

Course Title: PSY 3120 – Sensation & Perception

Proposed Change: This proposal is to change the wording of prerequisites in the catalog description for this upper-level course.

Current Catalog Description:

PSY 3120 - Sensation and Perception
3 Credit Hours

Study of sensory and perceptual processes; examination of the sense organs and related neurophysiological mechanisms, and the necessary stimulus conditions for particular perceptual phenomena. Laboratory. Spring semester. Prerequisite: PSY 1010, PSY 2010 or equivalent, PSY 2020, and PSY 2040 or department head approval.

Proposed Catalog Description:

PSY 3120 - Sensation and Perception
(3) Credit Hours

Study of sensory and perceptual processes; examination of the sense organs and related neurophysiological mechanisms, and the necessary stimulus conditions for particular perceptual phenomena. Prerequisite: PSY 2020 or department head approval.

Rationale: This wording simplifies the prerequisites as PSY 2020 already requires students to have taken PSY 1010, PSY 2010 and PSY 2040.

Impact on Other Programs/Departments: None are anticipated.
