

## Job Description

We are currently looking for a graduate student with lab experience in chemical engineering, chemistry, or related topics.

Knowledge of control systems and coding is preferred but will train.

The Graduate Assistant (GA) will manage the Chemical Engineering teaching labs.

- Create maintenance schedules.
- Clean up and move items out that do not belong.
- Create a cleaning schedule or lists for students before and after their class, creating a standard of cleanliness throughout the year.
- Ordering lab supplies and other items that will help in its organization.

You will directly report to our Chemical Engineering Lab Manager. Currently, it is Dr. Bradley Harris and starting in the FA23 semester it will be Dr. Rahul Bhosale.

### Basic Requirements:

- Wet Lab Experience
- Detail oriented, organized.
- Self-motivated & eager to learn more.
- Exemplary Time Management skills

**Hours:** 20 hours/week

**Hourly Rate:** \$20/hour

**Time Frame:** **Now until FA23 semester**

Starting in the FA23 semester, this will be an assistantship, 20 hours a week and 9+ tuition waiver, \$4500 for the semester.
