B.S., Tulane University, 1970; M.S., University of Maryland, 1974.

- **George O. Taylor Jr.** (1969)  
  B.S., University of Chattanooga, 1958; M.S., Michigan State University, 1960; Ph.D., Georgia Institute of Technology, 1969.

### Music

- **Mario Abril** (1973)  
  Professor  
  A.B., University of Albuquerque, 1967; Ph.D., Florida State University, 1971.

- **Zelman Bokser** (1983)  
  Assistant Professor  

- **Walker L. Breland** (1972)  
  Professor  
  B.A., Furman University, 1958; M.M., 1959, Ph.D., 1974, Indiana University.

- **Earl Coleman Jr.** (1982)  
  Assistant Professor  

- **Monte Coulter** (1980)  
  Assistant Professor  

- **Reene S. Cox** (1976)  
  Associate Professor  
  B.M., Oberlin Conservatory of Music, 1974; M.M., University of Michigan, 1976; Ph.D., Ohio State University, 1983.

- **Anthony J. D’Andrea** (1982)  
  Associate Professor,  
  Director of Bands  

- **Glenn W. Draper** (1968)  
  Professor  
  Director of Choral Activities  
  B.M., Indiana University, 1951; M.M., Southern Methodist University, 1956.

- **Peter Edwin Gerschefski** (1971)  
  Alumni Distinguished Service Professor,  
  Department Head  
  B.A., Yale University, 1958; M.A., University of Southern California, 1959; Ph.D., Florida State University, 1962.

- **Danette Littleton** (1977)  
  Associate Professor  
  On leave 1985-86  

- **Earl B. Miller** (1957)  
  Associate Professor  
  B.M., University of Chattanooga, 1949; M.A., Columbia University, 1957; studied with Beryl Rubinstein, Cleveland Institute of Music, 1952.

- **David L. Pennebaker** (1971)  
  Associate Professor  
  A.B., University of Chattanooga, 1960; M.M., Florida State University, 1961.

- **Arthur Rivituso** (1968)  
  Professor  

- **Jocelyn Sanders** (1980)  
  Associate Professor  
  On leave 1985-86  
  B.M., Eastman School of Music, 1979; M.M., Northwestern University, 1980.
184—Faculty

James Stroud (1976)  
Professor,  
Director of Orchestras  

Edgar Stryker (1973)  
Associate Professor  
B.M., Stetson University, 1949; M.A., Florida State University, 1951; M.A., University of North Carolina at Chapel Hill, 1963.

Rebecca Tate (1982)  
Assistant Professor  

Peter M. Temko (1974)  
Professor  

Jean Thomas (1984)  
Visiting Assistant Professor  
B.S., 1975, M.M., 1979, The University of Tennessee at Chattanooga.

Donald Robert Zimmer (1978)  
Associate Professor  
B.M., Eastman School of Music of the University of Rochester, 1975; M.M., Yale University School of Music, 1978.

Adjunct Music

J. James Greasy (1980)  

Janet Hale (1985)  

Janet Sump (1980)  
B.S., The University of Tennessee at Chattanooga, 1974; M.M., Converse College, 1977.

Philosophy and Religion

Herbert W.L. Burhenn Jr. (1970)  
Professor, Department Head  
A.B., Johns Hopkins University, 1966; M.Phil., 1969, Ph.D., 1970, Yale University.

Dimis Taylor Dowse (1965)  
Professor  

Thor Hall (1972)  

Donald S. Klinefelter (1969)  
Professor  

John Frederick Phillips (1980)  
Associate Professor, Classics and Philosophy and Religion  

Donald Robert Weisbaker (1965)  
Professor  

Physics

Joel Lamar Davis (1979)  
Associate Professor  
B.S., 1970, M.S., 1972, Ph.D., 1976, Georgia Institute of Technology.

Eric Trent Lane (1967)  
Associate Professor  

Robert Marlowe (1985)  
Assistant Professor  
B.A., Vanderbilt University, 1971; M.Ed., University of Maryland, 1974; Ph.D., University of Cincinnati, 1983.

Randolph Stuart Peterson (1985)  
Associate Professor  

Grayson Howard Walker (1978)  
Professor, Department Head  
B.S., University of North Carolina, 1961; M.S., University of Illinois, 1962; Ph.D., Georgia Institute of Technology, 1969.

Adjunct Physics

Li-Hwa Huang (1980)  
B.S., Taiwan Normal University, 1965; M.S., Western Michigan University, 1968.

Political Science

David M. Brodsly (1971)  
UC Foundation Professor  

Richard D. Bush (1985)  
Assistant Professor  
B.A., Augustana College, 1970; Ph.D., 1983, University of Illinois at Urbana.

David W. Cullerth (1970)  
Adolph S. Ochs Professor, Government  

Robert H. Swansbrough (1971)  
Professor, Department Head  

Richard L. Wilson (1971)  
Associate Professor  
B.A., University of Chicago, 1966; Ph.D., Johns Hopkins University, 1971.

Psychology

Michael D. Biderman (1972)  
Associate Professor  

Edward J. Green (1971)  
Guerry Professor  

Ralph W. Hood Jr. (1970)  
Professor  
A.B., University of California, Los Angeles, 1964; M.A., California State College of Los Angeles, 1966; Ph.D., University of Nevada, 1968.

Irene Nicholls Ozbek (1977)  
Assistant Professor  

Pamela T. Reid (1979)  
Associate Professor  

Assistant Professor  

Paul J. Watson (1977)  
Associate Professor  

Adjunct Psychology

George J. Carhart (1985)  
B.S., Seton Hall University, 1950; M.S., The University of Tennessee at Chattanooga, 1981.

Ronald J. Morris (1979)  

Susan Anissa (Mantooth) O'Hara (1985)  
Sociology and Anthropology

Edward E. Cahill (1975)  Professor
B.S.Sc, St. Mary’s College, 1952; M.A., University of Notre Dame, 1957; Ph.D., Catholic University of America, 1965.

Lawrence M. Cox (1979)  Associate Professor

P.K. Geeverghese (1982)  Associate Professor

N. Honerkamp (1980)  Assistant Professor

Clive Kileif (1970)  Professor
A.B., Harvard University, 1966; Ph.D., Rice University, 1970.

Lyn W. Miles (1976)  UC Foundation Associate Professor

Bart Carter Pate (1986)  Associate Professor

Leland W. Robinson (1973)  Associate Professor

Richard G. Thurston (1970)  Associate Professor
B.A., North Western University, 1946; M.A., 1948, Ph.D., 1957, University of California, Los Angeles.

Adjunct Sociology and Anthropology

Murl Dirksen (1982)

Robin L. Smith (1982)

Theatre and Speech

Fred D. Behringer (1980)  Associate Professor

Robert Duffy (1984)  Assistant Professor

Jim G. Lewis (1969)  Associate Professor

William M. Smotherman (1980)  Assistant Professor

David W. Wiley (1975)  Associate Professor

Adjunct Theatre

Suzanne B. Carter (1982)
B.S., University of Chattanooga, 1961; M.M., College Conservatory of Music, 1963.

John R. Miller (1980)
B.A., Emory University, 1967; Ph.D., University of Georgia, 1974.

Sydney L. Roberts (1980)
B.I.A., University of Texas at Austin, 1980.

School of Business Administration

Accounting and Finance

M.J. Albin (1984)  Assistant Professor

John M. Alvis (1985)  Assistant Professor

William T. Bertin (1984)  Assistant Professor

John G. Fulmer Jr. (1977)  Professor
A.B., Wofford College, 1966; Ph.D., University of Alabama, 1970.

Thomas A. Gavin (1971)  Associate Professor
B.S., Seton Hall University, 1966; M.B.A., University of Missouri, 1968; D.B.A., The University of Tennessee, Knoxville, 1982; C.P.A.

Jack A. Hale (1977)  Professor

Rayford John McLaurin (1955)  Associate Professor
B.S., Bowling Green Business University, 1948; M.B.A., University of Alabama, 1951.

Bernard M. Orqua (1985)  Assistant Professor
B.S., Far Eastern University, 1959; M.B.A., Texas Southern University, 1977.

Patricia Ann Pauley (1984)  Assistant Professor
B.A., University of Missouri at St. Louis, 1974; M.B.A., The University of Tennessee at Chattanooga, 1979; A.B.D., University of Houston, 1984.

Neil F. Riley (1984)  Assistant Professor

Winnie D. Riley (1984)  Assistant Professor
B.S., McNeese State University, 1975; Masters of Accountancy, University of Mississippi, 1981; A.B.D., University of Mississippi, 1984.

Marilyn Willis (1976)  Associate Professor

Adjunct Accounting and Finance

Robert Anderson (1983)
B.A., Illinois Wesleyan University, 1968; M.S., Illinois State University, 1974; C.P.A.

Warren M. Barnett (1985)

Betsy Benderman (1983)
B.S., The University of Tennessee at Chattanooga, 1975; M.B.A., The University of Tennessee, Knoxville, 1976; C.P.A.

E. Tylor Claggett (1982)
B.S., University of Southwestern Louisiana, 1969; M.B.A., University of West Florida, 1972; Ph.D., University of Houston, 1979.

Cam Conway (1984)
B.S., 1984, University of Denver, 1949; C.P.A.

James M. Erwin (1982)

Durwood Harvey (1970)
B.B.A., University of Minnesota, 1947; M.S., The University of Tennessee, Knoxville, 1948; C.P.A.

David Larson (1969)
B.S., University of Minnesota, 1967; M.B.A., The University of Tennessee, Knoxville, 1969; C.P.A.

Lynda G. Scott (1982)
B.S., 1972, M.B.A., 1983, The University of Tennessee at Chattanooga; C.P.A.
186—Faculty

Economics

Phillip E. Giffin (1977) Professor B.A., University of Texas, Austin, 1966; M.A., Texas Technological University, 1968; Ph.D., The University of Tennessee, Knoxville, 1972.

Eugene B. Hutchinson (1982) Assistant Professor B.S., 1965, Ph.D., 1979, University of Virginia.

Alan Rabin (1977) UC Foundation Professor B.A., Hamilton College, 1969; Ph.D., University of Virginia, 1977.

Adjunct Economics

Dan E. Birch (1977) B.A., Brigham Young University, 1970; M.S., 1972, Ph.D., 1977, Purdue University.

Wilbur A. Bush (1984) B.S., Norfolk State University; M.A., Rutgers University.

Gary Jackson (1979) B.A., Florida Atlantic University, 1971; M.A., 1972, Ph.D., 1979, University of Massachusetts.

Alan Larson (1973) B.A., University of Nebraska, 1968; Ph.D., Kansas State University, 1976.

Lloyd C. Nace (1983) B.S., Miami (Ohio) University, 1974; M.A., Vanderbilt University, 1979.

Management

Mohammad Ahmadi (1979) Henry Hart Professor B.S.M.E., Mississippi State University, 1968; M.B.A., Nicholls State University, 1970; Ph.D., North Texas State University, 1976.

Lawrence P. Ettlin (1976) Marvin Edward White Professor, Department Head B.B.S., Cleveland State University, 1967; M.B.A., Kent State University, 1968; Ph.D., University of Nebraska, 1974; C.P.I.M.

Adjunct Management

A. Ben Forrester (1979) B.S., North Georgia College, 1965; M.S., Auburn University, 1967.

David R. Parks (1979) B.S.I.E., Purdue University, 1974; M.S.I.E., The University of Tennessee, Knoxville, 1978.

Marketing

A. Richard Casavant Jr. (1977) Alan S. Loebbaum Professor, Department Head B.A., Emory University, 1964; M.B.A., University of Pennsylvania, 1966; Ph.D., Georgia State University, 1976.

Irvin D. Reid (1979)  
**John Stagmier Chair or Economics, and Business Administration;**  
School of Business Administration Dean  

Walter F. Williams (1981)  
Assistant Professor  

**Adjunct Marketing**

William M. Carter (1975)  

B.A., University of Georgia, 1972; M.B.A., The University of Tennessee at Chattanooga, 1983.

Joan M. Gutmann (1985)  

Michael A. McMahan (1985)  
J.D., The University of Tennessee, Knoxville, 1968.

Gail D. Smith (1985)  
B.S., The University of Tennessee at Chattanooga, 1983.

**Office Administration/Business Education**

Judy C. Nixon (1975)  
Associate Professor, Department Head  

Judy F. West (1981)  
Associate Professor  
B.S., 1971, M.B.Ed., 1973, Middle Tennessee State University; Ph.D., Georgia State University, 1976.

**Adjunct Office Administration/Business Education**

Bobbye G. Dedman (1977)  

Nena Leigh Lasky (1984)  

**School of Education**

Ronald G. Area (1978)  
Assistant Professor, Education; Development Vice-Chancellor  

Dan Quarles (1977)  
Associate Professor, Education; Director UTK/UTC Graduate Center  

Charles M. Renneisen (1970)  
Associate Professor, Education; Student Affairs Dean  

**Adjunct Education**

Shirley J. Cronkhite (1982)  
B.S., 1972, M.S., 1980, Indiana State University.

Barbara Fulmer (1983)  

Philip J. Gross (1974)  
B.S., Middle Tennessee State University, 1953; M.Ed., The University of Tennessee at Chattanooga, 1971.

Linda K. Helton (1978)  
B.S., North Texas State University, 1967; M.Ed., Texas Woman’s University, 1970.

Lucille S. Lewis (1977)  
B.S., University of Chattanooga, 1964.

Cynthia E. Messinger (1982)  
B.S., The University of Tennessee, Knoxville, 1975; M.Ed., The University of Tennessee at Chattanooga, 1980.

Cynthia J. Norris (1982)  

Marjorie Richelson (1981)  
B.S., Tulane University, 1967; M.Ed., Emory University, 1969.

Suzanne Rushworth (1983)  

Kathryn A. Simmons (1980)  

**Curriculum and Instruction**

Eugene C. Bartoo (1978)  
Associate Professor, Department Head  

Bernard Wayne Benson (1970)  
UC Foundation Professor  
B.S., 1962, M.S., 1966, Northern Illinois University; Ph.D., University of Iowa, 1970.

Thomas E. Bibler (1970)  
Professor  

William L. Butterfield (1967)  
Professor  
B.A., Ohio Northern University, 1952; B.S., Garrett Theological Seminary, 1955; Ph.D., Ohio State University, 1967.

Anne J. Hunt (1974)  
Associate Professor  

Douglas E. Kingdon (1972)  
Associate Professor  

Sandra L. Snyder (1981)  
Assistant Professor  

Barbara Ann Woford (1975)  
Assistant Professor; Director of Affirmative Action  

**Educational Administration and Supervision**

M. Daniel Baker (1976)  
Associate Professor, Student Teaching Director  

Lloyd D. Davis (1970)  
VC Foundation Professor, Academic Computing Services Director  
A.B., Ohio Northern University, 1956; M.S., University of Miami, 1959; Ed.D., The University of Tennessee, Knoxville, 1974.

William Hales Jr. (1969)  
Professor  
B.S., Mankato State College, 1957; Ph.D., University of New Mexico, 1970.

Charles Monroe Hyde (1968)  
Guerry Professor, Education; Graduate Studies and Research Associate Provost  

Colbert W. Whitaker (1981)  
Associate Professor, Department Head  
Health, Physical Education and Recreation

Gene Ezell (1974) Associate Professor

W. Leroy Fanning (1971) Professor
B.A., Southeastern Louisiana University, 1964; M.S., The University of Tennessee, Knoxville, 1966; Ed.D., University of Georgia, 1972.

Leon Ford (1964) Associate Professor

Anton David Jadin (1979) Instructor

Robert C. Norred (1977) Professor

William A. Norris (1981) Assistant Professor
B.S., 1973, M.S., 1975, University of Akron; Ph.D., Ohio State University, 1981.

Ann Shea (1983) Instructor
B.A., Florida State University, 1977; M.A., Texas Woman's University, 1978.

Roy Stinnett (1967) Professor

Steven A. Underwood (1982) Instructor

Adjunct HPER

Educational Psychology and Special Education

Earl E. Davis (1978) Professor
B.S., University of Southern Mississippi, 1956; M.Ed., University of Texas at Austin, 1963; Ed.D., University of Alabama, 1972.

Janice R. Davis (1978) Assistant Professor
Youth Educational Assessment & Research Center Coordinator

Paul DeVivo (1970) Professor
B.S., Northeastern University, 1958; M.S., Kansas State Teachers College, 1961; Ed.D., Ball State University, 1970.

W. Rodney Fowler (1976) Professor
B.S., Lock Haven State, 1965; M.A., California State University, San Diego, 1968; Ed.D., Ball State University, 1971.

George B. Helton (1975) Associate Professor
B.S., 1966, M.S., 1967, North Texas State University; Ph.D., University of Texas, Austin, 1972.

Nancy Ligon (1984) Assistant Professor
B.S., University of Chattanooga, 1967; M.S., The University of Tennessee, Knoxville, 1969; Ph.D., Texas Woman's University, 1980.

Ted L. Miller (1978) UC Foundation Associate Professor

Barbara A. Ray (1991) Assistant Professor

Caryl A. Taylor (1978) Assistant Professor

School of Engineering

Merl Baker (1982) Professor
B.S.E., University of Kentucky, 1945; M.S.M.E., 1948, Ph.D., 1952, Purdue University.

Terrance M. Carney (1970) Professor

Ronald B. Cox (1970) Professor

Wayne H. Clifford (1984) Associate Professor

James R. Cunningham (1973) Professor
B.S., Louisiana State University, 1963; M.E., 1970, Ph.D., 1972, University of Florida; P.E.

Praaksh R. Damshala (1981) Associate Professor
B.E., Osmania University (India), 1969; M.S., University of Miami, 1972; Ph.D., Georgia Institute of Technology, 1978; P.E.

Ahmed H. Eltom (1984) Assistant Professor
B.S., University of Khartoum, 1973; M.S., 1982, Ph.D., 1984, Clarkson University.

Jan M. Evans (1981) Assistant Professor

Edwin P. Foster (1979) Professor
B.A., 1964, M.S., 1966, Ph.D., 1974, Vanderbilt University; P.E.

William Q. Gurley (1979) Professor
B.S., University of North Carolina, Charlotte, 1967; M.S., 1970, Ph.D., 1973, North Carolina State University; P.E.

Max Lavoyd Hailey (1984) Associate Professor
B.S., The University of Tennessee, Knoxville, 1964; Ph.D., Texas Tech University, 1972; P.E.

James E. Henry (1980) Associate Professor
B.A., B.S.Ch.E., Rice University, 1964; M.A., 1966, Ph.D., 1970, Princeton University; P.E.

James W. Hiestand (1985) Assistant Professor

Byron M. Jones (1985) Associate Professor
B.S., Purdue University, 1953; M.S., Marquette University, 1974.
Michael H. Jones (1975) Chattanooga Manufacturers Association Professor, Freshman Engineering/Advising Director

Charles V. Knight (1979) Professor
B.S., 1963, M.S., 1966, Ph.D., 1971, The University of Tennessee, Knoxville; P.E.

Gary H. McDonald (1985) Assistant Professor

Edward H. McMahon (1976) Associate Professor
B.S., Rutgers University, 1965; M.E., New York University, 1969; New York University, 1974.

Clifford R. Parten (1985) Assistant Professor
B.A., Texas Tech University, 1963; B.S.E.E., University of Houston, 1965; M.S.E.E., 1972, Ph.D., 1979, Texas Tech University.

Henry M. Sendaula (1979) Associate Professor

Virgil A. Thomason (1975) Professor, Laboratories/Facilities Planning Director
B.S., Case Institute of Technology, 1960; M.S., 1971, Ph.D., 1977, The University of Tennessee, Knoxville; P.E.

Donald E. Todd (1979) Professor
B.S., 1959, M.S., 1964, Ph.D., 1968, Texas A & M University; P.E.

J. Eric Schonblom (1974) LC Foundation Professor
S.B., 1956, S.M., 1958, Massachusetts Institute of Technology; Ph.D., University of Florida, 1974; P.E.

Robert H. Wynn (1981) Associate Professor
B.S., 1962, M.S., 1966, Tennessee Technological University; Ph.D., Virginia Polytechnic Institute, 1969; P.E.

Adjunct Engineering

Charles N. Adams Jr.
B.S.M.E., Tennessee Tech, 1962; P.E.

Charles L. Ballentine
B.E., Youngstown College; M.S., The University of Tennessee, Knoxville.

Subir Banerji
M.S.I.E., Kansas State University, 1967; M.B.A., Southern Methodist University, 1976.

Gayle K. Cunningham
B.S., Louisiana State University, 1964.

Karen M. Downer
B.S., The University of Tennessee, Knoxville, 1976; M.S., Clemson University, 1978.

Steve E. Gaines
B.S.E., The University of Tennessee at Chattanooga, 1973; M.S., The University of Tennessee, Knoxville, 1976.

John M. Higgins

Roy E. Johnson Jr.
B.S., 1966, M.S., 1969, Georgia Institute of Technology.

Norbert Koch
B.Ed., Wisconsin State University, 1937; M.S., The University of Tennessee, Knoxville, 1940; Ed.D., University of Missouri, 1951.

Gordon G. Park
B.S., University of Texas, 1970; M.S., University of Texas, 1972.

Tyndall L. Pugh

James W. Rogers Sr.
B.S., University of Chattanooga, 1955.

Alan H. Spring
B.S., 1966, M.S., 1967, Georgia Institute of Technology.

Jack Tarpley (1983)
B.S.E.E., University of Oklahoma, 1965; M.S.E.E., The University of Tennessee, Knoxville, 1972; P.E.

Mary M. Walker
B.S., University of Georgia, 1967.

Computer Science

Richard Baskerville (1984) Assistant Professor
B.S., University of Maryland, 1978; M.S., University of London, 1980.

Alexander Bykat (1984) Professor

B.C. Day (1982) Assistant Professor
B.S., U.S. Naval Academy, 1958; M.P.A., American University, 1968

James Del Valle (1982) Assistant Professor
B.A., University of South Florida, 1964; M.A., 1966, Ph.D., 1974, University of Georgia.

Craig Harston (1985) Assistant Professor
B.S., Brigham Young University, 1970; M.A., University of Texas-El Paso, 1976; Ph.D., Tulane University, 1977.

Elise Lewis (1985) Instructor
B.S., The University of Tennessee at Chattanooga, 1981.

Janet Smith (1985) Assistant Professor
B.S., City University of New York, 1978; M.S., 1980, Ph.D., 1984, University of Georgia.

Jery Smith (1982) Assistant Professor
B.S., University of South Carolina, 1977; M.A., 1978, Ph.D., 1982, University of Georgia.

Clinton Willis Smullen III (1973) Associate Professor

Stephanie A. Smullen (1979) Associate Professor

Jack Thompson (1980) Professor, Department Head
B.S., University of Texas, El Paso, 1961; M.S.M.E., New Mexico State University, 1968; Ph.D., Texas A & M University, 1974.

Adjunct Computer Science

School of Human Services

Criminal Justice

Kathryn Diane Bush (1980) Assistant Professor
B.S., 1975, M.A., 1976, Texas Woman's University.

Robert A. Catale (1980) Assistant Professor
B.S., Manhattan College, 1985; M.A., Hunter College of The City University of New York, 1969.

Stanton P. Fjeld (1980) Professor, Psychology and Criminal Justice
190—Faculty

William H. Hall (1977)  Assistant Professor
B.S., Aurora College, 1972; M.A.P.A., Northern Illinois University, 1974; J.D., Lewis University College of Law, 1978; J.D., Northern Illinois University College of Law, 1981.

Roger D. Thompson (1976)  Associate Professor, Department Head

Kenneth Venters (1974)  Professor, Director, Graduate Program in Criminal justice
B.S., Manhattan College, 1965; M.S., 1966, Ph.D., 1971, Florida State University.

Human Services: Management

Ralph Anderson (1982)  Assistant Professor
B.S., University of Wisconsin, Whitewater, 1969; M.S., 1972, Ph.D., 1976, University of Wisconsin, Milwaukee.

Adolfo Baras (1985)  Visiting Instructor

Kyna Osmus (1982)  Assistant Professor

Phyllis Jan Printz (1986)  Professor, Psychology; Department Head
B.A., University of Kansas City, 1950; M.A., University of Missouri, Kansas City, 1951; Ph.D., The University of Tennessee, Knoxville, 1978.

Adjunct Human Services: Management

Military Science

James D. Bell (1984)  Assistant Professor
Captain, U.S. Army; B.S., The University of Tennessee at Chattanooga, 1977.

James F. Pike (1985)  Assistant Professor
Captain, U.S. Army; B.S., Middle Tennessee State University, 1979.

Military Science

Gordon J. Rodell (1985)  Assistant Professor
Major, U.S. Army; B.S., Murray State University, 1972; M.A., Jacksonville State University, 1981.

Military Science

Ronnie G. Rogers (1985)  Assistant Professor

Military Science

Curtis W. Seiler (1985)  Professor, Department Head
Captain, U.S. Army; B.S., William Carey College, 1974; M.P.A., California Lutheran College, 1981.

Military Science

Richard A. Sherman (1984)  Assistant Professor
Major, Army National Guard of the United States; B.S., Troy State University, 1976.

Social Work

Carol Berz (1983)  Visiting Assistant Professor
B.A., The University of Tennessee at Chattanooga, 1973; M.S.S.W., The University of Tennessee, Nashville, 1975; J.D., YMCA, 1983.

Tommie F. Brown (1971)  UC Foundation Associate Professor
B.A., Dillard University, 1957; M.S.W., Washington University, 1964; D.S.W., Columbia University, 1984.

Social Work

Patricia Walker (1974)  Associate Professor, (On academic leave)
B.S., Butler University, 1960; M.A., Indiana University, 1965.

Dorothy Williams (1977)  Associate Professor, Acting Head
B.A., South Carolina State College, 1967; M.S.W., State University of New York, 1971.

Adjunct Human Services: Management

Adjunct Human Services: Management

Military Science

James D. Bell (1984)  Assistant Professor
Captain, U.S. Army; B.S., The University of Tennessee at Chattanooga, 1977.

Tommie F. Brown (1971)  UC Foundation Associate Professor
B.A., Dillard University, 1957; M.S.W., Washington University, 1964; D.S.W., Columbia University, 1984.

Social Work

Patricia Walker (1974)  Associate Professor, (On academic leave)
B.S., Butler University, 1960; M.A., Indiana University, 1965.

Dorothy Williams (1977)  Associate Professor, Acting Head
B.A., South Carolina State College, 1967; M.S.W., State University of New York, 1971.

Adjunct Home Economics

Martha Attaway (1983)  Associate Professor, Department Head

Marlene C. Bradshaw (1977)  Associate Professor
B.S., Michigan State University, 1957; M.A., University of New Mexico, 1972; Ed.D., The University of Tennessee, Knoxville, 1984.

Adjunct Home Economics

Martha Attaway (1983)  Associate Professor, Department Head

Marlene C. Bradshaw (1977)  Associate Professor
B.S., Michigan State University, 1957; M.A., University of New Mexico, 1972; Ed.D., The University of Tennessee, Knoxville, 1984.

Adjunct Social Work

Jane Cahill (1983)  
Assistant Professor  
B.A., Chestnut Hill College, 1951; Ph.D., St. Mary's School of Notre Dame, 1953; M.S.W., University of Georgia, 1976.

Ron Gates (1982)  

Farrell B. Cooper (1976)  
B.S., Memphis State, 1963; M.S.S.W., The University of Tennessee, Knoxville, 1967.

Carol Holtcamp (1979)  
B.A., The University of Tennessee at Chattanooga, 1975; M.S.S.W., The University of Tennessee, Knoxville, 1980.

Sadye McCain (1985)  
B.A., University of Evansville, 1963; M.S.W., Washington University, 1968.

Ellen Pedmore (1980)  
B.S., Ohio State University, 1965; M.S.S.W., The University of Tennessee, Knoxville, 1977.

Mary K. Radpour (1985)  
B.A., University of Illinois, 1964; M.S.S.W., The University of Tennessee, Knoxville, 1980.

Barbara Young (1985)  
B.A., Agnes Scott College, 1963; M.S.W., Columbia University, 1967.

Special Services

Deborah Elwell Arfken (1980)  
Assistant Professor, Coordinator of Writing Services  

Paul L. Beasley (1979)  
Assistant Professor, Director of Special Services/Upward Bound  

Brenda Cantrell (1985)  
B.S.W., 1975, M.S.W., 1976, University of Alabama.

Jeanne Jolley (1983)  
Instructor, Coordinator of Writing Services  
B.S., 1974, M.D., 1977, Middle Tennessee State University.

Dennis Miller (1982)  
Instructor, Coordinator of Tutorial Services  
B.S., 1975; M.Ed., 1982, The University of Tennessee at Chattanooga.

Booker T. Scruggs (1968)  
Assistant Director, Upward Bound  
B.A., Clark College, 1964; M.A., Atlanta, University, 1966.

School of Nursing

Barbara Andersen (1983)  
Associate Professor  

Barbara Cherry Anderson (1984)  
Assistant Professor  

Martha Butterfield (1974)  
Assistant Professor  
B.S.N., 1957, M.S.N., 1964, Ohio State University.

Gwendolyn Charles (1975)  
Associate Professor  
B.S.N., A&T State University (North Carolina), 1960; M.S.N., Emory University, 1970.

Anne Ch'ien (1985)  
Assistant Professor  

Kay Chitty (1985)  
Assistant Professor  

Jane DeBarge (1985)  
Assistant Professor  

Patricia Haase (1982)  
Professor, School of Nursing Dean  
B.S.N., 1956, M.S.N., 1957, Indiana University; Ph.D., Purdue University, 1972.

Library

W. Michael Bell (1980)  
Assistant Professor, Circulation Services Head  

M. Kathryn Breeden (1983)  
Assistant Professor, Nonbook Services Head  

Robert Neal Coulter (1971)  
Assistant Professor, Reference Librarian  

Mary Bashie Evans (1980)  
Assistant Professor, Cataloging Department Head  

E. Ray Hall (1985)  
Assistant Professor, Library Instruction Coordinator  

Joseph A. Jackson (1973)  
Professor and Dean, Libraries  

D. Alan Keely (1985)  
Instructor, Catalog Librarian  

Susan D. Keely (1984)  
Instructor, Reference Librarian  

Sarla R. Murgai (1969)  
Assistant Professor, Reference Librarian  

Jessie L. Nicol (1977)  
Assistant Professor, Acquisitions Department Head  

William W. Prince (1981)  
Assistant Professor, Reference Services Head  

Marea E. Rankin (1984)  
Instructor, Reference Librarian  

Anne L. Seay (1975)  
Assistant Professor, Catalog Librarian  

Fay L. Verburg (1983)  
Assistant Professor, ILL/Remote Database Services Coordinator  

Randolph L. Whitson (1979)  
Associate Professor, Assistant Dean of Libraries  
Administrative Directory

Office of the Chancellor
Frederick W. Obear (1981) Chancellor
  B.S., University of Lowell, 1956; Ph.D., University of New Hampshire, 1961; L.H.D., University of Lowell, 1985.

Barbara Ann Woford (1975) Director of Affirmative Action

Susan P. Car dwell (1975) Assistant to the Chancellor
  B.A., 1975, University of the South.

Athletics
Harold B. Wilkes (1959) Director
  B.S., University of Chattanooga, 1959.

Greg Ahrens (1985) Assistant Football Coach
  B.S., University of Southern Mississippi, 1980.

Sue Bartlett (1985) Women's Tennis Coach
  B.S., The University of Tennessee at Chattanooga, 1982.

Tommy Bartlett (1979) Tennis Coach
  B.S., The University of Tennessee, Knoxville, 1952.

Bob Brennan (1985) Assistant Athletics Director

William Brown (1985) Administrative Assistant

Joseph D'Alessandris (1986) Assistant Football Coach

Sharon Fanning (1976) Women's Sports Coordinator/Assistant to the Athletics Director
  B.S., The University of Tennessee at Chattanooga, 1975; M.S., The University of Tennessee, Knoxville, 1978.

Bill Cleason (1981) Assistant Basketball Coach

Ken Henry (1985) Assistant Women's Basketball Coach

  B.S., Memphis State University, 1977.

Bobby Johns (1986) Assistant Football Coach

J.C. Kilby (1985) Assistant Basketball Coach
  B.S., Lincoln Memorial University, 1975.

Stanley King (1984) Assistant Football Coach
  B.S., The University of Tennessee at Chattanooga, 1979.

Doris Lail (1983) Women's Golf Coach
  B.S., Sullins College, 1957.

Neil Magnussen (1979) Sports Information Director

William McCarthy (1986) Head Basketball Coach

Bobby McKinnon (1986) Assistant Football Coach
  B.S., Florida State, 1976.

Charles K. Nix (1983) Head Football Coach

George Price (1984) Assistant Basketball Coach

Ethan Reeve (1984) Head Wrestling Coach
  B.S., The University of Tennessee, Knoxville, 1977.

Fred Ellis Riley Jr. (1984) Assistant Football Coach
  B.S., University of North Alabama, 1982.

Michael W. Royster (1978) Equipment Manager

Reed Sanderlin (1977) Men's Golf Coach

Mary Tinkler (1971) Assistant Director

Mike Wood (1984) Head Cross Country Coach

Phyllis Adams (1983) Business Manager
  The University of Tennessee, 1963.

Vice-Chancellor, Administration and Finance
David Larson (1969) Executive Director
  B.S., University of Minnesota, 1967; M.B.A., The University of Tennessee, Knoxville, 1969; C.P.A.

Arena & Fine Arts Center
Mickey Yerger (1981) Executive Director

Kenneth A. Kapelinski (1981) Fine Arts Center Director

David B. Ross (1984) Arena/Arts Center Director
  B.S., The University of Tennessee, Knoxville, 1974; M.S., Ohio University, 1977.

Skip Schreiber (1984) Arena/Arts Center Director
  B.S., University of Florida, 1983.

Audit and Management Services
Linda Hendy (1984) Director

Jamie Zurkiya (1985) Auditor
  B.Sc, University of Jordan, 1975; M.B.A., The University of Tennessee at Chattanooga, 1982.

Budget and Financial Planning
Ralph W. Moser Jr. (1971) Director
  B.S., 1970, Tennessee Technological University.

Elaine Holcombe (1982) Budget Analyst

Ollie E. Murphy (1983) Budget Officer
  B.S., M.S., University of Richmond, 1967.

Personnel
Linda Freeman Sendaula (1975) Director
  B.A., Memphis State University, 1971; M.Ed., The University of Tennessee at Chattanooga, 1982.

Training and Development
Nancy Williams Arthurs (1984) Director
  B.S.W., 1981, M.S., 1984, The University of Tennessee at Chattanooga.

Sandra M. Tudos (1983) Director
Assistant Vice-Chancellor, Facilities Planning & Management
David E. Butler (1984)
B.S., University of Southwestern Louisiana, 1957.

Telecommunications Services
Robert O. Chavous Jr. (1983) Director
B.S., The University of Tennessee, Knoxville, 1982.

Facilities Planning
C. Michael Hyder (1981) Coordinator
B.A., University of Kentucky, 1974.

Physical Plant
Bobby Joe Johnson (1971) Maintenance & Repair Superintendent
Joseph F. Milner Jr. (1978) Building Services Superintendent
B.S., The University of Tennessee at Chattanooga, 1976.
Charles A. Pyron (1985) Campus Services Superintendent
Jim Weddington (1970) Project Coordinator

Mary Knuff (1984)  
Coordinator, Conferences and Non-Credit Programs  
B.S., The University of Tennessee at Chattanooga, 1982.
Endowed Funds

Through the years many persons have made generous gifts to establish endowed funds for various purposes. The University would like to recognize and thank them once again by publishing their names here.

Scholarships

Julius Ochs Adler Scholarship: Established in July 1956 by an anonymous donor in memory of the distinguished citizen who was associated with Adolph S. Ochs in the management of The Chattanooga Times.

Marvin L. Anthony Scholarship: Established in 1965 by Chicago banker, Marvin L. Anthony, 1926 chemistry graduate and member of Phi Delta Sigma, for students of business administration or chemistry.

Steve Baras Memorial Scholarship Fund: Established in 1982 by the family of Steve Baras, a graduate of UTC and a past member of the varsity tennis team, for students who are members of the tennis team or majoring in business.

James William (Bill) Barker Scholarship: Established in 1960 by friends and fraternity brothers of the popular young Pi Kappa Alpha who died four years after his graduation in 1949.

Creed F. Bates Scholarship: Established in 1976 by more than 300 individual gifts from friends, former students, and citizens of the Chattanooga community in honor of Creed Fletcher Bates, student, teacher, principal, University trustee, and community leader, to be awarded annually to a qualified and deserving student from the Chattanooga area.

M.W. Brabham Scholarship: Established in 1963 by the Brabham-Martin Bible Class of the Centenary Methodist Church in memory of its esteemed member, the longtime executive secretary of the Chattanooga Community Chest.

Dr. Jeffrey L. Brown Memorial Scholarship: Established in 1981 by friends and family of Dr. Jeffrey L. Brown who at the time of his death was associate professor of sociology and anthropology at UTC and founder and director of the University's Institute of Archaeology. The scholarship award is based on merit and is given to a student who will further advance the academic ideals of conservation and preservation of man's historical past espoused by Dr. Brown.
Margaret Whiteside Buhrman Scholarship: Established in 1978 by friends in honor and recognition of her 46 years of distinguished service to the students, faculty, and staff of the University, for deserving students wishing to attend UTC with preference for students majoring in English.

Queener Carter Memorial Scholarship: Established in 1979 by Professor Emeritus Roland D. Carter and his children, Roland D. Carter Jr. and Yvonne Carter Gardenhire, in memory of Gillie Queener Carter who taught in the Chattanooga public school system for many years, to be awarded to a student majoring in special education.

Morton Neal Center Athletic Scholarship: Established in 1978 by Mr. Center, business and civic leader, to be awarded to a qualified and deserving student athlete.

Walter W. Colby Memorial Scholarships: Established in 1982 by Benjamin W. Colby, a University of Chattanooga alumnus, in memory of his father Walter W. Colby, an early resident of Walden's Ridge (1878). Needy and worthy students from the Hamilton and Sequatchie county area of Walden's Ridge are given preference for the scholarships.

Harry B. Deuberry Physics Scholarship: Established in 1985 by Mr. Deuberry, president of the class of 1930, to encourage outstanding physics majors interested in assisting faculty with special projects.

Thomas O. Duff Scholarship: Established in 1956 by Mr. Duff, business and civic leader, patron and trustee of the University, augmented at his death by memorial gifts from family and friends, with preference to be given to sons and daughters of licensed Chattanooga area pharmacists who desire to make pharmacy a career.

John W. Evans Scholarship: Established in 1966 by the will of John W. Evans, retired Chattanooga real estate dealer, who bequeathed his entire estate to the University for the benefit of "needy and deserving students."

Lillian B. Feinstein Art Scholarship: Established in 1980 in honor of Lillian B. Feinstein, sculptor, patron of the arts, and longtime supporter of the Hunter Museum and the University Art Department. The scholarship is awarded annually to a student majoring in art.

Fincannon Scholarship Endowment Fund: Established in 1984 by Mr. Al Fincannon. The scholarship is awarded upon the recommendation of the UTC Scholarship Selection Committee to a student who demonstrates a desire to secure a college education that would enhance his or her career.

John E. and Claudia F. Gilbreath Scholarship in Memory of Katherine Frazier: Established in 1971 by Mrs. Gilbreath for deserving male students in memory of her husband and her sister, two of the founders of the Chattanooga Federal Savings and Loan Association, both prominent business and civic leaders who died in 1969. Mr. and Mrs. Gilbreath graduated from The University of Tennessee, Knoxville.

Sharon Gilley Grant Memorial Scholarship: Established in 1984 by Claude and Mildred Gilley in memory of their daughter, an honor’s graduate and friend of UTC. This scholarship is awarded on a competitive basis in either opera or voice.

John L. Hutcheson Jr. Memorial Scholarship Fund: Established in 1983 by the Rossville Memorial Center and W. Frank Hutcheson in memory of John L. Hutcheson Jr., longtime member of the board of the University of Chattanooga and a prominent citizen of North Georgia. The scholarship is awarded to students who demonstrate successful academic performance. Preference for scholarship is given to students from specific North Georgia counties and Tiftonia.

John Earlon Kerr Scholarship: Established in 1959 with a bequest from Mrs. Lillian Webb Kerr, longtime East Lake Grammar School teacher, in memory of her son, a student at Vanderbilt University at the time of his death in 1915.

Norbert Koch Scholarship: Established in 1979 by gifts from former students, colleagues, and citizens of the Chattanooga community in honor of Dr. Norbert Koch, professor of engineering, on the occasion of his retirement after 32 years of dedicated service to the University to be awarded annually to a qualified and deserving engineering student.

David McKendrie Key Scholarship: Established in 1955 by Mrs. Sarah Key Patten in memory of her father, Postmaster General of the United States, U.S. Senator, Federal Judge, and one of the founders of the University.

Joyce Litchford Scholarships: Established in 1976 by Dr. R. Gary Litchford, a member of the biology faculty, in memory of his wife, for scholarships to a senior pre-medical student and to a junior or senior member of the wrestling team.

Mr. and Mrs. Charles W. Loftin Scholarships: Established in 1983 by Miss Amy Loftin in memory of her parents, Mr. and Mrs. Charles W. Loftin. The scholarships are awarded to outstanding students from the Department of Theatre and Speech.

Winston L. Massey Scholarship: Established in 1973 by the University of Chattanooga Foundation in honor of Mr. Massey, Guerry professor of mathematics, on the occasion of his retirement after 40 years of service to his Alma Mater, for an outstanding upperclassman majoring in mathematics.

T.R. McAfee Memorial Scholarship: Established in 1979 and enhanced in 1980 by friends who hosted a T.R. McAfee Golf Tournament to raise funds for an endowed golf scholarship in memory of T.R. McAfee Jr., former University student and member of the varsity golf team.

Burkett Miller Scholarships: Established in 1954 by a generous gift from Mr. Miller, leading Chattanooga attorney and philanthropist, to aid needy and worthy students.

Scrappy Moore Memorial Scholarship: Established in 1971 by memorial gifts from the family and friends of longtime, distinguished head football coach and athletic director A.C. "Scrappy" Moore Sr., who served
the University from 1926-1971. Scholarship preference is given to a varsity football player who exemplifies the ideals of leadership, scholarship, and service.

*Charles A. Noone Scholarship:* Established in 1981 under the terms of the will of Dr. Reisman, well-known Chattanooga physician and longtime supporter of the University, and augmented at his death by a memorial gift from his family. The scholarship is to be awarded annually to an outstanding nursing student.

*Calvin U. Smith Jr.—C.H. Miller Smith Scholarships:* Established in 1985 by Mr. and Mrs. George Blackwell Smith in honor of their nephew, Calvin U. Smith Jr. (1940-1963), and of their son, C.H. Miller Smith (1921-1944), both gallant young Chattanoogans who died in the armed forces of their country.

*Dr. Charles Roberts Thomas Scholarships:* Established under terms of the will of Dr. Thomas, well-loved Chattanooga physician who died in 1968, to assist needy students in premedicine.

*Thomasson Premedical Scholarship:* Established in 1979 by Mr. and Mrs. Eugene M. Thomasson to be awarded to a qualified and deserving undergraduate student who is pursuing premedical studies.

*Vanzant B. Warrenfels Scholarship:* Established in 1976 by Mr. and Mrs. W.O. Cullen of Oxford, Ohio, in honor of Mrs. Cullen's father, Dr. Warrenfels, to be awarded to a student participating in the University Scholars program.

## Professorships

*Burkett Miller Chair of Excellence in Management and Technology:* A cross-disciplinary Chair of Excellence that bridges the resources between the Schools of Business and Engineering at UTC. Funded by the Tonya Memorial Foundation of Chattanooga, the distinguished holder of this chair will assist the University and the Chattanooga community in understanding the importance of technology; identifying and nurturing the development of technology; and assisting with the transfer of that technology to the marketplace in ways which foster economic development.

*Chattanooga Manufacturers' Association Professorship in Engineering:* Established in 1980 to provide support for the School of Engineering that will enable the University to reward a member of the engineering faculty for excellence in teaching, public service, and research.

*Joseph F. Decosimo Professorship in Accounting:* Established in 1977 by Mr. and Mrs. Joseph F. Decosimo, civic and business leaders long associated with The University of Tennessee at Chattanooga, to provide faculty support for the University's program in accounting.

*Alexander and Charlotte Patten Guerry Professorships:* Established by anonymous gifts in 1959 and 1961 in memory of the University's esteemed seventh president and in honor of his dedicated wife, to enable a group of outstanding professors to bear a revered name and to receive salary supplements.

*Henry Hart Professorship in Business Administration:* Established in 1978 by R. Henry Hart, a civic and business leader, to provide faculty support for the University's School of Business Administration.

*Alan S. Lorberbaum Professor in Marketing:* Established in 1978 by Alan S. Lorberbaum, a business leader and carpet executive of Dalton, Georgia, to provide faculty support for the marketing program in the School of Business Administration.

*Adolph S. Ochs Chair of Government:* Established in 1925 by Mr. Ochs, distinguished owner and publisher of The Chattanooga Times and The New York Times, longtime friend of the University, father and grandfather of trustees.

*Scott L Probasco Jr. Chair of Free Enterprise:* Established in 1976 by Mr. Burkett Miller, a leading Chattanooga attorney and philanthropist, in honor of a longtime friend, well-respected Chattanooga citizen, and trustee
198—Endowed Funds

of the UC Foundation Incorporated, for a distinguished professorship relating to the free enterprise system.

Provident Life and Accident Insurance Company Chair of Excellence in Applied Mathematics: This Chair of Excellence, funded by joint gifts from Provident and the University of Chattanooga Foundation, will bring to the University and the community a deep new sense of the significance, utility, and relevance of mathematics and its applications. The holder of this chair will function not only as a scholar, teacher, and researcher, but also as a valuable resource and vigorous advocate for mathematics in the schools and community-at-large. The existence of this chair will help the Department of Mathematics at UTC strengthen its long-standing commitment to high quality undergraduate mathematics education. Students pursuing more advance topics in mathematics will receive the major benefits; however, every student at the University stands to benefit since all must take at least one course in mathematics before graduation.

John Stagmaier Chair of Economics and Business Administration: Established in 1956 by the Tennessee Paper Mills in memory of its founder, respected and admired citizen of Chattanooga and University trustee from 1932 until his death in 1943.

Marvin Edward White Professor in Business Administration: Established in 1978 by Selox Incorporated to provide faculty support for the University's program in business administration and to honor Mr. White, the company's founder.

Supported Professorships

Alumni Distinguished Service Professorships are awarded to outstanding faculty members of each of the four campuses of The University of Tennessee. Each faculty member, chosen on the basis of University and community service, will continue to receive the stipend as long as he or she remains at the University. These awards are made by the University of Tennessee National Alumni Association.

The Distinguished Professor of Religious Studies is supported by the UC Foundation. This professorship was established to insure the continuation of the ties with the University of Chattanooga’s Methodist origin and heritage.

UC Foundation Professorships were established in 1976 to recognize outstanding younger faculty and to provide an incentive for their remaining at UTC.

Student Loan Funds

William E. and Mary F. Ansbach Memorial Student Loan Fund: Established in 1968 by Raymond J. Ansbach, Chattanooga merchant, in memory of his parents.

Dr. H. Eugene Hames Student Loan Fund: Established in 1969 with a generous gift from the Hartsell, Alabama, physician who took his premedicine work at UC from 1954-1956 and his M.D. from UT in 1960.

Lewis B. Headrick Memorial Student Loan Fund: Established in 1966 by family, friends, and colleagues of Dr. Headrick, class of 1926, research physicist with the Radio Corporation of America for 34 years.

Ethel Chapin Morgan Student Loan Fund: Established by a bequest from the UC alumna who took her B.S. degree in 1925, taught at several colleges, and lived in Lorain, Ohio, at the time of her death at 86on October 10, 1973, for students in chemistry or history.

Frank L. Underwood Memorial Student Loan Fund: Established in 1967 with a bequest from Mrs. Underwood in memory of her husband, vice-president of Chattanooga's Hamilton National Bank and UC trustee from 1920 until his death in 1942.

Additional Funds

Dr. North Callahan Honors Essay Prize: Established in 1984 by Professor Emeritus of History, New York University, author, and UTC Distinguished Alumni. Prize to be awarded to a UTC student for the best honors essay, as determined by an honors committee, based on UTC library research.

Morrow Chamberlain Memorial Library Fund: Established in 1971 by a bequest from Mrs. Chamberlain in memory of her husband, Chattanooga business and civic leader, chairman of the UC Board of Trustees from 1932 to 1958, member from 1919 until his death in 1959.

Paul W. Curtis Jr. Awards: Endowed in 1948 by Mr. and Mrs. Paul W. Curtis in memory of their son, class of 1933, who was killed in action in World War II, for outstanding students in engineering.

Irvine W. Grote Fund for the Department of Chemistry: Established in 1976 by a bequest from the estate of Dr. Irvine W. Grote, Guerry professor of chemistry, to be used solely for the benefit of the chemistry department in such manner and amounts as the administrative department head and the chancellor of the University may in their discretion from time to time determine.

Hartung Fund for Nursing Education: Established in 1969 by Dr. and Mrs. Carl A. Hartung, UC graduates of 1929 and 1931 respectively, with income to be expended in support of the nursing program.

Mary B. Jackson Award Endowment: Established in 1977, monetary endowment established in 1984, to honor outstanding senior nursing student selected by peers.

John B. Haskins Jr. Memorial Laboratory: Science laboratory equipped and its upkeep endowed in 1948 by gifts from Dr. John B. Haskins in memory of his son, a UC student who died in 1944 after a long illness.
Hinds Memorial Book Fund: Established in 1921 by Mrs. Kate Hinds Steele and Mrs. Bashie Martin in memory of their father, J.I.D. Hinds, for the purchase of chemistry books.

Martha Chase and Andrew David Holt Library Endowment Fund: Established in 1970 by the Hamilton County chapter of The University of Tennessee National Alumni Association and other friends in honor of the retiring UT president and his wife, for the purchase of books for the UTC Library.

Keese Lecture Series: Established in 1962, endowed in 1964 by Will S. Keese Jr. in memory of his mother, Lucy Beall Keese, who died in 1959, and in honor of his father, the late William S. Keese, longtime directors of the Bonny Oaks School, to bring to the campus each year an outstanding speaker who is an authority in some branch of the humanities.

Captain Daphne Marjorie Painter Memorial Art Education Endowment Fund: Endowed in 1984 by Mrs. Marjorie Stanford Painter in memory of her daughter to fund classical art instruction in the UTC Childrens Learning Center.

Seth C Smith Management Award: Established in 1975 by the Society for the Advancement of Management in memory of its distinguished business leader, awarded annually to an outstanding student graduating with a major in management.

Carl A. Swafford Jr. Endowment Fund: Endowed in 1984 by Mr. Carl A. Swafford Sr. in honor of his son for the purchase of equipment and supplies for the Departments of Biology and Chemistry.

Terrell Louise Tatum Memorial Fund: Established in 1968 by the University in memory of its Guerry professor of Spanish who served her Alma Mater for 43 years, for the purchase of books and teaching materials for the department of modern languages.

Terrell Louise Tatum Spanish Award: Endowed in 1964 by an anonymous donor to honor UC's Guerry professor of Spanish by awarding a yearly prize bearing her name to the outstanding senior majoring in Spanish.

Edgar B. Tolson Memorial Book Fund: Established in 1942 with the residue of Mr. Tolson's estate, authorized by Wilfred O. Stout Sr. of Minneapolis, executor, for the purchase of books of history and philosophy.

William H. Wheeler Center for Odor Research: The William H. Wheeler Center for Odor Research is across-disciplinary laboratory facility established by an estate gift from the William H. Wheeler estate. The main thrust of this center will be to study the objective relationships between various substances and their effect upon olfaction. It will draw upon the expertise which exists within the cooperating disciplines of chemistry, biology, physics, and psychology and provide scholarship opportunities for students to be involved in basis and applied research.
