## Certificate of Immunization

Name: _____ <div style="display: flex; justify-content: space-around; font-size: small;"> <span>(Last)</span> <span>(First)</span> <span>(MI)</span> </div>	UTC ID _____
Date of Birth (M/D/Y): _____ Primary Telephone: (____) _____ - _____	
Plan to live in on-campus housing? (circle one): <b>YES</b> <b>NO</b>	

**INSTRUCTIONS:** Immunization information must be completed, uploaded, submitted, and approved in order to register for classes at The University of Tennessee at Chattanooga. The health care provider's signature and office stamp must be noted in the appropriate space or a copy of medical records with evidence of immunizations must be provided. Medical exemptions documenting contraindication of vaccinations or an alternate proof of immunity (i.e. titers) may be attached.

**How to Submit:** Immunization forms must be uploaded to the Mediat Patient Portal. Dates must be correctly entered into the portal as well in order for them to be reviewed and approved. Recognized exemptions from immunizations include being enrolled exclusively online or in a dual-enrollment program, medical contraindications, and religious objections. If you need more information or any assistance, please go to <https://www.utc.edu/university-health-services/immunizations.php>

### IMMUNIZATION REQUIREMENTS

Vaccine	Notations	Date of Dose	Health Care Provider Stamp
<b>MMR</b> ® (2 Doses) (Measles, Mumps, Rubella)	<b>REQUIRED:</b> Students born on or after January 1, 1957 must provide proof of immunization with two (2) doses of MMR vaccine at least 28 days apart or serology showing immunity to MMR.	<b>Dose 1</b> _____ <b>Dose 2</b> _____	
<b>VARICELLA</b> (2 Doses or Proof of Disease) (Varivax®) (Chicken Pox)	<b>REQUIRED:</b> All students born on or after January 1, 1980 provide proof of immunization with two doses of Varicella vaccine at least 28 days apart, serology showing immunity to Varicella or documentation from a medical facility verifying a previous diagnosis with the illness or a titer showing immunity (supporting documentation must be uploaded).	<b>Dose 1</b> _____ <b>Dose 2</b> _____ <b>or</b> <b>Date of Illness:</b> _____ <b>or</b> <b>Titer Result:</b> _____	
<b>Meningitis ACWY</b> (Menactra® or Menveo®)  <i>Off Campus Housing Waiver – please see page 2 of your immunization form</i>	<b>REQUIRED:</b> New incoming students who are younger than 22 years of age and who will live in campus housing must have documentation of a dose of quadrivalent conjugate vaccine (MCV4 protects against strains: A, C, Y, W135) at greater than or equal to 16 years of age. Any student not living on campus who has not received a dose of quadrivalent conjugate vaccine within the past five years may choose to be vaccinated to reduce the risk of meningococcal disease. Students who are living off-campus must sign the <a href="#">Meningitis Off-Campus Housing Waiver</a> .	<b>Dose</b> _____	

## IMMUNIZATION RECOMMENDATIONS

<b>Tetanus or Tdap</b> <i>(Adacel® or Boostrix®)</i>	<b>RECOMMENDED</b> within last 10 years. Tetanus vaccine can help prevent tetanus disease, commonly known as "lockjaw", a serious disease that causes painful tightening of the muscles, usually all over the body, especially the jaw. This vaccine is recommended, not required. Tdap also contains protection from Pertussis (whooping cough).	<input type="checkbox"/> <b>Tetanus</b> <input type="checkbox"/> <b>Tdap</b>  <b>Dose</b> _____	
<b>Hepatitis B ®</b> (Series of 3 doses)	<b>RECOMMENDED:</b> Students may upload documentation and input dates of Hepatitis B dosing. For information on Hepatitis B, please refer to the Centers for Disease Control and Prevention website. Proof of immunization with a three-dose regimen and a (+) antibody titer is required for all Health Science students.	<b>Dose 1</b> _____  <b>Dose 2</b> _____  <b>Dose 3</b> _____	
<b>COVID-19 (Circle One)</b>  <b>PFIZER</b>  <b>MODERNA</b>  <b>JANSSEN J&amp;J</b>  <b>OTHER:</b> _____	<b>RECOMMENDED:</b> Students may upload documentation and input dates of COVID dosing. For information on COVID, please refer to the Centers for Disease Control and Prevention website.	<b>Dose 1</b> _____  <b>Dose 2</b> _____	
<b>Hepatitis A</b>	<b>RECOMMENDED:</b> Students may upload documentation and input dates of Hepatitis A dosing. For information on Hepatitis A, please refer to the Centers for Disease Control and Prevention website.	<b>Dose 1</b> _____  <b>Dose 2</b> _____	
<b>Meningococcal Serogroup B</b> <i>(Bexsero® or Trumemba®)</i>	<b>RECOMMENDED:</b> Students may upload documentation and input dates of Meningitis B dosing. For information on Meningitis B, please refer to the Centers for Disease Control and Prevention website.	<b>Dose 1</b> _____  <b>Dose 2</b> _____	
<b>Human Papillomavirus (HPV)</b>	<b>RECOMMENDED:</b> Students may upload documentation and input dates of HPV dosing. For information on HPV, please refer to the Centers for Disease Control and Prevention website.	<b>Dose 1</b> _____  <b>Dose 2</b> _____  <b>Dose 3</b> _____	

## MENINGITIS OFF- CAMPUS HOUSING WAIVER

Student First Name: \_\_\_\_\_ Student Last Name: \_\_\_\_\_

UTC ID: \_\_\_\_\_

*Please note: All signatures on this waiver need to be written signatures and not typed.*

### Meningococcal Disease

I understand that under Tennessee Law, new incoming students, who are less than 22 years of age, who will be residing in on campus housing, must have documentation of a dose of conjugate vaccine at greater than or equal to 16 years of age. I understand that I may waive this requirement as a student who is not a resident of on campus housing. I have read and understand the following information about meningococcal disease: Meningococcal disease is a serious bacterial illness. It is a leading cause of bacterial meningitis in children 2 through 18 years old in the United States. Meningitis is an infection of the covering of the brain and the spinal cord. Meningococcal disease also causes blood infections. About 1,000 – 1,200 people get meningococcal disease each year in the U.S. Even when they are treated with antibiotics, 10-15% of these people die. Of those who live, another 11%-19% lose their arms or legs, have problems with their nervous systems, become deaf, or suffer seizures or strokes. Anyone can get meningococcal disease, but it is most common in infants less than one year of age and people 16-21 years. People with certain medical conditions, such as lack of a spleen, have an increased risk of getting meningococcal disease. College freshmen living in dorms are also at increased risk. Meningococcal infections can be treated with drugs such as penicillin. Still, many people who get the disease die from it, and many others are affected for life.

☐ I am not a resident of on-campus housing.

Signature of Student: \_\_\_\_\_ Date: \_\_\_\_\_

If the student is under age 18, a parent/guardian must also sign the waiver.
