ASSIGNMENT 1

Walter manes states there are two schools of thought as to why computer ethics is unique and should be its own study. He goes on to explain there are six levels of justification for the two views. Write a two to three page paper stating which of these views resonate with you and why or if you disagree with both schools of thought why. This paper should make clear you position, explain that position, and make an argument for your position.

Attach your paper to UTC Online using the submit function. I do not accept emailed assignments.
